MEATS.

(L. Miller & Co.)

The exhibit of meats and mutton, at our Butcher's Stands are anything but first rate in quality; of course there are exceptions. At Mr. Miller's stall, in California Market, we observed some excellent South Down Mutton; also, Durham Beef, which had been fattened on root crops, carrying out the old proverb,

"Rutabaga, carrots and beets,
Improve the character of meats;
They make good beef, and quicker too,
Than any other feed can do.

Farmers and Graziers, wake up and plant out your crops of Mangold and *Turnips*, etc., do it now.

Wholsale prices for meats are declining a little.

POULTRY AND GAME.

"After a storm, comes a calm," so it is with the high prices in our Poultry Market, as is usually the case when high figures are to be seen in our columns, for Chickens, Turkies, etc. Our farming friends, rush in their stock consequently a serious fall. There is too much of the spirit of dealing in Mining Stock with our Ranchmen. Farming and Brokering are two opposites. The former is a positive uncertainty—the latter, a sure and certain gain to all, (if judiciously carried out) our country friends would find it much to their advantage to send their regular supply weekly, or tri-weekly, as circumstances allow, and not rush all their stock into the Market because prices are high—a regular, steady system in Farming is the most sure way to success. When prices are unusually high, Smith's Jones', Brown's and Robinson's rush in with their stock and the result is a serious fall.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southhampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates as given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

March 10th—GOLDEN CITY, Capt W. F. Lapidge, connecting with ALASKA, Capt. Gray.

March 18th—MONTANA, Capt. E. S. Farnsworth, connecting with RISING STAR, Capt. Connor.

March 30—COLORADO, Capt. W. H. Parker, connecting with HENRY CHAUNCEY, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se1 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets

v17-13 J. WHITNEY, JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, UNtill further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9.50 A. M.; Reno at 4.20 P. M.; Wardsworth at 6.30 P. M. Winnemucca at 3.30 A. M.; Argenta at 8.50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 1905 P. M. Reno at 2.10 A. M. Colfax at 9.50 a. m. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6.30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada,

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermit, Silver City, Owyhee, and all points n Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages or White Pine, and Overland Stages for Salt Lake City and the Atlantic States.

C. CROCKER,
General Superintendent

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,
(Of the firm of Hucks & Lambert.)
No. 708 Lombard street, North Beach.

SORE BACKS ON HORSES.—A correspondent in the *Farmer's Gazette*, writes:—I send you an excellent remedy for a sore on a horse. Beat the yolk of an egg with a teaspoonful of spirits of turpentine and athe pply to sore—cover with a soft cloth. I have tried it.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLane's Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge, now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements that prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure u are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Heplatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINTS and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It has been our sincere wish that these Pills should be fairly and for tested, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the proper digestion of the Stomach, Bowels, Brain, and the whole Nervous System, should be vast and vital importance to the health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has so close connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal nature or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Bowels, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful notion of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, and complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every one. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow this. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are inferior to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked. Even in cases of great violence, if a potent and rompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an annular circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or frothy tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a gnawing sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nauses and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently streaked with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough; cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual, providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water in the morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten years, a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

From our Special Correspondent.

(*Continued from Last Week.*)

PARIS, January, 29, 1669.

SHEPHERDS' SCHOOLS.

No country can derive more benefit from sheep farming than France; knowing this, it is not surprising that the Emperor has decided upon opening a training school for shepherds. For the last thirty years the number of sheep reared in the country has been on the decline, the cause being, the incapacity of the shepherds. The new school will be founded upon one of the State farms in the north of France, famous for its Disbley rams, and Disbley merinos. It will be open to all France; the pupils will serve an apprenticeship of two years, receiving a certificate at the end of this period, and 300 frc., the equivalent of their wages. They will attend lectures on all that belongs to the Ovine race, and will be instructed in reading, writing, and arithmetic. The Director will be M. Daubenton, the first authority on sheep in France. Other schools will be established in other parts of the Empire.

PREPARATION OF MANURES.

In Paris there are no dust-bins—the kitchen refuse is thrown into the street after sunset, and removed in the morning by the contractor's carts as manure. The night-soil is collected according to three systems—in a reservoir, which is pumped out periodically, and conveyed in large barrels to the suburbs, where it is made into *poudrette*, and sold for 5 frc. per 22 gallons, or sold in its liquid state. It is also collected in iron cylinders or small strong barrels hermetically closed with plaster of Paris. The same companies prepare sulphate of ammonia, and animal black from the carcasses of deceased animals, sell dried blood, horn clippings, etc. Well, a company from Brussels is in course of formation to buy up all these systems and completely revolutionize the water-closet system of the city—two thousand tuns of fecal matters being daily removed from Paris.

LOAN'S TO TENANTS—STOCK, ETC.

Proprietors in France, can at any time receive by means of a society in Paris, loans on two-thirds of the value of their property, at three and four per cent, repayable over a long series of years. In the centre of the Empire, as well as other parts, where the land is poor, the proprietor furnishes the dead stock for a farm, and divides the profits with his tenant. This is called the *Metayer* system—somewhat analogous to what exists, as we shall see, in Russia, but in every other way reprehensible. The tenant has no self-interest, no independence. It is an ingenious plan of "grinding" on both sides.

BEET ROOT SUGAR.

Since Napoleon's celebrated decrees at Berlin in 1802, enforcing and encouraging its cultivation, so as to be independent of the English Colonies, the manufacture of beet root sugar and brandy, has made rapid strides in the western and north-western districts; upward of 200,000 tuns of sugar alone are annually manufactured. Well, the Society of Parde-Calais, will hold a show of beet-root on the 9th of October next, to make known the best kind of root, to cultivate, the best manures, and the most suitable soils. Specimens of the worst, the average, and the best roots are to be presented, with a careful history of the soil, the the chemical manures employed, and the saccharine richness of the root.

WORLD'S FAIR IN RUSSIA IN 1870.

Russia it is rumored, will have an agricultural Exhibition next year, open to all the world. Implements, beasts, etc. sent for show, will be bought in by the government at a price fixed on beforehand. All expenses of transit will be paid in advance. Odessa has recently had a trial of steam plows, (English) and mowing machines, (American,) with the most happy results. Southern Russia, and its rich wheat lands cry aloud for cheap labor, where the population already sparse, is reduced in its effects, by the demands of the Greek Church, which on the average, admits not more than twenty workable days per month. In France there are no vacations—from two o'clock on Sunday, is the only holiday almost.

MORMON EMIGRATION—SILK CULTURE, ETC.

The Mormons have been making great efforts to induce emigration from the wine growing districts of France, and with success, and California is now doing the same in the silk growing districts. America is going in very heavily for wine and silk; California silk is at present being exhibited in Paris of an excellent quality, and cocoons are supplied to France from California, (as Italy imports from Japan) and has proved the best remedy for the "disease." What will France do, when the Cape and Australia, really bestir themselves?

Professor Cantoni of Turin, is engaged in a series of interesting experiments, of which I shall duly inform you, of the relation between the temperature of the soil and the air; between the roots of a plant and its stem, especially as takes place during the process of irrigation. But these, and other points I reserve for "continuation in our next."

VINEYARDS OF FRANCE—CEREALS, ETC.

In 1788, the area of the vineyards in France was 2,325,411 acres; at present, there are 5,682,353. The mean average yield of wine is 308 gallons per acre, valued at one franc the gallon in the Bordeaux district; the yield is about one-third more in monetary value, in Burgundy, and double, in Champagne. The mean average produce of wheat is, per acre 19 bushels; marlin 22; rye 18; barley 24; maize 19; buckwheat 19; and oats 30. Plowmen receive 500 francs a year wages, with board, and laborers from one to two francs per day.

HORTICULTURE AND FLORICULTURE.

Horticulture has been truthfully described as the laboratory of the fields. In France, the garden does much for the farm in the way of experiment, in the testing of new varieties of farm plants. Much preparation is being made by French horticulturists, for the forthcoming Horticultural Show at St. Petersburg in May, on the fifteenth of that month according to the Russian calendar. The Czar does everything on a grand scale, and the prizes to be awarded will be valuable. Every cheap facility will be afforded, to exhibitors from all parts of the world, and the "exhibits" will be bought in. Hamburg opens its International Horticultural Show in September, and promises to be the first of its kind. A good practice is growing up in France, that of wealthy proprietors delivering gratuitous lectures on horticulture, and its principal branches. Petroleum is largely employed to heat hot-house boilers, as well as coal gas, etc., and *portable* boilers, of an economical construction are generally preferred. A beautiful prelargonium has been brought out, called Madame Ronher, wife of the First Minister of the Crown, to whom it has been dedicated. The *hydrangea otaksa* is much sought after; it is very ornamental, pottable, and easily propagated. Plants raised in the open air have a brighter shade than those raised in a hot-house. The name Otaksa, is taken from the daughter of the gentleman who introduced it from Japan. The peach trees in the vacinity of Paris, were very sickly during the past season. Microscopical examinations showed that the malady sprung from fungi. It is common in France for amateurs to make an exchange of roots and seeds; addresses of such shall be furnished from time to time. The rose and camelia "crops" never were so plentiful in Paris, and the violets are as abundant and as welcome as the flowers of May.

C. F.

GONE TO BED.

An eminently good man thus wrote on hearing of the death of a child:—"Sweet thing, and is he so quickly laid to sleep? Happy he! Though we shall have no more the pleasure of his lisping and laughing, he shall have no more the pain of crying, nor of being sick, nor of dying. Tell my dear sister, that she is now so much more akin to the world; and this will be quickly passed to us all. John is but gone an hour or two earlier to bed, as children used to do, and we are very soon to follow. And the more we put off the love of this present world, and all things superfluous, beforehand, we shall have the less to do when we lie down."

THE PREMIUM CLIPPER MOWER.

OUR ILLUSTRATION.

We give our readers this week the CLIPPER MOWER as advertised by Messrs. D N. Hawley & Co., of our city.

This Illustration makes some half a dozen various Mowers we have illustrated for the benefit of our Farmers, and we hope they will use careful examinations of all Implements always, and never spare the cost when the BEST IMPLEMENTS are to be had.

It is not for us to decide for the Farmer what Implements he shall use; he must be his own best judge. *We* endeavor to lay before them all the very best Implements known, and they can decide.

We give above the Clipper Mower of Messrs. D. N. Hawley & Co. who are among the oldest Agricultural Houses on this Coast—now nearly *twenty years* as Business men, and always commanding the respect and confidence of their patrons. They have as will be seen by their new advertisement received a large invoice of Implements to which hey ask the special attention of the Farmers of our State.

THE SIAMESE TWINS.—A PROTEST.

[We copy the following excellent article upon the unfortunate *Siamese Twins* from the London *Telegraph*, and we are glad a wise and better action will be had everywhere in regard to the outrageous custom which has so long prevailed of making an *Exhibition* of every poor deformed *Human Creature*, or *monstrous animal*, and it is to be regretted too, that newspapers that claim to be respectable, will so often publish elaborate descriptions of these deformitiver, enough to make the delicate and sensitive shudder.

It is high time our Medical men, and our Authorities, should take action to have all such deformities kept from public view—they never do good but often great evil.—ED. FARMER.]

Says the *London Telegraph*:

We protest against a renewed exhibition of the Siamese twins. The shadow of a horrible destiny hangs over them; since, unless science dares to promise their deliverance, and to execute the promise with a bold and skilful knife, the day must come when one brother living will be bound to the other dead, and instead of an operation to which they shall mutually agree, one moiety of the double man must be lopped away to save the other—if, indeed the operation do not prove fatal to that other. Is it endurable, then, that the decency and humanity of London should be outraged by such an exhibition as that which has been announced? When the twins were last made objects of show, they were young; the thing was new to the public; they, themselves were contented with their fate, because there seemed to be no hope of severance. Besides, the generation which first saw them differed greatly in taste and morals from the present. In no case, and at no time, should such examples of broken physical laws be made a vulgar spectacle. As well expose to idle or diseased curiosity the hideous cases of the hospital operating table, or open to foolish gazers the dissecting rooms of medical colleges, as flaunt in the face of the public these sad aberrations from the divine form of man. But to do such a thing at a time when the poor souls have emerged from their bidding-place, and are on their way from surgeon to surgeon, praying for some one daring enough to save them, at the risk of death, from the "death of life" which threatens them—this appears a cold-blooded contempt for all that is reverent, all that is pitiful, all that is ordinarily human; and the scheme of exhibition is so gross and disgusting that immediate steps will doubtless be taken to forbid a speculation so abominable.—*London Telegraph.*

POTATO CULTURE.

The principal cultivation of the potato consists in keeping the soil loose and free from weeds.—Whatever process accomplishes these points best and cheapest is the best cultivation. As soon as the potato vines appear above ground, a furrow with a small plow should be plowed away from the rows as close to the potatoes as possible.—About two weeks after this a furrow with the double moldboard plow, is opened in the centre between every two rows, and repeated every two or three weeks afterward, until the vines cover the ground. If the field is very weedy and the plow does not destroy all the weeds, it is necessary to go over the ground after each plowing and hoe up the weeds left by the plow, and also uncover vines occasionally covered by the plow.—After the plowing has been discontinued a very important part of the cultivation commences. In order to obtain a full crop, there should not be at any time, a single weed be visible in the field, and all weeds growing after the last plowing should be pulled by hand. After a rain, when the soil is light and loose, is an excellent time for weeding potatoes, and it should have the preference before any other farm work. The time required is but very little compared with the advantage gained. The labor saved in digging in a clear field is more than is required to pull the weeds when they are small, not to add the increase of the crop. We have raised large crops without the use of the hoe, by simply plowing three times and pulling the weeds twice. When potatoes are planted late, so that the ground can be plowed twice before planting, this is probably the cheapest way to raise the crop.

Had I to make a selection of six varieties to plant for marketing, I would choose, for early:

Early Rose, because it is the earliest and best early variety, having yielded 264 bushels per acre.

Early Goodrich, which, although it has not succeeded well in the last wet season, is, when grown under favorable conditions, of excellent quality, of good size, shape, and color, productive and free from disease.

For medium or main crops:

Harrison, because it is the most productive and most profitable table potato in existence; of white skin and flesh, large size, fair quality, and entirely free from disease. Yield, 389 bushels per acre. Throughout the whole extent of our country, no potato has given more unanimous satisfaction than this variety.

Lapstone Kidney, for its beautiful shape and appearance. It succeeds in soils where the Prince Albert has failed. It is an excellent baking potato, and by many preferred to any other.

For late:

White Peachblow, because it is, when matured, the most sought-for potato in market, unequaled by any other variety for its mealiness. The growing of the White Peachblow has made many a farmer rich, and favorable seasons will no doubt improve it again, as they have improved other varieties.

Gleason, for its hardiness. It is a surer crop than any other potato. Be the season wet or dry, be the land manured with fresh manure or old, or none at all used, the Gleason is certain to grow, if it is planted early enough and well cultivated. True, its quality is not first-rate when dug, but it improves by keeping, and is quite acceptable if kept till April, when other varieties are no more fit for the table.

Should I choose six varieties, in addition to those characterized, I would name: Early Cottage, Dykeman, Garnet Chili, Orono, Calico, and Andes.

LETTERS FROM AN OLD CALIFORNIAN AT THE EAST.

NUMBER NINETY-NINE.

NEW YORK, March 7, 1869.

Editor California Farmer:—

THE PRESIDENT'S INAUGERAL.

The wretched imitation of Washington's honored Farewell Address, which an accidental President presented to the American people, was in singular contrast to the sharp, clear words of Grant's inaugeral. The Cabinet appointments which at first caused great surprise, apart from that of Washburne, are regarded with great favor, as indicating that the demons of corruption must take their flight from the Capitol. Let us hope that they may be banished forever. The morning of March 4th was glowing in the extreme; the afternoon was bright, and the sun shone out magnificently. May it typify the Future. I have never seen a pleasanter sight than the satisfaction in the faces of people I met; everybody, even the followers of the Tory leaders, speak hopefully of the "good times" which are coming. Washburne's course in the House makes him particularly acceptable to those who are expecting a thorough reform. Alex. T. Stewart is known here to be a man of ceaseless industry, and not only is he comprehensive in his views, but he is attentive to the smallest details of business. He has been remarkably fortunate as a merchant. When his name was announced as Secretary of the Treasury, gold fell; securities went up. This effect shows how the business men of the country regard him.

THE PACIFIC RAILROAD.

The newspapers are discussing the Pacific Railroad. The accounts from travellers who have come across the continent are damaging in the extreme, to both the Central Pacific and Union Pacific Companies. Of our friends, Mr. T. E. Smith and wife started a week ago overland, but I fear that they will be compelled to turn back.

REAL ESTATE—BUSINESS MATTERS, ETC.

Much excitement prevails here as to Real Estate. Business is driving the aristocracy from Fifth avenue, below 34th street, and in consequence it is regarded as quite sure, that in a few years they will all be compelled to look out for new houses. Apparently it is the unanimous opinion that the land situated between the Hudson River and the Central Park, will hereafter be the fashionable quarter, and there is a great scramble for choice lots. At present the land is occupied by squatters (who are here harmless,) or by the old families who settled upon the land when it was "in the country." Your readers can form some idea of its value when they are told, that a corner lot on 71st street and Eighth avenue sold for nearly thirty thousand dollars, the lot only 25x100. Lots in the middle of the block brought from $7,000 to $10,000. This property, however, is all located on high ground, and there are comparatively few lots between the great park and the river. The boulevard is being rapidly constructed and will be completed in a couple of years. If any person with money wishes to buy cheap, he can purchase elegant houses and lots over in East Broadway and Henry streets at less prices than the houses could be erected for. Yet this was formerly the fashionable quarter. I noticed yesterday the sale of an elegant house and lot in Rutgers Place, 23x110 for $14,000! I expect that surer fortunes can be made in buying land at the South, than in any other way. It requires, however, great knowledge of the country and a clear judgement, that few people posess. Much interest is felt in the news from the White Pine district, and it seems quite sure that numbers of young men will "try their luck" in that direction, as soon as the spring fairly opens. Unless there is a better account of the Pacific Railroad, however, it will cause many who could take advantage of it, to look elsewhere for "chances." If the managers of the Union Pacific and Central Pacific Companies have swindled the people of the United States, they will pay dearly for their success.

M. A. S.

PLANT THE NEW POTATOES.

The remarkably moist season and the continuance of the rains will give to all who desire to secure the *New Kind of Potatoes*, to plant during all this month, and in some places even during the entire month of May.

We would particularly urge upon all who may plant the "Early Rose," the "Goodrich," the "Harrison," the "Chili," and others, to be careful and save all their *Seed-Balls*, from which they can spring new and valuable varieties, that being raised from *Seed*, are indeed NEW CALIFORNIA POTATOES.

As a matter of business and pecuniary gain, it is very certain that those who shall raise the 'Early Rose," and the "Goodrich," will receive a very handsome recompense, as the product of both these varieties are very great, and both will be in great demand another year. We can therefore recommend these kinds as a good, perhaps the best investment that can be made, even better than mining stocks.

Agriculture.

LITTLE BROWN HANDS.

They drive home the cows from the pasture,
Up through the long shady lane,
Where the quail whistles loud in the wheat-fields,
That are yellow with ripening grain.
They find, in the thick waving grasses,
Where the scarlet-lipped strawberry grows;
They gather the earliest snow-drops,
And the first crimson buds of the rose.

They toss the new hay in the meadow;
They gather the elder-bloom white;
They find where the dusky grapes purple
In the soft-tinted October light.
They know where the apples hang ripest,
And are sweeter than Italys wines;
They know where the fruit hangs the thickest
On the long, thorny blackberry vines.

They gather the delicate sea-weeds,
And build tiny castles of sand;
They pick up the beautiful sea-shells—
Fairy barks that have drifted to land.
They wave from the tall, rocking tree-tops,
Where the oriole's hammock nest swings,
And at night-time are folded in slumber
By a song that a fond mother sings.

Those who toil bravely are strongest;
The humble and poor become great;
And from those brown-handed children
Shall grow mighty rulers of state.
The pen of the author and statesman—
The noble and wise of the land—
The sword and the chisel and palett,
Shall be held in the little brown hand.

SUGAR PRODUCING PLANTS.

[We take the above chapter of facts, collected and sent out in the little book by Hedges, on Sugar producing plants for the North. Californians should make use of this valuable information.—Ed. Farmer.]

There are a variety of sugar-producing plants, among which is the sugar cane of the tropics, technically called "*Saccharum Officinarum*." "This sugar-cane is an herbaceous plant, possessing a jointed, succulent root, from which arise several shining, jointed, solid stems, from an inch to two inches in diameter, and from six to twelve feet high, and containing a white and juicy pith. The color of the stem is yellow, greenish yellow, purple, or striped. The joints are about three inches apart, and give origin to the leaves which embrace the stem at their base, are three or four feet long, and about an inch wide, flat, acuminate, longitudinally striated, furnished with a white midrib, glabrous, finely dentate, and of a green color inclining to yellow. The flowers are pinkish, surrounded by a long silky down, and disposed in a large terminal, nearly pyramidal pinnacle, composed of subdivided spikes, and two or three feet in length. The plant has a general resemblance to Indian corn. Four varieties are mentioned: 1st. The common, with a yellow stem. 2d. The purple, with a purple stem and richer juice. 3d. The gigantic, with a very large, light-colored stem, and 4th. The Otaheitan, which was introduced into the West Indies from the Island of Tahita (Otaheite), by Bougainville and Bligh, and is distinguished by its greater bigbth, the longer intervals between its joints, and by the greater length of the hairs which surround the flowers.

"The sugar-cane is cultivated by cuttings, which are planted in rows, and which, by giving rise to successive shoots, furnish five or six crops before the plants require to be renewed. At the end of a year the plant generally flowers, and in four or five months afterward the canes are completely ripe, at which time they have a yellowish color and contain a sweet, viscid juice. The quantity of sugar which they yield is variable. According to Avequin, of New Orleans, the proportion of cane sugar in the recent stalk is about 10 per cent; of uncrystallizable sugar, from 3½ to 4 per cent. Cane juice is usually stated to contain from 17 to 23 per cent. of crystallizable sugar, though scarcely 7 per cent. is extracted in practice."

The sugar-beet affords a sugar only slightly inferior to the regular cane, although a product of our latitude on this Continent, but several degrees north of us upon the Eastern hemisphere. The "Holcus saccharatus" or Sorgho* sugar-canes are the product of a climate further from the equator. A traveler in Thibit and Tartary, M. Hue, says: "The brandies of the North are made principally with a large millet (*Holcus Sorghum*)." We may infer that this is of the Sorgho genus, and of a latitude still above our own. The name, Holcus sorghum, occurring in parenthesis and in italics, indicates that it was of his own substitution, as his travels were prior to the introduction of the Sorgho into France, but the publication subsequent thereto.

The Imphees, or African varieties of the Sorgho, are from the country of the Zulu-Kaffirs, in latitude 30° south. This country is situated in front of a long range of high mountains on the west, which, no doubt, exert much influence upon the climate of the country in front of it—the same as upon our south-eastern coast. It is believed by many that there is, yet farther back upon the base of this mountain-range, a cane still better adapted to our climate. Of these varieties introduced by Leonard Wray, Esq., there is a great difference in the period of their maturity, only a few, however, early enough to insure good results in our latitude and climate. From these latter, in favorable seasons, a tolerable fair sugar may be made.

* By the term Sorgho, I include all the varieties of this genus, Chinese and African.

POTATOES AND THEIR ORIGIN.

Long may we remember with gratitude the great and rare discovery of Sir Frances Drake, who claims to have discovered in the wilds of South America the potato. This was seven years prior to Sir Walter Raleigh's expidition. He (Sir Walter) is believed to have planted at Youghall in July, 1587, the first potatoes ever grown in the British Empire, and from these few the country was furnished with seed. The patent passed the great seal in 1754. A scientific gentlemen named Hercot, who was also one of the explorers, describes under the head of roots those called in Virginia open ark. The potato when first discovered was diminutive in comparison to the present growth; and as the handful of fragments that fed the vast multitude, so the few scattered roots gathered by lone explorers have increased till millions now banquet. Well may we herald His name with gratitude and bless the Hand that led ambitious wanderers to the distant wilds where lay hidden such rare treasures—such great blessings. We acknowledge the potato superior to all the root kingdom. They are harmless, nutritious, and wholesome. Active as a medicine, healing to the afflicted, indispensible to the cook, fragrant and tempting to the epicure, and can be shaped into almost every dish. They are inviting, from the most dainty preparation, down to their original selves, wrapped in their ragged coats.

WASHING THE FACE AND HANDS.

Is performed by millions every day, and yet perhaps not a dozen in a million will do it right.—The common practice is to take a basin of cold water, catch up a double handful of water, dash it into the face and rub it vigorously, thus rubbing all the matters of the soiled hands which have accumulated during the night into the skin of the face.

It is a great luxury to wash the hands thoroughly and well with soap and warm water among the very last things on going to bed at night. The cleanliest person will often find that a tea-cupful of warm water will be soiled by the operation, and the same will again occur the first thing in the morning, since in addition to adventitious causes there is during sleep an exudation of an oily substance through the pores of the skin, and to this floating dust of the rooms, furniture and clothing will adhere.

It is one of the inestimable blessings of city life that both warm and cold water are at hand at all hours, day and night.

Take a tea-cupful of warm water, not more, and with soap make a lather, with which wash the hands thoroughly, not forgetting under the ends of the finger-nails, and dabble in the water until every particle of accumulation is removed. This is better than to use a brush, because the hard bristles will irritate and harden the tender skin under the ends of the finger-nails. Scraping out the dust with a pen-knife is an excusable violence and an indecency, too, when done in company.—Next rince the hands in an abundance of water until all the soap is thoroughly removed. The face may then be washed in another supply of water, warm or cold, according to the taste of the individual: Warm water is better, as it dissolves more readily any accumulations about the eyes or ears, and then with an instantaneous rinsing o the face in cold water, the work is done; and then your hands and face are clean enough to pat the face and kiss the cheek of the one you love best as a morning salutation.—*Hall's Journal of Health.*

Glue which will Unite even Polished Steel.—A Turkish receipt for a cement used to fasten diamonds and other precious stones to metalic surface, and which is said to strongly unite even surfaces of polished steel, although exposed to moisture, is as follows:

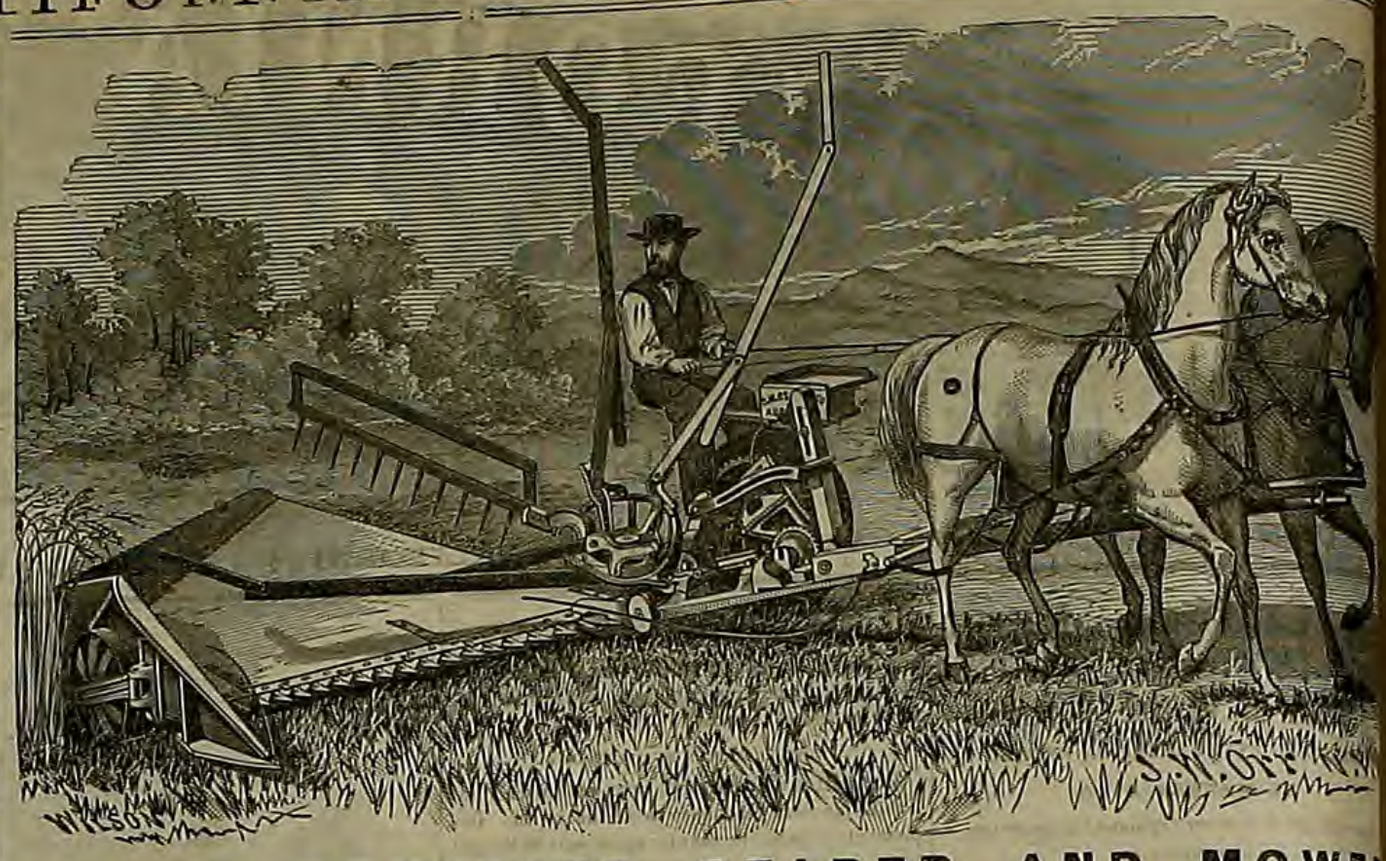
"Dissolve five or six bits of gum mastic, each of the size of a large pea, in as much spirits of wine as will suffice to render it liquid. In another vessel, dissolve in brandy as much isinglass, previously softened in water, as will make a two-ounce vial of strong glue, adding two small bits of gum ammoniac, which must be rubbed until dissolved. Then mix the whole with heat. Keep in a vial closely stopped. When it is to be used, set the vial in boiling water.

A Quaker's Horse.—When the 2d Indiana Cavalry Regiment was originally recruited, it was in want of horses, which the government could not supply. A certain Quaker gentleman was applied to among others, to furnish a horse for the good of the cause to which it was known he was in heart and soul devoted; whereupon he replied to the Colonel: "Thou knowest we are opposed in principle to war; but those five horses in yonder meadow are mine, and if one is missed in the morning I shall not inquire about it."

ASPARAGUS.

Well! will you buy the *White* Asparagus that is absolutely *poisonous*, and of which you can only use *one-fourth* in weight of what you purchase, or will you buy the *natural esculent* that is green, tender, melting and rich, and of which you can eat seven-eights of the amount purchased; besides there is more nourishment and palatable food in *one pound* of the Green Asparagus than in *ten pounds* of the White.

—There are at present in the State of Illinois eighty-seven wool-carding mills, and one hundred and thirty-three manufactories of woolens, with a capital of $3,600,000 invested in buildings and machinery, and employing 3,450 operators, one-fourth of whom are women, and consuming annually 4,000,000 pounds of the 7,000,000 pounds of the wool clipped from over 2,500,000 sheep. The investment of capital is steadily increasing.



KIRBY'S COMBINED REAPER AND MOWER
WITH COMBINED SELF-RAKE AND REEL
TWO COMBINATIONS IN ONE MACHINE
This is the only TRULY COMBINED MACHINE in the world. While many machines PROFESS to be Combined, and some of them are very good Mowers, there are very good Reapers, there are none that Combine both qualities like the KIRBY, and work in either capacity as well as if designed for no other purpose.
"MONITOR"
Self Raking Attachment IS THE MOST PERFECT THING IN THAT LINE EVER INVENTED.
It is COMPLETELY SUCCESSFUL in any or all conditions of Grain, either Heavy, Light or LODGED, or in the heaviest Mustard; as over a Hundred Farmers on the Pacific Coast, who are successfully using them this year, can testify.
The Kirby can cut the largest Mustard without any trouble, and rake it off also, if necessary.
We shall keep a large supply of EXTRAS of all kinds on hand.
The working of the "MONITOR" is so complete, that the closest scrutiny cannot discover that the team works any harder when it is taking off the heaviest In fact, it is easier for the team to run the KIRBY COMBINED REAPER with the "Monitor" Self Rake on it, than it is to carry a man to rake off, and the grain are left in much better shape for the binder; so much so, that many claim that it saves the work of one binder, to say nothing of the difference in scattering the grain.
By a device lately invented, the size of the gavels can be regulated at the will of the driver, according as the grain stands heavy or light; it consists of a treadle which operates on one of the ways of the Rake-arm, so that the Rake can be thrown and pass over the grain until a gavel of the right size is collected upon the platform, then the Rake, of its own accord, will sweep it off.
This machine can be set to cut at any desired height from the ground, from two to eighteen inches, by merely changing two bolts, one in the grain-wheel slide, the other in the axle plate, where the joint or independent action is obtained.
This machine never had an equal in heavy lodged grain or grass, as it is in such cutting that it shows its superiority to the best advantage.

New Strawberries, Raspberries, Grapes &c
We have just received an invoice of New Strawberries, Raspberries, Blackberries, &c., to which we call the special attention of all who desire the Newest and Choicest Vines and plants known. The following varieties received:
Blackberries—THE KITTATINY, WILSON'S EARLY.
Raspberries—DAVIDSON'S THORNLESS, DOOLITTLE BLACK CAP.
Strawberries—DR. NICAISE, nine to the pound. GOLDEN QUEEN, magnificent. GREEN PROLIFIC, rare.
New Grapes—TEN VARIETIES New Grapes.
As the amount of these new and rare things is limited, early orders only will secure them. Address

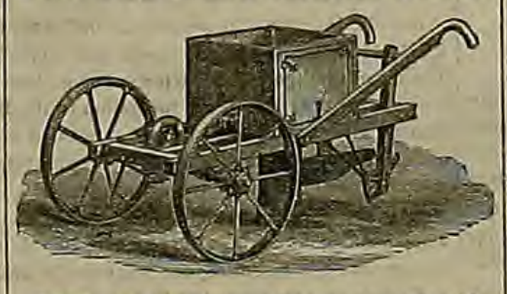
EARLY COODRICH POTATO.
Important to Market Gardeners and the Agricultural Public.
The Undersigned, having growing and tested the above Potato for two seasons, have no hesitation in pronouncing it far superior to any other grown on this coast, for an early Potato, and now offer it for sale. It is very early (from three to four weeks earlier than any other) good size, white skin, smooth eyes, white flesh, of superior table quality, and very productive.
L. F. or F. SANDERSON, San Jose, Cal.
Agents in San Francisco—GRIFFITH & ELLIS, No 225 Washington street, one door below Front; and G. F SILVESTER, No. 317 Washington street. 30-12.

TRUE'S IMPROVED POTATO PLANTER.



This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes ever introduced.
It Saves the Labor of 12 Men in Planting Time.
Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed
No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatoes in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.
This distinguishes the Potato Planter from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.
The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.
We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it
Particulars and Catalogues can be had at our office.
WARREN & CO.,
320 Clay street, up stairs.

LINFORTH, KELLOG & RAIL,
(Successors to L. B. Benchley & Co.)

A PRINCELY RESIDENCE
IN THE COUNTRY
FOR SALE
To any wealthy person who desires to retire from the drudgery of a business life in the city and enter upon a newer and better and higher life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have a little of business to occupy his mind and his time, and at the same time secure to himself
A PRINCELY HOME
And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this property and gathering the products. Such a place as I had, already complete to the taste, and in one of the most healthy localities in our State.
This place is now offered for sale, only because of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Gardens of Eden with all manner of luscious fruits, and which with a judicious care and management, the entire cost of the place could be returned again in a few years *by its productions*, can learn of the owner by applying to the Editor of the Farmer. No person need apply unless with the means to fulfill contract.
Real Estate, or other property, in San Francisco at Gold Value, will be received in part payment and *Statistical proof given* to show the real increase annually of this rich and fertile spot.
Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO.

THE PHOTOSCOPIC Table Company.
THE NEW INVENTION of this Company is known as the Anthrophotoscopic, or "Photoscopic" Table, designed to give a Life effect to every picture placed on the table.
THIS INVENTION enlarges and perfects the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Engraving.
THE GRAND OBJECT OF THE INVENTION of this wonderful table is to present a real size of Pictures from 100 to 500, and thus give an opportunity to group Families entire; and also groups of friends, collections of noted individuals, or grand landscapes, giving a grand Panorama of choice pictures, arranged to suit the wishes and taste of each owner of the table.
THESE INSTRUMENTS are made in the latest style so as to be a beautiful parlor ornament, the best in the parlor, made of our own beautiful woods, and highly finished, and in price from $100 to $125.
Those who desire to purchase, can see one of the Tables by calling at the Farmer Office, or address
EDITOR FARMER.

Horticulture.

AMONG THE ORANGES.

The St. Augustine *Examiner*, of a recent date, thus speaks of the *Orange Groves* of that Sunny land:

"We are now at the Orange Grove. In this place we have the distinct seasons of flowering in March and the fully ripened fruit in November, but a little farther south, in the Indian River Country, the same tree often contains flowers, green fruit, and fully ripe fruit, at the same time, and it is said if the old fruit remain upon the tree from one season to the next, after being dry and spongy in the summer, it again fills with juice at the ripening season.

This is one of the most singular botanical facts related of any tree. Another remarkable fact in regard to them is, that they can be transplanted at any age, even very old trees.

The best transplanting seasons are December and June, on account of the frequent rains. The latter month is particularly our "Rainy Season," of which we hear so much in tropical countries. Every day a refreshing shower is expected to gladden the potato planters.

The sour orange and the bitter-sweet grow wild throughout this part of the country. The sour orange, whose rind is bitter and pulp intensely sour, I suppose you do not fancy, though the drink made from it is considered quite as good as lemonade, which it resembles. The children are very fond of eating them with salt, which deprives them of some of their sharpness.

Orange wine, made from their fermented juice, combined with a large proportion of sugar and water, is considered by some to be very fine. But the best we have had the pleasure of tasting resembles flat sauterne. The quantity of sugar, which of course ferments and gives its proportion of alcohol, deprives the orange juice of all credit it would have as a wine-making product.

The juice has, however, been extracted, barrelled and sent to Cuba, where it brings a good price. The oil of the peel, rising to the top and protecting and preserving the acid for a long time. It has been a question with speculators if the great numbers of these oranges might not be applied to some profitable use.

However, we are discussing the sweet orange just now. There are several methods of rearing them. Many plant the seed and wait for the fruit from five to seven years. This is the long, slow way.

The best is to obtain sour orange trees of the proper size and bud them with sweet orange buds, in the same way peach trees are budded. The ordinary time of their bearing from the bud is three years; but there is a tree in Mr. George W. Atwood's grove, near the city, that produced oranges in a year from the bud. This is a remarkable case, and is said to be owing to the fact that a fruit bud was used instead of a leaf bud. If this is always the case, it certainly demands the attention of persons raising oranges. We have never tried it ourselves, so can only give it as second-hand.

The time for transplanting the sour trees is during the winter months. They are cut three to four feet from the ground at the time of taking up: During the summer months, shoots large enough to bud start out. Two or three of the best are selected, and the others rubbed off. The buds grow the first year and bear, as we have said, the third year from transplanting. By the fifth year a grove with proper care should bear one hundred to the tree, the number increasing every year after, giving to old trees the thousands we spoke of in our last Walk and Talk.

There are various opinions concerning the proper distance apart the trees should be planted, many insisting that twenty feet is the proper distance, and quite as many and as successful growers contending for ten feet. The great object is, that the trees shall be protected from the action of the winds, and when they are near, this is effected, though if they are protected by close hedges of cedar or sour orange, to the north and east, and have cross hedges, traversing the grove a greater distance apart will not injure them, but will give nutriment from the soil to each tree. Manuring the trees is always advantageous."

Curious Facts.—A single female house-fly produces in one season 20,000. Some female spiders produce nearly 2,000 eggs. About thirty fresh water springs are discovered under the sea, on the south of the Persian gulf. A wasp's nest usually contains 15,000 or 16,000 cells. The depth of the Atlantic ocean is estimated at three miles, and the Pacific at four miles. There are six or seven generations of gnats in the summer, and each lays 250 eggs. There are about 9,000 cells in a square foot of honey-comb. A swarm of bees contains from 10,000 to 20,000 in a natural state, and from 30,000 to 40,000 in a hive. The bones of birds are hollow, and filled with air instead of marrow. A cow eats 100 pounds of green food in the 24 hours, and yields 5 quarts of milk. Fish are common in the seas of Surinam with four eyes, which grow on the top of their heads. 2,000 silk worms produce one pound of silk, but it would require 27,000 spiders to produce one pound of web.

—A humorous note, which an American gentleman tossed into the English Channel seven months ago, inclosed in a bottle, has just been returned to his address, No. 356 Superior Street, Cleveland, Ohio, U. S. A. It was picked up at Worthing, near Brighton, England, after floating in the water three months. It was covered with barnacles.

Our New York House, under the name of
WILSON, MORROW & CHAMBERLIN,
will open in New York City about the first of November next, and will have the exclusive agency of our

WINES AND LIQUORS

in all the States east of the Rocky Mountains. We are prepared to do a General Commission business in New York, which will be under the management of

Messrs. MORROW & CHAMBERLIN,

whose business capacity, well known to the Merchants of San Francisco and the Interior, is sufficient guarantee that all business intrusted to them, whether of buying or selling, will be promptly and efficiently executed. We will make liberal Cash Advances on Merchandise consigned to

MESSRS. WILSON, MORROW & CHAMBERLIN,

and forward the same free of Commission when shipped from San Francisco

WILSON, MORROW & CHAMBERLIN

will forward Consignments to us in San Francisco, free of Commission, and make advances there if required—Eastern orders for Wheat, Flour, etc., will be filled by us at lowest market rates

We desire to call the attention of Wine Consumers to our

LAKE VINEYARD AND MOUND VINEYARD

WINES AND BRANDIES.

These Wines have already acquired reputation in the principle markets of the world, and in California are acknowledged to be superior to the productions of any other Vineyards. As many Dealers here and at the East have used our name to facilitate the sale of Spurious Wines, we have deemed it necessary for our own protection to place our Trade Mark on every package or case that goes out of our hands. You will please observe that no Wines purporting to be ours are genuine unless they bear on the package the Trade Mark at the head of this sheet 30-12.

VALUABLE PLANTS FOR SALE.

☞ **Persons who are desirous of securing a few** very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

tf *Farmer Office.*

GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the Trees, Plants, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California Farmer.

None but Educated men ever engaged in such work.

New Advertisements.

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

Thornless Raspberries.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The Thornless raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1869. John Gage

From the American Horticultural Annual, for 1868 page 102:

"Davison's Thornless.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant a grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicates, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are propagated from tips making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

We hope these offers will be so appreciated that we shall have the earnest co-operation of many friends, and to all who shall interest themselves, we shall be ready to fully remunerate their kindness.

Sample copies will be sent, when desired, to those who wish to canvass among their friends.

Address COL. WARREN, Editor.
or WARREN & CO. Publishers

IMPORTANT TO NURSERYMEN, GARDENERS, AND AMATEUR FLORISTS.

We beg to announce the arrival of the choicest and best assorted collection of

RARE SEEDS,

ever received on this coast. They have been selected with the greatest care, from the first houses in Europe, and are comprised of

EVERGREEN, AND DECIDUOUS TREES AND SHRUBS, RARE AND BEAUTIFUL PERENIALS, BIENNIALS, ANNUALS, ETC.;

also, new and choice Vegetables; the assortment is worthy the attention of all who admire the beautiful; and also the particular attention of gardeners who are anxious to secure something rare and new in the Vegetable kingdom.

We shall send them out in small parcels or individual packets, so that many may have the chance of securing the collection. Orders executed in rotation, and carefully packed for mailing any distance.

Persons remitting us five dollars, will have collections of seeds sent them, worth intrinsically double the amount.

WARREN & CO.,
Farmer Office, 320 *Clay St.*, San Francisco.

Jebb's Patent Churn.

This admirable Churn—one of the best yet invented—and which was pronounced

THE BEST CHURN EXHIBITED AT THE LATE STATE FAIR,

and to which was awarded by the Committee

THE FIRST PREMIUM,

is now offered for sale to the Trade, or at Retail, in lot to suit purchasers at the

CALIFORNIA FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....APRIL 8, 1869

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

220 Clay Street.—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are open file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of *our Journal*, to which we would direct their *special* attention.]

Rail Road Excursion.—We acknowledge the reception of an invitation to the opening of the *first section* of the Southern Pacific Railroad, from San Francisco to Gilroy. We anticipate a very happy occasion and shall give full report of the same in our next.

Our *Farmers* and *Orchardists* will find valuable Essays on Fruit Culture, and on *Improved* systems of Agriculture, and on Sugar Plants, which we have collated from the best authorities for their interests.

The Two Clerks.—Young men who may chance to read this number of the *Farmer*, and who may be acting in the capacity of clerk, we commend the story in our Journal as worthy your special reading. There is *truth*, and there is the voice of warning in it also.

Let disobedient and ungrateful children read the Little Boy's Rebuke, in our Home Department, and ponder well its meaning. There are too many sad examples of this Ingratitude of children here in our fair sunny land, but never can such children ever prosper. Heaven has so ordained that the Sin of Ingratitude (the blackest of all crimes,) can never prosper.

We acknowledge a card of Invitation from Mess. Snow & Roos, for the private exhibition, to their New Gallery of Paintings, which is soon to be shown to the public at their place on Kearney St.

We would also call special attention to the article on the "Culture of the Potato," which we copy from the *Rural American*.

WORK IN THE GARDEN.

Now is the time to do good work in the "Home garden." The late rains will have moistened many gardens that had been neglected, and these will come as *merciful benefactors* to save beautiful Plants and Flowers. Now, go to work, dig deep and fine, pulverize lumps of earth, and then rake fine and finish up, and the flowers will bless your labor.

TO ORCHARDISTS EAST.

We call the attention of skillfull Orchardists in the old States, those who thoroughly understand the care of an Orchard and the culture, picking, packing and marketing of Fruits, to the Splendid Orchard and Vineyards we have for sale.

To such per sons as have *Capital and Experience* in this business, we can give them a sure chance to make an ample fortune in a few years.

Fruit raising when well conducted, must become more and more profitable each year, by reason of the *Markets* that will open to us at the East, and the facilities we shall have to send our Fruits there fresh and early over the Pacific Railroad.

We invite all who wish to enter into the Fruit trade on a large scale, to call and learn of the Splendid Orchards we have now for sale.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office

Wanted.

A Gentleman residing a few miles from the city, is anxious to meet with some one, who can Superintend the construction of Trout Ponds, or give information as to the best mode of constructing Fish Ponds. Such parties will be amply compensated for all trouble and knowledge. Address, B. L. B., FARMER OFFICE.

P. S.—A personal interview would be preferred at the Farmer Office.

RAMBLES IN THE COUNTRY.

NO. 4.

STOCKTON.

As promised in our last issue we gave a brief sketch of our visit to Stockton last week, to catch a glimse of the progress that city is making in comparison with others.

Our trip on the steamer was a pleasant one, where every attention and courtesy is paid to passengers to make them comfortable as possible on the *small* steamers now running on that route. It is to be hoped that larger and more commodious steamers will soon be placed on the Stockton route; for that region is very rapidly improving, and the increasing business demands larger and better steamers.

As we remarked last week, our "Headquarters" was at Webster Brothers' Pioneer Agricultural Warehouse, for there we can always meet the Farmers, from whom we gather the most important facts relative to the prosperity of our State, which is its

AGRICULTURE.

We met several of our well-to-do Farmers, quite a number too of our wise ones, who, taking the *Advice* given in the *California Farmer* all last year, did not "Hold On," but sold at good prices, and they now fell well and happy, and are resolved to sell when harvest comes this season too, whatever the advice of the Sacramento *Union* or the Stockton *Independent* may be, even to the contrary notwithstanding.

We met quite a number of Grain growers that still held grain; some had made sales that week at $1.47½ for wheat that they could have realized $1 65 *eight months ago*. Such losses should lead our Farmers to adopt the only safe policy, *Sell at Harvest.*

The Agriculture of the great San Joaquin Valley is far greater than has been estimated, and the crops are all in a most prosperous way. Mess. Webster Brothers are doing a large business, and have one of the largest and best assortments of Agricultural Implements in the country, and of the most approved kinds, and we are glad to notice that our Farmers are now growing wise, and using the *Best.*

The fires in Stockton during the last two years, proved beneficial, clearing away many old buildings which are now replaced by substantial and some elegant structures, giving a handsome look to the streets.

We were glad to note that the Authorities are putting their "Public Square" in good order, pruning shrubbery, cleaning walks, cutting lawn, etc. It needed attention, and the improvements will pay.

We noticed quite a heavy stock of Grain in several of the Commission Stores, and more at the Flouring Mills, yet a liberal quantity is shipped away from Stockton almost daily.

The City Mills (Sperry & Co.) have done a fine business this year. Their Flour ranks high both at home and in the East. The Foundry is also doing a prosperous business; and Lumber Yards are full of business, as large amounts are wanted for New Buildings going up everywhere, and lands are being fenced, and many improvements generally.

We visited the large workshops of Matteson & Williamson, who are now running full handed, making a "New Harvester," said to be of very great merit, and costing from $1,000 to $1,200 each.

Mr. Matteson is an old Pioneer Plow Maker, and has monster Plows that require 12 to 14 yoke of oxen or horses to draw them. They are for road purposes.

Matteson & Williamson are making a large number of their famous "Hay Forks" and Waggons. Their business requires from 20 to 30 hands all the time, and we are glad to note their well deserved prosperity. *Industry must prosper.*

We were pleased to visit the new, spacious and very handsome Carriage Manufactory, recently erected by William P. Miller, Esq. This is one of the best Establishments of the kind in all that region of country.

Mr. Miller has been many years in Stockton and has been noted for his famous Waggons, a kind no longer much wanted, since Railroads and Steamers take the freight.

By reason of the excellence of the work always done by Mr. Miller, his business has largely increased, and now Waggons, Buggies and Carriages of all of the very best style are manufactured by him, equal to any from the celebrated factories of the East, and better too, for they are made to answer our climate and the wants of our people.

The new Manufactary is some 50 feet square, three stories high, and furnished with all the most valuable working machinery for the business, by which *Labor is Saved.* There are some 8 or 10 other buildings connected with the main building for all the various branches of Carriage making, and here we saw some twenty or more men at work; we also examined several Carriages, Waggons and Buggies, all of which are a credit to our State, as well as to Mr. Miller who deserves the prosperity, which we are glad to see he has secured. We shall speak of these places again.

TULARE RAILROAD.

We met quite a number of citizens who are up and doing for this new Railroad to the Tulare Country. It is to be hoped they will not rest until the work is well completed. Our Farmers must take hold of this enterprize; they are interested *more* than any other class of people, for they need quick means to bring their produce to market. Our Farmers should *own all the Railroads, for they are built with the Farmers' money.*

When our Farmers shall take the lead in these matters and *build Railroads*, they will not cry out *Monopoly*, for they can control the Roads themselves, can fix the price of freight and passage, and if they make it high the dividends comes into *their own pockets*; if they put it low, *their own freight* will not cost them much.

Farmers! take hold of the Railroad. Build it and own it. You are amply able to do so. What say you Farmers?

The Banks in Stockton are doing a good business, doubling up their Capital and paying good dividends; and this is all owing to the success of the grand cause of Agriculture in that great Valley.

INSURANCE.

WEBSTER the great Lexicographer says *Insurance* is, *to make sure.* Now as we have often said, it is one thing to *hold* a "Policy of Insurance," and it is quite *another thing*, to MAKE SURE.

During the late excitement about the "Builders' Insurance Company" with the Insurance Commissioner, there was great fret and worriment among those who held Policies about which the newspapers were talking so much. Many people who held Policies questioned their value, and some became so reckless as to say, It was no use to Insure at all, as there was no knowing *which was good.*

That Insurance excitement did the public great good, and caused both Insurer and Insured to look into the *question of Insurance as a matter of business*, to the Insurer, to make it a *safe paying investment for Capital*, and to the Insured to be *safely Insured.*

The *Result* of that excitement, by and through the action of the Legislature, and the appointment of the *Commissioner*, the "Builders' Insurance Company" was reported to be *Insolvent*, and *went out* of business. Fortunately, the Policies were transferred to Solvent Companies, and are now good. Other Companies, after giving their business a careful scrutiny, found "it did'nt pay," and they gave up their Corporations. Since then, by a prompt action of those now among us, a wise and judicious system has been adopted of *Establishing Rates* just as low as *Safety* both the *Insurer* and the *Insured* will justify.

This course will at once convince all who wish to be *safely Insured*, that this is the only way to make a *Policy of Insurance good to the holder.*

If a course like that pursued by the "Builders'" recently had been continued by other Companies, many would have become bankrupt—for those who Insured *too low*, lost capital. Only those who pursued a wise course are now on high ground, with ample capital, and doing a large and very safe business; and without any disparagement to the many excellent Insurance Companies in our midst, we can point with pride to the PACIFIC INSURANCE COMPANY of our city, a Company that is composed of our solid men—a *California Insuranace Company*, one that with extra assets that can bear losses—whose rule is, RIGHT TO ALL, to the Insured and the Insurer; whose statements, now widely published, show a wisely managed business. To such an Institution we would direct our Farmers in the country, and say to them, go there at once and Insure your property, your Houses and your Barns, your Granaries and your Stock, your Implements and your Furniture, then, if the calamity of Fire comes you will not be left "Homeless and Penniless," but by the "Flash of the electric wire," the messenger will come from the Insurance Company, and soon your "Homes" will be restored, and your losses made good.

We have been very much surprised as we have travelled over our State, to find so many of our Farmers and Mechanics and private Citizens who are yet exposed to the danger of Fire. This is a risk a man who has not an abundance of this world's goods has no right to run, especially if he has a family. It is to be hoped that those who are now exposed to loss by fire, will at once *make all sure* by obtaining a Policy of Insurance.

We can add a strong fact as evidence of the excellent management of the "PACIFIC INSURANCE COMPANY," that its Stock now ranks the highest of any Insurance Co. on our Coast, bearing 27 per ct. Premium, and leaving large surplus assets in the treasury. This gives to those who Insure in this Company a full guarantee of perfect safety, and also ensures promptness in the payment of all losses even in cases where they are very large.

We ask, who then, will be so unwise, as to remain in danger of Ruin, and go to bed only to be disturbed with fear and anxiety that robs so many of the comfort of that "sweet restorer," sleep.

Reader! have you those loved ones whom to leave destitute would embitter your last hours?—Then go to day and secure an *Insurance Policy for their good.*

MURDERS—SUICIDES—CAUSALITIES.

The very large and really alarming increase of the sad and solemn events which are now daily heralded in our newspapers, should arouse public attention to this matter, and some effort should be made to stay this tide of Desolation and Ruin that falls upon so many families around us.

The *Terrors of the Earthquake* startled our whole city and State, even the *whole Pacific Coast*, yet the actual *loss of life* was very small—not so many deaths as have occurred in this city *in a single week* by carelessness, *Brothel fights*, or Drunken brawls in the *Licensed* under-ground Dance Cellars; and yet our "Chamber of Commerce" have spent time and money to devise a style of building that would *guard life.* Now if life is so valuable, why do not the "Chamber of Commerce" act boldly in regard to the *Murders, Suicides, and Calamities* that daily occur in our midst? We venture to say that in no other community, of equal size and population, are there so many of these calamities as with us.

Since writing the above, the sad event on Geary Street, and the still more calamitous one at Gold Hill, has cast a gloom over many household. Why so many sad and fearful events?

HAYING COMMENCED

By a letter received from one of the prominent Farmers, in the "Moore's Landing" District, near Antioch, we are informed that *Haying has already* begun, the MOWER is at work, and

We hope the fragrance of the new mown hay,
Will come with its balmy breath across the bay;
We love its odors. Oh! to *work* is play,
Among the Mowers and the new mown hay.

While speaking of the "Haying Season," it is well to remind our Farmers, that to make their labor *light* and their WORK PROFITABLE, they should be certain to secure the *very best implements* to work with.

Look to our advertising columns. You will always be certain to find the *very latest* and ONLY THE BEST advertised in the CALIFORNIA FARMER. We never advertise any but the best.

THE FARMERS PROSPECTS FOR 1869.

The present season is so very propitious that we can hardly refrain from writing a song of joy and GRATITUDE every week, hoping our Farmers will indeed, bless God for the prospect before them, but never let a murmur escape their lips, for never could the most selfish mortal planned *so well for himself* as God has arranged for him this present season.

We have so often repeated these sentiments, that this week in speaking, we gladly take an excellent article from our cotemporary, the "Commercial Herald and Market Review," of our city, which we give our readers as valuable information and fully supporting all the statements we have all along made as to the condition and prospects of the Farmer and Grain Grower.

The Review speaks as follows:

Never in the history of this State has there been a more prosperous and promising season for Farmers than the one just closing. We have had abundant rains just when they were needed; the area sown to wheat is very much larger than ever. It is estimated that the growing crop will yield over 10,000,000 centals for export, while Oregon promises to increase the volume by 2,000,000 centals more. An interior cotemporary * has the hardihood to predict that there will not be half a crop. Upon what ground this piece of vaticination is formed does not appear. Every time that journal foretold drought, it rained; when it prophesied a rise in prices, wheat and flour declined in all markets. Perhaps we shall be told that the season has been too wet; that the wheat is going to rot; that it will all run to stalk without heads; but all such apprehensions are not shared by the Farmers, whose only anxiety now is where to find a market. Our receipts of Breadstuffs for the first nine months of the current harvest year, have been, when reduced to a wheat basis, 6,070,000 centals, against 5,100,000 for the same period last year. For the first quarter of 1869 the shipments have been 1,366,000 centals, against 1,231,530 during the same period of 1868, showing a gain of 134,470 centals; but the prices realized have been much smaller. During the past three months our shipments of Breadstuffs to New York have fallen off 27,457 barrels of flour, and gained 6,832 centals of Wheat, as compared with the first three months of last year. To England we have sent 20,408 barrels of Flour less, and 119,551 centals of Wheat more. To China we sent 18,082 barrels of Flour more, and 1,600 centals of Wheat less. Rio de Janerio has taken 26,366 barrels of Flour more than in the first quarter of 1868. Our exports of Breadstuffs to this port have not been materially modified.

The returns for the first nine months of the passing harvest year are very suggestive, showing marked increase in Breadstuffs trade with some countries, and falling off in that with New York and England. New York took 40,604 barrels of Flour less, but 674,763 centals more of Wheat. England slackened her demands to the extent of 24,996 barrels of Flour, and 456,666 centals less of Wheat. On the other hand, China increased hers 11,167 barrels of Flour, and 37,826 centals of Wheat. This proves what we have often asserted, that Rice must give way before Wheat with the the spread of civilization. Australia made largely increased requisitions upon our Breadstuffs, taking 31,522 barrels of Flour, and 208,694 centals of Wheat more than in the first nine months of the harvest year of 1868. Rio de Janerio also became an excellent customer, increasing her requirements by 55,937 barrels of Flour, and 6,127 centals of Wheat. Under the head of "All Other Countries," in last year's tables, our exports amounted to 82,034 barrels of Flour, and 67,897 centals of Wheat. This includes Central America, Panama, Manila, Mauritius, Tahiti, Cape Town, Callao, Batavia, Spain, Montevideo, Valparaiso, Russian Arctic Possessions, and Singapore, which are specified this year, and to which we shipped 87,695 barrels of Flour, and 51,489 centals of Wheat—a gain of 5,661 barrels of Flour, and a loss of 16,408 centals of Wheat. The grand arregated shipments of Breadstuffs to all countries shows an increase of 38,853 barrels of Flour, and 444,480 centals of Wheat. Vineyards, Orchards, Gardens, and Pastures, all exhibit the most prosperous and thrifty condition. Farmers and stock raisers, Vineyard Proprietors, and Silk-worm breeders, are jubilant over the bright prospects for the largest yield of their respective interests ever yet realized in this State.

*We presume the Sacramento Union is meant. —ED. FARMER.

SEVENTH MECHANICS FAIR.

We have the circular of the Mechanics Institute, which announces their *seventh* Industrial Exhibition which will be held at their splendid Pavillion, commencing on the 14th day of September next and immediately after the close of the State Agricultural Fair.

It is the intention of the Management to invite contributions from abroad, and efforts will be made to have visitors and contributors from China, Japan, the Island of Mexico, Peru, Chili, etc.

We would suggest to the Board of Managers the great importance of sending out their Plans, Premiums, Regulations, so that the *Public* may know them and *prepare for the* Exhibition. The great error in our State, is the late period at which these plans are sent out—too late for many to prepare.

WHITE PINE! WHITE PINE!!

Still the fever rages, and to some, the Lunatic Asylum will be their Home instead of Palaces, and coveted millions. There are now in the aggregate over Two HUNDRED MILLIONS of Dollars, as the total of the Companies already formed, and *new ones* are daily added.

Well! Dog Days are coming, and people must *run mad!* There are always some that *will* do so—but—our motto is, "Let well enough alone."

—When a man and woman are made one by a clergyman, the question is, which is the one.

Acknowledgements.

Articles Received at the California Farmer Exhibition Rooms, No. 320 Clay Street.

We have received the *Sixth Annual Report* of the Trustees of the Massachusetts Agricultural College at Amherst, Mass. This Report is full of important and interesting matter, a portion of which we shall be most glad to publish, to aid by their examples of success, other colleges who seem to be groping their way in the dark.

The Massachusetts Agricultural College is now a success, and in a most prosperous condition.

We acknowledge the receipt of a few parcels of Seeds from Hon. Horace Capron, Commissioner of the Agricultural Department at Washington, D. C.

We are indebted to Hon. W. Higbee, M. C., for Volumes of Agricultural Reports for '67, for which we return thanks.

American Educational Monthly.—We have the late numbers of this valuable publication issued by J. W. Schemerhorn & Co., Bond Street, N. Y. This Monthly is devoted, as it purports to be, to the cause of *Education*, and contains many valuable essays upon all the most important subjects bearing upon Teachers, Schools, Books, etc. A valuable periodical for Teachers.

MAGAZINES.—We have received several copies of *Leisure Hours*, another new magazine, published by O'Dwyer & Co. of Pittsburgh, Pa. A pleasant magazine.

Bee-Keeping, Bee-Hives, etc.—We have a little volume by Jaspar Hogen of Albany, N. Y., on the subject of *Bees, Bee-Keeping*, and the "Eureka Hive." We shall examine the work and report.

Once a Month.—This happy little messenger of good tidings, comes to us regularly, and we peruse many good things from its cheering pages.

We have received the January and February numbers of the *New Monthly*, by George Husmann, Esq., the well known *Grape Culturist.*

This Monthly is to be devoted to Grape culture, and under the management of George Husmann and Charles H. Fring, will undoubtedly make a most successful Journal, as Grape culture is to become one of the most important interests of the country. We shall take early opportunity to cull from its pages.

Catalogue.—We have the new Catalogue of J. Cline, Esq., Nurseryman of Rochester, N. Y., containing his colored plates of new Strrwberries, Raspberries, and Grapes, and making a very handsome showing, giving 14 varieties of strawberries, and 2 of Raspberries.

Catalogue.—We have the new issue of R. J. Thomas & Co., Nurserymen of York, Pa. A good Catalogue, with lists of many new and valuable things worthy the attention of our nurserymen.

Catalogue.—From Vick's Gardens, Rochester, N. Y.

Catalogue.—From J. W. Kumerlee, Seedsman, Newark, N. J.

Catalogue.—From J. Vanderbilt & Brothers, Implement Makers, New York.

Catalogue.—From G. A. Dietz, Seedsman, and dealers in Seed Grains, Chambersburg, Pa.

Catalogue.—From L. D. Scott & Co., Fruit Growers, Huron, Ohio.

Catalogue.—From F. Trowbridge, Seedsman, Milford, Conn.

Catalogue.—From J. S. Houghton, of new Fruits, Philadelphia, Pa.

With numberless of others too many to notice this week.

PROSPEROUS RAINS.

We think the "Croakers" about the "Dry Seasons" in California will now *dry up*, for the late refreshing rains of last night and the prospect of more, must convince all that the *seasons of California* have indeed changed.

We have carefully noted and recorded enough to sustain us in our oft repeated declarations, that, according to the extended cultivation of the soil, so would our seasons become more humid and genial, giving us repeated showers during the seasons of our planting, and in the spring with summer showers and an occasional refreshing of Lightning and Thunder. These but the results of a wide cultivation of the soil and the settling up of the State, thus making more healthy, luxuriant, and prosperous.

[For the Farmer.]

WASHING MACHINES.

Now, Mr. Editor, I wish to ask through your paper, which Washing Machine is the best? Let those who have used them reply, as experience is what is needed to answer the question. I can say that the ECONOMY is truly the "Woman's Friend," from over four years experience I speak this. I learned to love it more, and more, as the time drew nigh that we must part.

I now, have the Pioneer and think it may be *better than no Machine.* But it surely is not equal to *Horner's Patent.* The ECONOMY, with a Wringer attached to it, not only saves time, but strengthens the lungs—is good for school boys to use.

Let others speak. ROSA.

Agriculture in Santa Barbara County.—Our Correspondent residing in that County have his word, and this in common with all in that vicinity, that the season was never better. He says of that section, March 11th:—

"This is a fine climate, and good soil; and that section can be made to "Bud and Blossom as the Rose." Fruit trees are beginning to bloom, the grass and early sown grain is "big enough

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULARS.

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes,
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all the trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for for sale the Celebrated

WOOD'S

SELF-RAKING REAPER.

This Machine stands at Front of all Reapers in this country. It cuts a swath 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so consstructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by gone* Implements, but keep up with the "Progressive Spirit of the Age."

Home Miscellany.

ARCHIE.

BY PHŒBE CAREY.

O, to be back in the beautiful shadow
Of that old maple-tree down in the meadow,
Watching the smiles that grew dearer and dearer,
Listening to lips that grew nearer and nearer;
O, to be back in the crimson-toped clover,
Sitting again with my Archie, my lover.

O, for the time when I felt his caresses
When up from my heart to my cheek went the blushes,
As he said that my voice was as sweet as the thrush's;
When he said that my eyes were bewitchingly jetty,
I told him 'twas only my love made them pretty,

Talk not of maiden reserve and of duty,
Or hide from my vision such wonderful beauty;
Pulses above may beat calmly and even—
We have been fashioned for earth, and not heaven;
Angels are perfect—I am but a woman;
Saints are passionless—Archie is human.

Talk not of heavenly, down-dropping blisses—
Can they fall on the brow like the rain of soft kisses?
Preach not the promise of priests and evangels,
Love-crowned, I ask not the crown of the angels;
All that the wall of pure-jasper encloses,
Makes not less lovely the white bridal roses.

Tell me, that when all this life shall be over,
I shall still love him, and he be my lover—
That in meadows far sweeter than clover or heather,
My Archie and I shall sit always together;
Loving eternally, wed ne'er to sever—
Then you may tell me of heaven forever.

LETTER FROM OUR LADY CORRESPONDENT.

JENNIE GREEN. CHAP. III.

A GLIMPSE AT GRAYSON.

When the sun was low in the East; and friends and companions had returned to their own homes, and Belle Gaye at the piano, made music to the echo of her own heart, and sang to herself.

Jennie sought the solitude of that chamber where years ago her beloved mother had slept herself to death.

With all the events of life, she was heart-sick, weary and lonesome. "Dear Father," seldom spared her a moment for conversation. The sunlight fell in broad bright waves through the curtained window to which she retired.

She clasped her fair brow to think and fell back in surprise for there was the strange artist. She parted the curtains—an eager joy quickening her hand as the artist stranger passed on. Jennie left the window and threw herself upon the sofa and covered her face, wondering if that was the being in love state of existence, of which she had heard was upon her by the delight she had experienced in meeting the stranger.

The man a strong man of the world, long used to the conquering sway he held over his natural love or fancy. Sentiments that did not now resist the power of his will; went from the Southern girls home with the mournful, unanswerable love agitating his bosom.

He led a strange life with the people, and the exploits of his own company were numerous, and daring, and not of that romantic turn to befriend the young wooer.

A rich young fellow, inspired by an old family dislike, had taken the advantage of the lawless times to cut a poor young fellow's finger off!—There had been a quarrel over the event, and one man killed. And the poor young man more dead than alive, had wandered about for help, and sympathy, falling in with the other young man's brother, who lashed him with his whip, and leaving him alive to find his way to a poor woman's house who drove him away with a gun. The house of the young girl's father, was not supposed to be free from the dreadful mystery of many murders. A few lines of regret from his true manly heart were entered in his valuable home. Letter, to the Weekly Republican, as his best refuge from dispair. His mere watching the house with revengeful sentiments, for human scalps were supposed to be hid under their tobacco; and human bones were supposed to be consuming in their lime barrels.

The mansion of Judge Green, gave refuge to a poor lad wounded in the hand, who had lost one of his fingers on Monday morning. And the week began with all the busy turmoil of the times.—Jennie and Belle drove to the village early, and after calling on some of their friends, returned with papers and letters, and found that black dresses were the object of their coming week's industry ready and waiting for their attention.

Their much injured guest was keeping his hiding-place, and needed the pledge of the continued protection of the house which Jennie hastened to give him.

One of her letters she had received from her brother which she recounted to him with the frankness of childhood, secretly hopeing to make him a valuable friend who would be able to give her much information—such a friend as she seemed to need in the absence of her brothers; and often her father leaving only herself and the governess, with only a negro man and his wife and two black children, a boy and a girl to serve them.

(CONTINUED IN OUR NEXT.)

"I don't admire ladies' cuffs," as the husband said when his wife boxed his ears.

[For the California Farmer.]

LET IN THE SUNLIGHT.

Let in the morning sunlight
To cheer each home blest room,
And scatter quick the darkness,
That's gathered there in gloom,
And let each sunburst quicken
The blood around the heart,
And bring bright smiles and pleasant words,
To help each act their part.

The sun is but the emblem
Of the *World* in its ceaseless roll,
That lies in each human heart,
And the eyes look out of the soul;
Then let us all greet this sun-light—
Let its brightness within us shine,
That its warmth, our blood may purify,
Till *Heart, Soul* and *Life* are DIVINE.

AVIO.

HOW TO BE BEAUTIFUL.

It is a question that burdens the mass of womankind so much. Curls and cosmetics are all in requisition to enhance the beauty of "the human face divine"—but what is the result? Youth's roses only to flee the faster—old age will creep on apace; rouge cannot hide its wrinkles, nor can it make any face beautiful. I am a decided believer in the old adage—"handsome is that handsome does." No face has true beauty in it that does not mirror the deeds of a noble soul. Not a thought, word, or deed, but that leaves its autograph written on the human countenance; and I care not whether kind Nature has given her child an ugly face or a handsome one, if the heart that beats underneath all is warm and loving. And if the soul that looks out from the eyes be true and pure, that face will be beautiful always, for it has found the true fountain of youth; though time may fold the hair in silver, and furrow the brow, yet there will ever be a beauty lighting it up that years cannot dim, for the heart and soul never grow old nor die.

LET US HELP ONE ANOTHER.

This little sentence should be written on every heart and stamped on every memory. It should be the golden rule practised, not only in every household, but throughout the world. By helping one another we not only remove thorns from the pathway, and anxiety from the mind, but we feel a sense of pleasure in our own hearts, knowing we are doing a duty to a fellow creature. A helping hand, or an encouraging word, is no loss to us, yet it is a benefit to others. Who has not felt the power of this little sentence? Who has not needed the encouragement and aid of a kind friend? How soothing when perplexed with some task that is mysterious and burdensome, to feel a gentle hand on the shoulder and to hear a kind voice whispering: "Do not feel discouraged—I see your trouble—let me help you." What strength is inspired—what hope created—what sweet gratitude is felt, and the great difficulty is dissolved as dew beneath the sunshine. Yes, let us help one another by endeavoring to strengthen and encourage the weak and lifting the burden of care from the weary and oppressed, that life may glide smoothly on and the fount of bitterness yield sweet waters; and He, whose willing hand is ever ready to aid us, will reward our humble endeavors, and every good deed will be as "bread cast upon the waters to return after many days," if not to us, to those we love.

ENVY AND JEALOUSY.

What fiends of darkness, what wreckers of happiness these two spirits are, when arm in arm they steal into a home, a church, or even a nation. Destruction is sure to follow—it is the serpent that curls in their track, kissing their vile foot-prints. But O, how petty, how contemptible they show forth when they take possession of an ignorant, shallow mind—they show their own true meanness to the blush of modesty. Let us quote an illustration that is both pleasing and instructive:—"Pedro Gonzalez De Mendoza, the grand cardinal of Spain, invited Columbus to a banquet where he assigned him the most honorable place at the table and had him served with the ceremonies which in those times were observed towards sovereigns. At this repast is said to have occurred the well known anecdote of the egg. A mean shallow courtier present, envious of the honors paid to Columbus and meanly jealous of him as a foreigner, rudely asked him whether he thought that in case he had not discovered the Indies, there were no other men capable of the enterprize. To this, Columbus made no reply, but, taking an egg, invited the company to make it stand upon its end. Every one attempted but in vain, whereupon he struck it upon the table so as to break the end and left it standing on the broken part." Illustrating in this modest and simple way that when he had once shown the way to the New World, nothing was easier than to follow it. This anecdote rests on the authority of the Italian historian, Benzoni. It may be deemed trivial, but the simplicity of the report, and the modest and practical sagacity of Columbus, beautifully illustrates a heart too noble to hold such vile guests as Envy and Jealousy.

PASTE.—Dissolve a tablespoonful of alum in a quart of warm water. When cold, stir in as much flour as will give it the consistency of thick cream, being particular to beat up all the lumps, then stir in as much powered resin as will stand on a dime, and throw in half a dozen cloves to give a pleasant odor. Have on the fire a teacupful or more of boiling water, pour the flour mixture into it, stirring it all the time. It will soon be of the consistency of mush. Pour it into an earthen or china vessel; let it cool; lay a cover on, and put it in a cool place. When needed for use, take out a portion and soften it with warm water. Paste made after this receipt will last at least twelve months. It is better than gum, as it does not gloss the paper.

—There is a policeman in every man's conscience—though not always found on his beat.

HOW TO MAKE A YOUNG WIFE OUT OF AN OLD MAID.

It is generally the case that the more beautiful and the richer a young female is, the more difficult are both her parents and herself in the choice of a husband, and the more offers they refuse. The one is too tall, the other too short, this not wealthy, that not respectable enough. Meanwhile one spring passes after another, and year after year carries away leaf after leaf of the bloom of youth, and opportunity after opportunity. Miss Harriet Selwood was the richest heiress in her native town; but she had already completed her twenty-seventh year, and beheld almost all her young friends united to men whom she had at one time or other discarded. Harriet began to be set down for an old maid. Her parents became really uneasy, and she herself lamented in private a position which is not a natural one, and to which those to whom nature and fortune have been niggardly of their gifts are obliged to submit: but Harriet, as we have said, was both handsome and very rich.

Such was the state of things when her uncle, a wealthy merchant in the north of England, came on a visit to her parents. He was a jovial, lively, straight-forward man, accustomed to attack all difficulties boldly and coolly. "You see," said her father to him one day, "Harriet continues single. The girl is handsome: what she is to have for her fortune you know; even in this scandal-loving town not a creature can breathe the slightest imputation against her: and yet she is getting to be an old maid."

"True," repl'ed the uncle; "but look you, brother, the grand point in every affair in this world is to seize the right moment: this you have not done; it is a misfortune, but let the girl go along with me, and before the end of three months I will return her to you as the wife of a man as young and wealthy as herself."

Away went the neice with her uncle. On the way home he thus addressed her:—"Mind what I am going to say. You are no longer Miss Selwood, but Mrs. Lumley, my niece, a young, wealthy, childless widow; you had the misfortune to lose your husband, Col. Lumley, after a happy union of a quarter of a year by a fall from his horse while hunting."

"But, uncle——"

"Let me manage, if you please, Mrs. Lumley. Your father has invested me with full powers. Here, look you, is the wedding-ring given you by your late husband. Jewels,' and whatever else you need, your aunt will supply you with, and accustom yourself to cast down your eyes."

The keen-witted uncle introduced his niece everywhere, and everywhere the young widow excited a great sensation. The gentlemen thronged about her, and she soon had her choice out of twenty suitors. Her uncle advised her to accept the one that was deepest in love with her, and a rare chance decreed that this should be the most amiable and opulent. The match was soon concluded, and one day the uncle desired to say a few words to his future nephew in private.

"My dear sir," he began, "we have told you an untruth."

"How so? Are Mrs. Lumley's affections——"

"Nothing of the kind: my niece is sincerely attached to you"

"Then her fortune, I suppose, is not equal to what you told me."

"On the contrary, it is larger."

"Well, what is the matter then?"

"A joke, an innocent joke, which came into my head one day, when I was in good humor; we could not well recall it afterwards. My niece is not a widow."

"What! is Col. Lumley living?"

"No, no, she is a spinster."

The lover protested that he was a happier fellow than he had ever conceived himself; and the old maid was forewith metamorphosed into a young wife.—*Leisure Hours.*

THE LITTLE BOY'S REBUKE.

There was once a very old man who lived in the house of his son. The old man was deaf, his eyes were dim, and his legs weak and thin. When he was at the table, he could hardly hold his spoon, so much did his hand shake; and at times he would spill his soup on the table-cloth.

All this vexed his son and his son's wife; and they made the old man sit in the corner behind the stove. There he ate his food from an earthenware dish, and he had not always too much to eat, as you may guess.

Well, one day his trembling hands could not hold the dish; it fell on the floor and broke. At this his son and son's wife were so vexed that they spoke harshly to the poor old man. His only answer was a deep, sad sigh. Then they brought him a bowl made of wood, out of which he had to eat his food.

Not long after this, his little grandson, a boy of about four years of age, was seen at work with a chisel and hammer, hollowing out a log of wood.

His parents could not guess what he was trying to do. The little boy said nothing to any one, but kept at work on the log, and looked very grave, as if he had some great work on hand.

"What are you doing there?" asked the father. The little boy did not want to tell. Then the mother asked, "What are you doing there my son?"

"Oh!" said he; "I am only making a little trough, such as our pigs eat out of."

"But what are you making it for, my son?"

"I am making it," said he, "for you and father to eat out of when I am a man."

The parents looked at each other, and burst into tears.

From that time forth they treated the old man well. He had the best place at the table, a nice dish, and plenty of foood.

—Don't imagine trouble; don't borrow it; don't die before your time. When God wants you to die, He will show you how to do it easy.

FLORENCE

The Best for Family Use,

Having the Celebrated

REVERSIBLE FEED AND SELF-ADJUSTING

SHUTTLE TENSION

To the President of the California State Agricultural Society:

Your Committee on Sewing Machines beg leave to report that we have examined the several Sewing Machines on exhibition—the Wheeler & Wilson, Grover & Baker, and FLORENCE—and find that for general family use the FLORENCE IS THE BEST.

J. N. ANDEWS,
THOS. C. McHALE,
L. ELKUS.

SAMUEL H. HILL, ... AGENT.

Santa Clara College, S. J.

SANTA CLARA, CAL.

Conducted by the Fathers of the Society of Jesus.

THE EIGHTEENTH ANNUAL SESSION OF THIS INstitution will commence on THURSDAY, August 27th, 1868

TERMS—Tuition in the Classical and Scientific Departments; Boarding and Lodging; Washing and Mending of articles; School Stationery; Medical Attendance and Medicines; Fuel, Light, Baths, etc., per session of ten months,.....$35

For further information apply to the President of Santa Clara College, Santa Clara, Cal., or to Rev. A. Maraschi, S. J., St. Ignatius Church, Market street, between Fourth and Fifth, San Francisco.

24-3 REV. A. VARSI, S J. President.

To Take Charge of a Place.

A young man with some capital (from $500 to $1000) can hear of a good opportunity to take charge of a new place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

No one but a steady and industrious young man need apply.

The applicant must be able and willing to work, and have a love and taste for rural life. To such a person a good chance can be given.

OUR HOME INTERESTS.

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact), and the probability that unless checked this large sum of money will be increased each year, until, in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, to be sent East for investment in the purchase of Life Insurance, instead of being retained at homes to promote and foster by ITS INVESTMENT HERE the commercial, mechanical, and agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States of the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION *whose capital and assets will not be impaired or injuriously affected by the change in values that will sooner or later occur by a return to specie payments in the other States of the Union.* Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to the citizen of this State, who feel an interest in its progress, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

THE CALIFORNIA

MUTUAL LIFE Insurance Company Of San Francisco.

Miscellany.

THE TWO CLERKS.

BY WILLIAM L. WILLIAMS.

In Market Square, in the pleasant city of Merryport, was a crockery-ware store, over the door of which was a block sign bearing, in guilt letters, the name of Benjamin Hudson. For many years this crockery-ware store had been there, with the great pitcher hanging in front for a sign; indeed, when Mr. Hudson first opened the store, some forty years previously, he was quite a young man, and the sign over the door was very bright and handsome; but now his eyes had grown dim, and the owner was called "Old Hudson" by all the boys and girls of the city.

The windows of this store had great attractions for all the children that passed that way. There were beautiful vases, handsome China mugs with "Ellen," "Fanny," "William," and lots of other names inscribed upon them; there were also plates with pictures on them representing Franklin's maxims; and funny clocks, shaped like dogs, that would roll their eyeballs to and fro every time they ticked, and many other things curious and ornamental.

Mr. Benjamin Hudson had grown rich in his business, for he had conducted it all himself, and taken care that nothing should be wasted or lost by neglect. He had made mistakes, to be sure, as every man will make some blunders during a life time, but by skillful management he quickly recovered from them. Sixty five years had begun to bend over Mr. Hudson's shoulders, and dim the brightness of his eyes, and he found business more irksome than it formerly had been.

"I must have a partner," said he, one day to himself, as he sat before a cheerful fire. "I must have some one interested in the business who is young and active, and will take the weight from my shoulders, for I cannot do as I used to do."

Now, in Mr. Hudson's employ were two young men—Herbert Bond and Charles Seymour. They had been with him an equal length of time, and had performed their duties faithfully and well.—Charles did his work quickly and had a smart way about him that made people think he was greatly superior to Herbert, who had a more quiet demeanor, and accomplished quite as much without making a great stir about it.

"I must have either Herbert or Charles for a partner," soliloquized Mr. Hudson; "which one I can not decide. They both do very well in the store, but I ought to know something of them out of the store, and I am sorry to say that that is a point I never have paid proper attention to. My clerks come here in the morning and go away at night; what becomes of them over night, I know not; and yet I ought to know. Neither of them have parents in the city; they live in some of the numerous boarding-houses, and I hope are steady and well behaved. I must see them in their homes, and then decide which shall be my partner."

The next day Mr. Hudson ascertained the boarding places of his two clerks, without letting them know for what purpose; and after supper, that evening, his wife and daughters were somewhat astonished to see him go to the hall, and put on his coat and hat.

"Where are you going papa?", asked Lily the youngest daughter, who could hardly remember the evening when her father had not remained at home.

"I am going to make a call, Lily, on two young men of my acquaintance; shall not be gone long," replied Mr. Hudson. And, bidding them goodnight, he went out.

Herbert's boarding house was the nearer of the two, and here Mr. Hudson stopped first. It was a neat looking house, in a very pleasant street. Mrs. Buntin, the landlay, opened the door, when Mr. Hudson rang.

"Does a young man named Herbert Bond board here?"

"He does. Walk in sir, and I will call him," replied the woman.

'I will go to his room, if you will show me where it is,' answered Mr. Hudson. 'I presume he is in it, isn't he?'

'I think so; he is seldom out of an evening. You can step up there if you like, sir; go up two flights and the first one on the right is the one,' replied Mrs. Buntin.

Mr. Hudson, puffed up the stairs, and knocked with his cane at the designated door. It was opened by Herbert, who looked very much amazed when he saw his employer, and said:

'Why, Mr. Hudson, is anything the matter at the store? Nothing happened out of the way, I hope?'

'No—nothing—nothing at all,' said Mr. Hudson, walking in, and taking a chair. 'I took a notion to call around and see how you were this evening.'

Bond expressed himself as being very glad to see his employer; and while he took his hat and cane, Mr. Hudson glanced around the chamber. It was an atic room, with two dormer windows; a good fire was burning in a open grate; a book-rack, filled with books, adorned one side of the room, while the centre of the floor was occupied by a table, on which were writing materials.

'You look very cosy here, Herbert; but why do you have an atic room? Are there none that you can have below stairs?'

'O, yes, sir; but this room is a dollar per week cheaper, and I have all the more money to send to my father," replied Herbert.

'Isn't your father well off?' inquired Mr. Hudson.

'Not very, sir; he used to be pretty rich, but his business was disastrous, and he lost a great deal of money,' said Bond.

'What do you find to do evenings? Doesn't time hang heavy?'

'O, no, sir! I have books to read, and letters to write. To-night I am writing home; they want me to make them a visit; but I write father that it is a pretty busy time just now, but when it is over I shall ask you for a few days absence,' answered Herbert.

'You shall have it willingly,' said Mr. Hudson and then he added: Does Charles ever call upon you?'

'No, sir. I have asked him to do so several times, but he has never called.'

'Are you contented here in this boarding house?' inquired Mr. Hudson.

'It is a very good boarding house, and Mrs. Buntin treats me very kindly; but I often wish that I could live at home with my father and mother,' answered Herbert.

'And why can't you? How far is it from here?' asked his employer.

'It is twenty-five miles, sir; rather far to travel every day; and then I cannot afford the expense,' was Herbert's reply.

'What time should you reach the store in the morning?'

'At half-past eight, sir.'

'And you would have to leave at what hour in the afternoon?'

'About half-past five, sir.'

'Not very bad hours for business: Perhaps it can be arranged so that you can live at home, Herbert.'

'O, I should like it so much, if I could! I am so homesick here in the city,' was the clerk's reply.

'Well, I'll look into the matter, Herbert. It seems a pity that one who is fond of his home can't live there, in these times of railways and fast traveling,' said Mr. Hudson; and he rose to depart. Herbert thanked him for his visit, and said it would please him to see Mr. Hudson again.

The old gentleman descended the stairs, well satisfied with the call, and said to himself: 'Now for Charles Seymour's. I hope I shall find him as well occupied as Herbert Bond.'

On the way to the house, which was three or four streets distant, Mr. Hudson's attention was attracted to three young men, who were talking very loudly, and acting in a rowdy manner, pushing each other against the passers by, and making rude, insulting remarks to them. It so happened that Mr. Hudson wore a white hat. So when these fellows past him, they looked behind and said: 'O, what a hat! 'Who stole the donkey?' 'The man with a wite hat!' and similar impolite observations. As they walked much faster than he did, they were soon out of sight

The boarding house was reached, the bell rung, and Mr. Hudson admitted. The servant said that Seymour was in, and ushered him to his chamber door. Mr. Hudson knocked, and the door was immediately flung wide open, and a voice exclaimed:

'Well, old fellow, got along at last, have you! We're all ready for you; have you got the———,' Charles Seymour stopped here, and his face turned deadly pale at seeing, instead of one of his boon companions, his venerable employer. It was several seconds before he could recover his speech. 'I beg your pardon, Mr. Hudson; you must excuse me; I expected a friend this evening, and, in the dim light of the entry, I thought you were he. Walk in, sir, and sit down.'

Mr. Hudson entered the room, and was somewhat surprised to see there the identical three young men who had insulted him in the street; they were smoking cigars, and had their feet elevated on the bureau, mantel-piece and bedstead. Mr. Hudson saw at once that he was a very unwelcome guest. The room was in confusion, and Seymour's actions were painfully awkward. Nevertheless, his employer started a conversation, and had been there about ten minutes, when a footstep was heard on the stairs; and then the door opened a little way, and a bottle of shampagne came rolling across the floor, following immediately by a round Dutch cheese, a bunch of cigars, and two more bottles—Seymour looked dreadfully distressed, and could do nothing. It was a fourth friend who had been out for refreshments, and took this facetious mode of introducing them into the chamber. Mr. Hudson thought it was time for him to go; so he took his leave, and returned to his home. It is almost needless to say that Charles Seymour's enjoyment of the evening was decidedly marred by this unexpected visit. He and his friends had arranged for a jolly good time.

Mr. Hudson was not long in making up his mind as to which one of his clerks he would make the most faithful and efficient partner; and in less than a week it was announced in the papers that Herbert Bond was a member of the firm of 'Benjamin Hudson & Co.' It was a happy day for Herbert, for he could live at home again, amid the scenes of his childhood; and it was not many years before he managed the whole of the business himself, and became a wealthy man.

Charles Seymour knew very well the reason of Mr. Hudson's choice, and he never ceased to regret having formed such unprofitable acquaintances as were assembled in his room that unlucky evening.

LABOR.

Why, man of idleness, labor has rocked you in the cradle, and nourished your pampered life; without it, the woven silk and wool upon your back would be in the shepherd's fold. For the meanest thing that ministers to human want, save the air of heaven, man is indebted to toil; and even the air, in God's wise ordination, is breathed with labor, It is only the drones who toil not, who infest the hives of the active like masses of corruption and decay. The lords of the earth are working men, who build or cast down at their will, and who retort the sneer of the "soft-headed" by pointing to their trophies wherever art, science, civilization and humanity are known. Work on, man of toil! thy royalty is yet to be acknowledged, as labor rises onward to the highest throne of power.

Is a man that reads a book bound in sheep in danger of getting on the rampage?

AVERY

PUMP WELL

COMPLETE FOR USE

THE TUBE WELL IS FORMED BY DRIVING prepared Iron Piping into the ground with a sledge Although of comparatively recent invention, these Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well, all surface water, dirt etc, being excluded. The Tubing is coupled together in lengths of five or six feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Lift Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. ☞For circulars, etc., address Postoffice Box, 17. UHRIG & DEWEY.

Office at 318, Pine street. 31-10.

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.,

upon the red cover of the packages

Railroad Lands.

CENTRAL PACIFIC RAILROAD, LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultura lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

[Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, April 8

The Grain Market has a still further tendency downward; and the last Telegraphic news from Liverpool, sends the *lowest* price, that Wheat had fallen to, in two years. This news and the good promise of our increase in the general crop, gives proof that Wheat and Flour must rule low for some time to come.

The advices from New York, are also downward, and no export demand—besides good crops everywhere.

The evidences are gathering all around us of a remarkable success in the crops of this State.

Haying has begun—Barley is strong and heading out where early planted. Wheat never promised so well; nor so abundantly. The continued showers come as a regular refreshing. These circumstances all combine to make the evidence doubly, sure that prices *must* rule low.

It is most earnestly hoped our Grain Growers will now consider well a wise course to pursue this year, and begin now to send away all the surplus at the price the Market bears, and thus make way for the new crop that must come in early.

Our Wool Growers' prospects are more cheering. Evidences are increasing to show that Wool will bear a better price than last year. Our increased demands for our Home product, and this with a better rate abroad will benefit our own growers.

Potatoes are abundant, California Beans continue to bring good prices, and other products seem to meet a fair reward.

Retail Prices in the Fruit Market.

Spring is making rapid strides upon us—in fact Summer is close at hand, which our friends in San Jose Valley can fully testify; and to be convinced of the fact, our citizens should pay an early morning's visit to our Fruit Market, and see the qualities of delicious Strawberries brought to Market during the past week, from five to seven hundred pounds have daily been brought from San Jose Valley, and all disposed of at prices ranging from 75cts to $1 00 per pound. San Jose Valley is bound to be the paradise of this State. It being so contiguous to the "City of the World" (is to be) that Orchardists and Fruitists would do well to look ahead a little and prepare for the future demand which will exceed all our anticipations; and at the same time make themselves acquainted with the most suitable and best sorts for planting, etc. The American Fruit Culturist by Thomas is the best reference. Every one possessing a few rods of ground should, be in possession of this book. It is crowded with practical remarks, and full of every information necessary to guide the amateur as well as the practical Orchardist.

FISH

(Tessmore and Hayes.)

Salmon is the most plentiful Fish in the Market, and the demand for it, by fresh arrivals is extremely wonderful. Of course, it is not to be wondered at, when we know that in London and New York, at this period of the year, it is worth from three to five bits per pound. Smelts in the Market are good, but not very plentiful.

AUZERAIS HOUSE,

SANTA CLARA STREET,

San Jose, Cal.

J. M. STAPLES, PROP'R.

—ALSO—

LAKE HOUSE,

DELMAR AVENUE,

SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most agreeable place of resort. Parties wishing rooms and board will please apply to J. M. STAPLES,

31:1 Proprietor of the Auzerais House.

Traveling.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southhampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

March 10th—GOLDEN CITY, Capt W. F. Lapidge, connecting with ALASKA, Capt. Gray.

March 18th—MONTANA, Capt. E. S. Farnsworth, connecting with RISING STAR, Capt. Connor.

March 30—COLORADO, Capt. W. H. Parker, connecting with HENRY CHAUNCEY, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se4 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings. Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento or alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17:13 J. WHITNEY, JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, UNtil further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9 50 A. M.; Reno at 4.20 P. M; Wardsworth at 6.30 P. M. Winnemucca at 3 30 A. M.; Argenta at 8 50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12 05 P. M. Reno at 2 19 A. M. Colfax at 9.50 a. m. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6.30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Colcma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada,

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermit, Silver City, Owyhee, and all points in Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages for White Pine, and Overland Stages for Salt Lake City and the Atlantic States.

C. CROCKER,
General Superintendent

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,
(Of the firm of Hucks & Lambert.)
No. 708 Lombard street, North Beach.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure u are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S

CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER and BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It has been our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effect.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the perfect use of the Stomach, Bowels, Brain, and the whole Nervous System, should be vast and vital importance to human health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has so close connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal atrocity or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Menses, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three-fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, and complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet on examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. A'S LIVER PILLS in cases of AGUE AND FEVER, when taken in connection with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow their use. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are unsurpassed to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S

American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and be ever quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, judicious in other respects, but which entirely fails in consequence of worms being overlooked. Even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an areola or circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or frothy tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a gnawing sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nauces and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently tinged with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual in providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water every morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten, a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows:—DR. McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by
FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of fifty cents in Government Stamps.

THE KIRBY REAPER AT WORK.

MASSACHUSETTS AG. SOCIETY.

[REPORT OF COMMITTEES.]

To the Honorable Senate and House of Representatives:

The Trustees of the Massachusetts Agricultural College respectfully submit the following Report, in accordance with the requirement of its charter, and of the law of the United States granting lands for its endowment.

The liberal appropriation of $50,000 by the last legislature has proved in the highest degree beneficial, not only in furnishing necessary means for the development of the institution, but in disarming opposition, overcoming prejudice and securing the confidence and sympathy of the public. The general feeling during the year, as represented by the agricultural and other papers, has been exceedingly friendly, and the kindest and most hopeful sentiments have been expressed by many distinguished citizens of this and other States who have visited the institution.

There can no longer be any doubt that there is an abundant demand for the education which the plan of organization adoped is designed to afford. Notwithstanding the numerous changes and the constant distraction inseperable from the building operations of the past year, the students have been as deeply interested and as successful in their studies as could be desired. The peculiar character of the course of study renders it difficult for persons to enter the regular classes except at the beginning of freshman year, so that the size of the classes will unavoidably diminish up to the time of graduation; and this may be expected to occur to a much greater extent than in the older colleges, because there are so few institutions of a like character from which the membership can be replenished.

While it is indispensable for the highest success of the College, as a professional school, that its regular course be very thorough and complete, it is perhaps equally important that it should offer every possible facility to those who choose to follow a select course adapted to their individual circumstances and necessities. It has hitherto been impracticable to furnish rooms and instruction to any considerable number of this class, and not until quite recently have they been invited to become members of the institution. It is evident that, as soon as the requisite supply of buildings, apparatus and teachers can be obtained, so that instruction may be given every year in all the studies of the course, there will be a large attendance of young men, designing to be farmers and eager to acquire the latest and best information respecting their chosen profession. As students of this class will generally be mature, industrious and specially interested in the departments of agriculture and horticulture, their influence upon the members of the regular classes, under suitable management, will be of a desirable character.

SCHOLARSHIPS.

Nearly all the agricultural societies of the State have shown their interest in the College by voting to pay the term bills of one or more students, the amount per annum for each being $54. As an excellent example of the mode of proceeding in the choice of scholars, the following statement is extracted from the report for 1868 of the Worcester North Agricultural Society:—

"The Committee to which was intrusted the duty of awarding the Scholarship established in the Massachusetts Agricultural College by the Trustees of this Society, sent a copy of the following circular to each member of the Board of Trustees.

'To the Trustees of the Worcester North Agricultural Society:

You are hereby notified that the undersigned will be in session at the hall on the grounds of the Society, on Tuesday, the 4th day of August, at half-past one o'clock, P. M., for the purpose of awarding the Scholarship of the Society in the Massachusetts Agricultural College.

Students proposing to compete for the scholarship must be 15 years old, of good moral character, and will be examined in English grammar, geography, arithmetic, and in algebra to quadratic equations.

It is earnestly desired that the trustees in each town will induce at least one young man to present himself as a candidate. We believe that no educational institution offers a better general and special education to its students than the Massachusetts Agricultural College. As agriculturists we should desire to give it such aid and encouragement in its infancy as to place its permanent success beyond question.

In making your selections, it will be proper to give a preference to persons of limited means, and particularly to such as propose to devote themselves to agricultural pursuits.

JABEZ FISHER,
JOHN BROOKS,
SOLON CARTER,

Fitchburg, July 20, 1868. *Com. on Scholarship.'*

At the date therein named, three candidates presented themselves, and after a written, competitive examination, lasting five hours, the scholarship was awarded to Wm. E. C. Whitney of Harvard.

He has since passed a satisfactory examination at the College and is now pursuing his studies as a member of the freshman class.

JABEZ FISHER, *Chairman.*"

At the present time the following societies maintain scholarships, viz: The Massachusetts Society supports three; Essex and Plymouth two each; Barnstable, Bristol Central, Berkshire, Franklin, Hampden, Hampshire, Franklin and Hampden, Hingham, Highland, Middlesex South, Norfolk, Worcester, Worcester North, Worcester South-East, and Worcester West, one each.

There are many indigent young men who would gladly secure a college education if they could enjoy the benefit of a scholarship, and it is confidently hoped that from time to time gifts and bequests may be made to the corporation for the establishment of scholarships and prizes, which may serve to stimulate, encourage and help worthy students in the effort to prepare for an influential and useful life.

LABOR FUND.

There is, however, another method of assisting indigent students, which is peculiarly suited to the circumstances and object of the College, viz: to furnish them labor at fair wages whenever they desire it, both in term time and in vacation, except perhaps in winter, when they could earn more in teaching or some other business, and when their work on the farm would be less valuable than at other seasons. This employment of students for money has been practised during the past year and with satisfactory results. A large amount of farm work has been performed, and the young men have proved faithful and industrious. As, however, the College has no funds to appropriate to this object, and a large proportion of the labor must be expended on improvements, or products to be consumed on the premises, it is obvious that only a limited number can thus be assisted. Suppose, on the other hand, liberal-minded and large-hearted friends of agriculture and education should establish a fund of say $100,000, the income of which should be expended for the labor of students on the farm and in the garden, several most desirable things would be accomplished.

First. Young men would be aided in such a way as to preserve their self-respect, and their habits of industry and manual labor.

Secondly. The College having such a fund would never lack for students of the best character.

Thirdly It would render it possible not only to manage the farm with due reference to pecuniary profit, but also to adopt and carry out a suitable system of improvements, and to perform such experiments for the benefit of agriculture as the object of the institution demands

Fourthly. It would enable the director of the horticultural department to proceed with the important work of laying out, planting and keeping in proper condition the botanic garden, the arboretum, the nursery, the orchards and the vineyards.

Would not money given to such a fund yield a most satisfactory per cent of blessing to the world, and thus of good to the giver? When the national government has provided the estate and the endowment, and the Commonwealth has liberally granted buildings and appliances for instruction, there surely must be some among the wealthy friends of the College who will contribute of their abundance to a Labor Fund.

MASSACHUSETTS HORT. SOCIETY.

[REPORT UPON THEIR LIBRARY.]

The value of a well-selected library to the horticulturist cannot be over-estimated. From books he reads the record of the failure and success of others, and by means of these charts he is enabled more certainly to hold his course to the wished-for port. But even a small horticultural library is an expensive luxury, in which very few can afford to indulge.

As a rule, scientific books are very expensive, and in this the science of Horticulture offers no exception.

The cost of a single illustrated volume may be a hundred dollars, and full sets are still more costly. And here we touch upon one of the great missions of our Society, which, formerly neglected, even now, we fear, is not fully appreciated.

To give each member access to a complete horticultural library is one of the duties which, as a Society, we are called upon to perform. Individuall we cannot have such a library; its cost would exceed our means, even before its bulk outgrew the accommodations of a private house; but as a Society, we can have it, and thus each member can, individually, have the use of it, and be a quasi proprietor.

Again, in Horticulture there are many thousands of volumes which are only useful for occasional reference. With these we would not cumber the shelves of a private library, but such works would find their proper resting place in the library of our Society. Here they would be accessible to all, reference would be easy, and the advantage derived from such consultation by members would be incalculable.

We know there is a class in the community who would sneeringly say, "What is the use of such a lot of books? It is throwing away money."—Thank Heaven, those who hold such sentiments are becoming fewer each year. What is the use of books? rather, how are they not useful? They are for reference, for study, for pleasure, for profit, for information, for assistance in the practice of horticultural science, and in the case of illustrated works, for elevating the mind to a perception of nature's beauties, and affording to all a sight of the wonders of floral life, which, perhaps, only the wealthy can indulge in the living examples.

"Throwing away money!" Rather making a most profitable investment. Looking only at the purchase of a library, in a pecuniary point of view, the lowest manner in which it can be regarded, it is money invested at compound interest.

Experience has repeatedly shown, that a well selected library increases wonderfully in value, and though this aspect is not one which we wish to prominently present, yet it is well it should not be lost sight of, as an answer to the argument that money spent in books is thrown away. As an illustration, the writer can point to volumes purchased by him while Chairman of the Library Committee, a few years since, which now, would readily bring five times the money they cost, and some of which cannot be procured at any price.

And this leads us to another consideration. As we have said, the first cost of horticultural books is large, and for this reason only small editions are printed, often only sufficient to supply subscribers, and thus the books are soon out of print, and become very scarce.

The library of this Society is the proper repository of all such books. There they can be preserved, cared for, used by us in our day, and handed down to coming generations.

We have now a good nucleus for a Library.—We possess many rare and valuable volumes, but there are in Boston, private horticultural libraries larger and finer than that of this Society. We have a good beginning, but our aim must be high: no less than to make our library contain a copy of every published work on Horticulture. This is not the work of a year, or of a decade; a century hence, long after we are laid to rest, it will be incomplete; but we have to remember that our Society, while benefiting us to-day, is not for to-day alone, but for all time, and that while we work together here for mutual advantage, we are also working for future ages, doing our part, be it great or be it small, for the advancement of a science which shall glorify the future, and of which we, perhaps, see but the light before the dawning, the full glory of whose rising, coming ages are to know.

If any one is incredulous as to the deficiencies in our Library, let him merely look over the list of books used by Pritzel in preparing Iconum Botanicarum, which will be found on the first pages of that volume; and, remembering that these comprise only *illustrated* works, see how many of those there mentioned are to be found on the library shelves of the Massachusetts Horticultural Society.

Your Committee are gratified to be able to report, that the circulation of the Library is steadily increasing, and, during the past year, has reached nearly or quite one thousand volumes. Every facility is offered for its use, and the value of the services rendered to the Society by Mr. Buswell, as Librarian, cannot be over-estimated.

The Reading Room has also been in constant use, and is of great practical benefit.

The Committee have expended nearly the whole appropriation of $500, only a small balance remaining, which will be needed for binding. They have added many rare and valuable books, as will be seen by reference to the accompanying lists.—In view of the wants and deficiencies of the Library, your Committee feel justified in asking as large an appropriation as the judgement of the Finance Committee may deem justifiable.

The sum of five hundred dollars is sufficient for the running expenses of library and reading room, and for the purchase of a few new books, but at least as large a sum should be placed at the disposal of the Committee, as a contingent fund, for the purchase of rare or valuable books. Opportunities for such purchases occasionally occur, and often at low prices, but they cannot be availed of unless the money is appropriated, and before a quarterly meeting, at which alone appropriations can be made, the opportunity is lost.

THE PROSPECTS OF THE WINE TRADE IN 1869.

[The *Grape Culturist* by Husmann & Frings, published at St. Louis, Mo., presents the following suggestions upon the Wine trade of America in 1869:]

The price of all merchandise and consequently also of wine, is regulated by *supply* and *demand*. The more the market is supplied, the lower is the price, and the greater the demand, the higher does the article rise in price. The larger the production of wine and the larger the crop, so much larger is the supply, and when we take it into consideration that the production of American Wines, expands from year to year, and that our last crop has been one of the most productive for many years past, (only in some parts of Ohio has the Catawba failed while in most other Wine producing sections of the country it succeeded beyond all expectations,) there can be no doubt, that this year the supply of wine will by far exceed that of any previous period. Besides this, most of the European Wine Countries that send their Wines to America, have in the past season also had an exceedingly large crop; so that the American Wine mart will not experience any want from that source. It remains to be seen whether the *demand* will keep pace with the *supply;* the former depends entirely on the amount consumed, while the consumption again depends more or less on the favorable circumstances of the consumers, in one word, upon the general aspects of business affairs. If business does not improve, we may almost to a certainty expect, that the consumption will not equal our increasin and foreign importation, and that the prices of wine will come down. The question then will be which will have to suffer most from the consequent abundance, the *domestic* or *imported* Wines?

This will depend mostly on the quality and prices of the different Wines brought into the market by one party or the other, and to this point we wish to direct the special attention of the producers of Native Wines. It is not sufficient that Native Wines should be offered in the Market *cheaper* than Imported Wines, but they must also be able to compete in *quality*. What does it benefit a Wine Producer here, for instance if he brings into market a mis-managed, foxy Concord Wine at $1 00 a gallon while petiotized Wine from Cette or Montpellier, at $1 75 per gallon, will suit even the taste of the most patriotic American better? For that reason it must be the earnest endeavor of every American Wine Producer to make the quality of his Wines superior to imported Wines; and really the Native Wines possess all the qualities to make them, under a rational management, take a front rank among all the Wines of the world. Those only of the American Wine Producers whose aim is superior *quality* rather than *cheapness* can look forward with complacency to the competition of Imported Wines, and even under the most unfavorable circumstances, will always find a market for them, while the mis-managed Concord and Catawba Wines, if they are the *purest* grape juice and offered at the lowest figures, will be unsaleable.

[Let the above very correct ideas be impressed upon the Wine Growers of this State, and let California Wines have a name for *Quality* that shall make them as famous as the Wines of *Cette, Montpellier, Burgundy, the Rhine*, or any other famed district. This can be done if the Wine Men of California will it so to be.—ED. FARMER.]

PLANT THE NEW POTATOES.

The remarkably moist season and the continuance of the rains will give to all who desire to secure the *New Kind of Potatoes*, to plant during all this month, and in some places even during the entire month of May.

We would particularly urge upon all who may plant the "Early Rose," the "Goodrich," the "Harrison," the "Chili," and others, to be careful and save all their *Seed-Balls*, from which they can spring new and valuable varieties, that being raised from *Seed*, are indeed NEW CALIFORNIA POTATOES.

As a matter of business and pecuniary gain, it is very certain that those who shall raise the 'Early Rose," and the "Goodrich," will receive a very handsome recompense, as the product of both these varieties are very great, and both will be in great demand another year. We can therefore recommend these kinds as a good, perhaps the best investment that can be made, even better than Mining Stocks.

Agriculture.

GOOD ANIMALS THE MOST PROFITABLE.

Poor animals are not profitable as farm stock.—Breed from the best animals, and let sire and dam be as perfect as possible.

Animals that you can depend on to transmit their good qualities through many generations, must have had a perfect descent from pure blooded stock. If an animal has had a defective ancestry, though in many past generations, such imperfection may show itself at any time in the young stock from such a source. The Devon cattle are noted for having been bred pure, and they stamp their good qualities upon their offspring with much certainty.

The male parent generally influences the size and external form of the offspring, and the female the vital power, health and constitution.

The best thorough bred stock will degenerate, unless supplied with nourishing food, and kept in general good health.

In-and-in breeding should be avoided generally, and only allowed when both parents are singularly free from defects.

A writer says:

"To encourage unbelieving breeders to make a liberal outlay for good blood, I will refer to the marked excellence of some families, where a single sire has transmitted his wonderful qualities through many generations, and over a very wide relationship. "Favorite" is the acknowledged parent of almost every choice pure-bred Short-Horn. It has been claimed that no horse ever made first-class time in trotting unless he had a strain of Messenger blood. Merinoes are not recorded of much account unless they come through a certain parentage. My friend Dr. Randall, the worthy President of the National Wool Growers' Association, called my attention to the fact that at the State Sheep Show at Canandaigua, where there were several sheep of very marked excellence, valued at $3,000 a piece and more; though coming from different States, all were descended from Vermont 'Sweepstakes.' Surely, 'Blood will tell.'"

While we would most earnestly call the attention of all our "Stock Raisers" to the above most excellent and truly scientific article on Stock Raising, which we find in the *Rural American*, and approve it most heartily as true, we would with a greater and more solemn earnestness ask if the *same law* which guides and controls nature in the creation of the lower order of animals, does not apply to *human beings*, only in a higher, stronger, and more important sense.

We hope the day is near at hand when the subject of *Creation* among the Human Species shall be thought of as much importance and create as much interest among Scientific and Medical men, in order that we may create a more Healthy, Purer and Higher type of Humanity; for among human beings also, "Blood will tell."

TRUSTY FARM HANDS.

It has become a general fact, that a large majority of farm hands, at the present day, take little or no interest in the success of their employer, beyond his ability to pay them their wages.—One cause of this state of things is the fact that they are less inclined to be contented in one place, than hands used to be 20 or 30 years ago, and the result is, that farmers are changing their help too often for their own interests, and the interests of those they employ.

It is almost impossible for a farmer to find hands who will work faithfully, unless he is constantly with them. To this fact every farmer can testify. The employer being away, the hands "take it easy;" and when he returns and says, "How is this! I expected you would have done a good deal more than you have accomplished," he receives the reply, "we've all been busy, sir, and no time has been lost."

That reply may be true, as the hands look on the case; but had the employer been present, one-third more work would have been done, and the hands would not have been overworked in the least. It is the loss of minutes that causes less work to be done than should be accomplished.—One stopping here, another there, a "yarn" being told by A. is listened to by B. and C., and thus time is lost; and in numerous other ways which it is not necessary to enumerate.

Nor are but a very few hired men strictly trusty in other respects. Teams are used harshly, and improperly fed, unless the eye of the owner is constantly on them, which cannot always be the case. The great want of farmers is *trusty* help, and the lack of such hands often makes farming "up-hill" work.—*Rural American.*

The *Rural American* is right; but it is not only so on the *Farm*, but in all departments. Men work for money—that is the "Golden Calf," and all bow down before it and worship it.

—It is not the height to which men are advanced that makes them giddy; it is the looking down with contempt upon those below them.

—The apprehension of evil is many times worse than the evil itself; and the ills a man fears he shall suffer, he suffers in the very fear of them.

—That plenty should produce either covetousness or prodigality, is a perversion of Providence; and yet the generality of men are the worse for their riches.

THE VALUE OF A VOTE CONSISTS IN MAKING IT CONDUCE TO THE HAPPINESS AND WELFARE OF THE VOTER.

It can be safely asserted that not one in a hundred of the voters of this great country have ever thought of how much they can be personally benefited by voting. And not one in a thousand have ever figured out how much money they could make if a majority of them voted for specified measures.

It is a "fact" that hitherto none but politicians, capitalists, bankers and speculators ever vote, with any expectation of putting money in their pockets by so doing. It is also a "fact" that those classes invariably do make money out of the "results" of every National, State, City, County and Town election, whatever party wins.

Every voter will acknowledge the truth of these assertions, when they call to mind the millions of acres of the public lands that have been given away to railroad companies and other corporate interests. An within the last three years, Congressmen and members of all the State Legislatures have voted themselves an increase of salaries, when they were elected to serve for the amounts heretofore paid—Congressmen going so far as to vote themselves five thousand dollars in place of three thousand.

All the e instances show, my fellow-voters, the value of a vote "money-wise." Now, if it is right for Congressmen to vote themselves two thousand dollars increase of pay for their services, why is it not right that the voters of the nation should vote themselves money to create property? If it is right that bonds should go notized, why is it not right for the freemen of this Union, North and South, to vote to exempt the laborer's shovel and the mechanic's wages?

One object that is sought to be obtained by publishing this book is to "wake" up the freemem of this nation to the "fact" that they can "make money" by a majority of them voting for measures that will create property for themselves individually. And that they can do so without injuring any one—be he rich or poor—high or low—religious or infidel. And when they find out the "money value" there is in their "votes," by following the directions given in the following pages, it is hoped and expected that they will never again spend time and money "merely" for the sake of electing one man over another. Also, before any election that shall hereafter take place, every one who has the right to "vote" should be sure that he votes for something that will directly benefit himself, and not run his legs off, and his pocket dry, in the service of any candidate for Governor or Congress, who, if they are elected, will be sure to talk and print "buncombe," and under cover of the dust they raise, proceed to enact and approve such measures as will put "money in their own purses."

Don't be frightened off by the cry that such a course of action will be too "sordid" for enlightened freemen; for, remember, those that say so are the very ones who will make money if you cast your votes as they direct. And also, when they say, that if you vote for the theory of this book, you will make too "much money." Remember they mean that it will be too much money "for you," they don't mean themselves—for if they had all the money that was ever coined or printed it would not be too much for them.

Let every voter forever hereafter remember that his vote can be made houses and lands to him if he so chooses. That if he wishes to own shares in money-making corporations, he has only to vote for them, when a majority of the voters are of like mind. And to be sure that they shall be of like mind, every voter must seek to convince his fellow-freemen that such a result will follow their "voting" for them. And so spend time, and, if need be, money, to advance their individual interests, instead of wasting both in the interest of some aspiring politician, accumulating capitalist, banker, or scheming speculator.

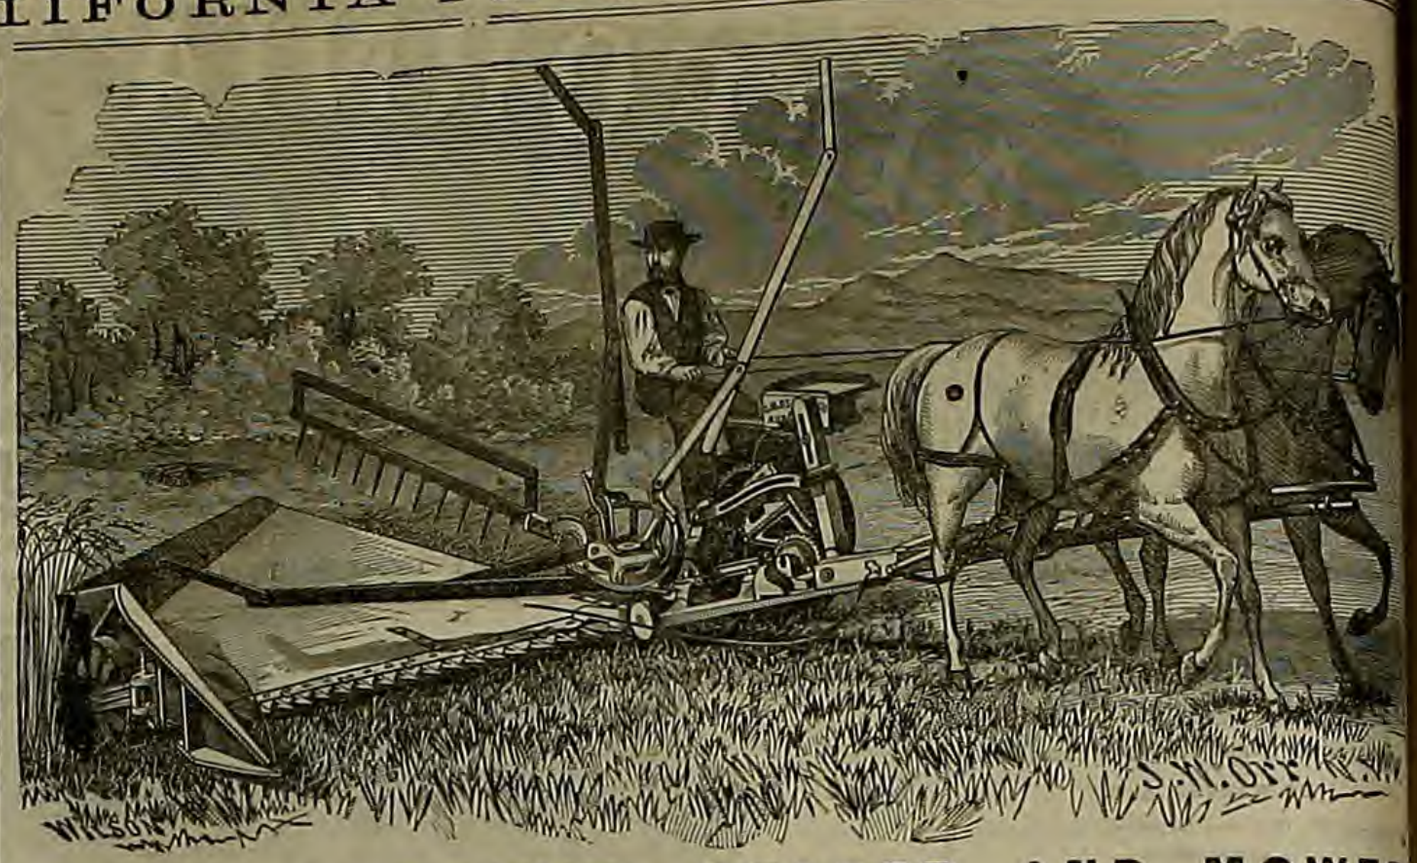
I know that such "teaching" will call down all sorts of hard names about my ears, from those who have heretofore led the voters. And they will say, the doctrine is a horrible one that asserts that voters must vote to benefit themselves "money-wise." Yet the fact is patent to all observers, that these very men are the ones who demand the largest pay for their services, and feel themselves insulted if any party proposes to use without paying them. Observation will teach any voter that all men are better citizens and Christians by having money or property enough. And that it is all "bosh" to assert that a man is debased by seeking after riches, for the very conclusive reason that no teacher of that sort ever follows his own precepts or takes his own medicine.

Let every voter take note of the action of Congress, or of the State Legislatures at the present time, and then seriously ask himself the question—How am I benefited? in what way shall I make money by the enactments of Congress? He will find that money, bonds and lands are given to a few, and tax laws enacted for the many.—*Fortunes for Workingmen.*

Poling Hops.—A Hop grower in Massachusetts says that he can get more and better hops by setting one pole to a hill, than by having two poles, as is the case generally. He denounces Collins' mode; says air and sunshine are essential to the proper development of the product. Collins' mode shades the hops too much; and good hops cannot be grown in the shade. A hill of vines, trained to one pole, will weigh on the average five pounds more per hill than if trained on two poles; and the same are worth more in the market.

—He that envies, makes another man's virtue his vice, and another's happiness his torment; whereas, he that rejoices at the prosperity of another, is a partaker of the same.

—We should take a prudent care for the future, but so as to enjoy the present. It is no part of wisdom to be miserable to-day, because we may happen to be so to-morrow.



KIRBY'S COMBINED REAPER AND MOWER

WITH COMBINED SELF-RAKE AND REEL

TWO COMBINATIONS IN ONE MACHINE!

This is the only TRULY COMBINED MACHINE in the world. While many machines PROFESS to be Combined, and some of them are very good Mowers, there very good Reapers, there are none that Combine both qualities like the KIRBY, and work in either capacity as well as if designed for no other purpose. Its

"MONITOR"

Self-Raking Attachment IS THE MOST PERFECT THING IN THAT LINE EVER INVENTED.

It is COMPLETELY SUCCESSFUL in any or all conditions of Grain, either Heavy, Light or LODGED, or in the heaviest Mustard; as over a Hundred Farmers the Pacific Coast, who are successfully using them this year, can testify.

The Kirby can cut the largest Mustard without any trouble, and rake it off also, if necessary.

We shall keep a large supply of EXTRAS of all kinds on hand.

The working of the "MONITOR" is so complete, that the closest scrutiny cannot discover that the team works any harder when it is taking off the heaviest burd In fact, it is easier for the team to run the KIRBY COMBINED REAPER with the "Monitor" Self-Rake on it, than it is to carry a man to rake off, and the gr are left in much better shape for the binder; so much so, that many claim that it saves the work of one binder, to say nothing of the difference in scattering the grain

By a device lately invented, the size of the gavels can be regulated at the will of the driver, according as the grain stands heavy or light; it consists of a treadle w operates on one of the ways of the Rake-arm, so that the Rake can be thrown and pass over the grain until a gavel of the right size is collected upon the platform then the Rake, of its own accord, will sweep it off.

This machine can be set to cut at any desired height from the ground, from two to eighteen inches, by merely changing two bolts, one in the grain-wheel slide, the n the axle plate, where the joint or independent action is obtained.

This machine never had an equal in heavy lodged grain or grass, as it is in such cutting that it shows its superiority to the best advantage.

TREADWELL & CO.,

Sole Agents for the Pacific Coast.

TRUE'S

IMPROVED

POTATO PLANTER.

This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes, ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatoes in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

Horticulture.

HYMN TO THE FLOWERS.

BY HORACE SMITH.

Day stars that ope your eyes with morn to twinkle,
From rainbow galaries of earth's creation,
And dew-drops on her lovely altar sprinkle,
As a libation.

Ye matin worshipers, who bending lowly
Before the uprisen sun, God's hideless eye,
Throw from your chalices a sweet and holy
Incense on high!

Ye bright mosaics! that with starried beauty
The floor of Nature's temple tasselate,
What numerous emblems of instructive story
Your forms create!

'Neath cloistered boughs each floral bell that swingeth,
And tolls its perfume on the passing air,
Makes Sabbath in the fields, and ever ringeth
A call to prayer.

Not to the dome where crumbling arch and column
Attest the feebleness of mortal hand;
But to that fane, most Catholic and solemn
Which God hath planned!

To that Cathedral, boundless as our wonder,
Whose quenchless lamps the sun and moon supply,
Its choir the winds and waves, its organ thunder,
Its dome the sky!

There, as in solitude and shade I wander
Through the lone aisles or stretched upon the sod,
Awed by the silence, reverently ponder
The ways of God!

Your voiceless lips O flowers, are living preachers
Each cup a pulpit, every leaf a book,
Supplying to my fancy numerous teachers
From loneliest work!

Floral apostles that in dewy splendor
Weep without sin and blush without crime,
O, may I deeply learn and ne'er surrender
Your love sublime!

"Thou wast not, Solomon, in all thy glory,
Arrayed," the lilies cry, "in robes like ours."
How vain your grandeur! O, how transitory
Are human flowers!

In thy sweet-scented pictures, heavenly artist,
With which thou paintest Nature's wide-spread hall,
What a delightful lesson thou impartest
Of love to all.

Ephemeral sages! what instructors hoary
For such a world of thought could furnish scope?
Each fading calyx a memento mori,
Yet fount of hope!

Posthumous glories! angel-like collection;
Upraised from seed or bulb interred in earth,
Ye are to me a type of resurrection,
And second birth.

Were I, O God, in churchless lands remaining,
Far from all teachers and from all divines,
My soul would find in flowers of Thy ordaining,
Priests, sermons, shrines!

THINNING OUT GRAPES.

[A correspondent of the Grape Culturist, of St. Louis Mo. (S Miller), presents the following suggestions upon the importance of *thinning out grapes*, in order to secure *better fruit* and a *better crop*. It will be remembered that this is the same doctrine that the FARMER has often urged upon our Grape Growers—it is worthy of serious attention among our Grape Growers, as here in California our vines and trees are greatly injured by being permitted to over bear.—ED. FARMER.]

Is the importance of thinning out the fruit of the vine, duly considered by the majority of cultivators? I think not.

From close observation; and even sad experience, the subject, in my opinion, calls for much more attention than is usually given.

In young vines this is particularly the case.

Such vigorous and hardy constituted varieties as the Concord, may stand it to a considerable extent; but even they will eventually suffer.

This fault is not only to be found in the Vineyards of the novice, but can be seen almost everywhere in charge of those who know better.

This then being admitted, the next question is, how shall it best be remedied?

Shall we prune so much shorter, so as not to leave more wood than the vine can carry safely through, or leave more wood, and then thin out the bunches?

The latter, in my opinion, will be the best; for by the first plan, we get our fruit too much crowded, and throw too much force into the young canes for the following years bearing.

My impression is, that when a vine is pruned to what would seem about right, the pinching out of every third bunch, at the first operation pinching back, would be the best method.

I would leave but two bunches on each bearing shoot; and in some instances but one.

We all know that the forming of the seed of any fruit, is the heaviest tax on the plant.

This being the case, do we not give considerable relief when we diminish this tax one third?

I think we would be safe in counting on having the same weight of fruit in the two bunches, as if three are left.

Some years ago we grew Concord bunches in this way, which the Committee, who were to test them, would not admit to be that variety until they tasted them.

For marketing table grapes, this is particularly practicable. For instance—let one man take Concords that will average three-fourths of a pound to the bunch, and another have them as usually grown, my word for it, the large bunches will command nearly double price, not only among the wealthy, but the masses.

What is your idea about this? My object in writing this is to elicit experience from others, and your own opinion in particular.

(Our friend is right, in attaching a great deal of importance to the thinning out of the fruit. The overloading of the vines has ruined many a promising vineyard already. The best course, in our opinion, is, not to prune too short, as many buds will not even start; but do the first pinching early; just as soon as the young shoots are long enough to discern where the embryo fruit bunches will be, then rub off all weak shoots, and reduce the number of bunches, as he suggests. In a future number, we will describe it fully, and hope to be able to convince our readers, that this is the proper course to grow the best of grapes).—Editor Culturist)

PORTUGAL.

According to the last advices from Oporto, the Wine Crop in Portugal has given in 1868: 48,000 pipes, about equal to that of 1867, while the production of 1866 amounted to 60,000, of 1865 to 65,000, of 1863 to 83,000 pipes. This enormous deficit, together with the superior quality of this year's vintage has brought about numerous transactions at elevated prices.

It is also reported that at this moment a speculative excitement prevails in the province of Valencia, and that a good number of agents, sent by French houses, are noticed among the many buyers.

As it appears, the troubles now ruling in the peninsula do something to depreciate the Wine prices, and speculation, always alert, will take possession of this year's splendid product of the vineyards in these countries.—*Monthly Statistics.*

LEWISIA REDIVIVIA.

This is a plant supposed to be found in California or on some portion of the Pacific coast, we think it is known in "Washington Territory," and also in British Columbia.

Dr Hooker of the Royal Botanic Gardens at Kew, London) says: Among the plants eaten by the Kootanier, Colville, and other tribes in that part of British Columbia and Washington Territory, is the beautiful Lewisia Redivivia, the roots are gathered in great quantities, and boiled or eaten like *Salep* or Arrow-root. In this state they are not unpleasant to the taste, slightly bitter, but are valued by the Indians as a nutritious food for carrying on long journeys, two or three ounces a day being sufficient for a man even though under great fatigue.

These Indians call it "*Spat Lum*" or "Ptleem-asd-ilse-ne-mare," and look upon it as one of the great gifts of the "Supreme Master of life.

We desire to learn where this root can be found, and shall esteem it a great favor if those who shall read this article and know of its location, will be so kind as to address a letter upon the subject, to the Editor of the California Farmer.

VALUABLE PLANTS FOR SALE.

☞ **Persons who are desirous of securing a few** very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us.

New Advertisements.

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. JOHN GAGE.

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant a grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

Those plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS, making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowands, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

The Floral Guide is published for the benefit of my customers, to whom it is sent free without application, but will be forwarded to all who apply by mail, for Ten Cents, which is not half the cost. Address

30-22-4t JAMES VICK, Rochester, N. Y.

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish *collections* of choice plants, can buy them in quantities at a very low rate, if they visit the *Gardens Corner of Mason and Pacific Street*, in this city, or address EDITOR FARMER.

PREMIUMS for 1869.

With a hope to enlist a new interest for our Journal and to give to those who co-operate with us a just recompense for their time and labor, we offer the following

Very Liberal Premiums

For the Year 1869,

THE THIRTY FIRST VOLUME,

—AND—

SIXTEENTH YEAR

OF THE

"California Farmer,"

We trust the following Premiums will induce those who desire to receive our Journal, and the accompanying New Year's Gifts, to extend to us their generous influence for the Extension of our Circulation, until every family in the Rural Districts shall have a copy of the

"CALIFORNIA FARMER."

TERMS OF SUBSCRIPTION:

(Payments in Gold or Silver, Always in Advance.)

By mail, one year,.....$5 00
" " six months,.....3 00
When payments are delayed six months,.....6 00

CLUBBING.

To clubs of five, (and extra copy), six for... 25 00
do twenty,..... 75 00
do fifty 175 00

Or, we will give as Premiums, as follows:

For every club of five, and $25, Agricultural Books valued at.....6 00

To every club of Ten, and $50, Agricultural Books valued at..... 15 00

For every club of Twenty, and $100, Agricultural Books valued at 30 00

For every club of Fifty, and $250, Agricultural Books valued at 75

Thus securing to a Farmer, or a Farmer's Club, the nucleus of a good Library—The Books to be at our lowest advertised Gold prices.

Every Farming District in our State could by co-operating with us secure a large and valuable Library, without any other cost save a little labor and co-operation to extend the FARMER'S circulation.

To any Lady who will secure us Ten subscribers, and $50, we will send Magazines or Floral Books to the value of $15 00

For Twenty subscribers, and $100, we will send Books and Magazines, or a Sewing Machine valued at 35 00

For a club of Forty, and $200, we will send a "Howe," or a "Florence" Sewing Machine valued at 65 00

Each and every Premium to be at regular Gold Prices, and the Premium to be selected by the winner.

We hope these offers will be so appreciated that we shall have the earnest co-operation of many friends, and to all who shall interest themselves, we shall be ready to fully remunerate their kindness.

Sample copies will be sent, when desired, to those who wish to canvass among their friends.

Address COL. WARREN, Editor.
or WARREN & CO., Publishers

IMPORTANT TO NURSERYMEN, GARDENERS, AND AMATEUR FLORISTS.

We beg to announce the arrival of the choicest and best assorted collection of

RARE SEEDS,

ever received on this coast. They have been selected with the greatest care, from the first houses in Europe, and are comprised of

EVERGREEN, AND DECIDUOUS TREES AND SHRUBS, RARE AND BEAUTIFUL PERENIALS, BIENNIALS, ANNUALS, ETC.;

also, new and choice Vegetables; the assortment is worthy the attention of all who admire the beautiful; and also the particular attention of gardeners who are anxious to secure something rare and new in the Vegetable kingdom.

We shall send them out in small parcels or individual packets, so that many may have the chance of securing the collection. Orders executed in rotation, and carefully packed for mailing any distance.

Persons remitting us five dollars, will have collections of seeds sent them, worth intrinsically double the amount.

WARREN & CO.,
FARMER OFFICE, 320 *Clay St.*, San Francisco.

Jebb's Patent Churn.

This admirable Churn—one of the best yet invented—and which was pronounced

THE BEST CHURN EXHIBITED AT THE LATE STATE FAIR,

and to which was awarded by the Committee

THE FIRST PREMIUM,

is now offered for sale to the Trade, or at Retail, in lot to suit purchasers at the

CALIFORNIA FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....APRIL 15, 1869

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street.—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for *one* insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of *our Journal*, to which we would direct their *special* attention.]

Agricultural College Education.—We ask special attention to the very interesting Reports of the Massachusetts Agricultural College, one of the best managed, and most prosperous Institutions in our country.

Books for Horticulturists.—We invite our Horticulturists to peruse the very interesting Reports of the Committee on the Library of the Massachusetts Horticultural Society, by Edward S. Rand, Esq., Chairan. This Society is now in a mort flourishing condition, having a splendid Hall and property worth about a Quarter of a Million Dollars.

We call special attention of Parents to the excellent article, which we copy from the California Medical Gazette of our city. It should be seriously considered by Parents, for *one-third* of the weekly reports of deaths, are children *under five years of age*, and this is *wholesale slaughter*.

Value of a Vote.—Farmers should read this essay, and they will remember how often they have balloted to help others, and injured their own interests.

Electricity of the Brain.—Here is food for thought. There is truth in these ideas—more truth than poetry.

Diminution of Marriages, should receive a due consideration.

Mother's Birth Day will appear next week. It is unavoidably crowded out this week,

Completion of the Pacific Railroad will appear in our next.

Jennie Green,—The continuance of this Story, by *Bertha Bay*, next issue.

Plant, and Keep Planting—The very favorable weather which has been granted to our Farmers, should wake them up to a rare spirit of Industry. The earth is still soft in many localities, and crops of various kinds can still be planted.

The present time is most propitious for planting *Strawberries*, and many small fruits and seeds. This, with setting out Cabbage, Tomatoes, and many small things, should keep all at work. Every man of family should sow a succession of garden vegetables, Peas, Beans, Radishes, Turnips, etc. so as always to have these luxuries for his own "Home" use.

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the article they have to sell is wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seeds, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their gains largely increased by giving attention to this plan and particularly in everything appertaining to Agriculture and Horticulture.

Newspapers and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* is the life of trade."

ELKA POPULATION.—It is reported that the city of "Elka" can now boast of nearly three hundred people.

HOW THE GOLD GOES, AND WHY?

This State is sending away the Gold by the wholesale, and the business Exchange talks of a *stringency in the money market;* and this it is said is on account of our large exports of Gold East, and the drain for the Pacific Railroad, Manufactures, New Enterprizes, Mines, etc.

Now, to *our mind*, we can easily account for about *One Million of Dollars*, gone unnecessarily the last *three* months, and can show where we might have saved that amount, and added about *Three Millions of Dollars more*, thus making a difference to our circulation here of *Four Millions of Dollars*.

It is a well known fact, that there has been quite a depreciation in the *Value of Breadstuffs* the last three months, and quite a falling off in Exports. The *decrease* in the value of these shipments from January 1st to April 1st, as compared with last year is over *Nine Hundred Thousand Dollars* in value, and our Gold Exports have increased this year over *Seven Hundred Thousand Dollars*.—Here is the secret of the whole thing. Stop sending grain, or depreciate its value and the *Gold* goes and drains our market, and money is scarce and interest higher. Had our Farmers been wise and continued shipments last summer steadily, over Two Million Centals more could have been sent away. This at the price then ruling would have placed on our money market *Three Million Dollars* more, and this money would have been the relief that is now so much wanted.

Farmers! when wheat stops here, you must pay for any extra price of extra interest, cost in storage, etc. There is no gain to the mass of Farmers by the "Hold On" policy.

OUR ILLUSTRATION.

Is not this a pretty picture? who would not wish to be engaged in the ennobling duties of "Rural Life."

Look at this lovely landscape! See the ease and grace with which this young Farmer guides his handsome span of horses, and how handsomely he handles the lines—see the full-headed grain, and see the heavy bundles that the KIRBY has laid so neatly with its *Self-Raker* in the path ready for *binding*. March on KIRBY! the horses are looking to the end of the field, the work being nearly done, and they know it is *done well*, and they will soon go to their stable. Who would not be a FARMER?

Mess. Treadwell & Co. are the sole agents for the Kirby Mower and Reaper.

NEW FURNITURE WAREHOUSE.

We regretted very much that it was not in our power to be present at the Opening Festival which took place at the NEW FURNITURE WAREHOUSE of Mess. Geo. Whitney & Co., on Pine Street, a few days since. Our absence from the city in our Rural Rambles, frequently deprives us of many pleasant city festivities, but as there is no loss without some gain; so what we loose from the *City*, we gain in the *Country*.

We are truly glad to welcome back into the scenes of active business life, our old friend and former patron of the *Farmer*, Geo. O. Whitney, Esq., whose Card appears in our columns this week, at the head of the new firm of Geo. O. Whitney & Co.

We spent a very pleasant hour in looking over the large and spacious Warehouse of this firm; a grand New Building, *four stories high*, with large basement, and well filled from the ground to the uppermost rooms, with the very richest and best styles of Furniture ever shown on this Coast.

Mr. Whitney is one of the Pioneers of California, and a Pioneer in the Furniture business in 1850, and again in later years, is well and widely known, and now as the many friends of the numerous circle of his old customers shall read the announcement of the new opening, they will flock to the standard of this firm and give them a very prosperous business. The large amount of trade they have done in the first few days, is a guarantee that this will assuredly be.

In looking over their many departments, we were particularly pleased to see their large and handsome "Department for Upholstery" here handsomely carpeted rooms, all seperated from the others, await the convenience of Ladies, who desire to select their goods. This is a good plan.

We examined the superb Parlor and Chamber Setts, many of rare beauty and exquisite style, in value from $200 to $1000 each for Chamber Setts, and from $350 to $1500 for Parlor Setts. Several that we noticed of French Design, very unique and costly, Swiss Reception Chairs, superb Tables, magnificent Etargaes, with Wardrobes, Desks, and other Furniture of every kind, to suit either the purse of those of moderate means, or those who claim to be millionares.

Our space will not permit more notice now. We shall make another call, but in the meantime we ask our readers to call and see for themselves, and our young men and maidens in this county, who are now preparing to be married and go to "Housekeeping," by all means to call at the Warehouse of Mess. Whitney & Co., where we are sure they will be well suited, by the new firm of whom we have spoken.

THE SUGAR BEET.—There is quite an excitement at Sacramento and vicinity, relative to the Sugar Beet and Beet Root Sugar interest, and the Stock for establishing a manufactory has been nearly or quite all subscribed. We hope that if such an establishment is gotten up, it will be pressed on to complete success. Better not begin, than begin and not succeed. There can be no question of success if the Right men manage the business.—"Knowledge is Power," and without a true knowledge of any undertaking, there can be no permanent success.

—The merit of our actions consists not in doing extraordinary actions, but in doing ordinary actions extraordinarily well.

OPENING OF THE SOUTHERN PACIFIC RAILROAD TO GILROY.

Never did a brighter day dawn upon a Festive scene than came to the immense and happy throng that was gathered at the San Jose Railroad Depot this morning (April 8th,) for the Excursion to celebrate the opening of this soon to be great and prosperous highway.

At seven minutes past 9 o'clock, 12 passenger cars filled to their utmost capacity, and containing some 1200 or more persons, together with 13 open cars, with about 800 more started from the depot, the band discoursing sweet music, and many groups of people along the streets waving their kerchiefs in token of a merry "God speed you."

The rains of the last night gave a sweetness to the atmosphere and the bright sun revealed as it were a myriad of diamond-hued drops in the grass and on the foliage of the trees and plants along the route, till, by its warmth they melted away.

For some miles from our city, many persons who before may not have been conversant with the rapid improvements that were going on *outside* the city, became interested in the "Homestead Lots" that are being improved and built upon, and many persons speculated in theory upon the great and prosperous condition of our wide extending city in the future.

Everything in nature bears the impress of a most prosperous season; the earth has put on her richest robes, and all the combined art and skill of the famed weavers of *Turkish carpets* could not make the earth as beautiful as it is now, *naturally* arrayed in her robe of beautiful fragrant flowers.

The verdant grass gemmed with the Golden Escholtzia, the Cerulean Nemophila and the Purpurean Lupinus like the Royal Tyrean Dyes, and these interspersed with the Ixias, Violas, Crocus and Tulips, with here and there the stately Fleur d'Lis, made a carpet richer and more grand and beautiful than the art of man ever did or can prepare.

The scenery a few miles from our city is peculiarly beautiful, as the cars wind among the undulating hills, and the Bay reveals itself here and there, forming numerous scenes worthy the attention of our best artists, and we often wonder we have not more "Views around the Bay" from our able Landscape Painters. We formerly heard much and read much of the "Bay of Naples," and many a broad piece of canvas has copied, the laborious skill of ancient artists, but this was before the "Discovery of Gold" brought the "Bay of San Francisco" to the notice of the world. Now let our most eminent artists make this *our* Bay truly known.

As we were on our winding way an hour or so after leaving the depot, there was a slight sprinkling of rain, but only enough to give us a "Rainbow" now and then upon the clouds on the opposite of our sky as they were passing away.

Lively music cheered us now and then, and this with a very merry and happy crowd made the time fly swiftly and kept due pace with the cars that went sweeping on in their course to honor the Day and the Occasion.

On reaching "Redwood City," another gentle shower came down only to be succeeded by sunburst and "Rainbows," and thus we sped on our way.

Along the entire route we could but notice the remarkable excellence of grain of all kinds heavy set, a healthy green, and sure promise of an abundance. It is to be hoped some of the groves of fine *Native Oaks* along this route that yet stand in their beauty on the large farms, may be spared and not fall before the *thirst for money making*. Such spots are too rich in natural beauty to be given up to the Spirit of Avarice or Gain.

As we approached Santa Clara, the rain clouds gave us quite a heavy refreshing, and the prospect was now a *showery day*.

Another "sunburst" and the blue sky comes again; and adding some fifty more to our company at Santa Clara, we speed on to San Jose, and reach there at quarter before 12, being 2 hours, 38 minutes from San Francisco, including stoppages.

At precisely 12 o'clock, with a large addition of company and another band from San Jose, we again sped on, and now upon the NEW ROAD. The recent rains has kept the soil in such good condition that the *Plows* are still at work, and many crops will be planted advantageously. Along the entire route, the hills on the eastern and northern side were brilliant with their rich floral decorations, while the low and level land was rich in natural and cultivated crops. Large tracts of land [illegible] y under one ownership, only wait to be cut up to become a rich luxuriant garden spot.

The old residences, mostly Spanish or native Mexican, show but little improvement or comfort around them—few or no orchards or vineyards add to the adornment of this section of country.

The train arrived at Gilroy at 1½ o'clock, P. M., and such a merry and happy crowd are not usually found. The immense depot, some 400 feet long, had been neatly prepared for the occasion, and two tables extending the entire length was liberally loaded with the good things of life—there had been a most liberal provision made for all that should come, *and they did come by the thousands, and were all provided for too.*

From the main Depot to the building opposite, each being festooned with evergreens, there was placed banners, on one of which was written

"WELCOME TO GILROY."

and upon the other

"NO SNOW BLOCKADE."

Gilroy has a natural and very beautiful location, and is destined to be a very prosperous and thriving town. The Valley is some 16 miles long, and 12 broad. The soil is rich, the climate salubrious and healthy, and the people generally Farmers, are prosperous and contented. The main street of Gilroy *looks business*; there are several good business houses, and the Hotels of the place, each and all are doing a good business. The main street is broad and long, giving a grand beginning for a large town, which, by reason of the opening of this Railroad, and the increased value of land, must eventually become quite a prosperous place. We noticed a *coffin-shop*, and when we looked upon this pleasant and healthful Valley, we felt impressed with the fact that the *coffin-shop* would have but a poor business here.

While waiting for the cars, we could but feel that with streets so well crowded and the Depot thronged, the people of Gilroy would not very often look upon the like again, as by the least computation there must have been from 2,500 to 3,000 people assembled there.

About 3½ o'clock P. M., a meeting was organized for speakers, and very soon the interests of Railroads was the theme of the speakers; although there were several good speakers, there was none whose words seemed to entrance his hearers like the words of W. H. L. Barnes, Esq., whose eloquence was indeed of the true metal.

After a season of speaking, the meeting merged into a merry Dance, and this was continued until the bell announced the departure of the train from Gilroy at the hour named, 6 P. M., for San Francisco, and the conclusion of the Festivities for them. The Festive scene was kept up in the evening by the citizens of Gilroy and the neighborhood, and they made a merry and happy time of it.

We have noticed some of our Journals have made complaints of the hotel charges there; no one need to have gone to a hotel, as there was ample abundance at the Depot, and of the best, and we can say, without fear of contradiction, that the Banquet at Gilroy, for completeness and liberality, reflects the very highest credit upon the Managers of the occasion. It was one of the most liberal outlay, and most complete arrangements for the guests invited that we have ever attended, and none but the extremely selfish could have found reason to complain.

One thing should be mentioned, to the credit of this large assembly; although a mass of people of all classes and ages, yet we saw no noise or confusion—heard no swearing or coarse language, nor did we see a single person intoxicated, notwithstanding the very free and liberal use of wine, champagne, etc. This certainly was most creditable to all concerned.

The whole celebration reflects credit upon the President and Directors of the Road, and of the citizens of the Towns who showed their liberal co-operation on the happy occasion.

OUR MINING INTERESTS.

The recent increasing attention paid to the mining interests of our State has caused a corresponding attention to the invention of new and various kinds of machinery, and of apparatus to carry on the work of Quartz Crushing, and of separating and saving of Gold, Silver, Quicksilver, Sulphurets and Amalgam. As great loss accrues from waste in all these, therefore every effort of mind has been given to secure the best kind of machinery and works to this end.

Among the many new and valuable inventions that have excited public attention of late, we notice as most prominent "The Evans Corrugated Riffle and Concentrator."

As an evidence of their value, we give the following letters which have been received, speaking of their value and excellence, and coming as these letters do from men practically engaged in mining, they speak with effect.

Those who wish to see and know these valuable aids to mining should call at the Paper Warehouse of S. P. Taylor, Esq. on Clay Street, where the Riffle can be seen.

The following are the letters to which we have alluded:

OFFICE NEVADA MILL, VIRGINIA CITY,
April 7, 1869.

O. T. GRAEF, ESQ.—*Dear Sir:*

Your favor of March 26th came to hand in due time, and this is the only moment I have had to answer, intelligently. At the last of the month and until after pay day on the 5th of each month, I am exceedingly busy, and this month much more so than usual from the fact that I shut down my mill on the morning of the 2d to put a new engine in, and am now running the work night and day to finish it in the shortest possible time.

With regard to the "Evans' Riffles" I have this to say: nearly one year ago, Mr. Evans made, or rather, I had a short section of [illegible] Riffles made under his direction, as an experim[illegible], and it performed very satisfactory, saving [illegible]artz, Silver, Amalgam, and Sulphurets. Since [illegible] return here, they have had his Riffles workin[illegible] at the Rhode Island Mill at Gold Hill. I talke[illegible]ith Mr. Pierce the superintendent since receiving your letter and he speaks in the highest terms of the Riffles, and says they have saved him thousands of pounds since he has been using them, and considers them very valuable, and a great acquisition to any mill. I have also tried a four feet section in the Ogden Mill when Mr. Taylor and Evans were here, which surpassed my expectations in the amount of Amalgam and Quartz Silver saved, in less than an hour's run. Our Mill Company would not authorize putting them in these mills permanently, for the reason that they expect to take all the mills to the river soon, and will not expend any money in any shape now, where there is a possibility of getting along without it.

If I had a mill of my own, I would surely have these Riffles, as I am certain they will make a great saving in Quartz Silver.

Wishing the Riffles and yourself success, I am dear sir, Yours Truly, S. B. HOPKINS.

GOLD HILL, NEV., March 10, 1869.

MR. S. P. TAYLOR—*Sir:*

I have seen in operation below the Rhode Island Mill, Evans' Corrugated Riffle and Concentrator, and I do not hesitate to say, that it is the very best apparatus yet invented for saving Quicksilver, Sulphurets and Amalgam.

Respectfully Yours, THOMAS ARMSTRONG.

Acknowledgments.

Articles Received at the California Farmer Exhibition Rooms, No. 320 Clay Street.

Congressional—We are indebted to Hon. Cornelius Cole for valuable Documents from Washington, for which we return thanks.

We have to return thanks to Hon. M. P. Wilder for valuable Reports on Horticulture, and for interesting Reports upon the Massachusetts Agricultural College.

Musical.—We have received No. 1. of Howe's Musical Monthly, a very large and fine Periodical, announced to be issued regularly each month, and to contain over *Twenty Pieces* of the choicest new Waltzes, Marches, Polkas, and others of the very best. This will prove a valuable work to students in music.

Watson's Musical Almanac.—This is a new idea, but *right* however, for there can be no *good* music without *good time*; so an almanac to give good account of time must be musical, and Watson's Musical Almanac is of that sort, and a very good one too.

Catalogue.—We have the new Catalogue of Green-House and Bedding Plants of Mess. Graves, Selover, Willard & Co. of Geneva, N. Y., containing many new and valuable plants.

Advertisers Gazette.—We have the March number of the Advertisers Gazette, by Geo. P. Rowell & Co., 40 Park Row, N. Y. This is really a most valuable publication to Newspaper men, and also to business men, and contains a large amount of business information. It is issued by them at $3 per year—a periodical of 24 pages monthly.

More New Potatoes.—We have just received four more new varieties of Potatoes, to test in the fine climate and soil of our prosperous State. The varieties received are the "White Chili," "Orono," "Patterson Blue," and Seedlings of "Harrison."

These all came safe and in fine order by mail, from the celebrated Potato Farms of L. D. Scott & Co., Huron, Ohio.

Surprise Oats.—By letter, we have samples of the NEW SURPRISE OATS, from the Agricultural Department at Washington, D. C., for which we return thanks. By reason of the very favorable season, new and rare samples of Wheat, Barley, and Oats can be safely planted to secure the seed for another year.

A NEW INVENTION.

ROOFS OF ALL KINDS TO BE IMPROVED.

A patent was obtained a few days ago by the American Fibre Company for an entirely novel mode of constructing roofs and walls of buildings, waterproof floors, tanks, etc.

The fibre used is made from the cane or reeds of the cane-brakes of the Carolinas and other Southern States, disintegrated by the explosive force of steam by the process recently described in the *Richmond Dispatch*. The fibre as it comes from the steam gun is in the shape of long fine tendrils, resembling oakum. This fibre is twisted or spun into a single yarn or strand, several of which strands are interlaced so as to form a stout matting, which is charged with a composition of tar and pulverized slate or soapstone, limestone, etc., forced into and amongst the fibres by great pressure, so as to make a solid slab. The fibre being thoroughly disintegrated and very absorbent, forms a good base for the mastic.

A series of these slabs made with rabbet joints are joined together and nailed to the rafters, the joints are cemented, and then another series of the slabs, made in the same manner, are laid over the others so as to break joints in every direction, the upper series being fastened to the lower with a mastic composed of the pulverized slate, etc., and tar, and the joints being cemented together. A light, strong, solid, indestructible slab is thus produced thoroughly water-proof and practically fire proof also. A similar composition, used for roofs in Montreal and New Orleans, is unaffected by the heat or cold.

As the steam-blown reed fibre can be supplied from Norfolk, Va., and Wilmington, N. C., to New York, Richmond, Baltimore, Boston, etc., for fifteen to twenty dollars per ton, and the pulverized slate can be obtained at about the same price, and the tar is cheap also, it is claimed that this invention secures the cheapest as well as the best and most durable roof ever made.

The roof resembles a solid block of slate or stone about an inch thick. A coating of sand is forced into the composition so as to lighten the color and make it resemble stone. The cost is less than half that of a tin roof.

The inventors propose to make the same slabs available for the outer walls of buildings in lieu of bricks, stone or wood. The same company have also obtained a patent for a substitute for lath and plaster. For this purpose fibrous composition panels are made by the above method from steam-blown cane fibre, in combination with silicate of soda (liquid flint,) lime and clay. These panels are fire-proof, and well adapted for ceilings, inner walls and floors, also for cabins of steamboats and railway cars. It is claimed that the fibrous composition panels are much cheaper than lath and plaster, and that they do not warp, crack, peel, crumble or decay, and that they keep out heat and cold.—*Richmond Dispatch.*

Rain Coming.—By the recent accounts from the country, of cold winds and frosty weather, and the general prevailence of cold nights, we are strongly led to believe that *Rain* is near, and unless we have a change of wind and milder weather soon, we shall have a cold rain before *Sunday next*; so *Hay-makers* prepare for it.

Virtue is like precious odors, most fragrant when they are increased or crushed; for prosperity doth best discover vice, but adversity doth best discover virtue.

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULARS.

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all the trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S

SELF-RAKING R

This Machine stands at Front of all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

FRANCIS & VALENTINE

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world; publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal: its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Send for a copy, enclosing 10 cents, to

HENRY E. CHILD,
30-32 41 Park Row, New York.

TRUE'S

IMPROVED

POTATO PLANTER.

This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes, ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed.

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatoes in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it.

Particulars and Catalogues can be had at our office.

—ALSO—

LAKE HOUSE,

DELMAR AVENUE,

SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story.

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most agreeable place of resort. Parties wishing rooms and board will please apply to J. M. STAPLES,

31-1 Proprietor of the Auzerais House.

Country Homes Wanted

There is wanted at this time, several **Homes in the Country**, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will buy them if they communicate with this office immediately.

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Address the FARMER OFFICE.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

ALL Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,

A CARD.

Advertising Abroad!

WE CALL THE SPECIAL ATTENTION OF ALL Manufacturers, Agricultural Men, Nurserymen, Booksellers, and others having interests connected with the PACIFIC COAST, that now is the time to secure the business of this region by wisely ADVERTISING WITH US.

The near approach of the completion of that Grandest of all HUMAN ENTERPRISES, the PACIFIC RAILROAD, must open a large and wonderfully increased business between the Eastern States and the Pacific Coast, and they who wisely ADVERTISE NOW, will be the FIRST TO SECURE IT, and when once secured, they can HOLD ON TO IT.

We therefore invite all such who have valuable IMPLEMENTS, MANUFACTURES, INVENTIONS, BOOKS PAINTINGS, etc. to the Columns of the CALIFORNIA FARMER, which will give them a wider circulation than any other medium they can adopt

WARREN & CO., Eds. and Prop's.

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish *collections* of choice plants, can buy them in quantities at a very low rate, if they visit the *Gardens Corner of Mason and Pacific Street*, in this city, or address EDITOR FARMER.

Home Miscellany.

"SHALL I DIE ALONE?"

When the rich gold and purple of Life's sunset
  Lies in its beauty on the silent sea;
When on the shore I see the white-robed angel
  And hear his whisper, "God has called for thee,"—

Eyes lit with love will watch me on the sea-shore,
  Warm human hands will fondly press my own;
But can I bear them with me on my journey
  Out through the dimness of the world unknown?

And this great beauty of the earth and heavens,
  The holy night whose glory fills my soul,
The softened amethyst of fading twilight,
  The gleaming stars on night's emblazoned scroll—

The rosy light of morning on the mountains,
  The tender purple of the distant sea,
Things I love now, from henceforth all forgotten,
  What of their beauty can I bear with me?

"Alone, alone," sighed gentle-hearted Pascal,
  And yet I think that not alone we die;
Though all this world is dimly fading from us
  And we alone, if one kind Friend is nigh?

One who hath said, "Lo, I am with you always,"
  The way-worn Man who sat by Galilee,
Speaking good words and healing all the people,
  Who lived and died for love of you and me.

O, not alone, for this our Friend and Brother,
  Though Heaven's great angels bow before His throne,
Shall stand with us upon the silent sea-shore,
  His hand shall guide us to the world unknown.

ON THE MANAGEMENT OF CHILDREN.

By E. Malcolm, M. D., San Francisco.

A physician in large practice has but little time, and often less inclination, to devote much of his attention to this important and sadly neglected branch of our profession. In each of the families in which we practice, our duties are not merely limited to prescribing for the diseases as they occur, but it is also our business, as physicians, to watch over the well-being of each member of a family that is under our medical direction; to give them good advice when we find it necessary for the preservation of their health; and especially to direct the parents as to the best means of bringing up their children in such a way that they may remain as much as possible in good health, and acquire strong constitutions.

I am well aware that what I am about to write contains no very new or startling information on this important topic. I am not so much "*cupidus novarum rerum*," as I am anxious to bring before the minds of some of my medical *confrères* certain valuable facts which many of them have known, and almost, or entirely forgotten: certain directions, taken from our ablest authorities on this point, which, if followed out, would save the lives of hundreds of children. The importance and value of these practical and *common sense* hints which I have *collected*, must prove my apology for the imperfect manner in which I have arranged them. There are very few physicians who cannot pick up one or two things, probably of much service to them, from some of the authors I quote in this article.

* * * * * * * *

Dr. Bedford says: "The absurd and mischievous practice prevails, too generally, of giving the little infant oil or some other medicine almost simultaneously with its birth, and of filling its delicate and much-abused stomach—a stomach whose powers of assimilation are extremely feeble—with food of domestic manufacture; and hence the 'pap bowl' is a fixture of the lying-in room. This practice, which is one of the products of remote but regular tradition, is fruitful in bad consequences, oftentimes proving the starting-point of disease and death. Why, gentlemen, is it not strange that, with all our boasted intelligence, we should be so inferior to the brute creation in the management of the young? Do you see the slut, with nothing but instinct to guide her, guilty of these absurd practices? Here, there is no medicine given, no pap forced down the throats of her innocent little offspring. The pups, as soon as they come into the world, seek each one the teat of its parent, and from these teats they extract both medicine and nutriment. They grow and become developed; they are healthy, and rarely do they need the services of the physician, for the reason that they observe the ordinances of nature. My rule therefore, is, as a general principle, to give the newborn child nothing, for the reason that it needs nothing but the material which nature has so carefully and elaborately prepared for it; and that material is the Mother's milk."

FEMALE STUDENTS IN ENGLAND.

The experiment of throwing Cambridge University, England, open to the admission of young lady students is to be tried this year. The first examination for admission is to take place on the 5th of next July. Candidates are required to be eighteen years of age on the 1st of January of this year, and to make application before the 1st of May.—Examinations will be held in any place where twenty-five fees are guaranteed, provided a committee of ladies will superintend the examination and provide accommodations for strangers, and that a suitable person will receive the examination papers. The result of the experiment will show how far the women of England really desire a higher education than is now afforded them.—*Boston Journal.*

The road to ruin—The highway to Pompeii.

DIMINUTION OF MARRIAGES.

The tendency to celibacy is the result of false reasoning indulged in by young men. We will not be ungracious enough to deny them the possession of refined social feelings, chaste affections, or any of the qualities that temper man's asperities and make him fit to preside at the holy communion of the hearthstone. No, no, we will not suppose him a beast; for then to reason were impossible. But he reasons wrongly. He says, "I am not ready to get married." Mark that man! he never will be. Few, the very fewest, ever direct their energies to prepare for such an event. A man cannot adapt himself to the circumstances of the married state so long as he remains single. He needs to feel the marriage halter draw before he addresses himself to the changed mode of life, before he begins to love in earnest, before he begins to stay at home of nights, before he begins to economize. Before marriage he is a great hulk, utterly at sea, without anchor, a helpless prey to every adverse wind and every buffeting wave. Afterwards he is a noble ship, securely moored, and able to laugh at storms and tides. California, the States of the Pacific, and all the Territories are sending for marriageable ladies. The want of families and the absence of society are to them a curse. A thousand marriage ceremonies would do more to elevate the morals of such communities than a thousand sermons. They would be more than church, or preacher, or homily; they would be law and order, and safety, and wealth and health, besides. The marriage tie has so proved at all times and among all nations.

[We clip the above from the *Mass. Ploughman.* There is great truth in his words, but if he will come to California and see how rapidly people are married, and how quickly *un*-married, he would write another essay.—Ed. Farmer.]

ANTIQUITY OF MAN.

At a recent meeting of the Chicago Academy of Science some interesting facts were introduced to prove the great antiquity of the human race. Deep down in the Nile, in Egypt, it was stated that the remains of men had been found, to which the Pyramids were young. In 1854, borings were made between Henopolis and Memphis. They were carried to the depth of seventy-two feet, and did not pierce through the Nile mud. At every foot, fragments of pottery were found. The deposit of mud is calculated to have been two and a half inches in a century. The pieces of pottery found at the lowest depths would thus be 38,000 years ago. Compared with it the Thebes of Homer was modern. During the past season in California, in the gold drifts, had been found a skeleton of a man, covered with three overflows of lava. If true, it carries back the epoch of the introduction of man to a remoter time than any European observations. While there are abundant evidences of glacitation of great parts of this continent, these phenomena were wanting in California, as though the Rocky Mountains acted as a barrier. But glaciers covered vast areas of the Sierra Nevada and crushed up the gold strata and carried them down. That grinding up might be referred to the glacial period. It was probably that comparative tranquility followed those violent phenomena. The valleys were filled with modified drift. Those deposits served mainly as the grave of the fossil elephant, while the mastodon was found in swamps. At Natchez there was a terrace of sixty feet, where Dr. Nixon obtained the pelvic bone of a man, intermingled with bones of the mastodon and megaloox.

Home.—The moral salvation of men and women depends, in a great degree, upon home surroundings. Men who never have good and well-cooked food nor pleasant society nor easy chairs nor tasteful rooms at home are pretty sure to patronize restaurants, saloons, bar-rooms, or the houses of happier neighbors.

—We rarely meet with persons that have a true judgement; which, in many, renders literature a very tiresome knowledge. Good judges are as rare as good authors.

CULINARY DEPARTMENT.

Breakfast Balls.—A little cold mutton or beef or both—a slice of cold ham—a small quantity of, fine bread crumbs—a bit of sage, parsley or thyme—chop well together—add 1 egg, a little melted butter, pepper and salt. Take a tablespoonful of this mixture, dredge it well with flour, drop it into hot lard and fry brown: it is very nice.

Sour Milk Doughnuts.—Take two cups of sour milk, one teaspoonful of soda, two tablespoonfuls of cream, one cup of sugar, and one egg put into the mixture without beating; add flour enough for a stiff paste; salt and spice to taste.

Lemon Pie.—One tablespoonful of corn starch dissolved in a little cold water—pour over it one teacupful of boiling water—add one cupful of sugar—one egg (reserve the white to go on the top after the pie is baked)—one tablespoonful of butter and flour with one tablespoonful of lemon extract—bake with under crust.

Apple Souffle.—Pare, core, and stew until tender, six large tart apples—press through a seive—flavor and sweeten to taste—then add while hot the yolks of six eggs—beat up the whites with one cupful of white sugar, and spread it over the apples. Eat cold with cream.

ASPARAGUS.

Well! will you buy the *White* Asparagus that is absolutely *poisonous*, and of which you can only use *one-fourth* in weight of what you purchase? or will you buy the *natural esculent* that is green, tender, melting and rich, and of which you can eat seven-eighs of the amount purchased; besides there is more nourishment and palatable food in *one pound* of the Green Asparagus than in *ten pounds* of the White.

ELECTRIC ACTION OF THE BRAIN.

A writer in the London Spectator propounds a new theory in reference to the numerous well authenticated facts in which persons at the moment of death have made their presence seen or felt by distant friends. He suggests that the brain has the power of producing waves or vibrations in an atmosphere peculiar to itself, just as a magnetic battery sends an undulation through the magnetic fluid contained in a telegraph wire, or a bell sets the air surrounding it in motion when it is rung. At the moment of death, particularly by death of some violence which finds the body in full vigor, the brain, exerting itself with spasmodic intensity, causes those brains which are connected with it by affinity to feel its power, and thus to perceive the presence of the person to whom it belongs.—Such oblique methods of communicating between brain and brain, if such there be, would, in the opinion of the writer, probably but rarely take effect. The influences would be too minute and subtle to tell upon any brain already preoccupied by action of its own, or any but brains of extreme, perhaps morbid, sensibility. But if, indeed, there be radiating from living brains any such streams of vibratory movements, these may well have the effect, even without speech, and be, perhaps, the *modus operandi* of "the little flash—the mystic hint" of the poet—of that dark and strange sphere of half experiences which the world has never been without.

The theory, to which the propounder gives the name of "brain waves," is an ingenious one, and may yet receive scientific corroboration. That this material world has within it a host of forces not appreciable by the coarser senses, and that mind can act on mind without audible speech or visible motion, and at distances beyond the reach of sound or sight, is getting to be generally conceded. But how, or under what conditions, this power exhibits itself, is still an interesting subject of inquiry.

OUR HOME INTERESTS.

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact), and the probability that unless checked this large sum of money will be increased each year, until, in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, to be sent East for investment in the purchase of Life Insurance, instead of being retained at homes to promote and foster BY ITS INVESTMENT HERE the commercial, mechanical, and agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States of the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION *whose capital and assets will not be impaired or injuriously affected by the change in values that will sooner or later occur by a return to specie payments in the other States of the Union.* Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to the citizen of this State, who feel an interest in its progress, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

THE CALIFORNIA

MUTUAL LIFE

Insurance Company

F. McCOPPIN, President. S. F. BUTTERWORTH, Vice-President.

All policies issued by this Company are, by the laws of California, EXEMPT FROM ATTACHMENT OR EXECUTION OF DEBTS, whether the policy be in favor of the *party assured*, or of *any other person.*

Policies are made non-forfeitable after two annual payments.

ALL PROFITS divided among the assured.

One half of the annual premium loaned to the assured at *any time* when desired.

Thirty days' grace allowed in the payment of renewal premiums.

This Company offers to those who have paid up their premiums in cash for two or more years, the advantage of giving notes for the whole amount of their annual premium, for a period *corresponding* to the time they have paid all cash, by merely giving their note, and paying the interest in advance.

Wm. R. WHEATON, General Agent.

Miscellany.

WHAT YOU MAY, AND MAY NOT, CALL A MAN

There is more or less of the animal about a man; that nobody will deny. Plato's definition of a a man was, "an animal without feathers, walking on two legs." This was too much for Diogenes, who caught a rooster, plucked it, took it into the school, and scornfully asked "if that was Plato's man?" We don't know how Plato got out of it, and don't care, as this has but little to do with the matter on hand. Though an animal, a man does not like to be called a beast; yet there are many known as "bulls" and "bears" that accept these appellations as rightly bestowed and properly belonging to them, though individually, in another sense, they would object to being called bears. There are many who would like to be known as "lions," or even tiger would be considered more complimentary than calf. Many a good fellow would like to be regarded as a "brick," and you may call a man "dear fellow," but don't think of calling him a moose. To be called a "duck of a man" would please many an individual who would take it very hard if called a goose, independent of the misnomer. Call a man a "puppy," and he'll resent it; but call him a "sly dog," and you'll rather please him. Don't call a man a hog, even if he is a bore, nor an elephant if he happens to be a "heavy-weight;" but you may call him a "fox" or a "coon" with impunity. A man doesn't like to be called a shark, but you may call him a "queer fish" without offence. Never call a cross-eyed man lynx-eyed—he'll think you are "sarkastic." Call a man a jackass, and he'll talk back; but you may call him an "old rat," and it is ten to one he'll ask you to "take suthin." A man who wouldn't feel complimented at being called a cormorant, would smile at being called a "night-owl." Don't offend by calling a man a gosling, but you may call him a "gay rooster" without offence.—Don't call a man a fool; call him a clever fellow, which amounts to the same thing, and sounds prettier. A man would be well pleased to know that you said he was keen as a razor, yet would object to you calling him "sharp." To call a man a stone would be considered reflecting on his intellectual powers, but you may call him a "brick" to his great satisfaction.

ANCIENT CITIES.

Ninevah was 14 miles long, 8 wide, and 40 miles round, with a wall 180 feet high, and thick enough for three chariots abreast. Babylon was 50 miles within the walls, which were 75 feet thick and 100 feet high, with 100 brazen gates. The Temple of Diana, at Ephesus, was 420 feet to the support of the roof. It was 100 years in building. The largest of the Pyramids is 481 feet high, and 653 on the sides; its base covers 11 acres. The stones are about 60 feet in length, and the layers are 208 in number. It employed 330,000 men in building. The Labyrinth in Egypt has 300 chambers and 12 halls. Thebes, in Egypt, presents ruins 300 miles around, and contained 359,000 citizens and 400,000 slaves. The Temple of Delphos was so rich in donations that it was plundered of $50,000,000, and Nero carried away from it 200 statues. The walls of Rome were 13 miles round.

ONETEEN, TWOTEEN.

A new trouble has assailed the tender consciences of some people in Yankeeland, who fear that it is sinful to say "eleven" and "twelve." Mr. John Fiske comes to their relief in the N. Y. *World*, and says:

We do say oneteen and twoteen when we say eleven and twelve. In Anglo Saxon these words appear as ainlif and twalf. Now in these forms the ain and twa are the Gothic words for one and two. What then, is the part lif? It is a modification of the word liba, meaning ten, which appears also in Lithuanian as lika; the change from the labial *b* to the guttural *k* being just like the change from Latin *lupos* to Greek *lukos*, a wolf. Now in Lithuanian they say *daylika* for thirteen, etc., using throughout the same root which we use only in these two apparently exceptional cases. Finally, he who recollects how often an initial *d* interchanges with an initial *t* in the mouths of those who speak hastily, and who bears in mind the Latin words *dinyua* and *lingua* for tongue, and the Latin *lacruma* and Greek *dakru* for a tear, will find no difficulty in connecting this Lithuanian *lika* with the Greek *dakru* and Latin *decem*. So that eleven and twelve are not exceptions to our otherwise universal rule in naming numbers, say so far as they are built up out of a somewhat unusual form of the word *ten*.

OILING BELTING.—Too *Shoe and Leather Reporter* says.—When oil is applied to belting dry, it does not spread uniformly, and does not incorporate itself with the fiber as when partly damped with water. The best way to oil a belt is to take it from the pulleys and immerse it in a warm solution of oil and tallow. After allowing it to remain a few moments the belt should be immersed in water heated to 100 degrees, and instantly removed. This will drive the oil and tallow all in, and at the same time properly temper the leather.

—The staff of the Paris National Guard having advertised that the position of drum-major in that part of the French militia is vacant, twenty or thirty men, over seven feet in height, have come to Paris as applicants for the place, and they are daily promenading on the boulevards, to the great disgust of all small Parisians, who look shorter than ever.

—Hoops have been compared to obstinate persons, because they stand out about trifles.

—In the languague of flowers—if you wish for "hearts ease," never look to "marry-gold."

Juries most dangerous to our liberties—Perjuries.

Miscellaneous.

A PRINCELY RESIDENCE IN THE COUNTRY FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

CAUTION!

AVERY

PUMP WELL

COMPLETE FOR USE

THE TUBE WELL IS FORMED BY DRIVING prepared Iron Piping into the ground with a sledge Although of comparatively recent invention, these Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well, all surface water, dirt etc. being excluded. The Tubing is coupled together in lengths of five or six feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Lift Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. ☞ For circulars, etc., address Postoffice Box, 17. UHRIG & DEWEY.
Office at 318, Pine street. 31-10.

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum;

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

Is on the red cover of the packages

Depot, 320 Jackson Street,

112 California street,

Railroad Lands.

CENTRAL PACIFIC RAILROAD, LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, April 15

The Grain Market continues to show every appearance of a still further decline, both in Europe and in all the largest Grain Markets at the East.

From all sources, from all Countries comes the song of "abundant harvests," and however this may disappoint those whose minds may be looking to the high price of Grain and Breadstuffs as a source of wealth to *themselves alone*, should we not rather rejoice at the prospect of this abundance the world over, which shall feed the *Millions* that are in want, and to whom this abundance shall come as a bounteous *Blessing from Heaven* to the *poor and needy* ones of the earth.

The quotations yesterday of Wheat at Liverpool, was 9s. 3d. the lowest figures yet reached, at New York $1.60, currency, being an almost certain loss to shippers of recent date. The evidence is clear that, as we have said for months past, the price for New Wheat must reach a low figure, even 1½c. or less, as the tendency is steadily downwards, with little or no Grain going abroad, and our city mills, many of them standing still.

Our Wool Growers find a better market this season, and their prospect are better. Let them realize when they can, as they now secure good prices for their clip.

We would particularly commend to all our Farmers this fact, when the great staple productions of a country remain on hand and in store, the immense amount of capital required to carry them on, causes Gold to become scarce, and *interest money* high, and the blow falls heaviest on the *producers*. They will *see and feel* this always. The shipment of Grain and Flour has almost ceased, and *Money* is again quoted at 2 *per cent.* Grain has been held back, and *Gold Exported.*

Retail Prices in the Fruit Market.

Our Fruit Market is opening and developing itself with the season, the various stands are daily changing their monotonous appearance, and throwing off the rusty looking Apples, etc., and placing in their stead, fine and delicious Strawberries. Thanks for the glorious sunshine, which in this salubrious climate, is bringing rapidly to perfection Strawberries and other early fruits. Thousands of pounds of Strawberries are daily being brought into our market, and tens of thousands must be brought in to meet the demand. Our Fruit Market is certainly the Flower of the day—the beautiful, fresh and delicious fragrance which is to be inhaled amongst the flowers and fruits, early in the morning in our markets is beyond description, and to see the Strawberries turn out in those beautiful pennetts of Mr. Gould,s, is indeed a pretty sight. They come to hand as fresh as lilies, without the slightest bruise or disfigurement, equally bright and fresh in appearance as when just gathered.

The Oranges received from Los Angeles are good; so also Pine Apples from Panama.

Retail Prices in the Vegetable Market.

Our Market keeps up its popularity—at all events our gardeners are disposed to convince our citizens that they are doing their best to keep up the supply of Greens and Vegetables, and of such quality which leaves little room for complaint.

Root Crops, such as Turnips, Carrots, Beets, Parsneps, etc. are much finer and better grown than any hitherto brought to market; so also are the Royal Cabbage and Neapolitan Lettuce; these two varieties are the most suitable for this climate. Onions are becoming scarce, consequently are very high in price. Our gardeners must sow a greater breadth of this invaluable crop; a few rods of ground will produce many bushels of Onions, and if they realize one or two cents per pound, will pay for labor, etc. At present they are worth eight to ten cents, and as a rule, persons do not care about exceeding four or six cents, when 4 pounds can be had for a quarter, every householder keeps a stock of them, but as it is, they resort to other esculents. The demand for all garden produce is increasing much. Prices for all being good.

FISH

(Teasmore and Hayes.)

The Market has been well supplied with Fish of all sorts in season, and the demand through some cause or other has been unusually large. The Celestials appear to be the first in the market, before daylight they are to be seen, anxiously waiting for the arrivals, and John is ever ready to select the finest and best for the purpose of hawking around the city, and on all which he puts heavy profits. The following are the prices realized in California Market.

MEATS.

(L. Miller & Co.)

There is a decided improvement in the Pork Market; undressed is worth 8 to 10 cents per pound; dressed, 12 to 15. Such prices we think leaves a margin for good profits for the raiser, as well as the retailer. Many of our householders find that Pork goes further in the supporting of their families, than other meats; consequently, the increasing demand for well-fattened Hogs. There is a slight decline in the prices of Beef, etc.

DAIRY—BUTTER, CHEESE, EGGS ETC.

(M. B. French & Co.)

Our California fresh Butter has become so favorable, that packed Butter is out of the question, and none in the market; shortly such a sound as packed Butter will soon become one of the things of the past. In this climate we can have fresh green food for cattle the year round, therefore, as our dairies increase, the quality of sweet fresh Butter will also increase.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southhampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

April 17th—GOLDEN CITY, Capt W. F. Lapidge, connecting with HENRY CHAUNCY, Capt. Conner.

April 30th—MONTANA, Capt. E. S. Farnsworth, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman' and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se4 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings. Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, UNtill further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9.50 A. M.; Reno at 4.30 P. M.; Wardsworth at 6.30 P. M. Winnemucca at 3.30 A. M.; Argenta at 8.50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12.05 P. M. Reno at 2.10 A. M. Colfax at 9.50 A. M. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6.30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Colcma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada,

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermitt, Silver City, Owyhee, and all points n Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages or White Pine, and Overland Stages for Salt Lake City and the Atlantic States.

C. CROCKER,
General Superintendent

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,
(Of the firm of Hucks & Lambert.)
No. 708 Lombard street, North Beach.

Wanted.

A Gentleman residing a few miles from the city, is anxious to meet with some one, who can Superintend the construction of Trout Ponds, or give information as to the best mode of constructing Fish Ponds. Such parties will be amply compensated for all trouble and knowledge. Address, B. L. B., FARMER OFFICE.

P. S.—A personal interview would be preferred at the Farmer Office.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLA... in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McL... Vermifuge, they very frequently get one or other of the many worthless preparations called Ver... now before the public. We therefore beg leave to urge upon the Planter the propriety and ... ance of invariably writing the name in full, and to advise their factors or agents that they will not ... other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., P... BURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements ... alent in the South and South West, has induced the venders of many worthless nostrums to claim for the... parations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the ... ginal and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter ... Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take ... Vermifuge or Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLA... and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the Wes... South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires ... some remedy should be provided, that would not in the least impair the constitution, and yet be safe and ... That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great ... which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It ... our sincere wish that these Pills should be fairly and for tested, and stand or fall by the effects produced ... they have been so tested, and that the result has been in every respect favorable, we call thousands to ... who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular ... the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected ... deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is ... to perform, and on the regular execution of which depends not only the general health of the body but the ... of the Stomach, Bowels, Brain, and the whole Nervous System, should be vast and vital importance to ... health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, ... ercises a powerful influence over the mind and its operation, which cannot be easily described. It has ... connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful ... that it misleads more physicians, even of great eminence, than any other vital organ. The intimate ... which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises ... passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal ... or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long ... convinced that more than one-half of the complaints which occur in this country, are to be considered as ... their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the ... Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate ... of which we afterwards ashamed; last, though not least, more than three-fourths of the diseases ... under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing ... pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes ... pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes ... taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels ... ral are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull ... sensation in the back part. There is generally a considerable loss of memory, accompanied with a pain... tion of having left undone something which ought to have been done. A slight dry cough is sometimes ... ant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning; ... complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise ... be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every ... Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet ... ination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken ... Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after ... Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not ... or three times by next morning, take one or two more; but a slight breakfast should invariably follow the ... The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are ... to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derange... of the Stomach.

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than ... consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult ... cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is ... fant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some ... cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and ... ever quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous ... of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too often ... happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids ... to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked ... even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be expelled ... loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed ... with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with ... al flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an arc... circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the ... occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy ... tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a ... sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and ... violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently ... with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by ... cough sometimesdry and convulsive; uneasy and disturbed sleep, wi grinding of the teeth; temper ... but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPEN... UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant ... in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual ... viding the symptoms attending the sickness of the child or adult warrant the supposition of worms being the ... In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MER... IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury ... most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water ... morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten ... a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. ... great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to ... palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have ... forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following ... of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE ... FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: ... McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. ... This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the ... stamped on the lid of the box, in red wax.

Prepared only by FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills ... Vermifuge on receipt of forty cents in Government Stamps.

CALIFORNIA FARMER AND JOURNAL OF USEFUL SCIENCES.

VOLUME XXXI. SAN FRANCISCO, CALIFORNIA: THURSDAY EVENING, APRIL 22, 1869. NUMBER 14.

The California Farmer AND Journal of Useful Sciences.

PUBLISHED EVERY THURSDAY EVENING.

BY WARREN & CO.

Office—No 330 Clay street (up stairs), below Battery. SAN FRANCISCO.

TERMS OF SUBSCRIPTION.

By mail, for one year, $5; for six months, $3. For a Club of five new subscribers, a sixth copy will be sent gratis. When payments are delayed six months $1 additional per year will be charged.

☞ City subscribers, delivered by carrier, 12½ cents a number or $6 a year in advance.

☞ Advertisements and Subscriptions must be paid for in advance. Payments in Gold or Silver.

☞ All letters on business connected with the office should be addressed to WARREN & Co. PUBLISHERS. San Francisco, Cal.

LIST OF AGENTS:

Our Subscribers can send money by MAIL safely (register at the Post-office, and the money will come direct and sure.)

Eastern Correspondence.

OUR N. Y. AGRICULTURAL CORRESPONDENT.

LETTER NUMBER ONE.

[We are happy to lay before our readers the first Letter of a series which we shall receive regularly from New York, giving us more particularly the full Reports of the very interesting Debates of the *American Institute Farmers' Club*, which we trust will prove of interest and value to our *Agricultural* Readers.

In addition to these Reports, we shall be apprized of the condition of the Markets at the East, and all material news.]

NEW YORK, March 30, 1869

Editor California Farmer:—

AMERICAN INSTITUTE FARMERS' CLUB.

The regular weekly session of the American Institute Farmers' Club was held this afternoon, Mr. N. C. Ely Chairman, and J. W. Chambers Secretary.

The following communications were read:

When to Sow Clover. J. D. Ackerman, Union City, Mich., inquired of the Club, if it would do to sow clover about the middle of June, with buckwheat, and get a good catch. He said he had a field he wished to seed—the land was too wet to get in proper condition early enough for oats—would it do any better with Hungarian grass?

S. E. Todd replied, that somehow, all the farmers had got the idea in their heads, that there is no sowing grass or clover seed without some kind of grain. Such, also, was his opinion, but years of experience had taught him different. Grass is even better sown by itself; but the ground must be well prepared, plowed, cross plowed, harrowed and bushed till it is smooth as a garden bed. The mode of preparing a seed bed is more important than the time for sowing. The best time perhaps to get clover into wheat is early in the spring, when the surface is soft, or the frost coming out of the ground.

Dusting Trees with Plaster of Paris. Mr. Horace B. Hitchcock, of Hillsdale, Mich., wrote to inform the Club, that he keeps the curculio from spoiling the choice fruit by dusting the trees when damp from dew with Plaster of Paris.

The Value of Coal Ashes. An interesting discussion then took place on the subject of the following queries, from W. A. Young, of Cumberland County, Pa.: He said, I wish to plant potatoes on a piece of new land—it is a stiff blue-grass sod and very heavy soil (limestone;) Would coal ashes be of any benefit to lighten it? How many one-horse loads to the acre? Will a compost of hen-droppings, coal ashes and plaster make a good top dressing for corn? About what proportion of plaster should be used? Mr. Young added that he had derived great benefit from reading the report of the proceedings of the Club, and desired these questions answered as a special favor to the farmers.

Mr. S. E. Todd recommended the application of 1,000 one-horse loads of coal ashes to the acre, meaning that coal ashes have so little value as manure.

Mr. A. S. Fuller differed with him. He had found anthrachite coal ashes worth from three to four dollars a ton. He liked their effect on sandy soil.

Mr. P. T. Quinn said he used coal ashes at the rate of 30 loads to the acre, but he would rather loose up heavy clay by fall plowing, than with ashes. The proposed compost for corn in the hill, hen-droppings with plaster is excellent; but he suggested the addition of muck or dry garden loam. Hen manure thrown near the seed is stimulating, and its effect will be excluded if earth is well mixed with it. He did not think much would be gained by mixing coal ashes with it; muck is much better.

Mr. Bruen said he had used the compost nine years on the same land, and always got good corn; better, he thought, last year than the first. Coal ashes have a mechanical effect if nothing else; they open and lighten the soil, admitting air and sunlight.

Mr. J. B. Lyman said he experimented with coal ashes last year, and the result was not flattering. They give a lusty growth of top, but no body to a root and no grain. He tried them on onions, beets and tomatoes; in May and June they grew bravely, but as soon as summer heat came on, that part of the garden showed no heart. The onions did not become bigger than butternuts, and the beets were pulled up and eaten as greens, the roots having ceased to grow; tomato vines grew rank but fruited badly. His conclusion was that antrachite coal ashes may give a spring start to grass, but they are worth nothing at the last of the season, when roots get their size and grain is developed in corn.

Dr. Feuchtwanger said there was considerable silica in coal ash, and it is in a fine state easily soluble in water. This accounts for its effect in spring. But though the form or outline of plants may be built up from silica, their value for food must come from potassia, phosphorus and lime. Silica acid is not, properly speaking, an element in true manure, because most soils contain an abundance of it.

THE POULTRY EXHIBITION.

The Committee appointed to report on the recent Poultry Exhibition at the Empire Rink, made an interesting report, giving some facts and reaching some conclusions in the poultry business, that may be of value to the community at large. They do not find that improved blood and fancy combs or gay feathers in chickens make a decided and uniform difference in the value of poultry; yet there is no doubt that breeding to a special end or point has accomplished for poultry nearly as much as it has in neat cattle. The chief marks of excellence in a chicken are three—to be a good layer at all seasons; to yield a tender and well-favored flesh; and to fatten rapidly. There is no breed that excels all others in each of these points. Such a combination of merits is not to be expected. In choosing among the breeds of fowls, we can get at least two good qualities combined.

1st. In the White Leghorn, he will find a regular and constant egg producer, and the flesh quite good, but a bad mother; they will not set.

2d. In the Dorking, he will get fine, delicate flesh, a full development of breast, hardiness, and self-help, the ability to pick up a living where any hen can live; but they are not great layers, especially in cold weather.

3d. In the Chinese fowls, especially the Brahmas, light and dark, he finds a big-boned chicken, a rapid grower, a large and indifferent feeder, that bears confinement well, and gives more weight of poultry meat to the food consumed than any other.

4th. In the French breeds, La Fleche and Houdan, we have fowls that lay well at all times of the year, and whose flesh is excellent; but they are not inclined to set, and make poor mothers.

We recommend to all who keep poultry to improve the common barn-yard chicken, by the introduction of cocks of some of the improved varieties. If one wishes to breed mainly for poultry, we recommend a Dorking cock as a consort to Brahma hens. If in eggs there is more profit, let him get a Houdan or a Leghorn cock. The Black Spanish is a good layer, but not so remarkable in that respect as a Leghorn, and his flesh is usually dry and hard. If he respects flavor and appearance of flesh and fullness of breast, the Dorking blood should predominate. If he raises poultry for market and wishes to convert his eggs into spring chickens in the shortest time, the Brahma fowl will be found most profitable.

In reply to a series of questions by J. M. Paul, of North Adams, Mass., respecting bones as a fertilizer, Mr. J. A. Whitney said, that a bone unbroken does about as much good on soils as stones, and not much more. The best way to get them into the proper state for plant food is, either to grind them, or melt them in an acid of alkali; dig a shallow pit, bank it round with clay, break the bones with a big hammer in as little pieces as may be; pile them in the pit, and pour over them diluted sulphuric acid; cover them with dry mould or sandy loam. They will soon dissolve; if the weather is moist they will dissolve fast. Crushed bones in a hogshead with strong woodashes kept warm and moistened with soap suds will soften into mass like putty that is soluble, and work like bread-making. [Here a few lines were blotted out in MSS.]

Fruit Tree Borer. Mr. Paul also asked how he could rid his trees of the borer. Dr. Trimble recommended killing it by running a wire into its hole until it is stabbed to death.

Mr. R. H. Williams said a friend of his had rid his trees of the borer, by driving nails into them. The oxide of iron gets into the sap, and the borer don't fancy it.

Dr. Trimble said that could not be; there was no science in the statement.

Mr. Carpenter said, another way to prevent the ravages of the borer is to lash a piece of strong paper or cloth smeared with grating wax around the trunk, close to the ground.

The Club then adjourned.

THE SNOW SHEDS OF THE CENTRAL PACIFIC RAILROAD.

Among the structures brought into use in railroad building of late none perhaps are more remarkable than the snow sheds built over the more exposed portion of the Central Pacific Railroad.

That road it will be remembered crosses the Sierra Nevada at an elevation of 7,000 ft.

The sheds, which have often been alluded to, no doubt have been taken by many readers to be temporary and scattered buildings. In fact they form in effect one continuous building twenty-two miles long, put up in the strongest manner, and intended to last for all time, due repairs being made when required. The shed is 16 ft. in width and 16 ft. in height, not including the pitch of the roof. All the timber used is of the best quality to be had. The sides are inclosed, and were it not for the fact that daylight penetrates through the spaces between the boards, the whole affair would like a huge tunnel. The building is braced together in a most effective manner, and is, in addion, firmly bolted to the rocks wherever the road nears the face of a cliff. Where snow slides are to be feared, an extension of the roof has been carried to the cliffs, so that falling masses shall pass over the building and lodge on the other side. In many places where the side tracks are located, the building is wider than stated above. More than 40,000,000 feet of lumber have been used in its construction. It covers an area of more than 18,000,000 square feet, or nearly 44 acres. One of the best proofs of the stability of the structure is in the fact that, with the exception of a few miles which had not really been completed, it thoroughly answered the purpose for which it was designed during the recent severe storm, in which it was subjected to the most severe test. We have on this point the testimony of a gentleman who has recently passed over the road just after a series of snow storms the most violent ever witnessed. He expresses himself surprised at the solidity and efficiency of the sheds. He says: "The snow sheds are a success."—*Stockholder.*

THE CASHMERE GOAT.

These animals are very rapidly increasing in our State. We are constantly receiving letters from parties who are largely interested in them, and whose flocks are now from 200 to 700 in number, and in some cases exceed one thousand.

We are glad to know this, and although the larger portion of these animals may be grades ¼, ½ or ¾. We would urge upon all raisers of these animals to aim to raise only *full bloods*, for these will pay best and can be raised as easily as other grades.

We desire to learn from all raisers of these animals their present numbers and their grades, together with the quantity of fleece they may have on hand and the character of that fleece, as we have important letters of inquiry from abroad touching this matter, which may lead to the early demand and manufacture of this staple here, so that if our raisers will but give us the needed returns, we may materially aid them in their enterprize.

From information already received, we learn of the flock of N. Gilmore, Esq., of Eldorado, which now consists of 500 Goats ¼, ⅜, ½, and 15 16. Mr. Gilmore having 28 full blood Bucks in his flock, and steadily advancing to the high mark.

Messrs. Upson & Wilson of Royalton, have a flock of about 700 Goats, and now with full blood breeders they will soon have a large and splendid flock.

When at Sacramento this week we were shown some samples of their fleeces which had been dyed at the Capitol Woolen Mills, to Royal Purple, Green and Blue, which were truly beautiful, showing what can be done when our raisers are ready with a good amount of these fleeces for manufacturing. *Persevere* is our word and success will surely be attained.

—Southern men are boasting that this year's cotton crop is of more advantage to the country than all the gold California has ever produced.

STATE AGRICTLTURAL COLLEGE. MASSACHUSETTS.

LEGISLATIVE EXCURSION.

The fine establishment at Amherst, known as the State Agricultural College, was yesterday visited by the members and attendants of the Legislature, and some invited guests, in a special train under the charge of Mr. B. W. Hobart, Superintendent of the Albany depot in Boston. The train left Boston at 8 o'clock and landed 240 passengers at Amherst at a quarter past 12 o'clock.—Among the guests were Lieut. Gov. Tucker, Talbot, Rice, Adams, Unnderwood and Knight, of the Executive Council, Hon. M. P. Wilder, Dr. George B. Loring, Hon. Chas G. Davis of Plymouth, Hon. D. Waldo Lincoln of Worcester. Secretary of State Warner and other gentlemen.

The College is beautifully situated, commanding a view of many miles, with the Valley of the Connecticut and Mounts Tom and Holyoke near at hand. As the train swept into the depot, the waving of table cloths and sheets from one of the dormitories of Amherst College, and the ringing of all the bells in town, welcomed the party. The school children had a holliday, the people were all abroad, and forty sleighs were at the depot, from the one-horse cutter to the four-hourse omnibus or farm sleigh, the inhabitants being resolved to do the generous thing, and show the beauties of their beautiful town to the best advantage. The sleighing was fair, the teams were fast, and Amherst College was soon reached, and inspected throughout.

At 1½ o'clock, the company went from Amherst College across the street to the temporary town hall, where the ladies had provided a magnificent collation, to which nearly four hundred guests sat down, and which was heartily enjoyed. Forty young men of the Agricultural College waited on the tables. The ladies and children and townspeople crowded all the galleries.

President Clark, of Amherst College, called the company to order after dinner and spoke of the needs of the College. In the course of his address, he said that twenty officers in the army had been designated as military professors in Agricultural Colleges. Three Agricultural Colleges had secured these officers, and in a correspondence with Gen. Grant, he was informed that such an officer would be sent as soon as 150 students had been obtained. A building would cost $8000. If the State desired that the College should lead all others, the means must be furnished and it would be done. The sum of $100,000 would be wanted this year, and $50,000 the next year, when the College would be in such a condition, each class being provided with dormitories, that they could obtain all else which might be needed to make it a success.

Lieut. Gov. Tucker, in his speech, said that it was good for every State to take care of its best possession, the bodies, souls and minds of the young men who are to carry down to the future the institutions of the good old Commonwealth. When you unite intellectual culture to the culture of the soil, you touch the great combination which in a Christian country, contributes to the highest prosperity. This country, with its great Mississippi valley, is to derive its power from Agriculture.

Hon. Marshal P. Wilder was received with great enthusiasm, and after a fitting introduction, referred approvingly to the great efforts of Massachusetts to establish an Agricultural College. Nineteen years ago a bill passed the State Senate to lead all the States in this educational work, as Massachusetts had in all others; but the bill failed in the House. No effort was made for several years afterward, till a commission (including Col. Wilder) was appointed to visit the Agricultural Schools of Europe. It was found that there were 350 such schools there, and the commission recommended one here. Subsequently a large sum of money was raised in Springfield to establish an Agricultural College, which will be an honor to the State henceforth. Other States have established Colleges before us, and their errors and their experience will be for our benefit. The question of completing our College was only one of time, and we might as well complete it now as ten years hence. Col. Wilder closed by expressing his gratitude to divine Providence, that he had lived to see an Agricultural College in Massachusetts, so well founded and with so able a head.

Senator Daniel Needham expressed the warmest friendship for the College, and for the science of Agriculture. Science alone had sustained the Agriculture of the State for many years, and this latest movement he believed was one of the agents which was to aid in solving the question of connection between labor and capital. It was to work out this problem that our fathers first set foot upon this soil; and to the same end free labor and slavery met, and intelligent labor had triumphed over despotism. As we educate the masses little by little will fade away the differences between labor and capital, and they will be found on the same platform with the same end in view, viz: the civilization and elevation of mankind.—Massachusetts had never founded any but successful institutions, and if this was a failure it would be her first failure.

Dr Loring was the next speaker, and joined his appeal to the others for further aid to every department of education.

President Clark read a letter from Gov. Claflin, calling on the State to keep the College in advance of all its competitors elsewhere.

The platform was now cleared and the freshmen class of healthy looking and spirited young men appeared and under Prof. H. H. Goodell went through their calisthenics with wooden dumb bells in a manner that called forth great applause. A section of thirty-two of the sophomore class, in uniform, with muskets, went through a military drill with great precision.

A brisk drive of a mile brought the company to the Agricultural College Grounds. The new dormitory, a handsome and substantial brick building, was erected last year at a cost of $36,000, and the new boarding house cost $8000. The balance, $6000, was expended in repairs and other necessary purposes. In the elegant floral houses, the superb collection of rare camelias and other plants, given by Col. Wilder, attracted general attention.

Another sleigh ride took the visitors to the depot, and soon after 4 o'clock the special train left, amid parting cheers, and reached Boston at 8 o'clock.

The Agricultural College now includes a freseman class and a sophomore class, together, ninety young men. For the class of this year it must have a new dormitory, and for that of next year another, and between the two years $150 000 is needed, to place it on a self-supporting basis. The funds and property are now as follows: U. S. land scrip fund, $168,000; town of Amherst, $75,000; appropriation by the State $70,000: gift of Dr. Nathan Durfee, $10,000; gift of L. M. & H. F. Hills, of Amherst, $10,000.

The following have been added to the institution during the year: Prof. Goersmann, (chemistry) Prof. Miller (mathematics), and Mess. Flint, Wilder, Stickney, Catter, Hitchcock, Fisher, (lecturers).

WOMAN'S INFLUENCE IN NEW YORK.

The late movement in behalf of women, the formation of the new associations, the "Sorosis," has led to other and more complete organizations for their advancement and benefit.

The membership of the New York Sorosis comprises six artists or workers in art, twenty-two authors, six editors, thirteen musicians, one historian, eleven poets, nine teachers and lecturers, eight well-known philantropists, two physicians, four writers on science, and forty contributors to periodicals.

A new Club House for women will be opened on the 12th of May, and will be occupied by the Sorosis, the Working Women's Association, the *Revolution* office, and sleeping apartments for women visiting the city who do not desire to go alone to a hotel.

This certainly is a most excellent plan.

OUR FUTURE RICE FIELDS.

The vast extent of excellent lands now lying waste, contiguous to the Sacramento and San Joaquin Rivers, will in coming years be covered with extensive Rice fields, which will give employment to thousands of laborers, yielding rich returns to the cultivators, and a handsome sum to our general productions.

At present, the fields are so extensive and the floods so wide spread when they do come, that many are prevented from engaging in the enterprize; but the Dyking in of 500,000 or 1,000,000 acres successfully will not be esteemed impossible, after the *Grand Triumph* of the Pacific Railroad. Heretofore the undertaking seemed impossible, now, nothing is imporsible for California Enterprize—*it will be accomplished.*

HIGH WATER ON SACRAMENTO RIVER.

The water is unusually high in the Sacramento, overflowing the banks in many places, and injuring the crops that were just starting into growth.

We are often surprised at the tenacity with which the dwellers along the banks of this river still cling to it for early crops, hoping they can escape the rise of the waters; but this can never be so long as the snows shall fall upon the mountains, and the sun melt them and send their streams downward.

Plowing and planting is still kept up along the river, which shows great fertility at this time.

We received a very complimentary parcel of beautiful Skins of the Cashmere Goat, or rather Kid Skins. They were very neatly dressed and finished with the fleece on, and most admirably adapted for the making of ladies' capes, cuffs, muffs, etc.; some of the smaller skins are just suited for this purpose. The skins received were from ¾ to ⅛ etc., from Goats raised by N. Gilmore, Esq. of Eldorado, to whom we return thanks for the same.

Agriculture.

SHALL WE ENCOURAGE BOYS TO STAY ON THE FARM.

By all means, if they want to stay; if they have a taste for farm life, and take to it more kindly than to any other pursuit. If a boy takes an honest pride in turning a straight furrow, rearing fine calves and building fine hay stacks, doubtless the farm is the place for him. If he prefers to go to the county fair to attending Dan Rice's circus, if he selects the *California Farmer*, that came in the same mail with the Sporting Paper, that boy has a taste for farming that it will do well to encourage.

But how about the other boys, to whom farming is an uncongenial employment, and whose only lively step in the field is taken when the trumpet calls to dinner? Shall we encourage them to stay on the farm, with the fact staring us in the face that they have no natural aptitude for the business, and consequently will never become good farmers? Much as we respect and honor the pursuit of agriculture, we think we should not. We cannot see how either the farm or the boys are to be benefited by the procedure. The fact is, we have too many poorly managed farms, and too many poor farmers to hold out inducements for increasing the number of them.

It would be a much wiser course, every way, to find out what a boy is good for, if, indeed, he is good for anything in particular, before you encourage him to adopt any particular calling. If the only good a boy ever did about a farm was to repair the pumps, hang gates, make mole traps, put in rake teeth, file the saw and hang the grindstone, and he did these things well, obviously the farm is not the place for him, but a machine shop is.

If a boy will walk half a dozen miles, after the day's work is done, to hear a political speech, if he takes time from his play to attend trials before a justice of the peace, and sits up half the night, when he is going to school, to learn declamations which bring down the house at spelling school, most likely he will do the world more good if you put a law book and not a manure fork into his hand.

If he earns more money trading jack-knives and fish-lines on rainy days, than he does hoeing potatoes and cutting grain in fair weather, give him a chance to handle a yard-stick, and not have him around troubling other boys who are handling horse-rakes and pitch-forks, and like the employment.

Again, if a boy is skillful in skinning small animals and stuffing birds, if he practised making pills of mud when he was a child and extracted teeth from the jaws of dead horses with pinchers when he got older; if he reads physiologies when his brothers are engaged in perusing Robinson Crusoe, he will be far more likely to succeed with a lancet than with a scythe.

It has become very fashionable lately to exhort farmers to encourage their boys to stay on the farm irrespective of their ability or taste to become good farmers; but we cannot see the propriety of it. On the other hand, we see many good reasons why boys who do not promise to become good farmers should be encouraged to try their hands at something else while they are still young. Because a boy was born on a farm it is no reason why he should always stay there if nature gave him gifts for something else, but denied him the inherent faculties for becoming a successful farmer. In India persons are born into a Caste but can never get out of it. In ancient Egypt children were obliged to follow the occupation of their parents to the latest time. But we have never heard of any good, but have heard of a good deal of evil coming from it. The farm is a good place for boys to stay on unless they have an aversion to farm life, and have at the same time, a strong inclination to go into some other kind of business that is more congenial to him; in which case, we think he had better go his way, and the sooner the better.

OIL CAKE FOR STOCK.

Messrs. Editors:—In the April number of the *Journal* now before me I find an inquiry regarding linseed oil meal to feed cows upon. It is a question that I as well as many others would be glad to hear more upon the subject, through the columns of the *Journal*, should it meet the wishes of those who have had experience with it. Would it be profitable for a man to pay the prices quoted in the New York papers of about fifty dollars per ton, pay the freight and haul it a distance of 12 miles? You answer that the meal is beneficial fed in connection with other food. What other food is best to be fed with it and in what proportions? I believe there is not one instance in this vicinity that it has been used although I have often heard it talked over by some, but most of farmers here think that it would be a waste of money to use it in such articles of food for stock, and perhaps an article or two in your valuable paper may enlighten the minds of many, especially those young men who are about to start farming on their own hook, and more especially those who are desirous of improving their stock, and you will oblige a few subscribers in this locality. P. D. G.

South Gibson, Susquehannah Co., Pa.

[Oil cake meal should always be fed as a mash either cold, or mixed with cut straw or hay, corn meal, bran, or other mill feed. Add about one pound of cake meal to a mess for each animal to, the other ingredients and feed once a day at first for a few weeks and afterwards twice a day. You will soon see a great difference in the appearance of the animal as well as in the yield of milk.

You consider $50 a ton a large expenditure of capital without considering that a ton will make 2000 feeds, costing but two and a half cents per mess.—Eds.]—*Am. Stock Journal.*

NOT HUMANE.

It is not humane: First—To work a horse after the skin of any part exposed to pressure is broken. By continuing to use him in this state, the sore increases, the poor animal suffers pain, eventually becomes unfit for work, and thus much more of his labor is lost for want of that kindness which it is both our duty and interest to bestow.

Second—To leave horses that have been driven fast exposed to the cold without cover. This cruelty is too common. Animals sometimes suffer for hours in this way while their riders are enjoying themselves by a fire within doors, forgetful of the poor creatures who cannot complain. Chills thus produced are the cause of fever and inflammation, the most fatal diseases of horses.

Third—To overload, or ride on an overloaded vehicle.

Fourth—To neglect to keep axles properly oiled, or greased.

Fifth—To let your horse hold the weight of a loaded cart, when you can save him by putting a rest under the shafts.

Sixth—To use animals unnecessarily on the Sabbath, which was made as much for them as you.

Seventh—To order carriages long before they are wanted, thus compelling both horses and drivers to remain unnecessarily exposed to the weather.

Eighth—To mutilate dogs by cutting their ears and tails, or horses by cutting off their tails, or shaving off the hair which nature has provided for their covering, to lessen the labor of hostlers in grooming them.—*Our Dumb Animals.*

GAMBLING ON THE RACE COURSE.

The leading editorial of the *Turf, Field and Farm* of February 12, commences with the remark:

"We have seen men defined as an animal that made bets. . . . In all nations and climes we find him the sole proposer and accepter of wagers; no matter how rude or polished, savage or civilized, ignorant or learned, all have the same betting proclivities."

The editor then assumes that all the evils which result from gambling are chargeable to "the perversion of this principle, and not to the principle itself," and that as men "cannot be legislated out of their smaller vices," all that the moralist or legislator can do is to "direct it so that as little injury as possible may arise from the gratification of the propensity."

The article closes as follows:

A very great majority of betters [on the turf] content themselves by the investment of a sum that will not be felt, if lost, while it greatly enhances the pleasure of seeing the race run, As long as men only venture what they can afford to lose, and do not take risks incompatible with the duties they owe to themselves or families, the injury will be very slight, if injury there is. But "plunging" cannot be too strongly reprobated, and those who have the true welfare of the turf at heart should use every endeavor to restrain that spirit that prompts large outlays.

"The whole argument is an ingenious and well put defence of betting, without which "the pleasure of seeing the race" would become stale, flat and unprofitable; but it is altogether unsatisfactory to our mind, and we hope it will be so to the managers of agricultural fairs who are solicited to co-operate with the friends of the turf. We believe that gambling, theiving, pool-selling, and many other "smaller vices" of poor human nature should be restrained, not merely regulated."—*N. E. Farmer.*

Wife Advertising.—An advertiser for a wife received an answer which pleased him, and a correspondence grew up which resulted in an engagement, made before the parties had seen each other, and upon knowledge derived from letters only.—In course of time the gentleman arrived at the lady's residence for a personal interview preliminary to the ceremony. He was ushered by the servant into a spacious and elegant parlor to await the appearance of Miss L——, for whom he inquired. Shortly a very neat and intelligent colored girl entered the room.

Gentleman. "It is Miss L—— I want to see."

Colored Lady. "I am Miss L——."

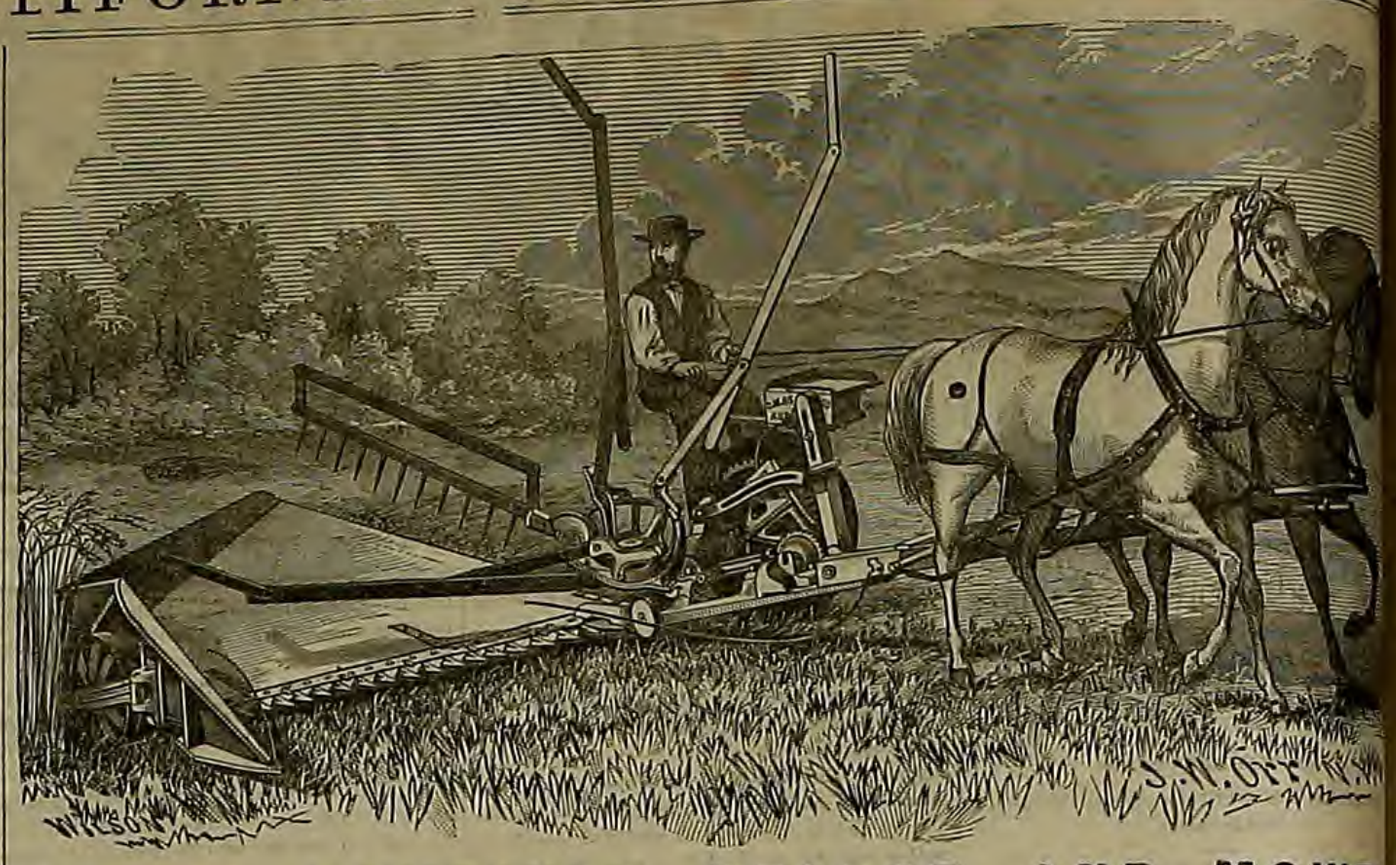
Gentleman. "Under the circumstances you will not expect me to fulfill the engagement."

Colored Lady. "Why, you will recollect I wrote you *that I had a dark complexion!*"

The Uses of Adversity.—You wear out your clothes. You are not troubled with visitors.—You are exonerated from making calls. Bores do not bother you. Tax gatherers hurry past your door. No one thinks of presenting you with a testimonial. Impostors know it is of no use to try to bleed you. You practice temperance. You swallow infinitely less poison than others. Flatterers do not shoot their rubbish into your ears. You are saved many a debt, many a deception, many a headache. And lastly, if you have a true friend in the world, you are sure, in a very short space of time, to know it.

"Blue" upon Wool.—The difficulty of fixing a *permanent* Blue upon Wool has been successfully overcome in England, and *fugitive* Blues are being completely superseded. The patentees are working, night and day, to supply the demand, and are making preparations on such a scale, as will permit of its being introduced in America very shortly. In dyeing, this is one of the greatest discoveries of modern days.

—In the language of flowers—if you wish for hearts ease," never look to "marry-gold."



KIRBY'S COMBINED REAPER AND MOWER

WITH COMBINED SELF-RAKE AND REEL

TWO COMBINATIONS IN ONE MACHINE

This is the only TRULY COMBINED MACHINE in the world. While many machines PROFESS to be Combined, and some of them are very good Mowers, there are very good Reapers, there are none that Combine both qualities like the KIRBY, and work in either capacity as well as if designed for no other purpose.

"MONITOR"

Self Raking Attachment IS THE MOST PERFECT THING IN THAT LINE EVER INVENTED.

It is COMPLETELY SUCCESSFUL in any or all conditions of Grain, either Heavy, Light or LODGED, or in the heaviest Mustard; as over a Hundred Farmers on the Pacific Coast, who are successfully using them this year, can testify.

The Kirby can cut the largest Mustard without any trouble, and rake it off also, if necessary.

We shall keep a large supply of EXTRAS of all kinds on hand.

The working of the "MONITOR" is so complete, that the closest scrutiny cannot discover that the team works any harder when it is taking off the heaviest lodged grain. In fact, it is easier for the team to run the KIRBY COMBINED REAPER with the "Monitor" Self Rake on it, than it is to carry a man to rake off, and the grain is left in much better shape for the binder; so much so, that many claim that it saves the work of one binder, to say nothing of the difference in scattering the grain.

By a device lately invented, the size of the gavels can be regulated at the will of the driver, according as the grain stands heavy or light; it consists of a treadle which operates on one of the ways of the Rake-arm, so that the Rake can be thrown and pass over the grain until a gavel of the right size is collected upon the platform, when the Rake, of its own accord, will sweep it off.

This machine can be set to cut at any desired height from the ground, from two to eighteen inches, by merely changing two bolts, one in the grain-wheel slide, the other in the axle plate, where the joint or independent action is obtained.

This machine never had an equal in heavy lodged grain or grass, as it is in such cutting that it shows its superiority to the best advantage.

Sole Agents for the Pacific Coast

30-22—no1

TRUE'S

IMPROVED

POTATO PLANTER.

This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatoes in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

Horticulture.

NEW SYSTEM OF ROSE CULTURE.

Some of the French and English horticultural journals speak of a new method of growing roses, quite different from any before practised. The essential points are three—first, to prune out all the old wood; second, to shorten the new wood very little; and, third, to peg it down flat to the earth. The rose is allowed to bloom, like a raspberry, only on the wood of the last year's growth; and this wood is but slightly pruned. All this is very unorthodox, and contrary to every received maxim. The effect, however, is said to be very fine. The long, young shoots, pegged down to the ground, produce an abundance of flowers from every eye, while fresh shoots grow up with the greatest vigor from the plant. These, in turn, are pegged down the next year; those which had bloomed being first cut away. It seems incredible that roses under this treatment, should produce as large flowers as under the system of short and severe pruning; but they can certainly be produced in a prodigious abundance. The ground is said to be completely hidden with masses of foliage and blossoms. The effect of laying the shoots in a horizontal position is to cause the eyes, or leaf-buds to open from end to end of the stem; while if it had been left in its natural upright position, the tendency of the sap to rise would have caused the eyes at the top to open, while those below remained dormant. The new method will probably be found to have one great advantage; the rose will live longer under it than when subjected to very close pruning. This latter practice is sure to result every season in a quantity of dead wood which has to be cut away. Some varieties, when cut near to the ground, rapidly decline and at length die.

The plan of pruning and pegging down was first tried two or three years ago, in England and France, and has since been practised with great success by a French cultivator, M Jean Sisley, of Lyons, who describes his experience in the *Revue Horticole*. It is well worth a trial here. We mean to try it, and commend it to all amateurs who have time and patience for experiment.—*Amer. Journal of Horticulture.*

LEWISIA REDIVIVIA.

This is a plant supposed to be found in California or on some portion of the Pacific coast, we think it is known in "Washington Territory," and also in British Columbia.

Dr Hooker of the Royal Botanic Gardens at Kew, London) says: Among the plants eaten by the Kootanier, Colville, and other tribes in that part of British Columbia and Washington Territory, is the beautiful Lewisia Redivivia, the roots are gathered in great quantities, and boiled or eaten like *Salep* or Arrow-root. In this state they are not unpleasant to the taste, slightly bitter, but are valued by the Indians as a nutritious food for carrying on long journeys, two or three ounces a day being sufficient for a man even though under great fatigue.

These Indians call it *"Spat Lem"* or "Ptleem ass-lise-ne-mare," and look upon it as one of the great gifts of the "Supreme Master of life.

We desire to learn where this root can be found, and shall esteem it a great favor if those who shall read this article and know of its location, will be so kind as to address a letter upon the subject, to the Editor of the California Farmer.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facia* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

Country Homes Wanted

There is wanted at this time, several **Homes in the Country**, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places *for sale*, or to lease for a term of years, can find the parties that will buy them if they call or write with this office immediately.

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Address the FARMER OFFICE.

OLIVER DITSON & Co., 277 Washington street, Boston.

CHAS. H. DITSON & Co., 711 Broadway, New York.

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,
(Of the firm of Hucks & Lambert.)
No. 708 Lombard street, North Beach.

VALUABLE PLANTS FOR SALE.

☞ **Persons who are desirous of securing a few** very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, who are strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. JOHN GAGE

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, grower as the Doolittle or the Miami, but still it is good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

Special Notices.

THE BEST WASHING MACHINE KNOWN.

In our columns this week will be found the new Advertisement of the "ECONOMY" *Washing Machine*, invented by John M. Horner Esq., a Pioneer Farmer of California, and whose Genius, Industry and Skill has accomplished much for our State, both in agriculture and mechanic art.

The "Economy" Washing Machine has been remarkably popular; wherever shown it has taken the lead and won the prizes, and what is better still, always gives our Housewives most excellent satisfaction. Known and honored right at home where made.

"Economy" for the Purse,
And Economy by name,
Has always cleared the coast,
And won its Author Fame.

PLANT THE NEW POTATOES.

The remarkably moist season and the continuance of the rains will give to all who desire to secure the *New Kind of Potatoes*, to plant during all this month, and in some places even during the entire month of May.

We would particularly urge upon all who may plant the "Early Rose," the "Goodrich," the "Harrison," the "Chili," and others, to be careful and save all their *Seed-Balls*, from which they can spring new and valuable varieties, that being raised from *Seed*, are indeed NEW CALIFORNIA POTATOES.

As a matter of business and pecuniary gain, it is very certain that those who shall raise the 'Early Rose," and the "Goodrich," will receive a very handsome recompense, as the product of both these varieties are very great, and both will be in great demand another year. We can therefore recommend these kinds as a good, perhaps the best investment that can be made, even better than Mining Stocks.

ASPARAGUS.

Well! will you buy the *White* Asparagus that is absolutely *poisonous*, and of which you can only use *one-fourth* in weight of what you purchase? or will you buy the *natural esculent* that is green, tender, melting and rich, and of which you can eat seven-eights of the amount purchased; besides there is more nourishment and palatable food in *one pound* of the Green Asparagus than in *ten pounds* of the White.

AXLE GREASE.—Hucks & Lambert's Axle Grease we esteem the best article we have ever known, and the reputation it has obtained is a most enviable one, surpassing all others ever yet invented, wherever we go we hear it commended, and although there may occasionally appear in our market some new compound, foisted upon the public by specious certificates and urgent arguments to introduce it, yet its value is soon tested, and its merits being put to the test are found wanting; then it disappears from the market as quickly as it came, while the Genuine H. & L. remains the best and most valuable yet invented or known.

American Kid Gloves.—From the samples of dressed Goat Skins we have seen and examined, and the knowledge we have of the thousands of Goats that will soon cover our hill and mountains, and Goats too of the best kind, we are induced to believe that it is certain that ere long we shall be able to have a *Manufactory of Kid Gloves* in California, and thus be wholly independent of France or any other country for this article.

Why should not California have Gloves as famous as those of Alexander or any other manufacturers? Let us try it!

Summer Fallowing.—Wherever we go in the country, we are glad to see the Plows at work, preparing the "Summer Fallow," in order to secure a good crop for another year. This is true wisdom, for the substances now upon the soil is equal to a rich crop of manure turned in for next year.

THE GREAT EVENT OF THE AGE.

TRIUMPHANT VICTORY.

The Completion of the Pacific Railroad.

Oh, such a day,
So fought, so follow'd, and so fairly won
Came not till now, to dignify the times,
Since Cæsar's fortunes.

When Shakspeare wrote these words, he had not then contemplated the Grand Triumph of a Railroad over the *Sierra Nevada Mountains*, although he had said he would "*Put a girdle round the Earth in forty minutes.*" This prophesy of Shakspeare has been fulfilled, and the Electric Telegraph has now the power to fulfill all that Shakspeare uttered.

The greatest event of the age, and we may say with truth, the greatest enterprize that has ever been completed since the world began of human achievements, is now about to be celebrated at Sacramento.

The completion of the Pacific Railroad is without a paralel among all human enterprizes. The "Laying of the Ocean Telegraph," the mighty Railroad Tunnels of Europe, the building of the *Great Eastern*, or the "Thames Tunnel," these, great as they were singly, when combined are nothing compared to the conception and completion of the Pacific Railroad, which is now so near its grand consumation. When we consider its length, 3,300 miles from San Francisco to New York, and this vast space to be traversed *in one week*; when we bear in mind that the citizens of San Francisco can and will pass from this City to Paris and London in *fifteen days*, it seems like magic; but when we realize that the Iron Horse, with breath of flame, will pass up and over the Ice and Snow clad Mountains that heretofore have been considered impregnable, and over the very ground in mid-winter where the early Pioneers in *the summer season* perished from exposure and fatigue, over an altitude too, of nearly 8,000 feet above the level of the sea; over precipices and chasms of thousands of feet, and in perfect safety, then we can with some faint degree, conceive of the magnitude and the daring of those brave men who have planned and completed this stupendous and most grand of all human enterprizes the world has ever seen undertaken and completed.

But of what avail can a poor feeble pen do to describe the magnitude of this enterprize. The most vivid imagination cannot paint the grandeur of the enterprize, or paint the sublime and grand scenery that is given to those who shall pass over this mighty highway.

But Grand and Glorious as is this noble work, even to our finite minds, it has been foretold years and centuries before those now upon the earth had conceived of it; and man is but the instrument of the ALL WISE to carry out His designs for for the highest interest of the human race.

Let us see if we are right!

The old Prophets foretold all the great events that are now coming to pass.

What saith the Prophets?

"Behold I will do a *new thing*; I will even *make a way* in the *wilderness*."

Again, "Every mountain and hill shall be laid low, and the crooked shall be made straight, and the rough places plain."

And "He will make the wilderness like Eden, and her *Desert* like the Garden of the Lord, joy and gladness shall be found therein, thanksgiving, and the voice of melody."

In the Books of Isiah, Jeremiah, Job, and the Psalms, will be found wonderful prophecies of events happening now.

We read of the Steam Engine on the Railroad like this,

"Out of his mouth goeth burning lamps, and sparks of fire leap out."

"Out of his nostrils goeth smoke, and a flame goeth out of his mouth."

And again of the Electric Telegraph we read:

"Can'st thou send lightning that they may go, and say unto thee, we are here?"

These words are indeed wonderful, and we now live to see their perfect fulfilment.

THE TRIUMPH IS NEAR.

The completion of the line, the uniting the Pacific with the Atlantic side, the joining of the Central Pacific and the Union Pacific, is fixed as near as may be to May 1st, and this we learned when at Sacramento this present week, when we called at the Railroad Office.

From those who are now perfecting the plans for appropriately honoring this great event, we have learned the

PLAN OF THE CELEBRATION.

All the Railroads that run into the city will carry the people into the city and Home again, *Free*, for the

FREEDOM OF THE CITY

will be tendered to all visitors.

All the Military and Engine Companies will Parade. The Pioneers, the Odd Fellows, and all other societies will turn out in full regalia.

Invitations will be sent to the National and State officers, to Mayors and officers of all cities, to the Pioneers of San Francisco, to the Mechanics' Institute, and other associations. The object and desire will be, to make a Celebration as Grand, Noble, and Joyous as this Great event demands.

THE GRAND CHORUS.

In order to fix and to suitably announce the exact period when the *last Rail* and the *last Spike* shall *Seal* this to be world renowned enterprize, that truly distinguished working man, Charles Crocker, Esq., will, having the "Lightning in his hand," at the grand Junction, and when this work shall be sealed, Telegraph to Sacramento, and in the very spirit of prophesy say, *we are here*—It is finished; at that moment, *every Bell* in the *Churches* and on the *Steamers*, and on the Engines which will be stationed all around the city on purpose, will send out their loudest peals, at the same moment of time, every *steam whistle* on Engines and Steamers will send forth thier shrillest scream, the Cannon, also stationed at all points, will send their booming thunders forth, which shall echo over mountain and valley, proclaiming the great work is completed, and all this too, while from Ten Thousand voices on church top, and house top, and from streets, shall send up to Heaven the loud Huzza—Huzza for the TRIUMPH IS COMPLETE.

This grand union of Cannon, Bell, and Whistle, with the chorus of voices shouting, together with the profuse decorations of every church and public building with Flags, Banners, and Mottoes.—This will be a sight worth seeing, for it is an event worth commemorating, the like of which never was and never can be again.

And this is but a Just tribute to the completion of such a noble enterprize, and the men who have conceived, carried forward, and completed it, will feel they are truly rewarded by this result, for it is indeed Victory.

The God of Battles will smile
For Justice has triumphed;
The Stars and Stripes—
Columbia's sacred Flag,
Like eagle pinions
Flutters to the breeze.
Loud cannons roar,
And church bells ring their chaunt,
For Victory, Great Victory is won.

SACRAMENTO.

"The *Floods*, they shall not overwhelm thee, nor shall the *Fires* consume thee."

Never has any portion of sacred writ been more truly verified than in the case of *Sacramento City*.

It has been our pleasure as well as our duty to have given full faith alway, to the belief that *Sacramento* would eventually become *Triumphant* over all the fearful calamities and difficulties by which she was so long surrounded and become a *great* and very *Prosperous City*. This we have always believed, and always asserted, and it affords us great and heartfelt pleasure to know that her time of *Triumphant Prosperity* is very near at hand:

The near approach of the Grand Festival in Honor of the completion of the Pacific Railroad, which occurs *next week*, will give to *Sacramento* an Epoch in her history, and give to her a *Name* and a *Fame* which can never be taken from her.

Sacramento deserves the Prosperity that is now steadily pouring into her lap, for her citizens have shown a faith and a devotion to that city that is without a paralel in the world.

We have visited the city the present week, and the *life blood of business* is written on all her Streets, while the Beautiful Homes that are springing up in all the environs of the city, tells of her permenency. The city may indeed be called the Garden of Roses, for the dwellings are embowered in them, and the air is redolant with their fragrant breath.

There is no city in our State, outside of San Francisco, that can show so many truly splendid *Family Residences* as the city of Sacramento, and no city where Real Estate is so surely and rapidly improving.

THE CAPITOL.

The *New Capitol* will be an honor to our State, and we feel assured that the people of our State will feel proud of this magnificent Capitol when it shall be completed, for then only can it be duly appreciated; and then no State in our Union can boast of one more truly chaste, unique or beautiful.

The Capitol now begins to assume form and comliness, and although many persons may remark that the Dome as it now appears seems not in keeping with the massive pile below; but few are aware that there is yet to be added a row of stately Corinthian columns from the base of the present Dome, and then a beautifully, complete, and chaste Dome yet rise, over *one hundred* feet higher than all that meets the eye now, and which, when completed, will as we have said, make one the finest Capitols in our Union.

We visited the Senate and Assembly chamber, and the Library, which now begin to develope their coming beauty and grandeur, which we rejoice to note, for we have never been in sympathy with the croakers and politicians that would have prevented if they could, the erection of a suitable Capitol for our State, and we rejoice to see it rising in its majesty, and approaching its completion; for it will be an Honor to *Sacramento*, and *Sacramento* will Honor it, and all will redound to the good of our entire State.

We cannot conclude these remarks of the *Queen City of the Plains*, without expressing our great satisfaction in now saying to all our old friends in that devoted city, who have so long and bravely fought against the storms of adversity, that we are confident the Tide has turned, and now, "Taken at its flood, it will roll on to Fortune."

The *Cloud* is past, the *Storms* are o'er,
A Golden Sunlight greets you now;
Calamities shall come no more,
For Joy and Peace shall light each brow.
Nobly her Citizens here toiled,
Faithfully all have duty done,
Adversity, each have bravely foiled,
Triumphant Prosperity at last is won.

Plant Seed Continuously.—This is a most capital time for all who have a "Home Garden Spot" to plant a succession of seeds of Flowers, or Vegetable seeds for a succession of crops for Home use. This opportunity should not be lost, as good crops can now be secured by *repeated planting*.

HON. MARSHALL P. WILDER.

PO MOLOGICAL VETERANS COMING TO CALIFORNIA.

We are most happy to give our readers the following highly gratifying Letter from the HON. MARSHALL P. WILDER, the distinguished President of the American Pomological Society, who now promises to pay a visit to this State in a brief time, accompanied by some of the most distinguished Horticulturists of Europe.

The Devotion of the Hon. Mr. Wilder to the Science of Horticulture during a long life, has won for him an enviable fame. His recent arduous tour through the *Southern States to heal the wounds that War has made*, and bring back again into the bond of amity and peace many distinguished friends of this Science, deserves the Respect, the Honor, and the Reverence of the wise and good of all creeds and parties, and *such* labors are the evidence of the *Good Fruits* which this noble Science teaches.

The name of "LEROY" is also a highly honored name in Sunny France, and "RIVERS" of Bonnie England. Here we have a trio of names that all will delight to Honor, and their presence will give an impetus to Agriculture, Horticulture, and Floriculture, that will be of lasting benefit to our State.

Let us do Honor to men, who by their own labor have done Honor to their own country, and whose devotion to Science has benefited the *world*.

When these visitors shall arrive on our Shores, we trust the Friends of Agriculture and Horticulture will esteem it a privilege and pleasure to give them a most cordial welcome, and make their visit in our State a pleasant one.

We most sincerely trust that the request of Hon. Mr. Wilder, the President of the American Pomological Society will be responded to, and that a large Delegation will be appointed to attend the next Annual Meeting of that Socity, to be held at Philadelphia next September.

DORCHESTER, MASS. March 14, 1869.

My Dear Sir:

Your kind favor of February 10th, is this moment received. "Now or never," is the exigency to which I am driven in response to correspondence. Yes, if life and health are continued, I hope to see the great men and great fruits of California. I have already invited Messrs. Rivers, Leroy, and other notable Pomologists of Europe to come over and join me in a trip by Rail of 3,000 miles across the Western Continent, where Gold nestles in the soil, where Grapes larger than those of Eschol wander in search of gatherers; where Apples and Pears striving for mastery in size with pumpkins, and the Melons of the field lie scattered in rich profusion over the land! Can this be?

We shall see!

Mr. Rivers already responds, "I and wife shall go over to Boston, by steam to New York; I shall leave her with Mrs. Wilder, while you and I make this trip to San Francisco, per Rail. On our return, we will receive deputations from American Pomological Societies as two veterans of the science."

This looks well on paper, except that the *Ladies must go with us*.

I have been on a Southern Tour of 3,500, an account of which you will find in *Tilton's Magazine of Horticulture* for March. One object of this visit was to reinstate the old relations between the officers and members of the American Pomological Society, which were suspended during the War.—They are all coming up to the meeting at Philadelphia, September 15th next. California should be represented by a large delegation. Please see that this is forthcoming. The Society is now in its 20th year, and has become the standard of American Pomology, and should be represented by every State and Territory in the Union.

I acknowledge the regular arrival of the *Farmer*, and read its pages with pleasure. With thanks for your courtesy, I am most respectfully yours,

MARSHALL P. WILDER.

To COL. WARREN.

LOOK TO YOUR GARDEN GROUNDS.

We repeat our advice to all who desire to have a good *Summer Garden*, to look to their grounds *now*. A special favor has been granted to all in the fine showers of last week.

Those who are observers of such things should notice how much more soft and mellow the soil is after these *natural waterings*, than it is after *artificial waterings*. This should teach all a good lesson.

We repeat, now is the time to dig, loosen, and let the sun and air down into the soil that was baked hard by neglect. Those who neglect this duty now, will *regret it* when they see their gardens wither by the hot sun of the summer. But grounds that are dug deep and nicely prepared *now*, can be kept soft and mellow all summer, and will not bake hard again. *Now, to this work.*

Cool Weather.—Since the rains, the weather has been quite cool, remarkably so in many places almost to a frost, but this has not yet done any harm, rather a benefit, giving a more vigorous growth; for had a very warm sun followed the generous rains, a too luxuriant growth would have been the result. The cool weather therefore has checked this, and a strong and healthy growth will follow, and in the orchard, fruit will be larger and better.

OUR FARMERS AND RAILROADS.

The *Farmers* of California will build all the Railroads of the State; their hard earned money will pay for all the Grading, the Sleepers, the Iron Rails, Spikes, etc., and when the Road is ready, Railroad money will pay for all the Engines and Passenger Cars, and for all the Freight Cars, and then the same money will pay the Salaries of the Engineers, Firemen, Brakemen, laborers, etc., and yet having done all this, *our Farmers do not own the very Roads their own money has built.*

This may seem a very strange assertion to make, yet this assertion is nevertheless *true*, for it is paid by them by the immense amount of Freight more which the rapidly increased and increasing productions will cost to carry this freight to market.

Our Farmers' money will thus build these Roads, but they will not own them, and yet, how strange it is that they cannot see, that they, of all men in the country, should be the first to become the active promoter of such enterprizes—aye, be the very men that should take the lead, manage, direct, build and own the Roads. A little reflection must convince every considerate man, that if we should take away the Freight and passage money from any line of Railroad any where which the *Agricultural Interests make for them*, the Road would soon become worthless.

But perhaps some Farmers may say, they have not the spare capital to invest in Railroads and wait till the income from the Roads pay them, for they will go and buy *their thousand acres of land, plow it, and wait till Harvest for the Return.* Now on the same principle, can they not, say one hundred or five hundred combine together, lay out the Railroad that *they themselves* will need to carry their produce to market, *Build the Road*, stock it, and wait till it is completed for their return? If they will reflect a little, they well see it will only be paying a *little in advance* for the freight of *their own produce.*

Farmers should study these things more closely. They have allowed for many years *others to manage all these things for them*, and thus *their money* has built all these Roads; they have *paid for them by their* assesment for the freight of their own productions, and if *they had only managed their own business for themselves*, they would have owned the *Railroads* in the country, and the Farmers of to-day would have been the Millionaires as the result of their own labor, instead of as now, men who never labored, being the wealthy ones standing in the Front Rank, while the true laborers, the Farmers, stand in the back ground.

If our Farmers would feel mortified to be obliged to *hire a wagon to carry their wheat to the mill*, they should feel just as mortified to *hire* a team or *Railroad Car* to take their grain to market, *i. e.* they and all men in the land should have a controlling interest in these great conveyances of their own produce to the great centres of trade.

We ask their particular attention to the excellent article on our 106th page, in the Agricultural Department, which we found in the *Horticulturie Farmer*, and we leave off as we begun, the Farmers of California will build all the Railroads in our State.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of *our Journal*, to which we would direct their special attention.]

We have a valuable Essay on Bees, from a correspondent at Albany, N. Y., which will appear next week.

We have to acknowledge favors from the Agricultural Department at Washington. Particulars next week.

Important Wool Reports from Boston and Philadelphia next week.

We acknowledge the favor of the Annual Report of the Illinois Industrial University for which we return thanks.

We have a letter from a distinguished Fruit Grower, relative to the Shipment of Fruit by the Railroad to New York. It will appear in our next with reply.

We commend to all our readers the Report of the Legislative Excursion of the friends of the Massachusetts Agricultural College.

Acknowledgements.

Articles Received at the California Farmer Exhibition Rooms, No. 320 Clay Street.

We have received Report of Surveys across the Continent in 1867-8, for a Route for the Kansas Pacific Railway to the Pacific Ocean at San Francisco and San Diego, by Gen. J. W. Palmer. A most valuable and interesting volume, for which we return thanks to the Author for a copy.

Monthlies.—We have April numbers of the Overland and Atlantic Monthlies, and as they lay before us, they appear like two blood Arabian Racers, both determined to win; Splendid both of them, but oh, the Overland is about one length ahead.

Music.—We have the Annual Catalogue and Circular of the 'New England Conservatory of Music from Boston Music Hall. The number of Pupils in this institution this year is 1827. A Prosperous Institution.

Catalogue.—We have received the new Catalogue of Peter Henderson, Esq., the well known Florist of Bergen City, N. J., author of many valuable essays on Floriculture.

Allen's Catalogue.—We have a copy from the well known Seedsman, of Water Street, N. Y.

The prayer of the office-seeker—"O that I were an event that might take place!"

Jailors invariably turn out rogues.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN 'JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so consstructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

FRANCIS & VALENTINE

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights o labor. It has the best agricultural department of any paper in the world: publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal; its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Send for a copy, enclosing 10 cents, to

HENRY E. CHILD,

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULARS.

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spoke.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all the trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S

SELF-RAKING REAPER.

This Machine stands at Front of all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good ReaPer only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

THE

PHOTOSCOPIC

Table Company.

THE NEW INVENTION of this Company is known as the ANTHROPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION

this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group FAMILIES entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changable pictures, arranged to suit the wishes an desires of each owner of the table,

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

Those who desire to PURCHASE can see one of the Tables by calling at the FARMER Office, or addressing EDITOR FARMER. 32-1

Can obtain SUPERIOR SEED at the

FARMER OFFICE.

Home Miscellany.

WHAT I LIVE FOR.

I live for those who love me,
Whose hearts are kind and true,
For the heavens that smile above me,
And await my spirit too;
For all human ties that bind me,
For the task my God assigned me,
For the bright hopes left behind me,
And the good that I can do.

I live to learn their story
Who suffered for my sake,
To emulate their glory
And follow in their wake;
Bards, patriots, martys, sages,
The noble of all ages,
Whose deeds crown history's pages,
And Time's great volume make.

I live to hold communion
With all that is divine,
To feel that there's a union
'Twixt nature's heart and mine;
To profit by affection,
Reap truth from fields of fiction,
Grow wiser from conviction,
And fulfill each grand design.

I live to hail that season,
By gifted minds foretold,
When men shall live by reason,
And not alone by gold;
When man to man united,
And every wrong thing righted,
The whole world shall be lighted,
As Eden was of old.

I live for those who love me,
For those who know me true,
For the heaven that smiles above me,
And awaits my spirit too;
For the cause that lacks assistance,
For the wrong that needs resistance,
For the future in the distance,
And the good that I can do.

LETTER FROM OUR LADY CORRESPONDENT.

JENNIE GREEN. CHAP. IV.

Walking in the morning, and working by degrees upon folds of black crape.

Sometimes at the opera and sometimes at the play, weeks and months passed away.

Belle was radiant.

Emily and Marie Lee, Rebecca Golden, and Laura Lancaster were all changed. They wore strange lovers' rings, and like a party of young wives, they wrote strange letters.

Was Grayson real? wondered Jennie alone, as all women are who throw their love away upon one who cannot be perfect to them.

He was too changed and changable to possess an individuality. But some one whom we call Grayson, who was one to himself in the multitude; who smiled on Jennie like the lover in the play.

And he wrote letters and poems, read by the Union loving people in the North.

He knew that the way over which this young girl was coming to him was not strewn with flowers. Sometimes he remembered another, who might be dreaming over his tedious poems, and wondered what object of inspiration, Grayson whom they honored as a hero and patriot, could find away in the South. When Grayson remembered this, he wrote more to the Weekly Republican, and the admiring beauties far away, knew that it meant more than it seemed to.

Others watched Jennie; one with a finger less than nature gave him, and another whom she distinguished by a showy chain of gold upon his bosom, who might have contested for Jennie's hand, had she not loved, not as a woman, but as a dutiful child, the victim of his cruelty, who could sometimes take the place of a brother to her. Grayson had no rival, and Jennie lived in the dream of her romantic love.

Till the cloud of sorrow grew darker, and her heart failed, she went to her room and the world as it had been faded away from her forever.

After weary days of suffering, Belle devoted her time to a quiet dreamer, who toyed with a bunch of red ribbons, or a strand of beads; who neither desires nor could converse with her old times friends.

Then the artist remembered her with sorrow, wondering if great men loved? His way was dark; and others fairer and happier than she was smiled on him. He expected the woman who loved him, to devote herself to his cause. This he required. From Jennie or a rival, what right had he to feel, if he could for forget, if others could fill the place he had given her in his heart.

Resting upon her pillow, languishing away beyond the reach of the world's comforts and customs, Jennie was passing away from the world as it had been to her. She dreamed of twigs and false lips, and then there was a gathering of many friends, and her brother came home, and in all the trouble of the times married Belle.

And Jennie turning to her own love knew that no marriage could make it more perfect than it was to her. In her room were many marvelous pictures, of strange flowers and smiling faces; but not to her solitude could any light of her past life come.

Her young companions would love and wed.

And Belle with her noble soldier brother lived an example of what their happiness might be.

When the beautiful gates are left ajar, she will pass away.

BERTHA BAY.

THE END.

WAKEFULNESS.

It is the complaint of many that they cannot go to sleep promptly on retiring; others are inclined to wake up during the night and find themselves unable to go to sleep again for some hours; a third class wake up early in the morning, feel as if they wanted and needed more sleep, but cannot get to sleep again, and finally get up unrefreshed, sad, or not in a very good humor. If sadly so, that this arises from a mind ill at ease, from sharp-pointed memories, from business entanglements, or the loss of the loved, we have no counsel to give just now; it was intended to make some suggestions which would avail to counteract the influence of physical causes or those of a constitutional character. In nearly all this class of cases, the immediate cause of the wakefulness is the attempt of the person to impose more sleep on the system than it requires under the circumstances. The body will no more take, naturally, a greater amount of sleep than is necessary for the wants of the system, than a gallon bottle will receive more fluid when its proper gallon has filled it to the brim. You may force sleep on nature by taking anodynes, but the sleep is not natural, and always fails to refresh. Each person requires an amount of sleep proportioned to his own constitution, temperament, occupation and age; the general rule is, that women require more sleep than men; all require more in winter than in summer; infancy requires more than mature life; and old age often less than either.

The great regulator of sleep is exercise; it is the best anodyne in the universe, and is the only one that is always safe, always efficient and always wholesome and natural. If you cannot take much exercise, take a little, and every second hour increase the distance, and soon you will be able to walk a mile or more easily than you walked the first hundred yards. The following rules are of admirable utility:

Arise and go to bed at a regular hour; avoid rigidly a moment's sleep in the day time; get up as soon as you wake, even if it be in an hour; wash, dress, and remain up until your regular hour of retiring, and you will seldom fail of two results within a week; you will go to sleep promptly, will sleep soundly, and will as certainly have as many hours sleep as you require under all the circumstances of your habits of life, temperament and muscular activities. Without these last, healthful, delightful, refreshing sleep is an impossibility.

[This excellent essay upon *Sleep* we copy from *Hall's Journal of Health*, is in accordance with the true science of life, and no one can follow the laws laid down here and not receive benefit.]

WHERE WOMAN'S POWER LIES.

The true power of woman is in the resistless power of affection. In asserting this, am I attempting to mask the great questions of our day with "a glittering generality?" Am I disposed to deny any lawful claim which woman may make for a more extensive recognition of her rights, or a larger field for her powers? No; I am not doing any such thing. Let woman do whatever her faculties can achieve—let her go wherever her instincts demand—if she truly follows her instincts, I am sure she will not go wrong. I am sure of this, also, that wherever man may lawfully go, woman may lawfully go. Wherever woman ought not to be, it is a shame for a man, it is a shame for humanity, to be. I merely insist upon this, that whatever woman may accomplish in the world, with brain or hands, will draw its vital efficacy, its talismanic virtue from the heart; and that her strength in all these various shapes of action and of influence, in its root and essence, will be the strength of the affections. The hiding of woman's power must ever be in the fervor and steadfastness of her love. And her most triumphant characteristic is love, culminating in its highest expression—that of self-sacrifice. A thoughtful writer has observed the contrast between the sexes even in their play. "The boy," he says, "gets together wooden horses and a troop of tin soldiers and works with them. The girl takes a doll and works for it." That is woman's great peculiarity—the work of self-sacrifice—working for others.—*Rev. Dr. Chapin.*

BRAIN DISEASES.—Softening of the brain is becoming a 'fashionable' disease—that is, it is getting to be uncomfortably prevalent. We have no statistics of its progress hereabouts, at hand, but we see that in ten years, 1857 66, 11,685 deaths were registered in England and Wales, from this cause. Brain diseases generally are annally claiming an increase of victims. These diseases are cephalitis, (inflamation of the brain) apoplexy, paralysis, insanity, chorea, epilepsy and convulsions.

In England and Wales this class of diseases constituted a proportion, in the year 1866, of 1,233.9 deaths to every ten thousand deaths from all causes—viz: cephalitis, 83 6; apoplexy, 207-7; paralysis, 211-9; insanity, 13-1; chorea, 1-3; epilepsy, 49 8; convulsion, 553 4; and other brain diseases, 113 1. We fear our own record would present similar alarming results. The manner and fashion of having and doing business in these latter days are highly favorable to the development of such afflictions.

[We should suppose by the large number of persons standing at the corners of our streets, and grouping together at saloons and other places, *doing nothing*; that here in San Francisco, there must be a large number of persons who were affected with "softening of the brain."—ED.]

AIR AND EXERCISE.—Dr. Hall, of the *Journal of Health*, says to his "consumptive friends:" "You want air, not physic; you want pure air, not medicated air; you want nutrition, such as plenty of meat and bread will give, and they alone; physic has no nutriment; gasping for air cannot cure you; and stimulants cannot cure you. If you want to get well, go in for *beef and out-door air*, and do not be deluded into the grave by advertisements and unreliable certifiers."

THE CAT'S TRAGEDY.

Four kittens came to my house,
A-foot on the highway;
The mother stopped to catch a mouse,
Under a stack of hay.

She made a mighty blunder,
In getting too far under,
And couldn't get away;
The kittens thought it would be nice
To dine upon a little mice,
But ne'er a mice had they!

MORAL.

Ambitious mother, on life's road,
Keep close unto your little brood,
And never let them stray;
Remember that the finest things,
Beyond the reach of apron-strings,
Is dangerous for they.

—Henry Ward Beecher says that the best time for family prayer is immediately after supper for then the children will be most likely to be quiet, and feel that they have something to be thankful for. No one will be hungry; no one will be sleepy; and if ever the whole attention will be given to devotion, it will be at those times.

—He that envies, makes another man's virtue his vice, and another's happiness his torment; whereas, he that rejoices at the prosperity of another, is a partaker of the same.

—We should take a prudent care for the future, but so as to enjoy the present. It is no part of wisdom to be miserable to-day, because we may happen to be so to-morrow.

—That plenty should produce either covetousness or prodigality, is a perversion of Providence; and yet the generality of men are the worse for their riches.

—It is not the height to which men are advanced that makes them giddy; it is the looking down with contempt upon those below them.

OUR HOME INTERESTS.

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact), and the probability that unless checked this large sum of money will be increased each year, until, in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, to be sent East for investment in the purchase of Life Insurance, instead of being retained at homes to promote and foster BY ITS INVESTMENT HERE the commercial, mechanical, and agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States of the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION *whose capital and assets will not be impaired or injuriously effected by the change in values that will sooner or later occur by a return to specie payments in the other States of the Union* Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to the citizen of this State, who feel an interest in its progress, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

THE CALIFORNIA

MUTUAL LIFE

Insurance Company

CAMILLA URSO EN ROUTE FOR CALIFORNIA.

This fine artist is working her way very slowly towards California, for every city on her route, is craving her presence, "just one concert." At the present rate she will not reach San Francisco before the end of the proposed six month's tour. The Buffalo Courier thus discourses of her playing in that city:

"We hesitate in our commentary, scarcely knowing what to say of the performance of one of the most remarkable women known to the age—we mean the *violiniste*, Camilla Urso. A true child of genius, whose soul is animated by the very spirit of music, possessed of the subtlest powers of emotional interpretation, commanding a magnetic force which is masculine, and a tenderness which is deeply and ineffably womanly, the master of a bow which is as true to her wish as is the needle to the North Pole, we approach her with that feeling of respect, verging on awe, which is the unvarying tribute we have to render to genius. Say what we might, we could only part company with her, dissatisfied with our best efforts at characterization. She is queen of her instrument, and even with the performances of Vieuxtemps, Ole Bull, and others of the masters, still fresh among our musical remembrances, we must confess that none of them ever facinated us as does the rapt-faced, dreamy-eyed, and serious Camilla Urso.—Her first performance was a fantasie on a theme by Beethoven, which was rapturously applauded. In response she played a piece which we did not recognize. Her execution of the 'Witches Dance,' by Paganini, brought down the house again in a storm of applause, and upon making her second appearance she gave the 'Carnival of Venice.'—The audience, still hungering for more of the delicious music, compelled her reappearance, when she played in succession 'Home Sweet Home," and the 'Mocking Bird.' Upon being called out the last time, we thought we discovered the faintest smile in the lines of her mouth—the first we have ever known to illuminate the absorbed, sad face of this great *artiste*.

VELOCIPEDESTRIANISM.

Exit Velocipedes. The great excitement caused by this new fancy sporting machine is awaking attention among our medical men, as to its effect upon the Physical Man, and the Louisville *Journal* gives a report from a prominent New York physician who has written to the *N. Y. Times*, asserting that the Velocipede produces *Hernia*. He says:

"The operator sits with his feet in the proper places; legs being slightly bent forward; the hands on the crossbar. Thus he sits, his limbs moving downward, upward, forward, backward, using slight exertion on a level, little descending a hill, and very much in ascending. And what now is the condition of things? All those muscles which, when the body is in one straight line, were tense, now become relaxed. The hernial rings and canals are somewhat open, and while thus open, let the viscera be slightly or powerfully pressed upon, as will be the case when the machine is in motion, by the action of the abdominal muscles, which are accessories to those of the legs, in a vast majority of cases the hernial tumor will appear. If the victim does not understand his case, or if a surgeon is not convenient, the state of affairs is indeed alarming, and even if it is reduced, unless the proper precautions be taken, the tumor will reappear. Not only the relaxed condition of the abdominal rings, and the force exerted by the external abdominal muscles, but that powerful internal muscle, the diaphragm, is lending its aid to the other causes in the production of hernia. For it must be apparent to all that there is danger, not only to those who have never been ruptured, but are predisposed from the formation, or rather lack of formation, of their bodies, but also those who have been ruptured and are now cured. Here, then, is a tendency to the reformation of the tumor. And what shall we say of those who are already ruptured? The least exertion may cause the tumor to appear, inasmuch as there is formed a passage already, and especially since the pad is constantly liable to become misplaced."

A NOVEL PLAN OF WHOLESALE PROPOSAL.—A short time since, at a wedding in South Carolina, a young lawyer moved that one man in the company should be elected as president; that this president should be duly sworn to keep entirely secret all the communications that should be forwarded to him in his official department that night; that each unmarried gentleman and lady should write his or her name on a piece of paper, and under it place the name of the person they wished to marry, and if any lady and gentleman had reciprocally chosen each other, the president was to inform each of the result, and those who had not been reciprocal in their choice were to be kept entirely secret. After the appointment of the president, communications were accordingly handed up to the chair, and it was found that twelve young ladies and gentlemen had reciprocal choices, and eleven of the twelve matches were solemnized.

This is a good plan and might lead to more real happiness in married life than long courtships.

—It is related of a certain minister of Maine, who was noted for his long sermons, with many divisions, that one day, when he was advancing among the "items," and had thoroughly wearied his hearers, he reached at length a kind of resting place in the discourse, when, pausing to take breath, and looking about over his audience, he asked the question, "And what shall I say more?" A voice from the congregation, more suggestive than reverent, earnestly responded, "Say amen!"

—The apprehension of evil is many times worse than the evil itself; and the ills a man fears he shall suffer, he suffers in the very fear of them.

Miscellaneous.

A PRINCELY RESIDENCE IN THE COUNTRY FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

We have the Exclusive sale of HILL CONCORD HARNESS, for the Pacific Coast.

AVERY TUBE WELL

COMPLETE FOR USE

THE TUBE WELL IS FORMED BY DRIVING prepared Iron Piping into the ground with a sledge Although of comparatively recent invention, these Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well, all surface water, dirt etc. being excluded. The Tubing is coupled together in lengths of five or six feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Lift Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. ☞ For circulars, etc., address Postoffice Box, 17. UHRIG & DEWEY.
Office at 318, Pine street. 31-10.

Valuable Patents FOR SALE

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

Is on the red cover of the package

112 California street.

Railroad Lands.

GENERAL PACIFIC RAILROAD, LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

Corrected Weekly, by Editor Farmer.]

San Francisco, April 22

Our Grain Market presents no new features this week, save a slight decline in price abroad. The Liverpool quotations being a shade lower than last week. The New York prices remaining about the same.

From all the great grain producing States *west* of N. Y., large crops are heralded in prospect, while beyond a doubt the *Southern States* will raise enough for their own use, and some to spare. It should be remembered that *before the war*, the North supplied the South largely with *Bread Stuffs*; now the case is materially changed.

Little or no demand is had for exports for Wheat, while it is rapidly being shown that we have an excess now beyong the calculation of the *Knowing Ones!*

The papers of the day, now show that speculating exporters are showing *Profits in shipping Grain on the wrong side of the ledger*, a plan that dont pay in bookkeeping, or rather purse-keeping.

The present stringency in the money market is being attributed to *Politics*, and the Chamber of Commerce are remonstrating against a change of Mint officers, and that the only way to prevent a "Crisis" is not to *shut up the Mint*. The Bank of California is calling in *half of their loans*, also to prevent *hard times*. These may be wise plans now the the mistake has been made, but if *our surplus Grain had been sent abroad, instead of our Gold*, the difference *now* would have been more than the *whole Capital* of the Bank of California, for we could have sent one hundred and fifty thousand tuns more, and there would have been *no pressure*, and we are surprised the learned Chamber of Commerce don't speak upon the subject plainly, and show that they are all really interested in this matter, and at the same time show their wisdom and foresight.

Wool is in good demand and advancing.

Hides and Tallow are at good prices.

Cotton Culture, Flax Culture, and Sugar Beet Culture are assuming shape now, and will soon form important items in our expert trade.

Large shipments of Linseed Oil Cake has been recently made by the Linseed Oil Manufactory to Europe, where it brings a large price, and profitable returns to shippers.

Oregon is going largely into Flax raising, and large crops have been put in also in our State.

Potatoes are abundant and low, and this year the new kind of Goodrich, Rose, and the Harrison will be offered in market as choice things for our tables.

A good and prosperous year is ensured to the cultivators of the soil, for which they should be devoutly thankful.

Retail Prices in the Fruit Market.

In our Fruit Market there is little or no change, excepting Strawberries, which are coming to hand very plentifully, consequently coming down in price. The demand for this delicious berry is unusually large, and increasing very much; without exception, there is no market in the known world so well supplied with this and all other seasonable fruits. What market can boast of having its thousands of pounds of Strawberries daily coming in, so early in the season, and all coming to perfection in the open air!

Oranges are becoming more plentiful, and are excellent in quality. There has been a scarcity of Pine Apples and Bananas this week.

Retail Prices in the Vegetable Market.

Vegetables, as a rule, have slightly fallen off this week. We have had nothing particular worthy of note brought to our city this week. The leading features are Asparagus and green Peas, which are very abundant. A few Spring Cabbages are coming to hand, the best of which are the Early Dwarf and Early Nonpariel. Broccoli and Cauliflowers are very scarce; so also is good Cabbage Lettuce.

Fish

(Tessmore and Hayes.)

Our housekeepers must be highly gratified to find that Salmon, the Prince of Fishes, can be had at the reasonable price of 8 cents per pound. Who will not have a piece of fresh Salmon for dinner every day, as long as it can be had so cheap. In this climate it is better to partake freely of light diet rather than more heavy and substantial meats. Fresh Fish is easily digested, and benefits the system as much as animal food. Lobsters are very fine, and excellent in quality; so also Crabs, and to be had at reasonable prices.

Meats.

(L. Miller & Co.)

The Meat Market is tolerably well supplied, and prices have a downward tendency, which in a small measure may be attributed to the large supply of Fowls and Fish. Birds of all sorts in season can be had very cheap; so also fine fresh Fish of all varieties. The unusual supply of these articles certainly must affect our Butchers, nevertheless, they have no reason to complain, as they each and all are doing a brisk business.

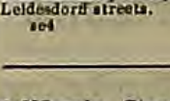
STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS



Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

April 17th—GOLDEN CITY, Capt W. F. Lapidge, connecting with HENRY CHAUNCY, Capt. Conner.

April 30th—MONTANA, Capt. E. S. Farnsworth, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman' and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—If desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se4 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings, Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento or alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, UNtill further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9 50 A. M.; Reno at 4.20 P. M.; Wadsworth at 6.30 P. M. Winnemucca at 3 30 A. M.; Argenta at 8 50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12 05 P. M. Reno at 2 10 A. M. Colfax at 9.50 a. m. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6:30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada.

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermit, Silver City, Owyhee, and all points n Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages or White Pine, and Overland Stages for Salt Lake City and the Atlantic states.

General Superintendent

AUZERAIS HOUSE,

SANTA CLARA STREET,

San Jose, Cal.

J. M. STAPLES, PROP'R.

—ALSO—

LAKE HOUSE,

DELMAR AVENUE,

SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most agreeable place of resort. Parties wishing rooms and board will please apply to J. M. STAPLES,

31-1 Proprietor of the Auzerais House.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

ALL etters, Orders, Parcels, &c., intended or this office hould be addressed WARREN & CO.,
California Farmer Office

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

—o—

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuges now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the vendors of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure u are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S

CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER and BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires that some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use will, we think, be sufficient to convince the most incredulous. It has been our sincere wish that these Pills should be fairly and for tested, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with deranged state of that organ.

DISEASES O THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the power of the Stomach, Bowels, Brain, and the whole Nervous System, should be vast and vital importance to human health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has so close connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal atrocity or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Menses, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three-fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet on examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken in connection with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge in two or three times by next morning, take one or two more; but a slight breakfast should invariably follow their use. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are infallible, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S

American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult, the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked. And even in cases of great violence, if a potent and rompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed and with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure or livid circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or foul tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a gnawing sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently tinged with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough; cough sometimes dry and convulsive; uneasy and disturbed sleep, nightmare; grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual, providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water every morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten, give a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: DR. McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the same stamped on the lid of the box, in red wax.

Prepared only by
FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLane's Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills, or one Vermifuge on receipt of forty cents in Government Stamps.

Eastern Correspondence.

TRAVELS IN ORIENTAL AND BIBLE LAND.

We are most happy to lay before our readers the following Letter from Rev. I. S. Diehl, our highly Esteemed Correspondent, and a well known Californian of former years; but recently a Traveler in Oriental land, previous to which Mr. Diehl was U. S. Consul at *Java*, from whence we received several valuable and highly interesting letters, and more recently we received letters from Asia, and letters from other places on his return.

It will be remembered that Mr. Diehl brought with him from Asia a large number of the *Cashmere Goats*, which has since greatly increased, and have proved of great value to our country.

We are exceedingly gratified to know, as the letter states that our friend will soon again visit our sunny land, and still again gratified to know he will present in a series of Lectures an account of his Travels in Oriental Lands.

This announcement we know will be most gratifying to the large circle of Friends that will be ready to welcome Mr. Diehl back to California again.

The Lectures of Mr. Diehl will *now* be of very great interest to us in California, for by the opening up of trade with China and Japan and the Eastern World, and the speedy passage that can be made to and from the Old States and Europe, everything that relates to the Old World and especially to Oriental Lands and their wonderful history, must particularly interest Californians.

We therefore speak in advance, and in behalf of the many warm friends of Mr. Diehl and bid him a most hearty Welcome back to California.

WASHINGTON, D. C., April 12, 1869.

COL. WARREN, *Editor California Farmer:*

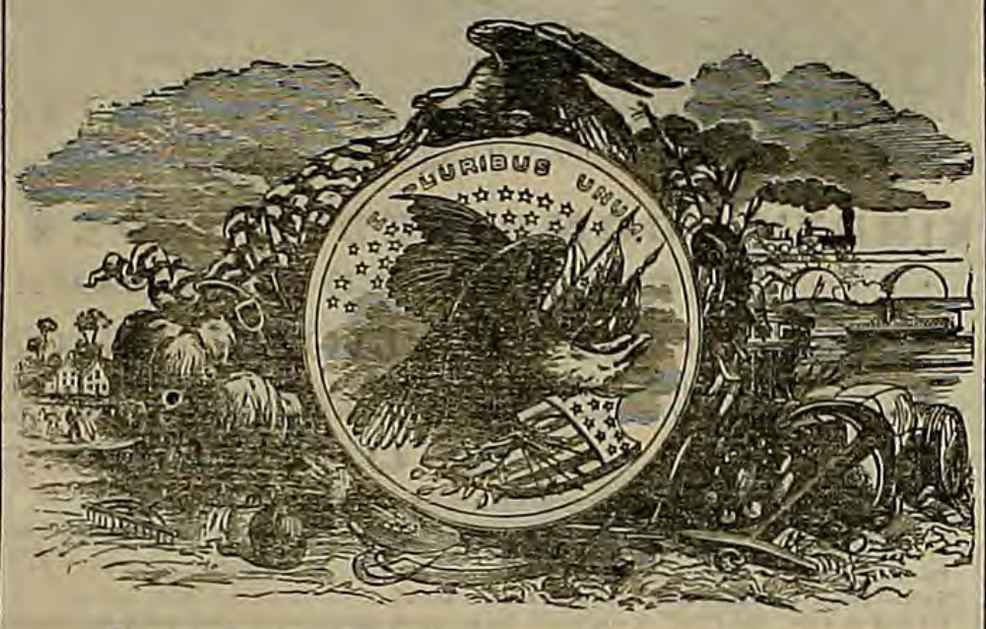
My Dear Sir and Friend:

I am pleased to say to you as an old Californian and Friend, I am finally about returning to California, at least for a season to see my old Friends, the scenes of my former labors, and travels, and at the same time to Lecture some on "*Travels in Oriental and Bible Lands*," which Lectures I am pleased to say have been well received, and with all been quite successful and remunerative. I shall doubly enjoy my trip and visit through California, more since my Tours through Asia from similarity of Country Scenery. I shall be quite happy to see you and my Old Friends of California.

I have been Lecturing all Winter at Philadelphia Pa., New York, Baltimore, and here. I go from here to St. Louis, to look after my Cashmere Goat Family, and as soon as Railroads join, start for California, anticipating a pleasant time, trip, and visit, and shall be pleased to see and serve you. I have had an eventful life since I saw you and left California, and as a Traveler yourself, I know you will be interested in those wonderful Asiatic Lands. The world is marching on, and California may yet be the beacon lighthouse to shed athwart the moral and political darkness of Asia, the benign and hallowed blessings of Civil and Religious light and Liberty, in which the Farmer as a Pioneer and Missionary may participate.

With kind regards till I see you; peace and prosperity attend you,

Most Fraternally Yours,
ISRAEL S. DIEHL.



American Genius and Enterprize!

CALIFORNIA BEATS THE WORLD!!!

Grand Progress in Agriculture.

NEW HARVESTING IMPLEMENT.

A Locomotive Threshing Engine.

In some lonely districts of New England, where railways have not yet penetrated, and the custom of forty years ago survive, distinct if not vigorous, the traveler may still hear at certain seasons of the year, proceeding from barns along the road the peculiar *thug*—which is like no other possible sound—of a flail descending upon grain in the straw. Yes, even at this day, many a Yankee boy schools his young sinews in the discipline of the flail, and ponders as he pounds, the "long, long thoughts" of youth. But the reign of the flail is nearly over, and soon it will be numbered among the obsolete agricultural implements that we read about, wondering how our ancestors could have been content with their awkwardness and inefficiency. The invention of the threshing machine revolutionized the whole system of agriculture. Even New England farmers must have it for their crop of 500 bushels of oats; and but for it the great grain fields of the West and the Pacific Coast would never have received the seed.

But man is never contented with his condition. He grew weary of swinging the slow and dangling flail, and forewith invented a machine by which horses could be made to do his work tenfold more rapidly. This was a great gain, but so long as he fell short of perfection he was not satisfied. He set to work and compelled steam to drive his threshers. This was another improvement; but he still found fault with his own handiwork. Threshers driven by portable engines, or even those driven by horse power, might do very well for small farmers, but the vast wheat fields of California and Oregon demanded something more efficient. There was a long interval of inaction. Many inventors kept up a thinking and an experimenting how they should make a machine that should thresh grain faster and more economically than the apparatus now in use.

At last a Californian—Robert Baxter, of Stockton, inventor of the famous Baxter gang-plow, marking the gigantic progress of his State in the business of grain growing, and knowing her enormous resources yet undeveloped, began to ponder on the desideratum. He determined to make a threshing machine that should not only reach the maximum of efficiency but should also move itself—be a locomotive, in fact, and, propelled by strength from its own loins, run about from farm to farm as easily as a scissors grinder or a hand-organ man. He resolved to do this, and he did it.

Coming over to Worcester he sat himself down in the great shops of the "Ames Plow Company" and went to work. A few days ago, the machine was finished and taken out into the yard to be gazed and wondered at by hundreds of curious spectators. It is a queer looking apparatus, not handsome according to the strict rules of art, but it impresses the beholder with a sense of enormous power. The casual observer, looking at it, would see hardly more than a smoke-stack mounted on two pairs of wheels, the rear wheels being of huge dimensions.

The running part of this machine, it should be remembered, is just like that of a portable engine; but the difference between the two, though not plain to the unprofessional eye, is very important. The distinguishing peculiarity of the former is this: on the crank-shaft it runs two gears on each side of the crank—one a plain spur gear, and one with an intermediate by which the motion is reversed. To the forward wheels is attached a pole, and above them is a little seat like that on a mowing machine. A pair of horses being hitched to the pole and the driver having occupied his seat, steam is started and the monster moves. The horses do not draw a pound, for there is no need that they should do so; they simply guide the course of the engine as the fore wheel of a velocipede guides that vehicle. The machine is under perfect control; it runs along, the horses trotting briskly before it, reaches its destination, connects with the threshing machinery, saws the wood that keeps its fires going, pumps the water that fills its own boiler, and all things being ready, falls to work on the waiting wheat and rattles it out at the rate of 1,500 to 2,000 bushels per day.

The design of this engine is entirely novel; nothing like it has ever been attempted. Its value must be plain to every reader. To the New England farmer and to the majority of his brethren in the Middle States it can be of little use, working on too large a scale; but in the great grain-growing regions of the West and the Pacific Coast, it will prove an inestimable help. The main objection heretofore existing to the employment of steam in threshing grain, was the difficulty and expense of transporting the engine from one point to another. By this invention this objection is wholly done away with. Of its success there can be no doubt; it has been carefully tested, with the most gratifying results, and within a few days the pioneer machine will be on its way to California, with whose next grain crop it will unquestionably have a very large "bone to pick."

The shops of the Ames Plow Company, in Worcester, where this invention was born, afford as striking an illustration of the potency of Yankee genius, the vigor of Yankee enterprize, and the skill of Yankee industry, as can be found in all New England. The shops themselves are not much to brag of in an architectural point of view, but, if life is beauty, they are beautiful enough, for there is no livelier place in the land. Every foot of the vast area covered by the shops is carefully utilized, the work is wisely systematized, and every man of the two hundred and seventy-five who compose the working force, seems to know his place and his duty, and to do the latter to the best of his ability. It is a pleasure to walk through an establishment where method is so palpably in authority.

The products of the Ames Plow Company are agricultural implements, and to the question what kind? the most fitting answer would be another question, what kinds do they not make? There are very few tools of wood or iron employed in the business of agriculture that do not appear in the list of articles manufactured by this Company.—And the extent of their business is proportioned to the variety of their products. Their implements are known and used in almost every civilized country, and each year witnesses an enlargement of their field of labor. California is a heavy customer, and hardly a vessel sails from the Atlantic Coast for that State that has not on board cases marked "From Ames Plow Co."

At Groton Junction the Company have other extensive works, which give employment to 225 hands, and are mainly occupied in the manufacture of the numerous labor-saving machines made by the Company. There are three or four of these machines whose remarkable efficiency and value fairly entitle them to mention in connection with the steam threshing machine which has been described above.

In gathering in the twenty million tons of hay, annually cut in the United States, our farmers have in the last dozen years, been materially aided by the mowing-machine and the horse-rake, each of which performs the work of several men. But even with these helps they have not been able to make sure of getting in their crops in good order, nor to "make hay while the sun shines," rapidly enough. Hardly any crop raised in the country is so liable to injury by unfavorable weather as hay, and it is the prime object of the farmer to secure it with the greatest speed consistent with its thorough cure. Dependent on hand labor alone for the necessary ventilation or "spreading" of the hay, he is rarely able to take advantage of fine weather, and house his hay within twenty-four hours after it is cut. Any means by which he can do this would happily supplement the advantages of the mowing-machine and the horse-rake, and lessen to an important extent, the risks which now attend the gathering of the hay-crop.

In the American Hay-Tedder, it is safe enough to say, this means has been discovered. This machine, drawn easily by one horse, goes about the field and lifting the freshly-cut grass, tosses and shakes and disentangles it, and opens its matted masses and drops it on the ground to receive the curing influences of sun and air. This it does as fast and far more thoroughly than twenty men with pitchforks could do it. Thus it virtually saves the farmer the wages of twenty men for a large part of the day, and, more than that, it enables him to put, as fully made hay, into the barn before night, the grass that his scythes or mowing-machine cut in the morning.

Hay tedders have for sometime been used in England, and a few English machines have been brought to this country; but their clumsy and faulty construction and heavy cost have prevented their adoption here. The American Hay Tedder seems to realize all the conditions of excellence—efficiency, lightness, ease of operation, simplicity and cheapness; it is adapted for use in all sections of the country, and within a very few years, beyond doubt, will be deemed as indispensable as the two machines with which it is naturally associated, by every intelligent farmer.

The American Hay Tedder consist of a light reel mounted on two wheels, and furnished with sixteen spring forks. When the wheels are revolved by the motion of the horse, these forks revolve also with great rapidity, catching up the grass and distributing it, as above stated, in just the manner which a man with a fork would pursue, *if he could*. A driver, who may be a boy of ten years, sits on a seat above the reel and has nothing to do but to hold the reins. It is a sufficient comment on the merit of these machines, which were first introduced in 1867, that the Ames Plow Company will, this year, make 3,000 of them.

There are three other agricultural machines made by the Ames Plow Company that deserve equal attention with the Tedder—The Perry Gold Medal Mower, Burt's Self-Adjusting Horse Rake, and the Patent Improved California Harvester or Heading Machine; but our limited space restricts us to a mere mention of them. That they are worthy companions of the Steam Threshing Engine and the American Hay Tedder, a visit to the warerooms of the Company in Quincy Hall, Boston, and at 53 Beekman street, New York city, will convince any intelligent investigator.

CONDITION OF THE PACIFIC RAILROAD.

The *Alta* says:

The Board of Commissioners appointed by the President to examine the Pacific Railroad have completed their first expedition, and reached home yesterday, on their return. They found that on Saturday last the Central road was finished to Monument Point, and the gap occupied by the stages was 65 miles—the time in the stages being eight hours. About 30 miles of track were then used by construction trains, as the road needs ballasting before it can bear general traffic. It was said that the last rail would be laid this week, and that the entire road will be open for general traffic on the 10th of May. The Central Company intend to lay ten miles of track to-day, and thus surpass any previous day's work at railroad track laying. The Union Company has sold out its track west of Ogden to the Central, and is doing work there as a contractor, not as a proprietor.—The two companies have settled all their disputes and are now on good terms. The Union has graded 142 miles, which it has not ironed, and the cost of this grade was $300,000. The report of the travelers is that the road lately made by the Union and Central is excellent. Some statements lately published by Henry George, to the effect that the Central Road is very shabbily made, are directly contradicted. A gentleman arrived in this city last evening in seven days and a half from Chicago, including the day that he laid by, so that the actual traveling time was six days and a half.

HOW TO GROW LARGE POTATOES.—The *North British Agriculturist* says: "To improve the size of potatoes, whether planted with small or large, whole, or even cut potatoes, when the plants are only a few inches high, let the shoots be reduced by pulling them up to one or two, or at most three of the strongest. The tubers will, consequently, be fewer and very much larger, also in measure nearly all fit for market and the table. Every grower will do well to try a few rows by way of experiment, if he disbelieves the truth of this statement."

THE YOUTH OF SAN FRANCISCO.

[The following most excellent essay we found in the interesting little periodical *Social Voices*, published in our city. The writer J. deserves thanks for this earnest counsel, and we trust Parents will read it carefully and heed it well.—ED. FARMER.]

The newspapers have had considerable to say of late in regard to the sad depravity so fearfully prevalent among the boys of our city; and when we consider how important the position of San Francisco will soon become in the world, it behooves not only the press but every true Patriot, Philanthropist and Christian to inquire, with earnest anxiety, into the present condition of the young of this place, in order that they may know what kind of citizens will have the reins of government when they shall have passed away, and their descendants shall be called upon to occupy the places they now fill. We hope that the public discussion this subject has had will culminate in the promotion of a strong and sound public opinion, whose weight will be felt in this community. Evil-doers must understand that society will frown down upon them and their actions, and that to gain the respect and esteem of their fellow citizens their private characters must be above reproach.

It too often happens that a man's position in society hides many of his glaring faults and misdeeds, and that on account of his talents, wealth or social rank, his imperfections of character and positive wrong actions are but slightly condemned, and he holds his head as high as the purest moralist in the land.

The plastic mind of youth easily receives impressions, and its estimate of virtue, morality and religion is very apt to be formed by the manner in which these are upheld and received by the people among whom it dwells.

The disgraceful scene enacted in the sand hills at North Beach one Sabbath morning, not long since, as the church bells were pealing and the respectable citizens were wending their way to the several places of worship, is still fresh in the minds of our readers. If men are allowed to charter steamboats for the purpose of visiting some unfrequented spot in our harbor, there to engage in all the details of the prize ring, for the gratification of beings whose tastes are so degraded that they really enjoy such inhuman scenes, is it at all astonishing that Young America, in emulation of what they have been taught to consider the height of true manliness and exalted nobility, should shock the public with similar exhibitions of what they are led to believe is the embodiment of all bravery and courage? If Young San Francisco is to be reared amid all these scenes, so debasing in their influences, it cannot be expected that without the utmost vigilance of parents and guardians they can ever prove useful to the community or to themselves. Something more than education must be done for the children of our city. While the standard of those who attend our public schools is the highest (with, we believe, one exception) in the United States, it is only necessary, on the other hand, to read the daily papers to furnish abundant evidence of how much degradation already exists among a very large proportion of the boys.

The open desecration of the Sabbath in the manner in which it is too frequently done in this city, cannot certainly meet with the approval of the respectable, and we believe the largest, portion of our people, however they may differ in religious opinions; and yet the entertainments that are held on that day in wanton violation of the feelings and utter disregard of the opinions of so large a number of our citizens, cannot fail of having its full influence upon the young. Will any one pretend to say, in the face of all history, that such a course will produce a sound and moral public opinion? Let those who will desecrate the day do so quietly, and in their own way, so long as they do not interfere with the just rights of peaceable citizens. All will then be protected—the Sabbath-keeper as well as the Sabbath-breaker.

Let us throw around the young all the saving influences we can, for if we wish our city to be well governed we must see to it that the youth are thoroughly instructed in those great principles of right, justice and virtue which lie at the foundation of all true national or individual prosperity.

FINE HOMESTEAD IN NAPA.

By referring to our columns will be seen a fine Home in Napa for sale. This is indeed a very fine Estate, and is offered at a great Bargain. We would urge those who want a fine place to go and see it. It is pleasantly located, and can be made profitable. The owner will show the place, and explain its prospects of crops, etc.

A NEW WHEAT CLEANER.—We see by our exchanges, that R. B. Lane, Esq. of the well known Flouring Mills on Weber Avenue at Stockton, has invented a new machine to clean wheat. It is reported to be a superior implement, doing the work perfectly. This is highly honorable to Mr. Lane, the inventer.

Agriculture.

WRECK AND RUIN.

A slovenly dress, a shabby pate,
The fences down, a broken gate,
Pigs in the garden, weeds very high,
Children unwashed—no bacon to fry—
Lots of great dogs and yawling tom cats,
Windows repaired with a dozen old hats,
An empty barn—not a spear of hay,
Cows in the clover, horse run away,
Things sold by guess without being weighed,
Bills coming in and taxes unpaid—
Pipes and tobacco—whisky—neglect,
Drag in their train, as all might expect,
All sorts of trouble to fret away life—
But worst of the whole, an unhappy wife.

* * * * *

[Such evils are rare in the circle of Home,
Unless it is cursed by Tobacco and Rum.—Ed.]

TALK ABOUT BEE HIVES.

[We lay before our readers a very valuable letter, from a venerable Apiarian at Albany, N. Y., who is now in his *seventieth year* of age, and yet a real worker.

Our apiarians here in California may get valuable instruction from this letter, and we give the letter with much pleasure, and hope to hear from our honorable correspondent as often as his duties and health will permit. He deserves honor for his industry.—Ed. Farmer.]

Of the hundreds of Bee Hives, patented and unpatented, in use or out of use in the United States, that hive that combines the means, at the least expense, to secure the most direct access to every part of the hive, the greatest security for winter, and the largest amount of surplus honey, given in the field of the apiary, is undoubtedly the best.—The first of these objects is best secured by movable comb, either by comb frames or by bars. The second is best secured upon the stand by such construction, that the bees may have straw, hay, chaff, sawdust, cobs, or other nonconducting substance, crowded around them, six or eight inches in thickness, enclosed by double walls.

The third object can best be secured by a sufficient number of surplus honey boxes to store all the surplus honey gathered by all the laborers in the whole season. The hive embracing these three ends, in the simplest form, and at the least expense, is undoubtedly the best hive for use in the United States.

Illustration by experiment with three classes of hives.

1st Class—Hives with 2,000 cubic inches in the body of the hive—four boxes upon the top for surplus, of an aggregate capacity of 20 pounds of surplus, covered with a cap. This hive has been in use in this section of the country more than any other. A hive in any form with only this room or a little more, will be very sure, in common seasons and a healthy colony, to cast one, two or three swarms. I think sufficient pains has not been taken to weigh and keep an account of the product of hives of this or any other class, to enable us to do much but to guess at results. Mr. Quimby in the first edition of his work "Mysteries of Bee keeping Explained," estimates their product at one dollar's worth each—this at 20 cents per pound is 5 pounds each. In 1864, I had four colonies in this class of hives. Three of them gave me one swarm each and no surplus. One gave me 12 pounds of surplus and no swarm. This would be 3 pounds to the colony, 3-5 of Mr. Quimby's estimate. In the revised edition of his work, he estimates them at $2.00 worth. This at 20 cents per pound is 10 pounds to the colony. In our comparison in this communication, we will call it ten pounds per hive.

2nd Class—In my experiments commenced in 1860, I constructed hives of 60 or 70 pounds of surplus honey box room, and to 1865 increased in amount of room for surplus until it went perhaps to 120 pounds. I have an account of the product in full in the year 1864. In that year, the year in which my first class of hives gave an average of 3 pounds, 13 colonies in the second class hives 797 pounds of surplus, an average of 61 4-13 pounds; they varied from 37 to 100 pounds. It will be seen the average was more than six times as much as Mr. Quimby's estimates in his second edition, and twelve times as much as his estimate in his first edition. It is twenty times as much as the actual surplus of my four hives of the first class. This hive was patented by me under date of September 2, 1862. In 1866, I built four new hives of 125 pounds surplus box capacity. I use for them movable bars. In 1867, I placed the boxes upon the hive early in the season. The product of two of the colonies was four new swarms, and 203 pounds of surplus; the product of the other two was one 123, the other 174 pounds of surplus. They made 49 pounds more of surplus than they had box room, requiring the removal of nearly half of their boxes when filled and supplying empty ones. Had they had boxes for 200 pounds of surplus each, I think the two would not have swarmed and the three would have given 200 pounds each. I confess this is guess work, and others have the same privilege to guess.

3th Class—I have progressed in my experiments until I have reached hives with 36 boxes of about 200 pounds capacity. Last season I had of a neighbor ten swarms placed in hives of different surplus room; two of them were without Queen and broken up last fall. One was sold in the spring, leaving seven. Two of the seven were so weak in the spring they only reached fair wintering strength. Of the five, one of nearly 200 pounds box room gave 147 pounds of surplus. Of three with 150 pounds box room each, one gave 105, one 97, and one 75 pounds—106 pounds from the four. The fifth hive with less room gave 39 pounds. My hives with large box room gave me an average of 106 pounds; of medium box room of 59 pounds. In order to reach the right result, it should be understood that the field and season was such that 20 colonies within eighty rods of my apiary gave less than 140 pounds surplus in all. Then we may estimate the aggregate surplus of the second class when there is no swarm at 100 pounds; of the the third class at 150 pounds.

First class hives well planed and painted will cost, say $2.00 each, last 10 years. Second class hives well planed and painted will cost $5.00 each, last 10 years. Third class hives well planed and painted will cost, say $7.00, last 10 years.

What will be the actual cost of one ton of surplus honey by each class? And what will be the cost per pound?

1st Class—200 colonies will give, at 10 pounds each, one ton:

200 hives cost	$400 00
200 swarms, at $5 00 each	1,000 00
Outlay for one ton	1,400 00
Interest on outlay at 7 per cent.	$98 00
One-tenth cost of hives	40 00
One-fourth cost of swarms, at $5 00	350 00
Cost of one ton of honey	$488 00

Cost of honey per pound 24 cents and 4 mills.

2nd Class—20 hives will give 2,000 pounds.

Cost of 20 hives, at $5 00 each	$100 00
Cost of 20 swarms, at $5.00 each	100 00
Outlay for one ton of honey	$200 00
Interest on outlay	$14 00
One-tenth of hives	10 00
One-fourth of swarms	25 00
Cost of 2,000 pounds in second class	$49 00

Cost of surplus per pound, second class, 2 cents 4½ mills.

3d Class—13⅓ colonies will give 2,000 pounds.

13⅓ hives will cost, at $7 00 each	$93 33⅓
13⅓ swarms will cost, at $5.00 each	66 66⅔
Outlay for 2,000 pounds of surplus	$160 00
Interest at 7 per cent.	$11 20
One-tenth cost of hives	9 33⅓
One-fourth cost of swarms	16 66⅔
Cost of 2,000 pounds in largest hives	$37 20

Cost per pound, 1 cent 8 6-10 mills.

The boxes in each class of hives for 2000 pounds of honey will be of equal cost, and paid for in the sale of the honey, and need not be reckoned.

Another consideration, a colony of bees during the breeding season and winter will consume 60 pounds of honey; 200 of the first class consume 12,000 pounds—six tons, and give 2,000 pounds—one ton, to their keeper—he gets one-seventh and they consume six-sevenths. 66⅔ colonies of the third class will secure it. They will consume 4,000 pounds—two tons, and give 10,000 pounds—five tons, to the keeper. The keeper gets five-sevenths of the product, instead of one-seventh, and they consume two-sevenths, instead of six-sevenths. 87½ of the second class will secure it. They will consume 5,250 pounds, and give 8,750 pounds to the keeper; between 2 3 and 3-5, instead of one-seventh.

Every Farmer, with little expense and trouble, may have his 150, 200, or 300 pounds surplus for family use.

Albany, N. Y. JASPER HAZEN.

HOME GARDENS.

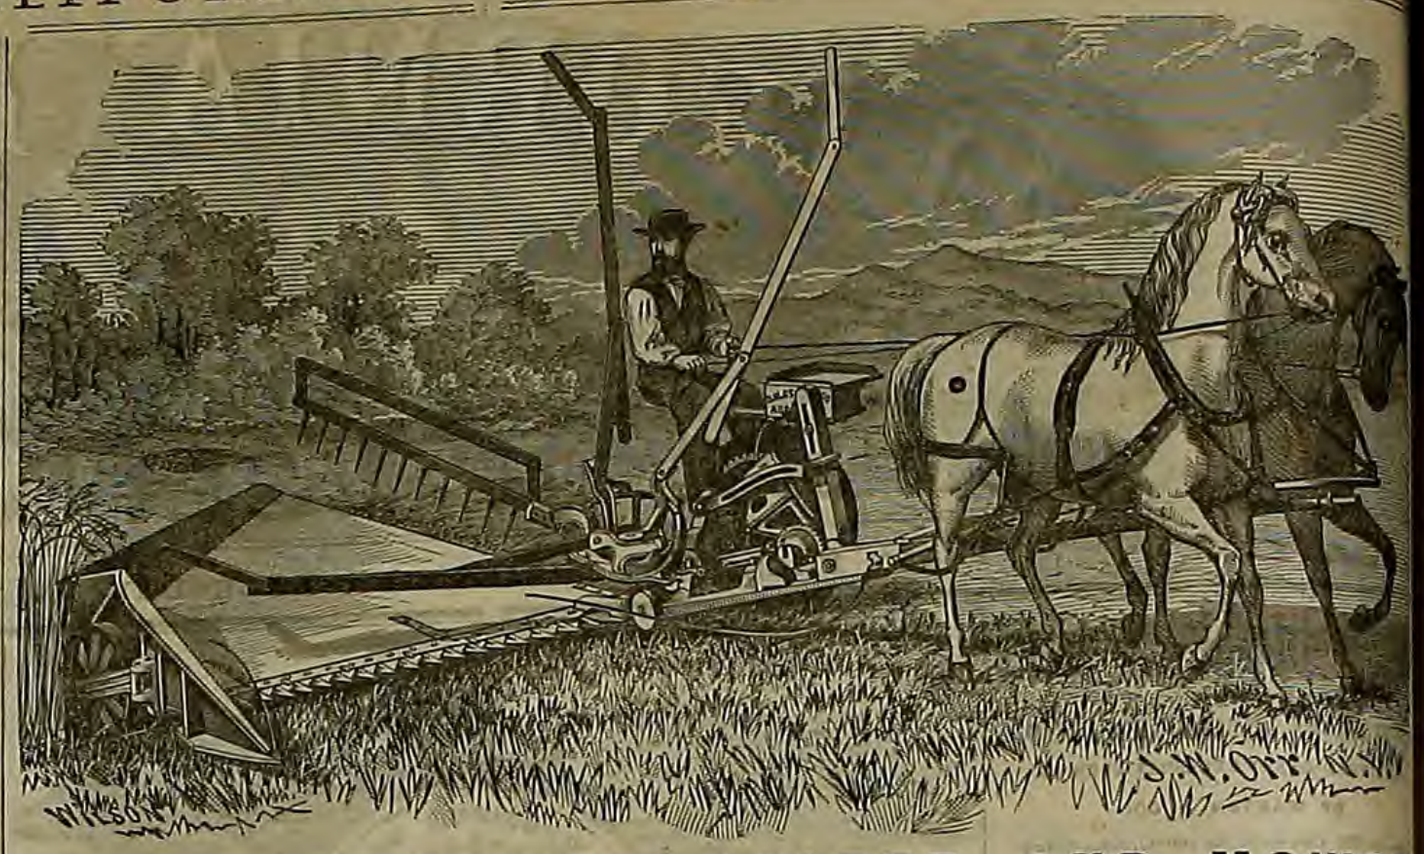
Much or Little.—The agricultural press are stimulating the farmers of the United States to devote more of their garden and land to the culture of small fruits for family purposes. This is right; but we must not forget to give credit to another class of the people of the country, who, though they have but *little* land, still do far more in proportion than those farmers who possess *much*.

We refer to the mechanics. We have often seen a farmer's garden side by that of a mechanic's.—The former was larger than the latter, but somehow as one looked at it, there appeared a great want, hard to describe—the general appearance was bare and plain.

In the mechanic's garden, one could not help being pleased with the disposition to convert every inch of available space into an opportunity for *use* or *profit*. Currants, gooseberries, strawberries, blackberries, raspberries, each had a row, in addition to the space necessary for vegetables; while in the corner or on the edge of one of the borders, a pear tree or a plum tree hung over.—Even room was found close to the path for some choice flowers and climbers and shrubs. A little garden like this is a perfect delight to one whose ears are tired with the dull monotonous roar of a manufactory ten long hours every day; and the charm not only of novelty but of contrast helps the poor mechanic, and stimulates him to produce results from his little garden which a sturdy farmer of a hundred acres can never bear compasison with.

[Such are the words of the Editor of the *Horticulturist*. He sees with the eye which values "Home" improvements, and *we* too often see the "Farmer's Home" neglected, when he has plenty of time to improve, while the *Mechanic* makes valuable improvements, by early and late hours pleasure in his "Home Garden," showing him to be a True Artist.—Ed. Farmer.]

Cattle Feed.—From every source we have constant information of the excellence of Oil Cake Meal as feed. We have met hundreds of our Stock Men and Dairymen who have used this food; all who speak of its excellence above all other kinds of food, and cheaper too than any other food known.



KIRBY'S COMBINED REAPER AND MOWER,
WITH COMBINED SELF-RAKE AND REEL
TWO COMBINATIONS IN ONE MACHINE!

This is the only TRULY COMBINED MACHINE in the world. While many machines PROFESS to be Combined, and some of them are very good Mowers, others very good Reapers, there are none that Combine both qualities like the KIRBY, and work in either capacity as well as if designed for no other purpose. The

"MONITOR"

Self Raking Attachment IS THE MOST PERFECT THING IN THAT LINE EVER INVENTED.

It is COMPLETELY SUCCESSFUL in any or all conditions of Grain, either Heavy, Light or LODGED, or in the heaviest Mustard; as over a Hundred Farmers on the Pacific Coast, who are successfully using them this year, can testify.

The Kirby can cut the largest Mustard without any trouble, and rake it off also, if necessary.

We shall keep a large supply of EXTRAS of all kinds on hand.

The working of the "MONITOR" is so complete, that the closest scrutiny cannot discover that the team works any harder when it is taking off the heaviest burden. In fact, it is easier for the team to run the KIRBY COMBINED REAPER with the "Monitor" Self Rake on it, than it is to carry a man to rake off, and the grain are left in much better shape for the binder; so much so, that many claim that it saves the work of one binder, to say nothing of the difference in scattering the grain.

By a device lately invented, the size of the gavels can be regulated at the will of the driver, according as the grain stands heavy or light; it consists of a treadle which operates on one of the ways of the Rake-arm, so that the Rake can be thrown and pass over the grain until a gavel of the right size is collected upon the platform, when the Rake, of its own accord, will sweep it off.

This machine can be set to cut at any desired height from the ground, from two to eighteen inches, by merely changing two bolts, one in the grain-wheel slide, the other in the axle plate, where the joint or independent action is obtained.

This machine never had an equal in heavy lodged grain or grass, as it is in such cutting that it shows its superiority to the best advantage.

TREADWELL & CO.,
Sole Agents for the Pacific Coast.

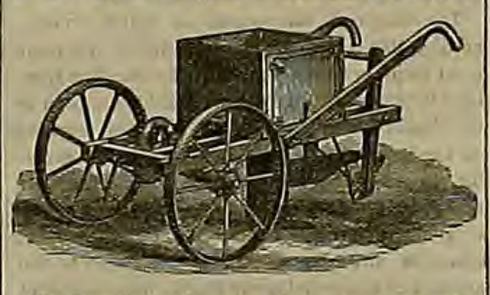
TRUE'S
IMPROVED
POTATO PLANTER.



This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed.

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatoes in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the Potato Planter from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it.

Particulars and Catalogues can be had at our office.

WARREN & CO.,
320 Clay street, up stairs.

LINFORTH, KELLOG & RAIL,
(Successors to L. B. Benchley & Co.)
No. 3 and 5 Front street near Market,

Horticulture.

A LESSON FOR FRUIT GROWERS.

Common Sense.—President Hammond of the Warsaw Horticultural Society, in his last annual address, December 30, 1868, conveys in a few plain words some sound practical wisdom, worth the attention of beginners in fruit culture. "It is a very prevalent idea that it is the easiest thing in the world to manage a farm or fruit plantation; while it really requires more brains to become a first-class farmer or horticulturist than to become a successful merchant, banker, or artisan. An ignorant, blundering man, may occasionally produce a crop of corn or wheat; but in these days of innumerable insects and diseases, he cannot succeed in profitably growing fruit. Insect enemies will come upon him like the plagues of Egypt; the locusts and grasshoppers strip the trees perhaps of their foliage. The curculio will constantly renew its attacks; the birds will appropriate the cherries and early berries.

But the man who would become a fruit-grower, and has not sufficient energy to boldly meet and finally overcome all these obstacles, has mistaken his calling, and had better turn his attention to some other pursuit.

Perhaps a word in regard to the profits of fruit culture may not be out of place at this time. Will it pay, is a question often put to the practical fruit-grower. Can I enjoy the poetry and pleasure the business affords, and at the same time make it pecuniarily profitable? We answer, yes. Still it is our duty to warn the novice of the difficulties he may expect to encounter—for in common with other avocations it has its perplexities. A few years ago a grape mania swept over the country, and hundreds of vineyards were planted in our own country. What is the result? Some were planted on uncongenial soil, others with tender or unhealthy varieties, while others have suffered from mismanagement, so that all have not proved a success; yet most of them are yielding their owners a fair profit.

A year or two later every body was planting pears, and many of our fruit-growers predicted that the market would soon be glutted, and prices ominously low. But we have seen that three-fourths of the trees planted have failed entirely, and one-half of the remaining fourth are in an unhealthy condition. In view of these facts—is pear culture profitable? Certainly it is, to those that possess the requisite skill to make it a success.

He who would succeed as a horticulturist must be in love with his profession; he must adopt it as his business, and identify it with his life. He must be a close observer, possess an indomitable will, and a large amount of patience and perseverance. He must be a man who has learned to labor and to wait. Not to labor for a season—to plant an orchard or vineyard, and then sit down and wait with folded hands, expecting, without further effort, to gain Pomona's fairest treasures. But to labor constantly and earnestly, in season and out of season, firmly believing that the reward will surely come."—*Horticulturist.*

ADULTERATED WINES.

[We find the following Letter from Ferdinand Meisler in *Colman's Rural World*, upon the adulteration of wines in the noted wine district of Herman, Mo., and we presume from Missouri to California, in every wine district, the same evil exists of *adulterated wines.*

What shall be done to stay this evil? Will Legislation stop it? No, for so long as men love wine they will drink it, and so long as men can *make money* by *vile compounds*, calling it wine, it will be thrust on the market, and *corner groceries* and *dark cellars*, and sly groggeries will sell it.

There is but one way to stop it. Make the license to sell it so high, as to drive low groggeries out of existence, and then let the *original wine makers* have their *private trade mark*, and when these are violated, make the violator pay the penalty, and be sure their own wine is pure and good. —Ed. Farmer.]

Gallized Wine.—This is an important subject, in which all are interested. I have seen the day, in Herman, Mo., when very good wine indeed was made from the pure juice of grapes, without the use of a cistern and a barrel of sugar. It is strange that it is almost impossible, at present, to get a drink, or to purchase a quantity of wine, which is not more or less adulterated; but the reason is, that Mr. S—, and several other leading wine manufacturers have discovered a plan of making wine(?) almost without the use of grapes. Herman has proved its locality to be one of the best for raising grapes and fruits, and in order to keep up its reputation, *Gallized wine*, to such an extent, ought to be done away with. In some seasons, certain grapes will not come to their full maturity, especially the Catawba, when a little assistance of sugar will be of benefit; but, it ought not come up to the point of a drug. Mixing grapes will do no harm; this is often done in order to give a different flavor and color. If the Legislature of Missouri once gets tired of making use of such an article as *Gallized wine*, I judge they will then pass an act to tax Gallized wine to such an extent that it will enable the pure juice of grapes to prosper, which at present has the Gallized wine to contend with—because this drug can be sold at lower rates and yet realize 80 per cent profit. It is forced into market by wholesale; besides, large inducements are granted to commission merchants, by whom this Gallized wine is sold at any price which it will bring. The prices paid for good wine, should induce many vineyards to be planted for some time to come, and we need not resort to the manufacture of sugar and watered wines.

NEW YORK.

Our New York House, under the name of

WILSON, MORROW & CHAMBERLIN,

will open in New York City about the first of November next, and will have the exclusive agency of our

WINES AND LIQUORS

In all the States east of the Rocky Mountains. We are prepared to do a General Commission business in New York, which will be under the management of

Messrs. MORROW & CHAMBERLIN,

whose business capacity, well known to the Merchants of San Francisco and the Interior, is sufficient guarantee that all business intrusted to them, whether of buying or selling, will be promptly and efficiently executed. We will make liberal Cash Advances on Merchandise consigned to

MESSRS. WILSON, MORROW & CHAMBERLIN,

and forward the same free of Commission when shipped from San Francisco

WILSON, MORROW & CHAMBERLIN

will forward Consignments to us in San Francisco, free of Commission, and make advances there if required.—Eastern orders for Wheat, Flour, etc., will be filled by us at lowest market rates.

We desire to call the attention of Wine Consumers to our

LAKE VINEYARD AND MOUND VINEYARD

WINES AND BRANDIES.

These Wines have already acquired reputation in the principle markets of the world, and in California are acknowledged to be superior to the productions of any other Vineyards. As many Dealers here and at the East have used our name to facilitate the sale of Spurious Wines, we have deemed it necessary for our own protection to place our Trade Mark on every package or case that goes out of our hands. You will please observe that no Wines purporting to be ours are genuine unless they bear on the package the Trade Mark at the head of this sheet. 30-12.

CHAS. H. DITSON & Co., 711 Broadway, New York.

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcemen', "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

VALUABLE PLANTS FOR SALE

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin description, prices, testimonials, etc., address WARREN & Co.,
Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

Thornless Raspberries.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The Thornless raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. John Gage

From the American Horticultural Annual, for 1868 page 102:

"Davison's Thornless.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, grower as the Doolittle or the Miami, but still it is good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicates, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are propagated from tips, making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials o character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....APRIL 29, 1869

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum the FARMER Office. Members of the Press and Strangers particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is TWO DOLLARS for five lines or less of space, in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

Special Notices.

OUR NEXT NUMBER.

Agreeable to our custom of observing "*Fast Day week*," or "*May Day week*," as our Chief Magistrate *did not* appoint any time of *Fasting and Prayer* this year!

We Resolve, No. 1. That as "May Day" week will become a *Grand Gala* week in a *Double sense*, by reason of the *Completion* of the *Pacific Railroad*.

We Resolve No. 2. That it is fitting and proper that we should have our *Rest week*, on the occasion of so grand and eventful a period, and so great an Epoch in the History of our State and the World. We desire to have time to attend at Sacramento and witness the Ceremonies ourselves, and gather all the incidents connected with the occasion, and Report the most important ones for the Farmer, and we desire also that those in our employ should do the same. Therefore, as we are *entitled to our Festival week*, we shall try and doubly improve it on this occasion, seeking information as well as rest.

Our next issue therefore will be the *Thirteenth day* of May, when we shall issue a Large Extra Edition of the Farmer, with valuable Reports and Important matter.

Advertisers will do well to remember that number and secure a place in it.

THE GOODRICH AND ROSE POTATOES.

We take a couple of paragraphs from the letter of a Subscriber, who had ordered some Early Rose for the mountains of Eldorado County, and to whom we had expressed Books, Seeds, etc.

We are glad to hear of the success of the "Good rich" there; we know them to be indeed *Early, Good and Rich*, hence the name is very appropriate, *Early Goodrich*.

Think of it Farmers! *New Potatoes in Eight weeks from Seed.*

Now try the *Rose* friend G., and you will see that you never had Potatoes that *Rose* quicker in your favor than the seed sent.

Thanks for your kind intentions for *Farmer* and to us personally, and wishing you all success in Agricultural enterprizes, and hope to meet you at the coming Grand Celebration at Sacramento soon.

EL DORADO, April 30, 1869.

COL. WARREN, *Dear Sir:*

I heartily thank you for Books, Papers, Potatoes and Seeds. I hope to be able to make a satisfactory report, and return for the *papers* some good *paying subscribers*—Potatoes and Seeds a report of fruitful yield.

From the Goodrich (seed purchased from you one year ago,) I now have new Potatoes, planted on 20th of February. Potatoes in eight weeks from planting is pretty good I think, and the *Early Rose* will have to "*Rise*" very *Early* indeed to beat it. Everything looks lively and promising here—Fruits, Grapes, etc.

Will write you soon and give you some items, perhaps worthy of a place in your Journal.

Hastily but respectfully, and truly yours,

N. G.

THE GREAT MAP.

We call especial attention to the *Advertisement* of J. T. Lloyd, Esq. of New York, of his New Map of *America* and *Europe*.

This is one of the most important Maps ever yet published, and very soon we shall show them at our Reading Room. Everybody should have one.

State Teachers' Institute.

The State Teachers' Institute will convene in San Francisco, on Tuesday, May 4th, at Lincoln Hall.

It is expected that there will be a general attendance of Teachers, from all parts of the State.

The session will last four days.

O. P. FITZGERALD.

MAY DAY.

"Wake and call me early Mother, Dear,
For I am to be Queen of the May."

In the New England States and especially the milder portion of them, May Day" is one of the Festal Days" that is universally observed.

May Day, is the Gala day of Spring time, it is then the Birds begin to sing, and the Flowers to bloom, and it is then everybody goes forth early at morning to gather flowers, the whole world goes a "Maying" Sabbath Schools, Picnic Parties and Family parties, wander forth at early dawn and the great aim is, who shall find the *first* flowers, and who shall gather the richest and the best—while at the Public gatherings the great desire among the fair young Misses, ever is, who shall be Queen of the May.

This is the honor most to be desried and happy is that heart that bears off the coveted Wreath of the May Queen.

With us in California living as we do in a land of *perpetual flowers* we do not feel the need of May Day—yet we are happy to know there will be those who will observe this Notable day, for it is indeed worthy to be kept, for the Love of Flowers will always make the heart purer, better and happier.

Saturday next will be our May Day, and great preparations is being made to observe it universally.

We shall take pleasure in Reporting some of the Happy Festivals.

OUR ILLUSTRATION.

FIONEER AGRICULTURAL ENTERPRIZES.

Webster Brothers, Stockton.

On our Front page we give an Illustration of American Genius, Enterprize, and Industry, embracing Agriculture, Manufactures, and Commerce with the National Coat of Arms.

These three interests form the Triune of the Prosperity of these United States, and we can with Truth claim by the Statistical Tables of the Nation, that the Agricultural Interests and Products are greater than all other interests combined; for without *Agriculture*, orr Manufactories would stop, and our Ships rot at the wharves.

Without any undue egotism, we can claim for California the most rapid and successful, and the most prosperous advance in Agricultural wealth the world has ever known, and as our State has developed this wealth, our Farmers have desired, sought for, Invented, or procured the most valuable Implements for their business, without regard to their cost, being determined to use only the very best, and those that combined all the very latest Improvements.

As a Journalist of over *Fifteen Years*, and the *only Agricultural* Journal on this Coast that is permanently established, we have watched this steady, progressive spirit of our Farmers, and have felt that it must lead them on to great Prosperity.

Without therefore any disparagement to any other section of our State, we have noticed how rapidly the great County of San Joaquin has been developing its vast Agricultural resources, which has placed her in the front rank of wealthy Counties.

Without any discredit also to other large Agricultural Warehouses on our Coast, we have seen with pleasure and satisfaction also, the wonderful energy and foresight evinced and displayed by the House of

WEBSTER BROS., STOCKTON

Who have seemed to us to be Electrified with the true spirit of Progress, and determined to meet the wants of the Farmers of that great region of Country and all its surroundings, and who under this spirit of progress, have stopped at no labor trouble, or cost, but have marched on to secure, every New and Valuable Implement known, and place them before the Farmers of California, and thus make our words true that

CALIFORNIA BEATS THE WORLD.

We now call special attention to the important and valuable article, which we copy from the Boston *Commercial Bulletin* of March 27:

It will be seen by the article we now publish, that *All These New Implements* have been secured by the House of Webster Bros. of Stockton, and the Great, Grand Implement of all,

THE LOCOMOTIVE THRESHING ENGINE

Is the production of our citizen, Baxter of Stockton, who has just returned from the East, and is now waiting the Arrival of this

AGRICULTURAL WONDER

Which will be here in a few weeks, when a Public Exhibition will be made of it at Stockton, due notice of which will be given.

We are free to say that when it shall be seen moving in the streets, it will be an Epoch in the History of Stockton.

The Exhibition of this Wonder at Worcester, Mass., drew large numbers of Farmers from all parts of New England, who pronounced it one of the *Wonders of the Age*.

Mr. Baxter may well be proud of his Invention, and Mess. Webster Bros. deserve well of the Public for their great enterprize.

Mr. Baxter will always be found at the Warehouse of Webster Bros., for information and consultation.

Complimentary for the Celebration.—We acknowledge an Invitation from the Grand Marshal of the Railroad Celebration, to act as *Aid* on this great day. Shall be most happy to do so if health will permit.

CENTRAL PACIFIC RAILROAD.

THE GRAND CELEBRATION.

The Grand Celebration will probably take place the coming week, or near the 10th of May. The *Central* Pacific stand ready at a moments notice. They have won their Goal, have Triumphed, and this week will reach Promontory Point, the place of the Grand Junction.

Due notice will be given of the day.

The Celebration will be a most Grand Affair, and will be under the charge of Gen. Josiah Howell, an accomplished Officer, and the best selection that could be made for a *Chief Marshal*.

THE GREAT DAY'S WORK.

April 28, 1869.

This day should be marked in the History of Railroad building in *Red Letters*, and transmitted down to posterity as a day when on the Central Pacific Railroad TEN MILES and six-tenths of a mile was completed.

Is not this Progress?

How few persons can realize this stupendous labor, to accomplish which, the following material was used:

31,500 ties, 4,037 rails, which weighed 2,268,000 pounds or 1,134 tuns, 8,140 fish bars—the straps that hold the rails together, 16,280 bolts to hold these straps, these required 120,600 spikes to fasten the rails to the sleepers.

To accomplish this mighty work, it took *ninety, six horse teams*, to carry sleepers forward, the rails were laid one after the other, and such a scene of busy labor was never seen on a Railroad before in this world, and possibly never will be undertaken again. This was the closing work of this Grand Enterprize, and none but such men as Stanfords, the Crockers, Hopkins, and Huntingtons, could have conceived and carried forward, and so Triumphantly Completed their Herculean Task.

ALL HONOR TO SUCH MEN.

CENTRAL PACIFIC RAILROAD BONDS.

Those who remember the day when the people of Sacramento and some few from abroad, were assembled to witness the lifting of the *first* shovel full of earth, can also remember the many remarks that were made on that occasion——some like the following:

The road will never be built!
They will stick at "Dutch Flat"!
Where will the money come from!
What a swindle of Uncle Sam!
Who the wants stock?

These and a hundred others similar remarks, together with many a sneer and numerous ironical smiles at the undertaking formed a part of the the history of the day when *the first earth* was broken on the Central Pacific RailRoad at Sacramento!

What became of the *shovel* that lifted that *first earth* has been an important inquiry of late, now that Triumph has completed that great work.

That Shovel, was for the moment carelessly throw aside, but there was *one person* who could look into the distant future who believed that it was worthy of preservation and it was saved.—and will bear a conspicuous part in the coming *Celebration*, and we do not think *One Thousand Dollars* could buy that shovel

But to the Bonds, when the Bonds of the Central Pacific RailRoad were the first put upon the market they were met almost with ridicule, and by Californians too—Men who since have grown rich by the trade which this road has given to our State sneered at them, and there influence was felt in New York; but thanks to that noble indomnitable spirit which no defeat could kill, the Manager *did make them tell* and gave them a name and a standing not only in New York but in all the Money Marts of Europe, until they were sought for and ranked as high as the Bonds of the United State Government.——

Where are these Bonds now?

No Central Pacific RailRoad Bonds for sale!

The certainty of success established beyond controversy, caused these Bonds to be all withdrawn from the market several months since, the success of the road giving assurance that they are worth a handsome Premium.

That this is a truth the Eastern Journals and European Journals assert it to be so by copious Editorials, we need give only a brief one from one the best Journals published—as follow:

—The Pacific Railroad is pre eminently an American institution, and closely allied to the Government, which fostered its beginnings. In consequence of this intimacy, the faith of the one is almost the reciprocal of the faith of the other.—Their securities are pulses for each other. When, then, we read of the wholesale disposition of Pacific Railroad bonds in foreign markets we are gratified, for it is but an exhibition of confidence in the higher securities of the Government.

PLANT THE NEW POTATOES.

The remarkably moist season and the continuance of the rains will give to all who desire to secure the *New Kind of Potatoes*, to plant during all this month, and in some places even during the entire month of May.

We would particularly urge upon all who may plant the "Early Rose," the "Goodrich," the "Harrison," the "Chili," and others, to be careful and save all their *Seed-Balls*, from which they can spring new and valuable varieties, that being raised from *Seed*, are indeed NEW CALIFORNIA POTATOES.

As a matter of business and pecuniary gain, it is very certain that those who shall raise the 'Early Rose," and the "Goodrich," will receive a very handsome recompense, as the product of both these varieties are very great, and both will be in great demand another year. We can therefore recommend these kinds as a good, perhaps the best investment that can be made, even better than Mining Stocks.

"He that by the Plow would thrive,
Himself must either *Hold* or *Drive*."

Farmers must *Think, Read*, and *Study* well,
If they do this, *every blow will tell.*

DO YOU TAKE THE FARMER?

READER,

Do you take the Farmer?

If you are a cultivator of the soil, and do not take the Farmer, please send us a *little note* and tell us why!

Look over this number please, and see if you should receive a number like this *every week* for one year, don't you think you be the gainer of much more than the cost of the subscription price?

Now Reader!

Although you may think *we* are most interested in this matter and are only looking for *subscribers*, we tell you plainly, you are a *greater loser* by *not* having this paper regularly, than *we* should be a *gainer* by your subscription.

We *know* what we say, for we can live *without* your subscription, and not feel the want of it.—But *not* so with you, for there is not a single week that passes away but what the pages of our Journal contains some valuable and important information that would advance *your own interest* more than the *cost of the paper for a whole year.*

Every week, some practical result of labor, in the *Grain field*, in the *Orchard*, in the *Vineyard*, in the *Garden*, the history of some new *Seeds, Trees, Plants, etc.*—some *new* Invention, a new Implement, and its uses.

And thus for a whole year, a series of valuable matter, worthy a due consideration, and thus *Fifty chances* for Prizes, that all go to show you that

"KNOWLEDGE IS POWER."

Reader, are we not correct in our illustration? Shall we not hear from you?

(EDITOR.)

SHIPPING FRUIT TO NEW YORK.

We have had many letters recently from growers, who write us to learn relative to this subject, *i. e.* to learn about the NEW ROUTE that so soon offers a safe, easy and speedy conveyance of Fruit to the great markets of the Eastern States, to Boston, New York, and Philadelphia.

Among the many we have received lately, we take some extracts from the Private Letter of one of the largest and most successful Fruit growers in our State, as most appropriate *now* at this particular time, when the Grand Enterprize, the completion of the Pacific Railroad, is to be the subject of one of the Grandest Celebrations ever taken place probably in the world.

We give the following very agreeable and happy introduction to a business letter:

* * * * * *

April 18, 1869.

The earth is bursting with fatness; the trees will soon be groaning under the burden of their luscious fruits. It appears as if all nature combines to festoon the earth for the completion of the Grand Railroad, and honor the visitors across the plains, who shall see the earth clad in its most gorgeous robes.

* * * * * *

But setting Poetry at rest, Col., we should prepare in time to find means how to exchange our productions in the Fruit line.

Have you any intimation of the probable schedule of *freight prices* on the Railroad, through to New York, and other intermediate places.

Please let me hear from you at your earliest convenience.

S.

REPLY.

Yes, we have not only an intimation what the *Freight of Fruit* will be on the Railroad to the Eastern Markets, but we have a strong and positive assurance from the Managers of the Central Pacific Road at Sacramento, that *they*, so far as their influence and interest goes, will do all in their power *to aid the producers in this State* in finding a ready and profitable market for their products in the cities of Chicago, Boston, and New York.

Having had several conferences with the Managers of the Central Pacific, we learn from them, that one of their Board, now in New York, will hold a conference with the managers of the other lines (for all should remember that there are four other lines besides the "Central," which have to unite to make a scale of prices through,) and at an early day the prices will be known. As far as can be estimated now, the freight of Fruit and perishable products, through by quick trains, say six days, will be about $100 per Ton, and it will be made $80 if possible.

One thing we do know, the Managers of the Central Pacific Railroad will do all in their power to facilitate and aid the *Producers* of California in this matter, even to the carrying their products at the mere cost of running their freight cars; and our Farmers and producers generally will soon learn that this great road will prove a great Blessing to them in making sales of Millions of their products annually.

As a matter of Justice they should be grateful to the able Managers of the Central Pacific Railroad for this outlet for their produce, which will prove of priceless benefit to them.

Vain inclinations—The shiftings of the weathercock.

The best part of many persons' poetry—The refrain.

A shade of difference—The ghost of one's former self.

Acknowledgements.

Articles Received at the California Farmer Editorial Rooms, No. 320 Clay Street.

Books Received.—We have received from the Author, a recent new Book, bearing the title of "*Made.*" This is a valuable Book, full of practical truths, deserving an elaborate notice. This we shall endeavor to do at an early day, and extract from its pages freely. Thanks to our esteemed friend and valued correspondent of early days.

Sermons by Rev. Charles Wadsworth, D. D.—This is a Book that will do good to every reader. The book is full of good thoughts, and good counsel. These are embraced in "Select Sermons," appropriate to all men, and embracing subjects worthy of every man's deep consideration. We most cheerfully commend this book to our readers.

Published and for sale by A. Roman & Co.

How to Read Character.—This is one of the publications of the well known Phrenologist, S. R. Wells of New York, a new Illustrated Edition Book of Phrenology and Physiology, with descriptive Charts. This is a most interesting book, and will be of real advantage to Parents.

That it is a *good book*, it is only necessary to say that its principles bear the earnest commendation of that noble advocate of Education, Hon. Horace Mann. For sale by Roman & Co.

Book of Tableaux.—This is a Book for Parlor Amusements, giving designs for a series of splendid and beautiful Tableaux, showing all the arrangements for the same. A really good book for family amusements, one that will be the means of delighting children prefer "Home," to any other place.

This book is by Mrs. Sarah Annie Frost, Ormsby & Fitzgerald, Publishers, and for sale by Roman & Co.

Fair Maid of Perth.—This is one of the Waverly Novels, a new edition, by D. Appleton & Co., for sale by Roman & Co.

Percival Keene.—Another new Novel by "Marryatt," from the House of the Appletons, N. Y. It will be a popular novel. For sale by Roman & Co.

My Ten Rod Farm, or how I became a Farmer, by Mrs. Maria Gilman; Loring, Publishers, Boston, Mass.

This will be found to be a very interesting and profitable book for *woman* to read; it is full of good and pleasant practical truths, sustained by the actual results of woman's labor. There is a large amount of practical experience and practical labor detailed in the sketches, which will be of real service to the reader. We received the book from the Author, for which we return thanks.

Grape Book.—We have received a copy of the Grape Grower's Guide, by J. Keech, of Waterloo, N. Y. This is recommended as a practical work upon the management of the Grape Vine, and it is important for Grape growers to have.

Mother at Home.—Here we have a periodical that touches at the foundation of all good, a very fountain whence springs everything *True, and Beautiful.* The *Mother at Home* is edited by Mrs. Henry Ward Beecher, and published by Hosford & Sons, 56 Cedar Street, N. Y. Every mother should have this monthly.

New Magazine.—We have the *Farmer's Guest*, a new Monthly, published at Richmond, Va., by Bossett French, Esq. We hail such magazines for our Southern States with great pleasure, as an evidence of returning prosperity, and of their being truly alive to *Industrial pursuits*, which will soon make them prosperous, independent, happy, and bring them into a better communion with their brethren of the Northern States.

Deitz's Farm Journal.—We have No. 3 of this Journal. We find it a valuable publication, full of practical truths—a very good Journal for all Farmers. Published by George A. Deitz, Chambersburgh, Penn.

Norfolk Agricultural Society.—We have received of the Transactions of the Norfolk Agricultural Society of Massachusetts, with a most valuable address by Rev. James W. Thompson, D. D., which we shall publish in part or the whole very soon as it contains much that is of universal value. We return thanks for the volume, which we highly esteem.

Government Aid to Railroads.—We have received a Report of the address before the Senate of the U. S., by Hon. M. Stewart, who presented a Report of the Committee of the Senate upon this subject. The Report contains matters of interest which facts we shall soon publish.

We have received from the Agricultural Department at Washington, parcels of the Excelsior Grape, pronounced of very superior order.

We have received from C. Gravert of Pleasant Valley, a Box of very superior Potatoes, one variety from seed, of very superior promise.

One of the kinds sent us is like the blue potato of England, and the seedling is a handsome fellow. We have planted these sent to us, and look for good results. We return thanks to our kind friend for his present.

ASPARAGUS.

Well! will you buy the *White* Asparagus which is absolutely *poisonous*, and of which you can only use *one-fourth* in weight of what you purchase, or will you buy the *natural esculent* that is green, tender, melting and rich, and of which you can use seven-eights of the amount purchased, and in which there is more nourishment and palatable food in *one pound* of the Green Asparagus than in *ten pounds* of the White.

"BLUE" UPON WOOL.—The difficulty of dyeing *permanent* Blue upon Wool has been successfully overcome in England, and *fugitive* Blues are being completely superseded. The patentees are working, night and day, to supply the demand, and are making preparations on such a scale as will permit of its being introduced in America very shortly. In dyeing, this is one of the greatest discoveries of modern days.

MUSIC.

VOCAL CULTURE.

[We select the following excellent essay on Music from the Report of the New England Conservatory of Music. This Report contains many valuable truths.—ED. FARMER.]

Probably no department of musical culture is so much neglected as that which relates to the development and training of the voice,—a subject of great importance, as it teaches the correct use of the respiratory organs, whose improper or insufficient employment injuriously affect the general health, and particularly that of the vocal organs, of which the forcing or straining tends directly to bronchitis, laryngitis inflamed tonsils, the "clergyman's sore throat," so prevalent among speakers, and similar diseases; It is a common opinion that frequent singing, reading aloud, or public speaking is injurious to the voice; but the truth is, that an intelligent and scientific use of the voice is the best way to strengthen the vocal organs' and enable them to resist the deleterious effects of our humid and variable climate. No people in the world can so ill afford to dispense with vocal training as the Americans.

In New England alone, more than twenty-five thousand persons annually die from diseases of the throat and lungs, and nearly as many more in the State of New York, a large portion of whom might have prolonged their lives many years, had they learned in youth the importance of the correct use of the respiratory organs, and to strengthen the vocal organs by judicious daily exercises.

Many voices are seriously injured, many ruined, through the ignorance of persons undertaking to teach vocal training, while they themselves know nothing of the mechanism of the voice, or of its registers or capabilities; It is no unusual thing for us to be requested to receive, as pupils, persons whose voices have been greatly injured, or entirly lost, through forcing, mismanagement, or disease; and though such voices can never fully recover from their injuries, they may, by proper treatment, regain very much of their original sweetness and power;

The practice of singing under a scientific master is calculated to bring about the healthy action and development of muscles which otherwise would have lain dormant; It expands and wonderfully strengthens the lungs, gives a tone to the stomach, and saves the throat from injury in the ordinary use of the voice in speaking or singing, and renders it less susceptible to the changes of temperature, and often prevents consumption by enabling us to avoid all irritation of the mucous membrane, and to establish a healthy action of the respiratory organs. Especial attention to this branch of musical culture is recommended to all the pupils, as its neglect cannot fail to be detrimental not only to their musical progress, but also to their general health,

In reference to singing, considered as musical art. Garcia, the most successful singing master of modern times, who formed such artist as Malibran, Viardot, Pauline, Sontag and Lind, observe as follows:

"Voices in their natural state are generally rough, uneven, undeveloped, often trembling, hollow, and of small extent. A good and persevering system of practice can alone fix the intonation, purify the quality, and perfect the intensity and elasticity of tone. By daily study the asperities and incoherencies of the registers are overcome, and the compass extended, flexibility and agility of of voice are attained—qualities too generally neglected. Not only the intractable organs must be subjected to severe practice, but all those which, hurried on by a dangerous facility, cannot be brought under perfect and regular control of the will; otherwise an apparent, but fallacious suppleness takes the place of distinctness, sustaining power and fullness of tone—that is to say, of all the elements of accent and style'"

The study of singing is also highly important to the pianist, aiding materially in the formation of a graceful and expressive style.

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing,' or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by gone* Implements, but keep up with the "Progressive Spirit of the Age."

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULARS.

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all the trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S

SELF-RAKING REAPER!

This Machine stands at Front of all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

Home Miscellany.

BLESSINGS IN DISGUISE.

Mine eyes are stiffened with the last nights tears,
And my brow ached too heavily to weep,
Oppress with sorrow past and future fears,
Too weary to awake—to sad to sleep.

With listless hand I drew away the blind
To look where lay the morning dull and gray;
I heard no whisper of the cold night wind,
I saw no gleam to chase the gloom away.

Spread like a morning veil on every hill
Hung cheerless mists, through which the dark dawn crept;
The rain-drops on the trees lay cold and still,
Like Tears of one who in his sleep hath wept.

Sadly, I turned and laid me down again,
Till sorrow's leaden trance my sense did steal,
As those who lulled my very strength of pain
Forget their pain awhile and cease to feel.

So passed the hours away, and I awoke;
But while I slept the world had traveled on—
The damp mist rolled away, the morning broke,
And, pouring radiance forth, uprose the sun.

The purple hills were tinged with living light,
The grass was waving in the morning breeze,
Like sparkling gems the rain-drops of the night
In rainbow showers were glittering from the trees.

Then my heart melted too, and the deep gloom
Passed like a dreary mist away;
The sun shone warm and bright into my room,
And I rose up from my dull trance to pray.

O God, most merciful! 'tis ever so;
While thankless men feels but the present pain,
And lies steeped in the weariness of woe,
Thy step is drawing near to heal again,

Then teach us, Lord, to bow beneath the rod,
Even for the chastisement to love Thee more;
To trust the mercy of the loving God,
And in the very blow His hand adore.

So shall we walk through our life's chequered way,
Safe from its noontide heat, its evening blight,
Till the last hour of gloom shall pass away,
And leave us to awake in endless light.

OUR LADY CORRESPONDENT FROM PENN.

LETTER NUMBER ONE.

GREEN TREE, PENN., February 24, 1869.

Dear Col.:

I trust that you will be glad to know that I am still extant.

There! my letter is fairly launched at last; my two great difficulties in letter-writing are starting and stopping.

I am in receipt of three *California Farmers*, bearing dates of Dec. 17th, Dec. 24th, and Jan. 7th—many thanks for the same.

I was very much amused at your receipt for small-pox. You are right; fight tobacco tooth and nail, and I, and all other women (the man of the *Overland* to the contrary notwithstanding,) will bid you "God Speed."

I am so sorry that the *Overland* is not sound on the tobacco question, for I have quite fallen in love with it; it is a charming magazine.

Some of us think a successful rival of *Putnam* and the *Atlantic*; what more can be said?

I have two numbers—those of November and January.

The poems in the November number are beautiful; "When the grass shall cover me," haunts me like the refrain of some old song.

"The Outcasts of Poker Flat," is a striking sketch—sketch did I say? sermon rather, whose text is, "there is something good in every heart."

How I envy editors in that matter of books and magazines, and how often I have wondered what they do with the mountains of them that must gather from time to time on "Our Book Table."

I suspect they send them to auction—am I right? or must I guess again?

There are so many really good magazines now, that it is difficult to choose, when restricted to one.

Have you read Richard Grant White's "Words and their Uses," in the *Galaxy*?

Those articles alone are worth the price of the magazine many times over. I live in the hope of one day seeing them collected in a book.

But one must live in a land where Winter holds sway for a good part of the year, to be able to truly appreciate books.

In your genial clime you are not so dependent on them for solace and recreation; the book of Flora lies open to you most days in the year.

We have a weary waiting for the first pale heralds of the Spring.

I have secured my flower seeds and am longing for the time to come for planting; to day that time seems far distant; the ground is a perfect glare of ice; the wind is as sharp as a razor; I am writing within three feet of a good soft-coal fire, yet am obliged to lay down my pen every ten minuets or so, and thaw out my stiffened fingers.

While you most likely are wandering through orange groves, or sitting under a literal fig-tree, luxuriating on strawberries and cream.

I cannot comprehend what your climate is really like—now, for instance, on this day of February 24th, is it Spring, Summer, Winter or Autumn?

Strawberries and cream on Christmas, puts a Pennsylvanian out of all reckoning. After that, it would seem quite in keeping to celebrate the Fourth of July by indulging in a jolly sleigh-ride, or a masquerade on the ice. "Carrie's" strawberry doings quite throw me in the shade. I wonder if she ever saw a strawberry grub?

But me, I must not get on that subject; time and space forbid; what I must do is to sign myself yours truly,

JENNY DARE.

REPLY.

Well, Jenny Dear, now tell me in the first place, is it very material whether I say Jenny Dare, or Jenny Dear—it is only *transposing* the letters. I shall let it go as I have written it, for a good correspondent is always *Dear* to us.

We are glad indeed to hear from our correspondent again, and we know her many friends here who always read her letters with pleasure are glad also.

We are glad you like our *Overland* monthly—we know you can't help it, it is so good, and it has *originals* that are "Gems," as we said last week, the *Overland* and the *Atlantic* are like two race horses, each contending for the victory.

You envy us our Book Table do you; come over and make our Sanctum a visit, and you may have the Review of more than *Five Hundred* Books, Magazines, Pamphlets, and papers, *every month*—but they never go to *auction*. We keep the choice ones for reference always, and this gives us a grand library.

"Words and their uses," in the *Galaxy*, is one of the Jewels that we come across in life's pathway.

But, come over from your glacier coated land to where Flowers perpetual bloom, and strawberries and cream can be had all the year round. Our markets are now supplied daily with many Tons of delicious Strawberries, and sell at 18 to 20 cents per pound at wholesale. Would you know our climate? come and see, come and enjoy; next month only, *one week's* ride in the *Railway Cars*.—Then, if you wish, we will send you a dish of strawberries and cream daily.—ED. FARMER.

LETTER NUMBER TWO.

GREEN TREE, PENN., April 5th, 1869.

Dear Col:

ABOUT GARDENING.

I want you to preach up gardening for women I feel like sermonizing them myself something after this fashion: "My dear sisters; try it: it is very easy. Your petticoats?

My dears; they are not in the way at all; the present walking dress; Sans crinoline; is just the thing for gardening. Don't be afraid of the Dr Todds; there is precedent for it I assure you Did'nt the great mother of the race garden, to be sure she did; what else was there for her to do; It was all out doors then; so she had no house to keep. Happy! happy Eve! no buttons to sew on; no stockings to darn; no sweeping, dusting; baking and brewing to mar the beauty of her long sunny, summer days!

But even we; my sisters; with all the heavy panal of poor Eves sin dragging at our skirts; may still grasp some of the best delights of Eden. Yes; dear beloved; the new Eden like the old is a garden.

Break the bonds of fashion; (I had nearly said satan; and I wish I had;) and you will have time to try my plan of getting back to Paradice.

When I see the tucks, flounces, and furbelows generally; that women spend time, health, and money on; I am tempted to turn Mohammedan yes; my dears; it is a dreadful thing to say; but it is true.

Here is my creed: "needle-works is a device of the evil one; a love of it an evidence of total depravity." What did Eve know of seam, gusset, and band"; when in a State of innocence? nothing. But as soon as she became a fallen woman; she took to patching up fig-leaves; and her degenerate female descendents have been at it ever since. And pretty patch-work you make of it my dears; don't you? Look at yourselves when in what you call full dress; and tell me; is that the likeness of any thing made in the image of God?——

So: don't tell me again that you hav'nt time to garden: dress like reasonable human beings and you will have time to raise more strawberries than you can eat; and more flowers than you will know what to do with.

Beside laying in a stock of health, and strength against the days of trial, that are sure to come sooner or later in the lives of all."

There, that is the way I would talk to them if I had a paper. Not that I would advise you to come out quite so plain: you know; seeing you are a MAN. Women don't like to be lectured by the stronger sex. You must coax; and lead them; a kind word will go a long way; but they are worse to of drive than pigs. I throw in this latter suggestion for your future benefit; hoping my sisters will for give the unelegant illustration for the sake of its truthfulness. Truly yours.

JENNY DARE.

REPLY.

Good for Jenny. We adopt your Text, Sermon and all, and say Amen with all our heart. Preach away, Jenny, and we will print it.—ED. FARMER.

LOOK TO YOUR GARDEN GROUNDS.

We repeat our advice to all who desire to have a good *Summer Garden*, to look to their grounds *now*. A special favor has been granted to all in the fine showers of last week.

Those who are observers of such things should notice how much more soft and mellow the soil is after these *natural waterings*, than it is after *artificial waterings*. This should teach all a good lesson.

We repeat, now is the time to dig, loosen, and let the sun and air down into the soil that was baked hard by neglect. Those who neglect this duty now, will *regret it* when they see their gardens wither by the hot sun of the summer. But grounds that are dug deep and nicely prepared *now* can be kept soft and mellow all summer, and will not bake hard again. *Now, to this work.*

THE

PHOTOSCOPIC

Table Company.

THE NEW INVENTION of this Company is known as the ANTHROPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION

this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group FAMILIES entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changable pictures, arranged to suit the wishes an desires of each owner of the table,

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

Those who desire to PURCHASE can see one the Tables by calling at the FARMER Office, or addressing

EDITOR FARMER. 32-1

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world; publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal: its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Send for a copy, enclosing 10 cents, to

24-3 REV. A. VARSI, S J. President.

OUR HOME INTERESTS.

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact), and the probability that unless checked this large sum of money will be increased each year until, in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, to be sent East for investment in the purchase of Life Insurance, instead of being retained at homes to promote and foster BY ITS INVESTMENT HERE the commercial, mechanical, and agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States of the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION, *whose capital and assets will not be impaired or injuriously affected by the change in values that will sooner or later occur by a return to specie payments in the other States of the Union* Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to the citizen of this State, who feel an interest in its progress, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

THE CALIFORNIA

MUTUAL LIFE Insurance Company

Of San Francisco.

FARMER OFFICE

Miscellany.

COME THIS WAY, GENTLEMEN.

For the past year or more, the agricultural press of the North have frequently contained most doleful accounts of the depressed state of the *wool trade*. Sheep that once were fondly expected to yield golden fleeces, are butchered for their meat A perfect panic prevailing, so that men run from a sheep as from a mad dog. Now, this is all folly. It is true that the sheep fever that raged during the war, was almost as foolish as the panic which now prevails. The business was overdone, and the reaction in prices is the natural result. It is very well, perhaps, for the majority of Northern farmers to get rid of their sheep, but it is the height of folly to kill them.

We say to you, bring them down South. There are millions of acres now lying idle in the South, where sheep can be grown cheaper and with less trouble by one hundred per cent than on the best sheep farm in the North. These lands can be bought for the very smallest sums. Or, if the sheep owners do not wish to come down South to live, they can very easily dispose of their sheep to the farmers in various sections of the South on very liberal terms. In view of these facts, we say: come this way with your sheep.—*Dixie Farmer.*

A NEW SCHEME TO SPECULATE IN LAND.

St. Louis, March 23.—A movement is on foot to call an Irish national convention of delegations from the Irish religious benevolent societies of the United States, the object being to form a central bureau in New York, with auxiliary societies through all the states, for the purpose of furnishing aid and information to Irishmen in regard to the price of land, labor, etc., and to render any other assistance necessary to secure the benefits of Irish emigration.

The Rivers of Damascus.—Abana and Pharpar rivers, of Damascus, mentioned by the Scriptures, have recently been thoroughly explored by Macgregor, the famous canoe traveler. Macgregor, after going from Cairo to Suez, and exploring the Delta of the Nile, had his canoe carried by land to Beyrout, thence over Mount Lebanon, and finally launched in the river Abana, on which he paddled to the plains of Damascus. The rivers Abana and Pharpar, in consequence of the wild beasts, deep jungles, and savage Arabs, have heretofore been laid down inaccurately on the maps by travelers. Macgregor gives an interesting account of a "giant stone town," with stone doors, rafters, and window-shutters, covered with Greek inscriptions dating before the Christian era.

How to Catch Rats.—Different contrivances have, from time to time, been presented to the public for extreminating rats and other vermin, and each claiming to possess some superiority, which the others have not attained. But, as a general thing, the cost of patent machines prices them beyond our poorer population, while many of the wealthy are incredulous, and prefer to employ the old style trap. Now, if a drop of oil of Rhodium be poured upon some bait in a common wire spring trap, and the said trap be set in an infested locality, only a short time will elapse before the cage will be found occupied by vermin.—Rats and mice possess a great liking for oil, and when scented, will risk anything to obtain it. I have cleared my cellar of the pests by this method, and others have tried it with similar success. The oil of Rhodium costs about one cent per drop, but a drop will last for several days. Rhodium oil is an extract of a Chinese rose tree, *Convulvus Scoparius*, and the perfume is similar to that of roses. This oil, as well as that of anise and assafœtida, is often used to attract fish, insects, and other animals.—*Scientific American.*

—There are a larger number of Cubans in this city than is generally supposed; and many, desirous of avoiding the horrors of war, have recently deserted their native island. An association of Cuban ladies, called "Junta Patriotica de Cubanas," has been formed for the purpose of forwarding hospital supplies and other necessaries to the revolutionists in Cuba. It is said that a large number of volunteers, from this and other cities, have found their way to the disturbed island, and are now fighting in the revolutionary army. They have gone in small parties; but, if reports are true, no less than seven hundred have sailed from this port alone.—*Harper's Weekly.*

—The pastor of a popular church, one Sabbath evening, at the Sabbath-school concert, said:—"Boys, when I heard your beautiful songs, tonight, I had to work to keep my feet still; what do you suppose is the trouble with them?" "Chilblains, sir," said a six year old boy, which, notwithstanding the solemnity of the occasion, set the whole audience in a roar.

ECONOMY
WASHING MACHINE!

A new lot of the above named Machines, including all the latest improvements, are now ready for sale and can be sent to any part of the State.

Ninety-one (91) Machines are now in use in this County Township, where they were Invented, and still Manufactured.

Price of Machine, ... $25.

Letters directed to JOHN M. HORNER, Mission, San Jose, Alameda County, will receive prompt attention.

Compare Prices.

The Mason & Hamilton Organ Company, whose Organs are acknowledged to be the best, have this season introduced very important improvements and new styles of Organs, and have materially reduced prices. Five Octave Organs, $90 each; Five Octave Double-Reed Organs, Five Stops, $125. Every one having any idea of purchasing an Organ should at least obtain one of their circulars (which will be sent free) and compare prices. Address the Mason & Hamlin Organ Co., 596, Broadway, N. Y. or 154 Tremont Street, Boston. 1t.

Miscellaneous.

A PRINCELY RESIDENCE
IN THE COUNTRY
FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the Farmer. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

HUCKS & LAMBERTS'
CELEBRATED PATENT
H.&L.
AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

Is on the red cover of the package

Railroad Lands.

Central Pacific Railroad, Land Department.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credits: five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. But three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, April 29

The present condiiton of the Grain Market should induce every Grain grower who has his last year's wheat on hand, to place it in the market at an early day.

It is a singular feature of our market, that, while we have positive assurance, that shippers of wheat to Europe and to the Eastern States have been losers, some to large amounts, that the same parties are still ready to try their luck again, and ship more.

The last Telegraphic news gives us from *Liverpool* 9s. 1d., and New York quotations $1.60–$1.65. These rates will not give a margin to shippers, and those who have cargoes arriving at either ports, that cost them here to place on board ship $1.80–$1 90, or even $1.70 can easily see the balance is heavy on the wrong side of Profit and Loss account.

The present market value of Wheat is $1.40–$1.55 for choicest; these are the outside rates. There has been some large sales this week, but the prices and terms are not made public.

There is one feature in our Grain Market that is favorable to our Grain growers, and they should now use it to their utmost; there is some demand for our Breadstuffs from new Marts of trade, and a better chance to ship to China, by reason of a lower price in grain. Now if our Farmers will only meet this demand and sell, even at a *low figure*, the market can be eased of a large amount of wheat, which otherwise must lay over to conflict with the *New Crop*.

We sincerely counsel our Farmers who hold wheat to sell by all means. The new crop will be immense, and must rule low, as advices from all parts of the world that will affect *our trade*, tells to this point.

Barley and Oats are declining. Prices nominal.

Our Wool Market is firm—prospect good. Eastern buyers want our Wool, and are buying largely. Prices are tending upward.

Hides and Tallow are firm.

Old Potatoes very low; the warm weather causes them to sprout fast.

New Potatoes bring good prices.

Onions scarce and high, as will be seen in our rates.

Retail Prices in the Fruit Market.

OUR

Fruit Market this week makes a very good showing. The *new* features are *Cherries*, from the Briggs' Orchard at Marysville; these brought 75 cents to $1.00 per pound. Strawberries come now in abundance—about 10,000 pounds per day is the average this week, the larger portion of which come to Mr. Weston, Pacific Fruit Market. Mr. Gould of Santa Clara, sends in some 500 to 600 pounds daily now. "Longworth's Prolific" is the variety principally.

Very fair Lemons and Oranges come from Los Angeles, and Bananas from Panama.

Nearly 1,000,000 Oranges arrived this week from Tahiti; also Lemons and Limes of best quality.

Apples are scarce, and only a few Pears now in market.

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9 50 A. M.; Reno at 4.20 P. M.; Wadsworth at 6.30 P. M. Winnemucca at 3.30 A. M.; Argenta at 8 50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12 05 P. M. Reno at 2 10 A. M. Colfax at 9.50 a. m. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6.30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada.

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermit, Silver City, Owyhee, and all points n Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages or White Pine, and Overland Stages for Salt Lake City and the Atlantic states.

AUZERAIS HOUSE,

SANTA CLARA STREET,

San Jose, Cal.

J. M. STAPLES, PROP'R.

—ALSO—

LAKE HOUSE,

DELMAR AVENUE,

SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most agreeable place of resort. Parties wishing rooms and board will please apply to J. M. STAPLES,

31.1 Proprietor of the Auzerais House.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO., California Farmer Office

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure u are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S

CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER and BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and sure. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It has been our sincere wish that these Pills should be fairly and for tested, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the proper action of the Stomach, Bowels, Brain, and the whole Nervous System, should be vast and vital importance to human health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has a sympathetic connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal atrocity or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Bowels, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels generally are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful impression of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every one. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow their use. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are unequaled to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S

American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked. Hence even in cases of great violence, if a potent and rompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an areola or circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or frothy tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a gnawing sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently streaked with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough; cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual, providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water every morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten, a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the same stamped on the lid of the box, in red wax.

Prepared only by FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

TRIUMPHANT COMPLETION OF THE PACIFIC RAILROAD

ADDRESS OF GOV. HAIGHT.

Fellow Citizens: We meet to-day to celebrate one of the most remarkable events of this eventful age, one whose influence upon the future of our country and upon human destiny it would be difficult properly to measure; one of the grandest triumphs of American enterprize, engineering and constructive skill and energy of which our history can boast. hers in a new era in American progress, and while it is an event of world-wide significance, it is one of special importance to our own country and our own State.

I would that its great results to California could be set forth on this day of rejoicing by eloquence more worthy of the theme than any poor efforts of mine; but in consenting to accept the invitation with which you have honored me, to be your speaker on this occasion, I have rather yielded to the necessities of official position than assumed a task to which I feel adequate.

I recollect some years ago looking at a picture which many of you doubtless have seen, representing a family of pioneers who had accomplished the tedious journey overland, and, having reached the crest of the Sierras, stood gazing with enraptured vision upon the magnificent panorama which extended before their eyes in the valley of the Sacramento. The noble river in the distance seemed like a silver thread meandering through the great valley; the purple summits of the Coast Range rose in front to the westward, and far to the south stretched the fertile plains of the San Joaquin, until in the soft haze of our landscapes, their limit was lost in the horizon.

In a metaphorical sense, we stand upon such an eminence to-day. Behind us is the rugged journey, with its desert sands, its savage tribes, its cooling springs, making oases where at times we have rested from our toil; around us is the pure air and over us the blue sky, while within us our hearts beat high with hope and confidence, and before us lies in its beauty the rich prospect of our boundless future.

In looking back over our journey, did time permit, one would be tempted to extend the review beyond our own personal experience, and the history of our own State and country to note a few of the most memorable epochs which have marked human progress during the eighteen centuries that are past. To trace the history of civilization, however, during this period would require far more than the time now allotted, and is a subject which would task the loftiest powers. Otherwise, it might be interesting to dwell upon those prominent epochs which have signalized the progress of mankind since the advent of Christianity marked an advance from paganism to theism, and from a religion of forms to one of spirit; from the time when the code of Justinian marked a memorable era in legislation to the period when Magna Charta developed a new and rational theory of government, and thence to the enlightment of the present day. This progress, it is true, has not been uniform or constant. The tide has had its ebb as well as its flood. There have been temporary retrogressions in almost every department of human activity—in science, in government, and in religion.

Nations have exchanged places in the scale; some have relinquished freedom for despotic rule, religious liberty for blind superstition, power for weakness, and science for ignorance, while other nations have risen from barbarism to the hights of knowledge, and from small beginnings have attained greatness in the arts and sciences, in freedom, wealth and power.

The great nations of the present day are none of them ten centuries old. England's greatness dates from the revolution of 1640, before modern civilization had penetrated the domain of the Czar, before the Prussian monarchy or the American republic were known among the nations—when Spain was the leading Power on land, and Holland was the mistress of the seas.

Human progress for the last two centuries has known little pause. Dynasties have risen and fallen; revolutions and civil wars have deluged portions of the world with blood; but heretofore good has been evolved out of evil, and, during war and peace, political changes and national vicissitudes, the minds of men have been year by year more emancipated from thraldom, and more active in investigation, and in useful invention and discovery.

In the history of human progress it seems to us as if the chapter devoted to the present century would fill as large a space as the eighteen centuries which have preceded it. It is now but little more than two-thirds gone, and yet what improvements and discoveries it has witnessed. When the last century closed, and for some years afterward, no steamboat had been built. Nearly a fourth of the present century has passed before railway construction was inaugurated, and nearly half of it was gone before electricity was pressed into man's service, as his messenger to annihilate distance and to bring into instant intercourse the most remote islands and continents.

Anthracite coal was never used as fuel in dwellings, nor was any city lighted with coal gas until after the year 1800.

Time would fail to enumerate even the most important discoveries and inventions of this century. In locomotion, in the art of printing, in weaving and sewing by machinery; in dyeing and coloring; in hydraulics and optics; in the application to machinery of steam and hot air; in the thousand improvements in firearms; in light, lighthouses and lightning; in photography, from the daguerreotype to the card photograph; in agricultural implements; in cabinet work and house building; in steam navigation; in ship building; in railways and electro-magnetic telegraphs, with their various apparatus of wire and cable, and printing; in house warming; in lighting streets and dwellings; in metal pipes and tubing; in sewerage and drainage; in cotton, wool, flax, hemp, and silk production and manufacture; in all these and many other channels the minds of men have been busy and fruitful during the sixty-nine years of the present century, until the limit of invention seems to be almost reached and human ingenuity exhausted.

Marshall's discovery of the particles of gold in the mill-race at Coloma was the beginning of a great revolution in the commerce and business of the world, and in the nominal value of labor and property. It changed our geography and gave a new expansion to American ideas. What had before seemed hyperbole, became reality; the empty boasts of stump orators seemed about to be verified by facts. The treaty of Guadalupe Hidalgo had secured us in possession of the fairest, the most genial and fruitful part of the American continent, and as we, in our partial judgement think, of the globe. We had almost realized the poet's dream of exchanging our "pent up Utica" for "the whole boundless continent." We still lacked the British possessions and Mexico, but we were in the position of one gorged with food and incapacitated from further indulgence, until time was allowed for digestion and assimilation. I speak of a revolution in the commerce and business of the world, and in the value of labor and property. Two substances alone, gold and silver, are an accepted standard of value and a universal medium of exchange. Like all other articles, the intrinsic value of these metals is regulated by the quantity produced, the cost of production, and the demand for their use. The demand has increased with the expansion of commerce, but its increase bears no ratio to the increased supply. The whole amount of gold and silver in the old world at the discovery of America was estimated to be $170,000,000, and the total annual product of gold in the world for some years previous to 1848, was but $20,000,000. At this rate it would have required a century to produce $2,000,000,000. Within the past twenty years there have been added to the stock of precious metals more than this latter sum.

The obvious result would be, as it has been, to diminish the exchangeable value of gold and silver, so that to procure many of the necessaries and comforts of life requires about three times as much money as it did twenty years ago.

This, however, is not the time to weary you with statistics, or discuss questions of political economy. The Oregon and Mexican treaties gave us a new geography; but neither Oregon, with its majestic river, its productive soil, and its "continuous woods," nor California with its healthful and equable climate, was accessible to immigration by any except the roving trapper and frontiersman.—Trackless deserts infested by tribes of Indians, and lofty mountain ranges intervened between the States of the Union and the newly-acquired territory along the Pacific.

The thirst for gold in 1849 and the few following years stimulated a multitude to defy all dangers and difficulties in the effort to reach the new El Dorado. An almost continuous line of emigrants crossed the Plains and reached the Pacific, way-worn with travel, and decimated by famine, pestilence and massacre. Another army crowded steamers and sailing vessels for the Isthmus of Panama, and encountered the miasma of the tropics and the discomforts of a voyage in overcrowded and ill-supplied vessels. Thus, by sea and land, the stream of adventurers poured into the land of gold. Europe added its contribution, and the penal colonies of Great Britain also—some of which latter was of indifferent quality.

So they came in 1849 and 1850, a vast throng, mostly men in the prime of life, full of adventurous energy—the elite of the enterprize of older countries, carrying with them, in spite of some vicious and dangerous elements, a large infusion of Anglo-Saxon respect for law, order, and constituted authority.

The track of emigration across the Plains was dotted with the graves of those who fell by the way, and in the lack of ordinary comforts multitudes more would have soon found a grave in California but for the salubrity of its climate.

The early emigration was composed of heterogeneous elements. All forms of vice and dissipation were indulged unblushingly by men and women set loose from the restraints of settled society, and freed from the control of a sound public sentiment. There were many noble spirits who labored to lay broad and deep the foundations of religious, educational, and charitable institutions, and to organize republican government on these shores. Some of them have rested from their labors, leaving behind them monuments more enduring than marble, and some are still pursuing their career of usefulness among us.

In looking back at the past, how checkered is the prospect! Conflagrations have swept our cities and towns with the besom of destruction.—The commercial metropolis of the State has more than once been almost wholly destroyed by fire, with no insurance to repair the broken fortunes of its citizens, and the present Capitol has suffered not only from fire, but from the more appalling disasters of flood. Mercantile embarrassments and disaster, with extreme depreciation of property, were superadded to the ruin wrought by flood and fire.

There are shadows in the picture like all of this world's experience; but in disaster and distress, Saxon and Celtic energy vindicated its claim to supremacy over all the obstacles of accident and of nature. The Winter of our discontent has been exchanged for glorious Summer, and a stable edifice of prosperity has been reared upon the ruins of our shattered fortunes. No more invincible perseverance has ever been manifested by any community under disheartening circumstances than by that of Sacramento, and her citizens are at last sharing with those of other cities a prosperity beyond that of any former period, and rejoicing in the certainty of a bright future.

For the first years of our California experience, those of us who were here felt many longings for the old homes and friends we had left beyond the mountains; an intense desire for some rapid and direct communication with the Eastern States, pervaded the mass of the population. It was never absent from our thoughts by day, or from our dreams by night. The lack of it induced many to bid a reluctant farewell to the sunny skies and attractive scenes of California, and seek their former homes east of the mountains.

Our only communication with the East in those days was the Panama steamer, first occasional, then monthly. The journey overland consumed months, and a telegraph or railway during the present generation was looked upon as chimerical. Installments of news came once a month in the shape of letters, and Eastern papers forty days old, which were eagerly purchased at fabulous prices.

In the Winter of 1849—50, the streets of San Francisco were thronged with miners driven in for shelter from the inclemency of the season. The prevailing style of dress was a flannel shirt of a coat, and in addition to the ordinary garments a pair of long boots purchased at the moderate price of six ounces or ninety six dollars in gold dust. Most of the large rooms in the city were used as gambling saloons, with the accessories of bands of music and well stocked bars.—Here day after day were to be seen dense crowds of men of all nationalities and races bending in absorbed attention over the gaming table, ignoring all distinctions of race or color in the excitement of play. Comparatively few were without weapons, and yet the number of homicides was relatively small. The sight of a lady was sufficiently rare to cause a street full of men to stop and turn to look at one passing.

The advent of Spring dispersed the crowds of miners throughout the mountains, and produced a stagnation for the time in San Francisco. I must not weary your patience by dwelling upon the scenes of the past so familiar in memory to many of you. Suffice it to say, the public gaming-house was soon succeeded by the school house, the hospital and the sanctuary. The common law and a code of well considered statutes superseded the vague, uncertain and strange rules of Mexican and civil law, and Courts organized in accordance with American usages took the place of the unfamiliar and irregular judicial administration of Courts of first instance.

One thing must be said in honor to our people, and it is but justice to say it: no more liberal, even lavish charities ever characterized any community than those of the people of this State.—The direction then given to benevolent impulses will never cease to be felt. It has conferred lasting honor upon our State and reflected credit upon human nature. It was the offspring of circumstances. Men came here strangers, without families and homes. There was a present feeling of mutual dependence. Wealth, too, was easily acquired, and, as a consequence, lightly esteemed. Open handed charity was the custom, and the people were educated to give at any time to any worthy object. Hence the benefactions of which California has been prolific, and which are known to the world, and hence the facility with which money can be obtained among us for any worthy or laudable purpose.

California in the early days was known to possess mineral wealth, and this was thought to be her only attraction aside from climate. The general judgement was that the country was worthless for agriculture. The long drouth of Summer was thought to render profitable husbandry impossible. On approaching her shores we were told that the earth became so parched with drouth in the dry season that it was rent with fissures, which in some districts rendered journeying unsafe. Trees, it was thought, would perish in Summer from lack of moisture.

Such was California in the past, with neither schools, hospitals or churches, with few public journals, with no agriculture, no firesides or children, no settled public sentiment, no railways or telegraphs, no shipyards, wharves or docks, no public buildings, no manufactures, and no communication with the East except by three small steamships, the germ of our present steam marine.

The country, however, was here, with its cloudless sky and its healthful air, its fruitful soil, its noble harbor and bay, and its water courses opening access to the two great inland valleys; and the pioneers were here, with faith in its future, with fixedness of purpose, with large hearts and stalwart arms

This was our past—what is our present? P little more than twenty years have gone and has been accomplished?

Look around you, and see these philan and benevolent institutions which now your highest praise. Sanctuaries r every form of religious belief—Gentil —Protestant and Catholic. A Pu tem, well organized and endowed year in efficiency, placing instru of all. A University, furnishe for growth, in addition to p learning. Hospitals, priva for the insane, for the d for the orphan. A public press, which for otion to the public interests, is rior to that of any Eastern State. omfortable homes, in the best sense ith troops of rosy-cheeked children. discriminating public sentiment. A interior railways, well advanced toward on, which will soon render the most dis- rts of the State accessible. Spacious and nt ferry and river steamers. A well organ- citizen soldiery, as a reliance against attack om without or lawlessness within. Telegraphic communication between the commercial centre and every considerable town in this State and the States north and east. Ship yards and dry-docks, foundries and factories—lines of steamships, north, west and south—public buildings for the criminal and the unfortunate. A State Capitol, nearly completed, which for solidity, spaciousness and architectural elegance has few equals on the continent. These are but a part of our present. To present a complete statement within the short compass of an address would be impossible; but there are two things more to be noticed. Agriculture, not mining, is now the basis of our prosperity, the sinews of our commerce, and the source of our wealth. The fame of our gold is eclipsed by that of our wheat. Agriculture is daily becoming a greater interest, and gold mining relatively, if not absolutely, less. Breadstuffs, wool, wine and silk seem now developing into the great industries of our State, but our agriculture will naturally be diversified and profitable beyond what would be possible elsewhere, owing to the peculiarities of our climate.

The other feature of our present is the great Continental Railroad, the completion of which we are met to celebrate to-day. If any one had asserted six years ago that to-day would find us rejoicing over a completed Pacific Railway, he would have been ridiculed as an idle dreamer. It is due to candor and truth to say, that even after the large grants made by Congress, the number of those who regarded the enterprize as spurious, and as nothing more than a Dutch Flat turnpike, probably exceeded the number of those who expected to witness its completion. It is unnecessary to give a history of a work with which you are all so familiar. Many of you recollect that not far from this place, in the month of January, 1863, the first ground was broken in the construction of the Pacific Railroad, by the then Governor of the State, now the President of the corporation. The enterprize encountered some opposition, which has probably retarded by a twelvemonth the completion of the work. I am not here to sound the praises of individuals or of communities, but it is simple justice to say that the men who projected and successfully executed this gigantic undertaking have exhibited a degree of foresight, of industry, sagacity, and business capability which merits high praise.

I say this the more freely because it is well known that I have never looked with approbatic upon the loan of State funds or credit, or the of State property to any corporation of this acter. The people will doubtless oppose ar policy in the future, as they have in the

It is a question of low taxes and from debt on one hand, and a burd and high taxation on the other. gift char- ay such past. exemption some debt the railroads private enter- with an incubus or half a century, ce of corruption. If from a Pacific Railroad , we should be able to ate free from debt, where the industrial and mer- ot all absorbed by the tax-

should be willing to be just to forget that most powerful private ave some interests in conflict with public, and that they are justly re- n some jealousy.

rn, however, from this digression: It be otherwise than a source of just pride to izens of Sacramento that whatever credit ches to any community in the State for the ception and execution of this great enterprize belongs rightfully to them. I say this not to utte any implied censure upon other communities o this day of festivity and rejoicing, but it is sai as the simple truth. The men who conceived th project and carried it through to success are al citizens of Sacramento, and the fact cannot b otherwise than gratifying to its people.

It was an arduous undertaking from first to las The progress, at the outset, was slow through th foot-hills and up the mountain slopes of the Sie ras. Hills were cut through and canyons bridge until after about four years of labor the iron tra reached the solid granite of the summit. A tunn of 1,650 feet, through granite rock, involved enc mous expense and labor, and caused a delay of year. The mountain was finally pierced, and t iron track started but little more than a twel month ago for its race toward the Rocky Mou tains. That the rapidity of its construction si that time has been a marvel, and that all anticip tions have been exceeded, is notorious.

We stand here to-day to rejoice not only o the completion of this great thoroughfare of co merce, but to rejoice still more with devout than giving over a prosperity not exceeded, if equal in any community on the globe. It is safe to that there is no State or country where more ments of substantial prosperity exist, where gre contentment prevails, where labor is so well warded, where wealth is so generally diffu where a sounder currency is to be found, where climate and other causes are more pro tive of the health and happiness of all classes

I have thus, in these discursive remarks, gla briefly at the past and present of California. shall be said of its future? Lift your eyes expand your conceptions to take in the magni of its destiny. An empire in area, presentin

Agriculture.

WHY EDUCATE BOYS WHO ARE TO BE FARMERS.

"Book-learning will not make John more expert in driving the oxen, or handling the plow," says my good neighbor B, "therefore a little arithmetic and writing will suffice." But our neighbor B. is wrong we believe, as both philosophy and fact will show. Our friend adopts as his basis that farming is for the sole purpose of gaining a livelihood and making money, and that here the duties of the farmer end. But can a father and a citizen rest with this low aim? Is he to enclose the life of his son within the limits of his paternal cares? Does he recognize no duties that the son owes to himself, and above all to this great republic of workingmen? Is the highest culture to be bestowed upon the plant, the tree and the animal, while the *Lord* of the soil remains undeveloped in mind and dwarfed in intellect? Look back through the centuries and read the sweeping fact of history that *without education the cultivators of the soil become serfs.*

Think, then of what this country aims to do for the laboring men and the means that are to elevate the *millions* instead of the hundreds to influence and authority. How elevate the *work* but by elevating the man? How ennoble the occupation except as its patent of nobility comes from the hands and brain of the toiler. Is the man's sphere the farm alone? Is it not in courts, assemblies, Legislatures and Congressional halls? How are the large and growing interests of agriculture to be protected, encouraged and made the glory of the nation, except as this class of men with brains, skilled in argument and loaded with facts, enter these places to do combat for the interests of their brethren of the soil?

The future of America, more than that of any other nation, depends upon the education of the boys of the Workshop and the Farm. Don't begrudge them the books and the time during the winter months. The fruitage of careful study may be a ripened manhood and an inventive genius that shall do yet more to hasten the improvements of agricultural science.

DUPLEX,
Lincoln College.

"LABOR-SAVING" ON THE FARM.

The farmer of the present day has great reason to be thankful that his lot was cast in a time when the universal tendency is to save labor by the invention of machinery. It manifests itself at almost every turn of the eye and hand The Patent Office at Washington exposes to view such a collection of ingenious agricultural machines, great and small, as is to be seen nowhere else on the civilized globe. What is the true meaning of this? It means simply that muscle is, in the future, to be duly subordinated to intellect, as it should be; that mind is to come to the top, and mere physical force to come under the sway of a reinforced intelligence; that the agriculturist is henceforth to have his deserved share of that leisure for thought, for culture, for social pleasure, for rest, which is called "golden." Hence, all appliances that will save labor, and therefore time, are to be welcomed with gratitude.—*Mass. Ploughman.*

GREENS IN SUMMER.

One accustomed to a good variety of vegetable food is struck with the paucity of this he meets in traveling about the country, not only at the tables of farmers, but at hotels in small towns. Potatoes, beets, onions, peas, and beans, in their season, make up a larger variety than is usually to be found. To add to these a frequent dish of greens would be an easy matter. The variety of beet known as Chard, or Swiss Chard, is most excellent for this purpose, and we wonder it is so little cultivated. It is a beet, the root of which is worthless, and it is grown only for the leaf.—The leaf stalk is broad and thick, and the leaf itself is fleshy, tender, and succulent. There is a red and white variety. The cultivation is the same as that of the common beet, but the plants should not stand nearer than a foot apart. A rich moist soil is best. In gathering, the outer leaves are pulled off, leaving the inner ones to develop and keep up a supply. The leaf and leaf-stalk may be cooked together, or the stalk may be separated, boiled, and dressed like asparagus, and the leaf cooked like spinach or other greens. A single trial will commend this to every lover of greens.—*Am. Agriculturist.*

—Mr. Kimble, in the *Prairie Farmer*, gives directions for shoeing, horses, to prevent their overreaching. The method seems to embrace much common sense, and is as follows:

Make the forward shoes long, and the toe-calks short and standing a little under, and set them as far back as convenient, in order to let the feet roll over as soon as possible, to get out of the way.—And in setting the shoes on the hind feet, reverse the order to keep them back, to give time for the forward feet to get out of the way. Make the toe-calks high, and the half-calks low, to keep the feet back, then he will travel like other horses. This may be remedied in part in the mode of paring the hoof. This is essential in all cases, and where too many horses have been made cripples. Great pains should be taken at all times in shoeing horses, and I believe not too many of our blacksmiths fully understand making the shoe and paring the hoof.

NEW SLATE DISCOVERY.

[We have received with the following Letter a very superior Sample of the Slate from this Quarry, which can be seen at our Office. It is indeed very fine and worthy special attention.—Ed. Farmer.]

COPPEROPOLIS, CAL., May 3, 1869.

COL. WARREN—*Dear Sir:*

I send by mail a sample piece of Slate taken from the Alvord Claim, about five miles west of this place. The Company employ thirty-five men at present, to carry on the work of opening the ledge, and I understand it is the intention to put on a greater number as the work advances. They are now down to the depth of thirty feet—the quality of Slate becoming better as they go down.

Messrs. H. M. Moore and Thomas Barber are the efficient and gentlemenly Superintendants.

As is the custom in California, a little town is beginning to be talked of, and I see no reason why one should not be reared.

The name of "Alvord" is now attached to the place, which consists of a boarding house, a sleeping house, a few brush shanties, a blacksmith shop, and a saloon, all of which places do a thriving business.

Respectfully Yours,
ALBERT A. SMITH.

THE MANAGING WOMAN.

To be a good housekeeper is one of the most essential and useful accomplishments; and the man who secures for his wife one whose education in this respect has not been neglected, combined with a mild, confiding and loving disposition, has a most valuable treasure; and if his home is not agreeable and pleasant, he may be assured that the fault is with himself, and he does not possess the manly and gentlemanly attributes necessary for such a partner for life.

We commend the following just and truthful remarks to the attention of our readers:

"The managing woman is a pearl among women; she is one of the prizes in the great lottery of life, and the man who draws her may rejoice for the rest of his days. Better than riches, she is a fortune in herself—a gold mine never failing in its yield—a spring of pleasant water, whose banks are fringed with moss and flowers when all around is bleached white with sterile sand. The managing woman can do anything, and she does everything well.

Perceptive and executive, of quick sight and steady hand, she always knows exactly what is wanting, and supplies the deficiency with a tact and clearness peculiar to herself. She knows the capabilities of persons as well as of character. The managing woman, if not always patient, is always energetic, and can never be disappointed into inaction. Though she has to teach the same thing over and over again, still she is never weary of her vocation of arranging and ordering, and never less than hopeful of a favorable result."

[We find the above in one of our Eastern Exchanges, and we most earnestly commend our young men, especially young *Farmers*, to look about them and find this "Managing Woman" for their household; then they will have found the Pearl worth having.—Ed. Farmer.]

QUANTITY OF FOOD FOR WORKING MEN.—Individuals whose organs of digestion, secretion, and respiration are weak, need food different in quantity and quality from that of persons in robuster health. For every stage of life a certain mixture of food is fitted; and what we all consider as a matter of course for the infant, is, strictly speaking, applicable to every period of The evil is that every one has not the free choice of what he will eat; but by learning what is especially suited to his wants, or what is hurtful for him, he may help to lengthen his life a short while. The daily work performed by an individual bears relation to the mass of his muscles, and this depends on his nutrition in relation to his food. Two individuals with muscles unequally developed, cannot perform daily the same amount of work. A badly-fed individual has little muscular formation, and requires less food than one well fed. With the same quantity of food which would keep the badly-fed individual up to his weight, the better-fed man, with greater muscular formation, would lose weight. The English railway contractors measure the capacity for work of their men by their appetite.—*Western Firesides.*

—The highest mountain in the world is the Ivy Gamin, 20,459 feet. The highest peak in the world is Mount Everest, 29,002 feet. The highest permanently inhabited place in the world is Ladak, 15,117 feet. The greatest mountain height visited by man is beyond Ivy Gamin, 22,359 feet. The highest point at which a man can ascend, without having his health affected, is 16,500 feet. The highest balloon ascent yet made is 400,000 feet.

—For a young man who is thoroughly in earnest, farming offers a grand field for effort; but the man who is only in half earnest, who thinks that showy surroundings are the great object of attainment, will find that the results of his farming operations are not very encouraging.

—The Vicksburg *Telegraph* urges the resort to sheep raising as a business in Mississippi. The hills abound in Bermuda grass, and would afford pasturage to immense flocks.

Country Homes Wanted

There is wanted at this time, several **Homes in the Country**, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 160 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will buy them if they call or communicate with this office immediately

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Addres the FARMER OFFICE.

KIRBY'S COMBINED REAPER AND MOWER

WITH COMBINED SELF-RAKE AND REEL

TWO COMBINATIONS IN ONE MACHINE

This is the only TRULY COMBINED MACHINE in the world. While many machines PROFESS to be Combined, and some of them are very good Mowers, there are very good Reapers, there are none that Combine both qualities like the KIRBY, and work in either capacity as well as if designed for no other purpose. In

"MONITOR"

Self-Raking Attachment IS THE MOST PERFECT THING IN THAT LINE EVER INVENTED.

It is COMPLETELY SUCCESSFUL in any or all conditions of Grain, either Heavy, Light or LODGED, or in the heaviest Mustard; as over a Hundred Farmers the Pacific Coast, who are successfully using them this year, can testify.

The Kirby can cut the largest Mustard without any trouble, and rake it off also, if necessary.

We shall keep a large supply of EXTRAS of all kinds on hand.

The working of the "MONITOR" is so complete, that the closest scrutiny cannot discover that the team works any harder when it is taking off the heaviest In fact, it is easier for the team to run the KIRBY COMBINED REAPER with the "Monitor" Self-Rake on it, than it is to carry a man to rake off, and the are left in much better shape for the binder; so much so, that many claim that it saves the work of one binder, to say nothing of the difference in scattering the

By a device lately invented, the size of the gavels can be regulated at the will of the driver, according as the grain stands heavy or light; it consists of a treadle operates on one of the ways of the Rake-arm, so that the Rake can be thrown and pass over the grain until a gavel of the right size is collected upon the platform then the Rake, of its own accord, will sweep it off.

This machine can be set to cut at any desired height from the ground, from two to eighteen inches, by merely changing two bolts, one in the grain-wheel slide, the n the axle plate, where the joint or independent action is obtained.

This machine never had an equal in heavy lodged grain or grass, as it is in such cutting that it shows its superiority to the best advantage.

TRUE'S
IMPROVED
POTATO PLANTER.

This is, undoubtedly, one o the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

OUR LADY CORRESPONDENT FROM PENN.

LETTER NUMBER THREE.

GREEN TREE, PENN., April 19, 1869.

Editor California Farmer:—

At last Spring is here. There is no mistake about it.

We have enjoyed a whole week of fair, sunny days, followed by several warm showers, and this morning the air is soft, the birds sing, and the meadows are clothed in vivid green; only the bare trees remind one of Winter, for the time of blossoms is not yet.

We have had a very disagreeable Winter—no snow to speak of, but an endless freeze and thaw, with excessively cold weather in March.

But that is over; old things have passed away, and we live in a new world, under a new reign.

It is years since I have passed an entire Spring in the country. It is so pleasant to watch the gradual waking up of nature from her long death-like trance of Winter.

I never tire of out-door pursuits; each day comes laden with fresh delight.

How beautiful are the brown buds! but they are not all brown. The haw tree is full of bright red buds, that look like little round berries; and on the beech trees instead of ordinary buds, I have found tiny fairy-like cigars, of a pale brown color.

Once in Winter, I recollect seeing a very beautiful spectacle—the trees were all cased in ice, and the buds, seen through this medium, looked like gems bedded in crystal.

But we have leaves too, now; the gooseberry bushes are full of bright green leaflets, and the lilac trees sport tiny turfs of emerald leaves that look like fairy plumes. And yes, flowers too—yonder old stump holds up a cluster of pale blue blossoms in the sun, the trophy of a wild wood ramble. For I have been to the woods a ready; you cannot imagine what a great event a first Spring ramble is with us frozen North folks.

But no flowers have yet ventured forth, except the Liver-leaf. This hardy little pioneer we hailed with delight, half hidden among the last year's leaves. They are lovely; some are pure white, others of a sparkling blue, but the majority are of a pale blue color, befitting the chilly season. Last year, at this time, I found wind flowers and blue violets.

Although flowers were scarce, we did not return empty-handed; our baskets were laden with ferns, lichens and violet roots.

Our woods are not worthy of the name; they remind one of a half-civilized indian—they are neither one thing nor the other.

It is a constant source of regret to me, that we do not live near a real forest. I saw one at the mountains one Summer—the grand, beautiful mountains! Shall I ever again behold them? It is true that "a thing of beauty is a joy forever;" it rests me even now to look back to those mountain days, all too brief. There for the first time, in the fragrant pine woods I saw the ghost flower, so unlike any inhabitant of the green garden world. And there too, I made the acquaintance of the trailing ground pine and the partridge berry, and many pretty things unknown in our lower latitudes.

But I did not intend to indulge in this retrospect.

I set out to tell you about my garden doings—I haven't the least doubt but what you think I do all my gardening on paper; but you are very much mistaken I can tell you. A hoe-handle is more often in my hands than a needle.

And I am not a bit afraid of a little rough digging. I have the entire charge of the asparagus beds, and I don't permit any one to come within ten feet of my grapevines. One fine day last week I worked seven hours in the garden, and sowing seeds was the very least part of what I did. A strong mind is a very good thing in man or woman, but a strong body is not to be despised when it comes to taking up bushes, and carrying wood-soil a quarter of a mile for flower beds. Not that I would deter delicate women from entering the garden; far from it. I would say to them, do not be afraid to try it; of course you must not attempt heavy work at first; you should confine yourselves to the lighter labor of the flower garden until you grow stronger, which you will very soon do if you exercise gently in the open air a great deal. But bless me! am I preaching again? It looks like it, decidedly.

I meant to have a little chat about flower seeds, but I fear it is too late. I have a little garden under glass, and I like to go out on bleak days and take a look at the "green things growing." It pleases me to think that it is Summer in their little world, and no matter how sharp the wind bites outside, they are safe and warm. But besides these tender things, I have an out-door garden of sweet peas, candytuft, sweet alyssum, and dwarf double flowered larkspur, the latter are just coming up. You needn't smile—Vick says that a bed of dwarf larkspur is as fine as a hyacinth bed, and he ought to know.

I wish you would send me some California flower seeds; something sweet and pretty, and I will think of you every time I look at the blossoms.

Yours Truly,

JENNY DARE.

—As the luminaries of heaven reflect from one to another their light and heat, even so it is that one human heart must reflect upon the other the genial glow of happiness and joy.

FRANCIS & VALENTINE

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,

(Of the firm of Hucks & Lambert.)

No. 708 Lombard street, North Beach.

VALUABLE PLANTS FOR SALE.

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us.

A Young Man Wanted!

A live Young Man wanted—one who wishes to *do his duty*, and by his true merit work his way up, and become of value to himself and his employer.

To such a young man, who can bring good recommendations a good situation will be offered in this office.

Apply only between the hours of 8 and 9 o'clock, A. M., and 5 and 6 o'clock, P. M., in the Printing Department of the FARMER OFFICE.

Wanted.

A Gentleman residing a few miles from the city, is anxious to meet with some one, who can Superintend the construction of Trout Ponds, or give information as to the best mode of constructing Fish Ponds. Such parties will be amply compensated for all trouble and knowledge. Address, B. L. B., FARMER OFFICE.

P. S.—A personal interview would be preferred at the Farmer Office.

PREMIUMS for 1869.

With a hope to enlist a new interest for our Journal and to give to those who co-operate with us a just recompense for their time and labor, we offer the following

Very Liberal Premiums

For the Year 1869,

THE THIRTY FIRST VOLUME,

—AND—

SIXTEENTH YEAR

OF THE

"California Farmer,"

We trust the following Premiums will induce those who desire to receive our Journal, and the accompanying New Year's Gifts, to extend to us their generous influence for the Extension of our Circulation, until every family in the Rural Districts shall have a copy of the

"CALIFORNIA FARMER."

TERMS OF SUBSCRIPTION:

(Payments in Gold or Silver, Always in Advance.)

By mail, one year,.....$5 00

" " six months,.....3 00

When payments are delayed six months,.....6 00

CLUBBING.

To clubs of five, (and extra copy), six for... 25 00

do twenty,..... 75 00

do fifty 175 00

Or, we will give as Premiums, as follows:

For every club of five, and $25, Agricultural Books valued at.....6 00

To every club of Ten, and $50, Agricultural Books valued at..... 15 00

For every club of Twenty, and $100, Agricultural Books valued at 30 00

For every club of Fifty, and $250, Agricultural Books valued at 75

Thus securing to a Farmer, or a Farmer's Club, the nucleus of a good Library—The Books to be at our lowest advertised Gold prices.

Every Farming District in our State could by co-operating with us secure a large and valuable Library, without any other cost save a little labor and co-operation to extend the FARMER'S circulation.

To any Lady who will secure us Ten subscribers, and $50, we will send Magazines or Floral Books to the value of $15 00

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....MAY 13, 1869

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street.—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum the FARMER Office. Members of the Press and Strangers particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mail, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is TWO DOLLARS for five lines or less of space, in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of our *Journal*, to which we would direct their *special* attention.]

Our readers as well as ourselves have undoubtedly for the last two weeks been happily engaged in the joyous event of the Completion of the Pacific Railroad, and are now looking forward and preparing for Great Results, which are sure to follow.

It will be seen we have occupied a large space this week in publishing the doings at Sacramento, as we believe it our duty to preserve these important histories.

As an old Sacramentan, we could not be any where else on that day but at Sacramento, that we might *Witness her day of Triumph*, and although we had kind and pressing invitations *To the Front*, and should have been glad to have been there; we could not forget Sacramento, and we *did enjoy* what we saw, and for the many courtesies we received *personally*, from many old friends, we tender our heartfelt thanks.

We shall never forget that Day.

We are obliged to omit much that we desire this week, but we shall find room in our next for many pleasing incidents of that day, long to be remembered.

Railroad Celebration in San Francisco.—We shall make it a duty in our next to give some of the most important events of the Celebration in this City, which we cannot do this week.

This Number.—Our Home Department contains much that should deeply interest "Wives" and "Mothers." *How to Live*, and the proper care of children should be their study. This will secure them greatest happiness.

Jenny Dare's Letter is full of interest. She shall have the *Flower Seeds*, and the Flower *buds*, too, viz. Pacific Railroad in *one week*.

STRAWBERRIES.—Oh! what a subject to write upon in a hot day; when we say that over *One Hundred tons of Strawberries* has come into our City in one week; that over twenty-two tons come to town in one day, who would not call this the "Strawberry Land." Let "Jenny Dare," our correspondent in Pennsylvania read this and then talk of the frozen north—talk of strawberries by *the quart* will you Jennie, *we* talk of them by the *Ton*, and they are sold on our streets at a bit a quart.

This is a land of Strawberries and Cream.

HAY CROP.—Some persons think the Hay Crop will be cut short by reason of the recent hot weather. It may be that some places may be affected, but there is no fear but that we shall have all that is wanted and enough to spare—croakers to the contrary notwithstanding.

G. O. WHITNEY & CO'S FURNITURE WAREHOUSE.

HOW TO WRITE EASY.—We called at the new Furniture Store the other day, and in looking over the hundreds of *new* and choice kinds of *Rich Furniture*, we noticed a new style of Table, called a "Library Table," which for convenience and economy of arrangement and style we have never seen equalled. We also noticed a new style of Couches, Easy Chairs, and Rich Parlor Setts, different from any before imported or made here and of surpassing richness, elegance and beauty.

We were pleased to find also in the Partner of Mr. Whitney, an old Bostonian, who we know will be glad to see his old Boston Friends.

Mr. Kimball, long known in Washington street, Boston, should have a host of Bostonians call to see him, and he can show them one of the richest assortments of Furniture ever displayed on this coast.

Bostonians should remember Bostonians.

TRIUMPHANT COMPLETION OF THE PACIFIC RAILROAD

CELEBRATION AT SACRAMENTO.

Now that the sound of BOOMING CANNON is hushed, and the PEAL OF BELLS has ceased; now that the HUZZAS of countless thousands with their echoes over mountain and valley has died away like the strains of pleasant music, and now that the mass of our people can stop to reflect upon the Grand results which has caused such vast rejoicings over our State within the past week, we shall all begin to see and feel the full value to *Our State, to Our Country*, and to the *World*, the boundless good which has been achieved for us all by the Grand, Triumphant and Gloriously successful

COMPLETION OF THE PACIFIC RAILROAD.

May the 10th should indeed be a *Red Letter Day* for California, as was so very appropriately said by the Orator at Sacramento.

It was a Proud day for Sacramento, and her faithful Citizens felt it was truly so, and never yet, for long, long years, has Sacramento ever looked so well, or had cause to *Rejoice without fear*, as on that memorable day, when she sent up to Heaven such a Chorus of Glad Rejoicings, from Cannon, Bell, and Steam Whistle, and from glad Huzzas, such as was never before heard on Earth.

When we stood amid that Vast throng of more than *Thirty Thousand people*; as we looked up the long streets of this Redeemed City and saw the Miles of living green, and the breathings of bright flowers, we could hardly repress our own joy; we had always looked forward to this *Day of Triumph*, and knew it would come; but when the Cannon announced the *Great Event*, when it was known that Gov. Stanford had given the final blow that completed this Noble Work; as the thundering Cannon spoke, and Bell upon Bell pealed, and the Steam Whistle joined in the shouts, our own wish was that the spirit of *Beethoven* might come to our Earth and catch up the spirit of this Grand Chorus and give us in *Music Notes* its Grand Completion.

Proud! Proud! Proud Day for Sacramento—Queen City of the Plains. Thou hast nobly battled with misfortune for Twenty years, but Victory has crowned thee at the last, and thy Day of Triumph has come.

Proud day, too, for those Brave *Sacramento Pioneers*, the President and Directors of this Great Work, who can now sit down in joy and thankfulness and feel that they too have conquered, and Victory is theirs, and as they review their six years of toil, anxiety and cares, although amid unprecedented trials, yet they can feel and know their purpose was firm, their cause a noble one, and now that the Goal is gained, they can with truth say,

"One self approving hour whole years outweigh
Of stupid starers, and of loud huzzas."

Yes! and they can say also,

"Who does the best his circumstances allows,
Does well, acts nobly—Angels could no more."

All Honor then to those who have now achieved the Work. Due Honor, also, to Sacramento, and to her Citizens who so Nobly and Generously responded to Commemorate the day, for the whole plan was most admirably conceived, most judiciously carried forward, and most triumphantly completed, reflecting due Honor upon all who were connected therewith.

Never was a city more appropriately decorated or more gaily dressed, and never did the Inhabitants of a city enter into a Jubilee with more heart and soul, than the Citizens of Sacramento on this occasion, and well they may, for this Grand Triumph is indeed the Work of *Sacramentans*, and they deserve and will have the Honor of it, and justly, too.

We were indeed glad to see this day of Prosperity coming to our "Old Home" where we ourselves suffered by *Fire* and by *Flood*, yet we have ever had faith of this coming day of Prosperity, and we rejoice we have been permitted to live to see the fulfillment of our prophecies and of our wishes.

The Preparations made by the Citizens for their Guests were on the most liberal scale, Sumptuous Tables were prepared at the State House for the Authorities and Guests in Procession, the Military, the Pioneers made sumptuous preparations also; the Odd Fellows and the Masons, and other Societies, and private Citizens, all were prepared; there was a "Feast of Fat things," and all hearts were made glad.

The Procession was immense, occupying hours in its course, and presenting a handsome appearance. Banners and Mottoes were placed along the streets, typical of the past and present, and all most appropriate.

When the head of the Procession was at the Capitol, in countermarching, the rear of it could be seen crossing and recrossing streets far back as Front street. This, with the many Bands of excellent Music, the ringing of Bells, the frequent cheering, and the greeting and waving of kerchiefs from private dwellings, made it truly a Joyous day.

The Address of Gov. Haight was a most admirable one, completely suited for so memorable an event, and so important that we have felt it a duty to give it entire in our columns.

We have also placed in our columns the entire *Prayer*, by Rev. J. A. Benton, the Pastor of the First Church in Sacramento in early days, (he too, an early Pioneer.) The Prayer was fervent and justly suitable for Public Men in great public enterprizes, and for all, and feeling it to be specially worthy of preservation with the history of this event, we have thus presented it.

The Odes we have also published, excellent and fitting to commemorate this happy event.

The immense throng that lined the streets, the Procession, Civic and Military, with the people, must have numbered Thirty Thousand, and yet no no event happened to mar the happiness of the day.

We can truly say, we have never witnessed a public gathering, so full of the genuine spirit of true Happiness, as that which celebrated the great event at Sacramento last Saturday.

REFERENCE FOR THE DEITY.

One of the most satisfactory features of the most excellent order of the Exercises, was the very Reverend and appropriate Recognition of GOD, as the source of all our success and prosperity, both in the Address of our Chief Magistrate, and in the Beautiful Prayer of the Chaplain, thus sealing the great Truth that *Men* are but the humble instruments of His will in the accomplishment of all good purposes.

It was a day that will never be forgotten.

But will long be remembered,
With Pride and with Joy,
As a day marked with Triumph,
Without a shade of alloy.

When the Procession returned to the great Freight House on the Levee, his Honor, the Mayor presided, and after appropriate remarks in commemoration of the Occasion,

Rev. J. A. Benton addressed the Throne of Grace with the following

PRAYER.

Almighty and eternal God! who hast flung suns and systems into space, and hung our world amid the stars of light, Thee we worship and adore; in Thy being and person we rejoice, as the high and mighty Ruler of the universe which Thou hast made. Thy providence is continually in force among all Thy works and Thy creatures. Thou makest Thy pavilion round about the dark waters and thick clouds of the sky; Thou ridest on the wings of the wind; Thou hast Thy way in the sea, and Thy path in the great waters; Thou buildest continents and islands; Thou scoopest valleys; Thou settest fast the mountains, being girded with power; Thou scatterest the hoar frost like ashes; Thou castest forth Thine ice like morsels; Thou givest snow like wool; Thou sendest forth Thy word and meltest them; Thou causest the wind to blow, and the waters flow; Thou coverest the heavens with clouds; Thou preparest rain for the earth; Thou makest grass to grow upon the mountains! Great is the Lord, our God! His understanding is infinite; He sendeth forth his commandments upon the earth; His word runneth very swiftly.

Thou, O Lord, art He "that canst bind the sweet influences of the Pleiades, and loose the bands of Orion; Thou sendest lightnings that they may go and say unto thee 'Here we are;' Thou hast put wisdom in the inward hearts, and Thou hast given understanding to the heart;', Thou didst create man in thine own image, and didst give him dominion over all Thy works. From age to age Thou hast led him to discovery, and inspired him with the knowledge of witty inventions. After centuries of human progress, we who now live have come upon the globe into the midst of an advanced and Christian civilization. We have entered into the labors of the great and good of all the generations of men. The lines have fallen to us in pleasant places; yea, we have a goodly heritage. We enjoy the manifold triumphs of art, science, skill, industry, wealth, enterprize and power.

We are met this day, O God, under the favoring smile of Thy providence to celebrate one of the grand achievements of our time. With the general acclaim of this great multitude, we give Thee thanks for the wonderful work which Thou hast enabled Thy servants to accomplish. We bless Thy holy name for the many successes and abundant triumphants accorded to those who, on this spot, a few years ago, inaugurated the greatest enterprize of our age. We bless Thee for the conferring aid and generous encouragement of the Government and people of this free Nation, of this young State, and these enlightened communities. And while we joy with all who rejoice over this vast achievement, and indulge in pleasing visions of the years of fruition, which now begin; help us devoutly to acknowledge our dependence on Thee, and to trust humbly in Thy goodness, grace and love.

In these days, and among us, Thou, Eternal God, hast caused to be fulfilled again, in another form, the prophetic mandate of old, "Prepare ye the way of the Lord; make straight in the desert a highway for our God. Every valley shall be exalted, and every mountain and hill shall be made low, and the crooked shall be made straight, and the rough places plain. Cast ye up, cast ye up, prepare the way; take up the stumbling block out of the way of my people." And across the breadth of this continent it shall come to pass "that the chariots shall be with flaming torches, and the fir trees shall be terribly shaken; the chariots shall rage in the streets; they shall jostle one against another in the broad ways; they shall seem like torches; they shall run like the lightnings."

We are glad, before Thee, that the remotest parts of the land are tied together with bands of iron, over which the waves of the world's great oceans may murmur to each other; that "the way of the Kings of the East has been thus prepared," at length; that a new track for the world's travel and commerce has been opened; that the facilities of intercourse with this our Pacific Empire have been suddenly and surprisingly enlarged; that a way of easy and rapid transit to the scenes of our early years has been opened; that our long isolation from many of the older seats of life, culture, and power, has ended; and that the prayers and toils of eventful and wearing years have been rewarded in this glorious consummation.

Be pleased, we entreat Thee, O Lord, to make this great highway of our nation, and of all nations, a great blessing to our National Union, to this State, and to these communities. Over these rails of commerce, roll Thou, also the car of thy Salvation. Speed the coming of the kingdom of Thy Son; and hasten the day of the redemption of all mankind. May all the affairs of this great railway be administered wisely and honorably, in the spirit of justice and benevolence. Smile Thou upon the officers and members of this now powerful corporation. May all of them have a fitting sense of the great responsibilities they bear. May they all seek that wisdom from God which is profitable to direct. And may they all be crowned with Thy goodness in this life, and with the rewards of well doing in the life to come.

Bestow now Thy blessing on us, and on all this assembly; may the exercises and festivities of the occasion be pleasing, profitable and memorable. May all go hence to a sweeter and more faithful discharge of the duties of their various callings and stations. May all now praise Thee, and go hence praising Thee.

For this event, for this day, and for this scene, we call upon our souls and all that is within us to praise Thy glorious name, O God! We call upon the people of our Coast to Praise Thee. We call upon them that dwell in every land to praise the Lord. "Praise the Lord from the earth, ye dragons and all deeps; fire and hail; snow and vapor; stormy wind, fulfilling his word; mountains and all hills; fruitful trees and all cedars; beasts and all cattle; creeping things and flying fowl; Kings of the earth and all people; Princes and all Judges of the earth; both young men and maidens; old men and children; let them praise the name of the Lord, for His name alone is excellent; His glory is above the earth and heaven. Praise Him for His mighty acts; Praise Him according to His excellent greatness. Let everything that hath breath praise the Lord!" "Now unto the King eternal, immortal, invisible, the only wise God, our Savior, be glory everlasting! Through Jesus Christ, the Redeemer. Amen, and Amen!"

The following beautiful Ode was sung by the whole Audience.

ODE.

BY LAUREN B. CRANE.

Through toil built mountain gates,
We come, O Sister States!
With hymns of praise;
Where white Sierras rise,
Where green plains face the skies,
We grasp the victor's prize,
To crown our days.

The wild, grand march is done!
The guarded ways are won
From sea to sea!
We see His mighty Hand
Now clasp this iron band
To grace our matchless land,
Where all is free!

Glad be the song we sing!
Columbia's Harp we string
With iron chords;
Swift shall grand music sweep
Round thrones beyond the deep,
Till tyrants kneel and weep,
Or grasp their swords!

Our Nation, pure and free,
Give thanks, O God, to Thee,
For wisdom taught!
No grim war-harness mars,
Not one slave fetter scars
These iron music bars
Her sons have wrought!

The Poem and many other interesting details of this interesting event we shall give next week.

ADVENT OF PACIFIC RAILROAD.

[We are most happy to lay before our readers a very excellent and appropriate Poem, to commemorate the Advent of the *First Locomotive* that makes the Grand Tour from Sacramento to New York.

Our Correspondent Agnes, being herself an Early Pioneer, is indeed most eminently qualified to Herald this Great and Grand Event, and her words and thoughts are most truly fitting for this occasion.

We publish the brief note that accompanied the Poem, and we feel honored with such a Poem for the Farmer.]

Home Valley Ranch, May 1, 1869.

COL. WARREN—*Dear Sir:*

I do not know that you, amid the general rejoicings, can find room for so weak an expression of *Welcome* as I have tendered to the First Overland Locomotive; but having a very clear remembrance of a long and toilsome march over this same route in early years, I can but express my Joy that better times have come.

WELCOME TO THE FIRST LOCOMOTIVE.

WE GREET THEE Thou Fire Breathing Steed of the Rail
Thy pathway completed, thy Advent We Hail!
Thou hast sped from afar, over mountain and plain,
Where but now the rude Savage unquestioned did reign;
Where the Bison and Antelope roamed in their pride,
By Cliffs which look down on the *"Platte"* turbid tide.
Thy *track has been builded* with Wisdom and Toil,
Such as may not from obstacles ever recoil,
When the *Good* of a *Nation* is urging them on,
Or a Goal like the present awaits to be Won.
Shall an Empire lie waste in its savage repose?
Or the Wilderness put on the Bloom of the Rose?
Shall *Millions of acres of land be untilled?*
While the earth is with millions of Homeless ones filled?
Or shall it by myriads of *Freemen* be trod,
Till it all becomes fair as the *Garden of God!*
Let the brave sons of toil find a Home and find Bread,
Where the broad fertile plains are luxuriantly spread;
Let the Eagle, brood o'er them in peace like the Dove,
Our Hearts bid them Welcome with Brotherly Love;
Thus teaching the Savages *lessons of Peace*,
Which may cause *strife and carnage* forever to cease;
For, example if good, e'en with them may prevail,
Where unpracticed precept most surely will fail.
The Sword and the Rifle *too long* have been tried,
To subdue the rude savage's untamable pride;
And the tribes who now roam o'er broad Western Plains,
Find still only *bloodshed* and *enmity* reigns.
Then now, let the *Ploughshare* and *Pruning-hook* come,
With the pleasures attending a *Civilized Home*;
Then e'er long all the *Strife* and *Destruction* will cease,
And thy Advent will herald the *Advent of Peace.*
Then *Speed on thy mission* from Mountain to Sea,
And the glad shouts of Millions thy Welcome shall be.

AGNES.

Eastern Correspondence.

THE CENTENNIAL LETTER.

LETTERS FROM AN OLD CALIFORNIAN IN THE EAST.

NUMBER ONE HUNDRED.

[*Our Centennial Letter.*—We herewith publish the One Hundreth Letter from our highly esteemed and most excellent Correspondent in New York, M. A. S.

We think very few Journals can boast of a more constant Correspondent, or one whose consecutive Letters can all be referred to, to the number of One *Hundred*, and all be found to be of so high order of merit, and comprising so many and varied subjects of interest in Literature and Science, and in Politics, Morals, Philosophy, and Social Life, and yet all marking a gifted mind and a pure heart.

We feel particularly proud to place this *Centennial Letter* in our columns the same week that we record the Triumph of the Pacific Railroad. An auspicious omen, we trust, for by this great work we hope soon to welcome to these shores our Friend and Correspondent again.]

NEW YORK, April 5, 1869.

Editor California Farmer:

EASTER SUNDAY SERVICES.

Easter Sunday was celebrated in the Episcopal and Unitarian Churches in a style of unusual magnificence. So determined a sight-seer as I am, would not miss looking into as many of the churches as possible. I heard a portion of Dr. Bergé's new mass at St. Stephen's, glanced at Dr. Osgood's, crowded into Dr. Ewers, and got just in time to hear some of the music at Dr. Chapin's. The crowd of people at St. Stephen's alone worth looking at. Not a place outside the altar railings was unoccupied, and the crowd overflowed into the corridors and out into the street (the vast edifice extends from 28th to 29th street). The music was unusually well performed even at St. Stephens. The mass is a very showy one and gave a fine opportunity for both the vocal and instrumental performers to distinguish themselves which they did in truth. After nearly fainting with the heat, I walked up to the church of the Messiah where I heard some delightful music, and enjoyed the exhibition of rare flowers. Then went to Christ Church where I was just in time to hear the Easter hymn, sung by a choir of selected soloists. This church has been splendidly frescoed and is alone worth a visit. Dr. Ewer was very eloquent and I could hardly tear myself away, but my mania for sight seeing conquered and I left in time to hear the music at Dr. Chapin's. It was very tame after the performances I had heard, but I was charmed with the flowers which made the church look like an enchanted palace.

The day was bright and cheerful, and the ladies looked unusually handsome even in the bright truth-loving sunshine. Their dresses, bonnets, etc., reminded me of the theatre—one to walk down Fifth avenue on Sunday can easily fancy themselves surrounded with the ladies of the ballet, without drawing upon the imagination much either.

THEATRES AND OPERAS.

Easter Monday brought extra attractions at the theatres, and the daily papers say they were worth seeing. I have witnessed the Tempest at the Grand Opera House, which is superbly presented. The applause, I noticed, curiously enough came in most appropriately from the "gods." Shakspeare, if he were alive, would have no reason to murmur at the want of appreciation in the American Paris. Romeo and Juliet magnificently performed at Booth's Palace—Much Ado About Nothing perfectly represented at cosy Wallack's. Hamlet wretchedly done at the New York Theatre to fair houses, murdered at the New York Theatre where empty seats attest the punishment of the offenders—and the Tempest, as I have said, splendidly mounted at Prince Erie's Fairy Temple. The Grand Opera House was crowded the night I was present, and Mr. Fisk will evidently be repaid for his outlay. "Young Edwin" is to bring out Romeo to next week, and rumor says, in a style every way superior to Romeo and Juliet. This seems almost impossible. I hope you will all welcome Lester Brougham; he is a Prince of Good Fellows, apart from the fact of his being one of the most accomplished men of the day and a first-class actor.

NEW YORK VS. PARIS.

A French lady in speaking of New York the other evening said to me, and not out of compliment either, "New York is a brilliant city, I assure you we find as much to amuse us here as in Paris, our city of luxury."

I regret very much as all well meaning people must do, that while New York rivals the Capitol of "La Belle France" in so many admirable ways, she pets that insult to purity and good taste the Can-Can. In Paris, we are told, at the infamous Mabille it is vulgarity polished and refined, in New York, it is simply a rude Cyprian exhibition, without any polish at all—simply stark naked obscenity.

REAL ESTATE.

The excitement in Real Estate has subsided. Buyers are divided in opinion as to its future course. I think that prices will yet continue to advance along the Hudson, and particularly in the neighborhood of the Park. Business is rapidly taking possession of the Fifth avenue, and the wealthy are already looking out for sites in the future West End. A reaction is sure to take place however in other localities. There is no good reason for such a rapid increase—thousands of people will move out of New York this May to avoid unnaturally high rents. This will be sure to affect Real Estate which has no Future before it. M. A. S.

HAIN.—We call attention to the advertisement of this celebrated Wine. We have used it in our family for years, and can recommend it as a pure article. Mr. Hain has been long known as a Wine Grower, and his Wines have always been of the best quality.

[CONCLUDED FROM PAGE 121.]

vantages and attractions to the people of the Eastern States and Europe far beyond those presented by any other State or Territory. Who will set limits to its progress, or paint in fitting colors the splendor of its future?

When we reflect upon what has transpired during the twenty years that are past, isolated as the State has been, what will be its progress during the twenty years that are to come? Extrinsic causes, of course, may influence our destiny for good or evil. Mismanagement at home or at Washington, profligate public expenditure, foreign war, and unwise legislation, famine and pestilence may, at times, retard our progress, but if the people of California are true to themselves, this State is destined to a high position, not only among her sister States, but among the commonwealths of the world.

What is to be her future in the useful arts with the popular intellect trained and developed by a complete system of general education; in the fine arts, when the exquisite tints of her landscapes and sky, and the stupendous scenery of her mountains are transferred in glowing colors to the canvas, and the sculptor's genius chisels into forms of beauty the marble of her quarries; in commerce, when trade is freed from its shackles; when her ships visit every shore, and her merchant princes control the commerce of this great ocean and the populous countries upon its border; in manufactures, when our silk and woolen goods, by their superior quality, displace the fabrics of older nations; in agriculture, when our wine and wheat are as eagerly sought after as our gold and silver; in science and literature, when institutions of learning of the first order afford every facility, and accumulated wealth secures leisure for scientific and literary pursuits?

In answer to these questions, we might be charged by our Eastern brethren with blind partiality and exaggeration. We are content to leave the answer to time.

The day is at hand when a more splendid civilization than any which has preceded it will arise upon these distant shores. A vast population will pour into this Canaan of the New World. Already we hear the hum of preparation in every quarter. Already we listen to the tread of the advancing hosts. From the North, East and South, from the Lakes to the Gulf, the swelling tide of population will gather volume and pour in a mighty tide across the continent, bringing to us the youth, the enterprize and energy of the older countries in search of adventure, of freedom and of riches on the shores of the Pacific. Tourists will be attracted by the most sublime scenery on the continent, and thousands will come to repair physical constitutions racked by the extremes of climate, the inclement air, and the miasma of the States east of the mountains.

These words may seem boastful to our brethren at the East, but we know whereof we speak, and in simple truthfulness can say no less. One reminiscence more before I close. The 14th day of this month terminates the first century of the occupancy of this State by the white race. One hundred years ago, on that day, the first settlement of white men was made within the borders of California. A party of immigrants then arrived, not in a luxurious passenger car, whirled along the dizzy hights and profound gulfs of the Sierras by a ponderous engine, waking the echoes of the mountains with its roar and rattle, but lead by a Franciscan friar, not in quest of gold or office, or of a more comfortable home, but stimulated by religious zeal and bearing the standard of the cross. After a laborious and painful journey overland through Mexico, Father Juan Crespi arrived at San Diego on the 14th day of May, 1769, one hundred years ago. Father Junipero followed, arriving on the 1st day of July of the same year.

It seems singularly appropriate to signalize the centennial anniversary of the settlement of California, by the completion of this crowning work of Saxon civilization, which links together in iron bonds the two great oceans of the world, and carries California at one bound into the centre of the great family of nations.

If after the lapse of this hundred years the good friar could awake from his slumber and revisit the scenes of his self-denying labors, with what speechless amazement would he gaze upon the transformation wrought on these shores since his day. It is doubtful, however, whether the changes of the past hundred years, amazing as they have been, are more wonderful than those that will occur within the hundred years to come. Where is the fancy adventurous enough to conceive the changes to occur before the ceaseless course of time brings the second centennial anniversary of the settlement of California?

In conclusion, however, some things must be borne in mind, if we expect that prosperity which seems to gild with its rainbow of promise the horizon of our future.

Railways and telegraphs are potent civilizers, but these alone will not constitute or conserve any State—much less a free State. Corruption and vice can travel on railways with as much ease as in stage coaches. California may have all the facilities of travel and intercourse, and its people accumulate wealth beyond the dreams of avarice, and yet be miserably poor in all the higher elements of solid and enduring happiness. What the moral character of the future population of this State is to be, depends largely upon the generation which is living to day.

When we contemplate the magnitude of the destiny in store for our noble State, let us realize that we must ourselves furnish to those who are to come after us that lofty example which we wish them to follow. We must set our faces like a flint against corruption in high places as in low ones—in legislative halls and primary Conventions. We must make no compromise with gilded dishonesty. We must refuse to recognize two codes of morals, one for private and a lower one for political affairs.

Above all, we must recollect that the only basis of morality is religion—that no people who are unmindful of their obligations to their Creator can permanently prosper. That no amount of material wealth can compensate for the decay of public and private virtue; and whatever our religious convictions may be, or whatever forms of worship or tenets of faith our judgements approve, while we obey the calls of patriotism and render unto Cæsar the things that are Cæsar's, let us be careful to "Render unto God the things that are God's."

Acknowledgements.

Articles Received at the California Farmer Exhibition Rooms, No. 320 Clay Street.

Agriculture of Massachusetts.—We have been favored with the last Edition, second series, of the *Agriculture of Massachusetts*, a valuable Book of over 600 pages.

This Volume is Elegantly Illustrated, containing a splendid view of the Massachusett Agricultural College at Amherst, with all the buildings connected with this College, now one of the most flourishing Agricultural Colleges in our country.

The other Illustrations are "Gray Eagle," a Thorough-bred Stallion, the property of W. W. Chenery, Esq., of Belmont; the Caraman, or *Fat-tailed sheep*, remarkable animals.

Also other noble Horses and Durham Stock, together with interesting and valuable Reports of Committees, relative to the College and its progression, and Reports upon Agricultural matters, all of great interest, and admirably arranged under the skillfull pen of Hon. O. L. Flint, the accomplished Secretary of the Massachusetts Board of Agriculture.

New Works Received.—We have the following the past few days. Our crowded columns prevent a more extended notice.

Wood's Household Advocate, Published at Newburgh, N. Y., by J. S. Wood, a 16 page periodical, devoted to Knowledge, Virtue, and Temperance. The specimen copies sent us promise well.

Aid to Railroads.—We have the Publication of the Report of Senate Committee, on the Policy of Extending Aid to Railroads on the Pacific Coast by the National Government. We shall speak more on this subject.

Pacific Medical and Surgical Journal.—This excellent publication, Edited by Dr. Henry Gibbons and Son, maintains its high character, and is constantly adding to its fame by valuable subjects published therein.

We have many Books, Letters, Parcels, etc. to notice, which must be laid over to our next issue, by reason of want of space to notice.

ARRIVAL OF REV. I. S. DIEHL.

We gladly welcome again to the golden shores of the Pacific, the well-known Philanthropist, whose name stands at the head of this article; whose letter announcing his coming we published three weeks since.

Mr. Diehl has been absent from our State, now, ten years, and has visited a large portion of the Eastern world, and has stored his already gifted mind with much that is of great interest of the realms of Eastern Asia, and the Holy Land, of Bible History.

Mr. Diehl arrived at Sacramento, yesterday morning, at 5 A. M., on the special train, and on the *first train through from Omaha*—being just *four days* traveling time from Omaha.

The many friends of the long-absent will gladly welcome his return, and hope, ere long, to have his account of the wonderful lands by Public Lectures.

LAKE

VINEYARD WINE

COMPANY.

The undersigned, hitherto doing business under the name and style of B. D. WILSON & CO., have this day changed their firm name, and will hereafter continue their business as Wine Growers and Merchants, under the name and style of

"The Lake Vineyard Wine Company."

J. De BARTH SHORB,
CARLTON CURTIS.

We desire to call the attention of the Trade to our large stock of the celebrated LAKE AND MOUND VINEYARD Wines, and choice assortment of Wines and Brandies from the best Vineyards of California. These wines, bearing our trade-mark on package, label, and seal, we guarantee of uniform good quality, inferior to none, and ready for safe shipment to any part of the world.

Orders for the Atlantic States will be filled by our New York House from their depot, at No. 45 Murray Street, New York.

We respectfully solicit your patronage. Yours, truly,

The Lake Vineyard Wine Co.

Corner Broadway and Battery Streets,
May 1st, 1869 San Francisco.

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so consstructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by gone* Implements, but keep up with the "Progressive Spirit of the Age."

—:o:—

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULARS

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

[O]ODS

SELF-RAKING REAPER.

This Machine stands at Front of all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

Home Miscellany.

THE THREE LITTLE CHAIRS.

[The following touching, tender and beautiful poem was written by Mrs. H. T. Perry for the *Evangelist*.—There must be solace indeed, to every Parent who has ost loving children; such memories, and such remembrances will always heal the wounds death has made. —*Ed. Farmer.*]

They sat alone by the bright wood fire,
The gray-haired dame and the aged sire,
Dreaming of days gone by;
The tear-drops fell on each wrinkled cheek,
They both had thoughts that they could not speak,
As each heart uttered a sigh.

For their sad and tearful eyes descryed
Three little chairs placed side by side,
Against the sitting-room wall;
Old-fashioned enough as there they stood,
Their seats of flag and their frames of wood,
With their backs so straight and tall.

Then the sire shook his silvery head,
And with trembling voice he gently said—
"Mother, those empty chairs!
They bring us such sad, sad thoughts to-night,
We'll put them forever out of sight,
In the small dark room, up stairs."

But she answered, "Father, no, not yet,
For I look at them and I forget
That the children went away.
The boys come back, and our Mary too,
With her apron on of checkered blue,
And sit here all day.

Johnny still whittles a ship's tall masts,
And Willie his leaden bullets casts,
While Mary her patchwork sews;
At evening time three childish prayers
Go up to God from these little chairs,
So softly that no one knows.

Johnny comes back from the billowy deep,
Willie wakes from the battle-field sleep,
To say a good-night to me;
Mary's a wife and mother no more,
But a tired child whose play-time is o'er,
And comes to rest on my knee.

So let them stand there, though empty now,
And every time when alone we bow
At the Father's throne to pray,
We'll ask to meet the children above,
In our Saviour's home of rest and love,
Where no child goeth away."

HOW TO LIVE.

[The following most excellent essay we find in the Massachusetts *Record*, as being "A Fragment of Nora's Diary." We like this *fragment* so well, we desire more of the same food, as it contains the very *germs of true life*.—Ed. Farmer.]

I wonder what people are thinking of, or whether they think at all, who make up a diary out of the hard, bare facts of a bare prosaic life! Of what earthly or unearthly use for me or any one else, to state that I rose at five in the morning, swept the house, skimmed and strained so much milk, got breakfast and had it on the table precisely at six, and then to add the items of washing, baking, picking up chips, scrubbing, dusting, and setting the house to rights generally?

This was a wholesome and necessary duty, cheerfully performed, because of that necessity; but why should I make a note of it? The inmost was not in these things. And if the inspirations of these busy hours could be written, how much more of the beautiful in human life would be found in its humbler walks.

It is a mistake to suppose that the affections, tastes, and intellect must go entirely uncultivated unless one can command elegant leisure and refined luxurious surroundings.

Nature's sublime mysteries as well as her loveliness, and picturesque grandeur, is an open store house to all. The key that unlocks her riches and delights is of that undimmed gold of spiritual excellence that wealth may possess but cannot buy.

That one who possesses but a square rood of mother earth may see as far into the summer blue of Heaven, the sublime ether that stretches far, far out into the ungrasped, uncomprehended Universe of countless worlds, as another who can boast of lordly possessions.

I pity that one who is condemned by hard necessity to a life of hopeless drudgery, when the inner nature is hungering and thirsting and crying out for its proper nourishment wisdom and knowledge. But I pity more that one who has no soul needs, whose treasures are all of this world, worldly.

What though this body rest at last in a rosewood casket, canopied with richest velvets and satins and spangled all over with silver and gold, if it awake on the other side poor, wretched, miserable and naked?

Over the way the man of God who breaks unto this people the bread of life, is swinging his axe in the slant rays of the morning sun that shimmer and sparkle all over nature's snowy winding sheet. He believes in 'working with the hands' as well as in the intellectual and æsthetic culture. Most likely the early morning hours were given to the kindling of those inner altar fires, that burn out so brightly in his weekly ministrations.

Ah, me! I sometimes think I might be inspired *too*, even to write a sermon, if only that clear day leaf might be written upon before it was soiled with the weariness of toil and grosser cares.

What's the use in wading through a sea of speculation that have been coming down to us from the days of Adam, in order that we may more scientifically, dogmatically, and approvingly, set home to the people the naked truth, God's truth, free and bounteous, 'without money and without price.' Not but it is well and profitable to study the past and learn from it lessons of wisdom, but is there not too much feeding upon it to the rejection of the ripe, luscious vitalizing truths of to-day? God gives to all times and seasons an overflowing abundance of Heaven's best gifts, if we will but reach forth our hands to pluck them. To-day—at the present time—the Earth teems with a glorious harvest of blessings to man.

Now I am quite sure I should like to write sermons, if only I had the time and ability, and yet I am quite as certain I never could abide any set rules or fixed systems of theology.

I have a theory that before we cut too sharp angles of faith, or locate too positively the centre and circumference of all truth, that it would be modest to take a few steps up that ladder that leads to Heaven, and on which Jacob saw the angles ascending and descending.

It sometimes seems to me that just in proportion as a theological dogma is hard to be understood, it is insisted upon most stenuously; and where there is the greatest difference of opinion among thinking people, then you are told lies your greatest danger if you don't see with a particular pair of eyes.

"What think ye of Christ" has been a vexed question for eighteen hundred and sixty-nine years. Now instead of quarrelling about it and spending our precious time in wordy controversy, would it not be better to practice those blessed principles of love and good will to humanity which made Him a homeless wanderer on the face of the earth? Christ says, "Follow Me." If I were a spiritual adviser, and one was in doubt as to the exact status of Jesus the Christ, I should say, walk as He walked and you will be surely taught of that subtler sense of Him that belongs to the higher, the purely spiritual, and which flesh and blood cannot reveal. If you have His spirit, you are safe. If you have not His spirit, you are none of His, though you cry "Lord, Lord," till you are grey and blind.

Where's the good of determining beforehand just now high He is to be placed to be looked at, when we prove the exact measure of our faith by our works.

He certainly and truly enthrones Him highest, who bears about in his daily life the surest tokens. What need to make your faith a wordy fixity?—Live it, so shall you honor that Name that is above every Name.

SPRING DISEASES.

Reader! have you a mite, one solitary atom, of common sense? If you have, be persuaded to make a healthful use of it and commence on the instant. As soon as Spring begins to set in, almost everybody has more or less a feeling of lassitude; there is less buoyancy, less of an appetite, less disposition to exercise; some are so indisposed that they have to keep in the house, and numbers take to their beds. All this is your own fault; it's because you have got no sense, not a particle; or, if you have, you do not make use of it. You can readily understand that now, as the weather is warmer, you do not require as much fire in the house; and may be you are wondering why the servants will persist in making the house hotter now than in the depth of winter; they are only burning as much fuel now as in mid-winter, and they have not the sense to know this, or at least they do not care to think. The human body is a house to be kept warm; and, to be in health, its heat must be maintained at the same temperature the year round—that is, about ninety-six degrees. The stomach is, in a sense, the furnace; the food put into it is the fuel; the lungs set it on fire.—Why, then, do you eat in warm weather as much as in cold weather. On a Spring day, when scarcely any fire is needed in the house, you cram as much fuel into your stomach as in the depth of winter. You see now that you have not as much sense as Biddy; she is only trying to burn up your house, you are trying to burn yourself up with fever. A baby not three months old has too much sense to poke its little finger into the candle twice, yet you are poking your whole glattonous hulk, head foremost, every day into the furnace, and yet actually don't know what hurts you. You don't think; or, if you do, they are such diluted, milk-and-water "thinks," that a dime a load would be a bad bargain to the purchaser.

In adult life all the food we eat serves two purposes; it sustains and keeps warm. For the latter objects, meats, oils, butters, gravies and sweets are used; hence, in warm weather, a comparatively small amount of these things should be eaten; but in their place take breads, fruits, vegetables, melons and berries. Nature's instincts call loudly for the acids of berries and fruits, and for the earliest tender vegetables, the "greens" and the salads of our gardeners. It is because they have no heating qualities; they are rather "cooling" in their nature. They who spend much of their time indoors, would enjoy an exemption from a great many bodily discomforts if, upon the first day of Spring, they would begin to have meat for only one meal in the day, and in lessening quantities as the summer comes on. Persons who have intelligence, some skill in observing facts and making experiments, would do well to turn their attention to these things. We should aim, not merely to live, but to live in bodily health; without this, life is a burden, a failure, for an ailing man can do nothing well but—grunt and groan, and toddle about the house like a sick kitten. He is in everybody's way; he don't know what to do with himself; he can't even swallow a tablespoonful of "catnip tea" without screwing his face up into a thousand wrinkles, and then he sighs and groans as if it had half killed him.—*Hall's Journal of Health.*

—A dangerous character—a man who "takes life" cheerful.

CAUGHT IN THE ACT.

Mamma had gone to the city in the horse-cars, and had left the two children, Emma and George in charge of their grandmother.

Before going, mamma had said to Emma, "Now, I expect you to see that George does not get into mischief. You must help grandma keep house while I am gone."

"I will do the best I can," said Emma.

But no sooner had mamma gone than George stopped blowing his trumpet and playing with his little cart, and said to his sister, "Emma, I know where there is some grape-jelly."

"Well, George, so do I," said Emma.

"Can't we have a taste of it?" said George. "Nobody will find it out."

"I did not know you were so bad a boy as to think of such a thing," said Emma. "Nobody will find it out? Ah! God will see us; and all hidden things will sooner or later be brought to light."

"I helped pick the grapes," said George; "and I think a part of the jelly is mine: so I mean to climb up and get some from the closet-shelf."

Finding that she could not make George give up his naughty plan, Emma ran to her grandma, who was clearing away the dinner table.

The two came in just as George had taken a spoonful of jelly out of a jar, and was about to eat it.

Now, grandma, I am sorry to say, was not a wise grandma. She was so fond of George, that she would let him do just what he So, when she saw him at the jelly, she only said, The poor dear boy made rather a slim dinner, and is hungry. Let him eat the jelly if he wants it."

George did not need to be urged. He eat till he could eat no more. When his mother came home, she found him in great pain.

"What has he been doing?" she asked.

"He has only been eating a little jelly: I told him he might eat it," said grandma.

"Did he take that in the blue jar?" asked mamma.

"Yes: he took that in the blue jar."

"That is a mixture of senna and jelly," said mamma; "and it is no wonder the child is sick.—This will teach him, I hope, not to meddle with my jars of jelly."

Mamma was right. George had enough jelly that day to last him the rest of his life. He was never known after that, to meddle with mamma's jars. When he wanted a thing, he would always ask for it, like a good boy. He would not touch it without first asking leave.—*Nursery.*

CROQUET.

To the Editors of the New York Evening Post:—

A PLEA FOR CROQUET.

While many admire croquet, yet even among its votaries there are some who show a disposition to slight it. They will tell you, "it is a very nice game; very pretty to play with ladies; a pleasant means of whiling away a pleasant hour; a good excuse for a mild flirtation," etc. To such we would say: "You misapprehend the whole nature of the game. You are unworthy to call yourselves croquet players; you do not *play* the game; you *play* at playing it."

I assert boldly that croquet is one of the most scientific out-door games ever invented, and only inferior tobi l liards in point of science from the fact that it is impossible to get a ground as perfectly true and level as the bed of a billiard table; a game demanding of those who would excel in it perfect coolness, exquisite delicacy of touch, a practical knowledge of the different angles, good judgement, a correct eye, and an unruffled temper. Rightly understood, it presents points, involves difficulties and demands qualities which may well excite the interest and arouse the ambition of our most accomplished billiard or ball players.

WHAT IS CROQUET.

Croquet mainly consists in striking balls through hoops. There is hardly a lawn in Europe fit for the purpose, without a set of little wire arches, which look like human springs and toe traps for the unwary. The game is new; and it is a pleasant, tapping, chattering, respectable, flirting game, too. Men, women and children can play at it.—Reverend dignitaries and fashionable dandies, crinoline and knickerbockers, can all play it at once. It is easy to learn, and yet admits of many degrees of skill. It gives fresh air, and does not make you hot. It is clean. Unlike archery, it can be played on a small place. It is not dangerous—no one has ever been mortally wounded at croquet. It is cheap. If not independent of the weather, it is not affected by the wind or sun—no one need complain of the glare of light in taking aim, or of the disturbing breeze which turns aside the arrow. It can be played by ladies and gentlemen on equal terms, and with the same tackle.—And it is the very chief provocation of small talk and garden gossip. Upon my word, I have no idea of the number of recommendations which it possesses. I had dipped my pen rather with the intention of blackening croquet than otherwise; and now its dissection has converted me. I do not wonder at the polite rural world playing croquet. It conceals the age of the old, and displays the grace of the young. Grandpapa, in whose hand a bow would look absurd, whose lumbago would interfere with the exercise of quoits and bowls, can and does often, play a game of croquet. He need not bend his back; thus it is a good pastime for those getting rather stiffish. And for those full of ease and grace, what better? A girl with neat ankles will play at croquet all day long—it is made for pretty feet and well shaped boots. And yet, with all these social and coquettish recommendations, it is a game within the pale of the most strict and straitened society. A Quaker might play at croquet with drab balls.

—To wash calicoes, put wheat bran in a bag, boil and take half the water to wash in, half to rinse in; use no soap. This will cleanse them without fading, and stiffen them without starch. Iron on the wrong side and they will look as if just out of the store.

Miscellaneous.

Santa Clara College, S. J.

SANTA CLARA, CAL.

Conducted by the Fathers of the Society of Jesus.

THE EIGHTEENTH ANNUAL SESSION OF THIS INstitution will commence on THURSDAY, August 27th, 1868

TERMS—Tuition in the Classical and Scientific Departments; Boarding and Lodging; Washing and Mending of articles; School Stationery; Medical Attendance and Medicines; Fuel, Light, Baths, etc., per session of ten months,.....$135

For further information apply to the President of Santa Clara College, Santa Clara, Cal., or to Rev. A. Maraschi, S. J., St. Ignatius Church, Market street, between Fourth and Fifth, San Francisco.

24-3 REV. A. VARSI, S. J. President.

OUR HOME INTERESTS.

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact), and the probability that unless checked by a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, to be sent East for investment in the purchase of Life Insurance, instead of being retained at homes to promote and foster BY ITS INVESTMENT HERE the commercial, mechanical, and agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States of the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION, *whose capital and assets will not be impaired or injuriously affected by the change in values that will sooner or later occur by a return to specie payments in the other States of the Union.* Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to the citizen of this State, who feel an interest in its progress, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

THE CALIFORNIA

MUTUAL LIFE Insurance Company Of San Francisco.

All policies issued by this Company are, by the laws of California, EXEMPT FROM ATTACHMENT OR EXECUTION OF DEBTS, whether the policy be in favor of the *party assured*, or of *any other person*.

Policies are made non-forfeitable after two annual payments.

ALL PROFITS divided among the assured.

One half of the annual premium loaned to the assured *at any time* when desired.

Thirty days' grace allowed in the payment of renewal premiums.

This Company offers to those who have paid up their premiums in cash for two or more years, the advantage of giving notes for the whole amount of their annual premium, for a period *corresponding* to the time they have paid all cash, by merely giving their note, and paying the interest in advance.

Miscellany.

A SERENADE.

Sleep, Dearest! sleep,
My heart will keep
Its vigil till yon star be low;
And though it set,
Love, faithful yet,
Will but the brighter, steadier glow.

Dream, Sweetest! dream,
And let it seem,
While tender fancies charm thy rest,
That he who waits
By thy closed gates
Is ever fond, if never blest.

Wake, Darling! wake,
For true-love's sake,
Show thy sweet face at lattice-bar,
The star has gone,
The vision flown,
But Love out watches dream and star.

—*The Land We Love.*

CHARADE.

My *first's* a time when weary men
Forget their trouble and their care;
Silence serene and quiet then
Reign on the earth, and in the air.

My *second* is a word, though small—
Is small indeed, that's true,
But indispensable, with all,
You'll find when it is known to you.

My *third* came swiftly o'er the sea,
And raged tumultuous on the main;
It spread destruction on the lea,
And leveled down the fields of grain.

My whole's a bird, whose music makes
The summer twilight air resound;
In Tuscan groves, in English vales,
The peerless songster may be found.

CHILDREN AND FLOWERS.—A kind friend, in York State, in a letter received, *inter alia*, says, "I have nearly put up a collection of seeds and bulbs which I will send in a few days—to make my promise good—and to afford you and your dear family some of the 'smiles of God's goodness.' Next to little children, flowers are the purest, sweetest and loveliest things that our Heavenly Father ever made—but I cannot now commence on this strain; my poor head is too tired, I will only say that I hope you will take as much pleasure in receiving and growing the things sent as I do in the sending.

We have a weakness for children—as every one will admit, if he or she will come to our house, and like our friend we place them *first* among the "smiles of God's goodness."

Thank God for the "quiver full" he has given us, and for those too He has gathered home, for "in heaven their angels do always behold the face of my Father which is in heaven."—*Farmer's Gazette.*

LAWYERS IN CONGRESS.—Out of sixty-six Senators whose occupations are stated in the Congressional directory, forty-five are lawyers, five merchants, five editors, four farmers or planters, three bankers, two teachers, one a manufacturer and one a railroad owner. Quite a preponderance of the disciples of Coke. The House is not quite as strong in that element; but there are mentioned as lawyers one hundred and nineteen, merchants nineteen, editors sixteen, farmers seven, manufacturers six, railroad men five, bankers five, ministers two, doctors two, painter one and prize fighter one.

A NOBLE EXAMPLE.—We are extremely glad to copy the following card from the *Sacramento* of to-day. *This is an honor* to the *"Turners' of Sacramento.*

Take Notice! All disreputable persons—of either Sex—are given to understand distinctly that they will not be allowed on the Excursion Train for the Turners' Festival, on Sunday next.

There will be at the Depot officers who will recognize and eject them, Tickets or no Tickets.

Fair Notice is now given. Heed it! By order of the MANAGING COMMITTEE.

NEW INVENTION.—The Kingston *East Tennesseean* relates the following illustration of the progressive spirit: "Mr Massey, the teacher of the colored school at this place, we learn, is having a serious time learning the young ideas how to shoot. They are disposed to be insubordinate and obstreperous, and will not be taught good behavior, notwithstanding he uses the rod without stint. The teacher, being a delicate man, in his efforts to subdue the refractory spirits completely exhausted himself, but being determined to have order in his school, and being too feeble to apply the remedy, adopted the novel mode of reaching the desired result by making each scholar whip the other, since which time better order has been maintained, and things have been progressing much better."

A LARGE RAFT.—One of the largest rafts of lumber that has entered Galena river this season is being received to-day by Barrows, Taylor & Co., from Chippawa Falls. It contains something more than six hundred thousand feet of sawed lumber, and the river is literally filled with the moving mass.—*Galena Gazette, March 20th.*

The road to ruin—The highway to Pompeii.

FINE HOMESTEAD IN NAPA.

By referring to our columns will be seen a fine Home in Napa for sale. This is indeed a very fine Estate, and is offered at a great Bargain. We would urge those who want a fine place to go and see it. It is pleasantly located, and can be made profitable. The owner will show the place, and explain its prospects of crops, etc.

Miscellaneous.

A PRINCELY RESIDENCE IN THE COUNTRY FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facia* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

AVERY TUBE WELL

COMPLETE FOR USE

THE TUBE WELL IS FORMED BY DRIVING prepared Iron Piping into the ground with a sledge. Although of comparatively recent invention, these Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well, all surface water, dirt etc. being excluded. The Tubing is coupled together in lengths of five or six feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Lift Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. ☞ For circulars, etc., address Postoffice Box, 17. UHRIG & DEWEY.
Office at 318, Pine street. 31-10.

Valuable Patents FOR SALE

We invite the attention of energetic Mechanics' to several very

VALUABLE INVENTIONS

for which we hold the

PATENT RIGHT

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a handsome re[turn] for labor and capital can be made from.

WARREN & CO.

BOUND VOLUMES FARMER

☞ Volumes of the "California Farmer" for The last EIGHT YEARS, uniformly bound, can be had at the Farmer Office at $3 per Volume.

These Eight Volumes contain more useful matter touchin the practical workings of Agriculture as adopted to California Culture than any Book or Books Extant, as they comprise hundreds of Experiments, Letters and Essays upon the Culture of Cotton, Rice, Coffee and Tobacco; Grapes, Strawberries, and all other Fruits, with the Culture of Hops, Castor Beans, Flax, Hemp, &c. and the Whole series of Essay of L. Prevost on Silk Culture, from early beginning.

This set of Volumes would be a Library of itself and invaluable to the Cultivator of the Soil.

Orders sent to Farmer Office will be promptly attended to

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance.* We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once a. our office, or addressing EDITOR FARMER

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

Is on the red cover of the package.

Depot, 320 Jackson Street,

Storekeeper and Wharfinger.
Or to I. FRIEDLANDER,
112 California street.

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento—either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

Corrected Weekly, by Editor Farmer.]

San Francisco, May 13

Our grain market is now at a low figure, precisely as we all along asserted it would be at and before the new crop came in.

There is still a large surplus of wheat on hand of the old crop, and prices still tending downwards.

From a careful scrutiny of the condition of other parts of our own country, the word *abundance* is written everywhere; and from all parts of Europe the prospect universally is good weather, and a prospect of large crops.

We notice in all the British colonies, in all the large Australian region, plenty of rain and promise of a bounteous harvest. Thus our own grain growers must be content with a *low price*, and the market rates of to day show this:

There may be many now who tell of the effect of the late hot weather upon the late sown crops, but this *does not effect* that which was sown in due season, and the *late crops, whatsoever their product may be*, is all gain. Even the cultivation of the land, and no crop, *will be a gain*. Croakers are about, but we still have ABUNDANCE.

Retail Prices in the Fruit Market.

The *Fruit market* shows what our *Strawberry* men are about, this is the "Strawberry Harvest," and the past *six days* has brought to our market not less than *One hundred tons of Strawberries*.

What a country for strawberries and cream! and think of it. Ten cents a quart for delicious strawberries, large as a small hen's egg; but this is a "Land of Fruit."

Cherries are coming in freely, and are selling at reasonable rates, but yet, compared with Eastern sales, would be esteemed high.

All other fruits are scarce, and nearly over, in fact it is the *order of Providence* to have one pass away while another shall take its place in due season—see rates below.

Apples, ₱ box	1 50	@	4 00

Retail Prices in the Vegetable Market.

(Brown & Arnold.)

Our Vegetable market was never in better condition; abundance of the very best is to be found at all our stands and can be had at very reasonable rates.

Vegetables and Fruit are largely consumed now, and many live entirely upon them in warm weather, this is the true *hygiene doctrine* for robust health; and far better than heavy diet.

20,000 NEWSPAPERS.

We have Twenty Thousand Newspapers—Newspapers of the largest size among our Exchanges, suitable for Wrapping Paper for Dry Goods, Clothing, etc.

—ALSO—

TEN THOUSAND

Of the best gricultural Papers known, comprising our various gricultural Exchanges from all the Eastern States and Europe. Farmers who would like valuable reading matter, which contain choice Essays and Letters on Agricultural matters, can have these at low rates by the 100. Apply at FARMER OFFICE.

NEW GRAINS AND GRASSES.

We ask special attention of all persons who have low meadow lands, or Tule lands redeemed, to the New Grains and Grass Seed received by the steamers.

As these are entire *New Varieties*, never before known here, it would be well to plant small lots in order to secure the seed for another year.

To those who can do so advantageously, and to some extent, *we will furnish Seed on liberal terms*. Apply at *Farmer Office*.

CRANBERRY PLANTS.

The Genuine *Bell Cranberry Plants*, just received by overland route, in the most perfect order, only a few days on the way.

This is now a grand chance for those who have "*Tule lands*," for if planted now, they will begin to yield the coming season. Apply at

FARMER OFFICE.

ECONOMY
WASHING MACHINE!

A new lot of the above named Machines, including all the latest improvements, are now ready for sale and can be sent to any part of the State.

Ninety-one (91) Machines are now in use in this County Township, where they were Invented, and still Manufactured.

Price of Machine, ... $25.

Letters directed to JOAB M. HORNER, Mission, San Jose, Alameda County, will receive prompt attention.

Traveling.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southhampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates as given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

May 8—COLORADO, Capt. W. H. Parker, connecting with ALASKA, Capt. Gray.

May 18—CONSTITUTION, Capt. Wm. H. Hudson, connecting with HENRY CHAUNCY, Capt. Conner.

May 29—GOLDEN CITY, Capt. Wm. F. Lapidge, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—If desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

oc1 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings. Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento or alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, Until further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9.50 A. M.; Reno at 4.20 P. M.; Wardsworth at 6.30 P. M. Winnemucca at 3.30 A. M.; Argenta at 8.50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12.05 P. M. Reno at 2.10 A. M. Colfax at 9.50 a. m. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6.30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermit, Silver City, Owyhee, and all points in Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages for White Pine, and Overland Stages for Salt Lake City and the Atlantic states.

C. CROCKER,
General Superintendent

A FINE COUNTRY RESIDENCE

A Farm of 100 acres of good land, well watered and fenced. 3 miles from Napa City. On it is a vineyard of 7,000 vines, five hundred being of foreign varieties; an orchard of, between five and six hundred fruit trees; a good new roomy house, tastefully planted about with ornamental trees and shrubs. Also, large barn stable, and other out-houses; with the above will go horses and harness, first-rate farm wagon, saddle and bridle, farming implements, gardening tools, poultry, contents of house, etc. The land, with exception of 15 acres, has not been broken up this season, and has a volunteer crops on it, which will make good hay, and is fine pasture now. If required, a portion of the purchase money could remain on mortgage at a low rate of interest.

PRICE OF ESTATE, $6.000

Persons wishing a very fine Estate, are invited to call on the undersigned, on the Premises, who will show them the Estate.

THOMAS SINCLAIR.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish *collections* of choice plants, can buy them in quantities at a very low rate, if they visit the *Gardens Corner of Mason and Pacific Street*, in this city, or address Editor Farmer.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLane's Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure u are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S
CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER and BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It has been our sincere wish that these Pills should be fairly and for tested, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the proper action of the Stomach, Bowels, Brain, and the whole Nervous System, should be vast and vital importance to human health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has so close connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal stain or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Menses, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three fourths of the diseases enumerated under the head of CONSUMPTION, have their rest in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, and complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts everything. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow their use. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are unequalled to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S
American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked. Hence even in cases of great violence, if a potent and rompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an arch or circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or frothy tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a craving sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently tinged with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough; cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual, providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten give a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by
FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLane's Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

CALIFORNIA FARMER AND JOURNAL OF USEFUL SCIENCES.

VOLUME XXXI. SAN FRANCISCO, CALIFORNIA: THURSDAY EVENING, MAY 20, 1869. NUMBER 17.

The California Farmer AND Journal of Useful Sciences.

PUBLISHED EVERY THURSDAY EVENING.

BY WARREN & CO.

Office—No 220 Clay street (up stairs), below Battery.

SAN FRANCISCO.

TERMS OF SUBSCRIPTION.

By mail, for one year, $5; for six months, $3. For a Club of five new subscribers, a sixth copy will be sent gratis. When payments are delayed six months $1 additional per year will be charged.

☞ City subscribers, delivered by carrier, 12½ cents a number or $6 a year in advance.

☞ Advertisements and Subscriptions must be paid for in advance. Payments in Gold or Silver.

☞ All letters on business connected with the office should be addressed to WARREN & Co. PUBLISHERS.

SAN FRANCISCO, Cal.

LIST OF AGENTS:

OUR SUBSCRIBERS can send money BY MAIL safely (Register at the Post-office, and the money will come direct and sure.)

WELLS, FARGO & Co., at all their Offices in this State.

POSTMASTERS, throughout the State are requested to act for us

THE CURRENCY.

There is now to be a serious controversy about our Currency. Already our Newspapers begin to agitate and ask the question:

Shall California hold on to her "Gold Currency" as the standard, or shall she fall into line and unite with all the other States of the Union, and establish Greenbacks as the medium of trade.

This Journal worked hard in the early days of the Greenbacks, to establish our National Currency, but we never advocated Repudiation or the violation of Contracts.

As this question must be met, and very soon, too, by reason of the immediate union we have made with the other States by means of the Pacific Railroad, we have placed on our first page the very interesting and valuable Speech of Hon. Cornelius Cole, our Senator in Congress, which shows the true condition of the obligations of the Nation, and why he advocated the strict fulfillment of obligations—Gold for Gold contracts, and Greenbacks for Greenbacks.

Senator Cole's Speech is worthy a careful perusal.

SENATOR COLE'S SPEECH

ON THE CURRENCY QUESTION.

MR. COLE said:

Mr. President: I cannot persuade myself even, at this late hour of the session to permit this bill to go to a vote without expressing my dissent to its provisions. I regret that it comes in for discussion so late in the session, for now its discussion must be attended with more or less restraint. I believe the second section of the bill is rendered entirely unnecessary by a recent decision of the Supreme Court. That decision, as I understand it, goes to the extent of sustaining a contract payable specifically in coin, a contract made prior to the rebellion, but the principle enunciated in that case I believe covers all other specific contracts, and is sufficient to sustain contracts made after the passage of the legal tender-law as well as contracts made prior to that, and it will cover all cases of specific contracts which may be made hereafter. If I am correct in this there certainly can be no necessity for the passage of the second section of the bill for any purpose of authorizing specific contracts in coin. But it is alleged that the passage of this section is desired for the purpose of restricting the operation of this decision of the Supreme Court. If so, I am equally opposed to it.

I am also opposed to the first section of the bill which declares that the faith of the United States is solemnly pledged to the payment in coin or its equivalent of all the obligations of the United States except in the cases where the law authorizing the issue of any of said obligations has expressly provided that the same may be paid in lawful money or other currency than gold or silver. This proposition was before the Senate over a year ago, and was then very fully discussed. Since that time until these last hours of the session it has been permitted to rest upon your table, and is now brought up, as I believe, without adequate opportunity for its discussion.

The Senator from Vermont [Mr. Edmunds] this afternoon congratulated the country on the advances made toward sustaining the honor and good faith of the country. It seems to me his congratulations would have been more applicable had it been directed to the bondholders for their advances upon the interests of the tax-payers, of the aggressions of the creditors of the country over the labor and industry of the country.

We are told by the chairman of the Finance Committee that it is only intended as a declaration of policy; but what are we to understand by this? Is it to be merely a vain and empty declaration of policy, or is it to be a solemn act of Congress, a declaration of law, which is to be binding upon us? It seems to me the latter will be its force and effect if it passes.

Perhaps it is well that this question should be disposed of without further delay, in order that the people may know with some degree of certainty the weight of burden upon them. If they really owe the whole $2,556,000,000 in gold coin, as the passage of this section will indicate, or the equivalent of that sum in currency, amounting at the present rate to about thirty-three hundred and fifty millions, the sooner it is proclaimed the better. It can be of no advantage to the people to fondle a delusion, however pleasant, which must finally cost them hundreds of millions. It is customary to speak of the national debt as about two and a half billions, but if we owe the whole of this $2,500,000,000 in gold dollars we actually owe about three and a third billions, as we usually estimate money.

If, as is alleged, it will improve our credit to put forth the statement that our national debt is three and one third billions, I am sure there is no rule by which that proposition can be demonstrated, and the result must depend upon a trial for its proof. I believe the hope is father to the opinion and the latter a most illegitimate production.

With an acknowledged indebtedness of $2,500,000,000, honored in all respects according to the strict letter of the obligation, our securities are worth less than seventy-five cents on the dollar, can it be said that by largely increasing the indebtedness, as this proposition virtually does, our credit will be improved? However clear this may seem to the bondholder it has not yet been made so to the debtor. The people will never take that view of the case. An insolvent whose available assets are unequal to his obligations, and whose credit in consequence is below par would not expect a favorable result from a similar transaction. It would take a long time for him to reestablish his credit by the process of adding voluntarily to his indebtedness. If unfortunately one is unable to meet his currency obligations he cannot improve his credit by acknowledging the indebtedness to be upon the basis of coin and by binding himself to pay all in gold. Such a step on the part of a person or firm would be regarded as rash in the extreme, and instead of improving would work an utter destruction of credit.

What is to be gained by the adoption of this proposition? It will not of itself pay a dollar of our obligations even in greenbacks, much less in gold. It will not dispense with a single exaction. The tax-gatherer will come as before and be not a whit less extortionate.

An admitted indebtedness of $3,400,000,000 will afford a better pretext, if one shall be wanting, for demanding a large percentage on your small salary and mine. It will furnish a strong argument for increasing taxes and tariffs, which are already too high. The debtor class, the people, the labor of the country, which after all has to pay the debt, would repel this monstrous proposition at once could they be heard. The people do not nor have they ever asked by petition or otherwise for the adoption of the principle embodied in this bill, and their creditors have no shadow of right to demand it. The form and substance of the bonds are prescribed by the public laws, and in accordance with them interest is paid regularly in gold. Let their holders be content with what is nominated in their favor, lest popular impatience should eventually require the utmost exactness in taking the pound of flesh.

It is not easy to devine the real object of this proposition. The debt is either payable in gold or is it not. If it is payable in gold as the law now stands then there can be no necessity for its passage. It would only be a vain repetition of an existing fact, and any number of reiterations would not alter it. But if, on the other hand, a large portion of our debt is not payable with gold dollars it would be great injustice to the debtors to declare it so payable while any description of lawful money bears a less value, dollar for dollar, than gold. Suppose my note is in bank for $1,000; if the banker can exact of me its payment in gold, the gold being at thirty-five per cent premium, my debt is actually $1,350, and my banker would not relieve my anxiety nor improve my ability to pay by graciously informing me that it is not due till some time hence. Such a demand, if it could ever be enforced, would tend to impair rather than improve my credit, and no sophistry could prevent that result.

Is it in a spirit of braggadocia that this declaration is sought to be enacted? Is our contempt of a burden of $2,556,000,000 so great that we ought voluntarily to shoulder about seven hundred millions more? Can we prove our ability to pay $2,556,000,000 by voluntarily, or at the dictation of our creditors, adding largely to it? To suppose so is to forget entirely that the present amount, mostly due as it is in a medium easiest to raise, weighs down our credit to a deplorable degree.

I am not unmindful of the indignation, assumed or otherwise, which bondholders manifest toward those who, like myself, believe that it is not unfair to pay in kind, if of equal or greater value, this borrowed money, and that the creditor has no right to demand coin for his greenbacks unless the contract calls for coin or unless we are paying coin when they become due; but at the same time I will not forget that the people, the many, have rights no less sacred than the fortunate few.

The $283,000,000 of 1881 bonds ought to be and unquestionably will be paid in gold, as they were mostly purchased with that commodity. In like manner the $221,000,000 of ten-forty bonds must be paid every cent in coin; for upon those terms the loan was made. But what justice or equity demands that the five-twenty securities should be paid in a different medium from that with which they were purchased, especially if that medium possessed a value far greater than it had at the date of purchase? All this loud talk about the dishonor of a refusal to respond to this extraordinary demand of the bondholder shall pass by me as the idle wind. Repudiator is one of the commonest appellations indulged in against the opponents of this measure; but that name is equally applicable to him who refuses his purse to the footpad.

I have already said that if the five-twenty bonds were really payable, as this bill attempts to declare, in coin, or its equivalent, there could be no necessity for its passage; but the very fact that the measure is brought forward is a palpable confession of the truth that they are not so payable. The letter and spirit of the law are in harmony; and these bonds should be discharged, like the ordinary and multifarious obligations of the country, in any lawful money—in gold if we are paying gold when they must be paid, and if not, then not. Should business reach a specie standard before these bonds become due, of which there is some hope provided we do not rashly forfeit our credit, as is now proposed, the holders of them would have nothing either to complain of or deplore, for they would be paid in current gold dollars. But here we are met with the statement that we are soon to reach specie payments in spite of events, and that the five-twenty bonds will in that case be paid in coin, and the passage of this bill therefore can do no harm. The fallacy of such a position is easily exposed. If we could arrive at a gold basis without much delay, and notwithstanding this proposed action the statement would possess considerable force. But some calculation is admissible to determine the effect of adding this $700,000,000 to our acknowledged indebtedness.

Before the war, when we owed but a few millions, not more than fifty or sixty, United States bonds commanded a premium of fifteen or twenty per cent; but when that indebtedness is run up to $2,556,000,000, they are thirty-five per cent below par. If it were increased to $3,300,000,000, they must go still lower, and we should be fortunate if we escaped financial ruin like that which overtook this Republic at an earlier period of its history.—It may have escaped the attention of some who ought to remember the historical fact that millions upon millions of the old continental or sage-leaf money became utterly worthless, and very many citizens who had exchanged their property, the produce of their farms and workshops, for it was utterly ruined. It is true that as a nation we were then weak and poor, and, boasting aside, we are comparatively so still, certainly poor if we may judge from the rate our securities bear in the markets of the world. Our population was then four millions, it is now ten times that number; but if I mistake not our debt is nearly as large in proportion to population as that which our forefathers neglected to pay.

But we are told our resources are inexhaustible and much calculation is made upon a great unborn population and boundless wealth yet undeveloped. A ready response to this is furnished in the fact that our ancestors had all the undeveloped wealth of the new world, all that has since been developed and all that will be forever hereafter, and still they flatly repudiated.

We expect to discharge our debt in full, principal and interest, down to the last cent, but it may be well to suggest to the creditor before hundreds of millions are unnecessarily added to our burdens that our fathers survived the death of the continental money, and the action of Washington and his compeers in this regard is not even remembered against them.

The persistent effort of the bondholders to carry their point by appeals to our fears and false pride may eventually succeed, but a victory gained by such device would be no less dishonorable than the worst form of repudiation, and in my judgement far from advantageous to those who are urging it. It may result in utter discouragement of the people.

It was a great mistake in the first place to make the interest on any portion of the public debt payable in coin. The object was to tempt the cupidity of money-lenders, and it succeeded admirably; but it was a most unfortunate step for the Government. Better to have resorted to more stringent taxation, or even to forced loans, than to have submitted to this exaction. Capitalists were more interested in the suppression of the rebellion than any other class of people, and their property should have been required to contribute to its overthrow without any extraordinary inducement such as gold interest or high premiums upon loans. The consent of the drafted man to render his service was never asked; he was compelled to march and to fight, and the capital of the wealthy is not more sacred than the life or limb of the poor. If "it is sweet and becoming to die for one's country," it ought to be equally agreeable to surrender a portion of one's property for the common safety.—There was really no overwhelming necessity for this promise to pay interest in coin, and had half its evil results been foreseen it would never have been made. About the only public advantage I am able to see in that provision is found in the fact that it prevents the exportation of an amount of coin sufficient for that use. It is but poorly disguised, even by the able and ingenious arguments of Senators, that by far the greater portion of the coin that was in the country before the war has gone abroad, and the principal obstacle in the way of getting back to specie payments will prove to be the want of specie itself.

An unintentional confession of the need of coin in the country before its use can be resumed appears in the persistent effort of its advocates to show that a large amount is already in the country, whereas, in fact, the amount is extremely limited. One hundred million dollars—a little more or less—are in the Treasury, but not nearly as much beside, in my judgement, in the country all told. But for this requirement of coin to pay interest there would have been no necessity for even this $100,000,000 which revolves over and over in connection with the Treasury, and that, too, would have sought a foreign market. This solitary advantage, however, weighs but lightly in the balance against the disadvantages to the country from that source. The obligation to pay interest in coin presents a strong inducement for the holders of securities to depreciate their value. It is too plain to need more than the bare assertion that the lower the price of such bonds the higher will be the yield of interest on the capital invested in them. Six per cent gold interest on a bond at par is equal to twelve per cent when the bond is worth only fifty cents on the dollar, and nine per cent when it is worth but seventy-five cents on the dollar. The holder of securities bearing gold interest therefore has a powerful incentive to decry their value in the market. He puts money in his pocket precisely in proportion as he injures the public credit.

It is impossible to tell to what precise extent men are governed by their own interests, and equally impossible to prove that the extremely low price of United States bonds all along is attributable to this cause; but I cannot withhold the belief that it has had very much to do with depressing their value. That the bondholders have it in their power to affect the public credit at any time few will deny; and the only question to consider is whether or not their interests would lead them in that direction. The reduced rates of our securities in the markets of America and Europe is a profound mystery if it cannot be ascribed to this influence. The United States six per cent securities are hardly second to the best in the world, and ought to command a large premium; but the German banker, with an outlay of $75,000, draws his six per cent gold interest semi-annually on $100,000, which is equivalent to nine per cent on his capital. He at least can have no motive in building up our credit while more bonds can be purchased. By reducing it he adds to his capital and his income.

Suppose the bonds were silent as to the kind of interest to be paid, and the interest were discharged regularly in current money the same as all other obligations of the Government, the case would then be precisely the reverse. It would then stand the creditor in hand to build up the public faith. He would gain in that case by the enhanced value of the money he received as interest, and every detraction from the credit of the Government would result directly in loss to each and every bondholder.

Further argument upon this head seems superfluous, and I hasten to notice the disadvantages of recognizing a distinction between coin and the Government currency. But when this distinction is so clearly acknowledged by the Government itself as it is in paying all its ordinary obligations in paper and interest on the public debt alone in coin, the people individually cannot avoid discussing it, and comparisons are often drawn unfavorable to the public credit. This leads to frequent disparagement of the Government securities, and it turns out that these paper promises are a much better representative of the public credit than of dollars. The reputation of a Government, like that of an individual, for solvency is impaired by being much questioned.

We have long been hoping that by some means we might succeed in funding our national debt into a security bearing a less rate of interest.—Plans for that end have been introduced almost without number, and the committee that reports this bill have brought forward at least one plan during this session for the funding of the public debt. But pass the bill and you will have reached the end of the question of funding the public debt. It will be utterly impossible to effect loans at a less rate of interest than that which these bonds which are already issued bear. When we agree to pay the principal and interest in gold, interest at six per cent, who will be induced by any motive you can present to take a bond at a less rate of interest? No one. The suggestion is absurd. The debt will not again be funded.

It will be remembered that the public debt affords an opportunity for a very large proportion of the capital of the country to escape taxation entirely, and as a consequence the burdens of taxation fall the heavier on the remaining property.—The interest on the public debt, therefore, should be no higher than the ordinary net profits on prudently conducted business. It should in no case exceed the clear income upon money otherwise invested and subject to taxation, which, as a rule, falls far below six per cent.

Every inducement presented to capital to evade active employment is a disadvantage to the public. Its tendency is to stifle industry and retard the increase of fixed capital. And from this cause possibly it may turn out that too high an interest is disadvantageous in the long run, not only to the producing classes, but to the bondholders themselves. The best rule for all is to pay regard to the interests of all—the poor as well as the rich, to labor as well as capital, to the unfortunate as well as the fortunate. I fear the tendency of much of our legislation is to make the rich richer and the poor poorer. This is not an unnatural result of the great calamity of civil war and the creation of a large creditor class in the Republic. The rich and powerful are always vigilant and active, while the poor, intent alone upon their own subsistence, are apt to overlook their rights.

But the eternal principles of justice can never be violated with impunity. While we render unto Cæsar the things that are Cæsar's the more humble citizen must not be neglected or forgotten.

GO TO SLEEP EARLY.

Many children, instead of being plump and fresh as a peach, are as withered and wrinkled as last year's apples, because they do not sleep enough. Some physicians think that the bones grow only during sleep. This I cannot say certainly, but I do know that those little folks who sit up late nights are usually nervous, weak, small and sickly. The reason you need more sleep than your parents is because you have to grow and they do not. They can use up the food they eat in thinking, talking and working, while you should save some of yours for growing. You ought to sleep a great deal; if you do not you will in activity consume all you eat, and have none, or not enough to grow with.

Very few smart children excel, or even equal, other people when they grow up. Why is this? Because their heads, if not their bodies, are kept too busy; so that they cannot sleep, rest, and grow strong in body and brain. Now, when your mother says Susie or Georgie, or whatever your name may be, it is time to go to bed, do not worry her by begging to sit up "just a little longer." But hurry off to your chamber, remembering that you have a great deal of sleeping and growing to do to make you a healthy, happy, useful man or woman.

The above important truths we clip from the *Rural New Yorker*, and hope that Parents will read these truths carefully.

When we look around us, in many families we see the blighting effects of late hours of little children. How many young and beautiful girls grow prematurely old, putting on a woman's face at ten and twelve years, but unnatural, and losing all that smart and healthful look that belongs to the child.

We do not wonder that our *Mortuary Report* shows the death mark at more than one-third young children; and when we see lads and Misses of ten and twelve years roaming about our streets till ten and eleven o'clock at night, and violating all the *laws of life*, we only wonder that any of them live.

There is a terrible and criminal neglect on the part of Parents in this respect, and in the great day of accounts, we believe that many Parents will be called to account for the lives of their children sacrificed to their own neglect.

Festival Season.—The Young Men's Christian Association have been holding their "Floral Festival" the present week, which have been quite interesting, and have been largely attended, with good pecuniary results for their Treasury.

Agriculture.

SHEEP.

[The following most excellent Report on Sheep comes from Marthas Vineyard, Massachusetts, and is published in the Agricultural Reports of that State. As it contains so much that is practically valuable, we give it entire.—Ed. Farmer.]

In the rearing of sheep, as in all other branches of husbandry, the farmer has an especial regard to profit. It is true there are instances where we find fancy farmers paying fancy prices for fancy stock, without having regard to the question of profit and loss, and who, when the balance is found to be on the wrong side, will cheerfully put their hands in their pockets and square the account. But with the class of farmers before whom this report is likely to come, the great idea to be discussed is, How shall sheep husbandry be made the most profitable? In discussing this we will first take into consideration the local conditions which have a direct or an indirect bearing upon the subject. First, proximity to a market. Upon this will, in a great measure, be determined the relative value to the farmer of the strictly mutton sheep, which gives a large per cent of carcase in excess of wool, or the more strictly wool sheep, which gives a large per cent of wool in excess of carcase. The farmer who can in a few hours place his fat sheep and lambs in a good market, with the chance of a ready sale, may, no doubt, with profit rear that breed of sheep which will give him the most mutton. Another important condition which affects this view of the case is the character of the farmer's feed, or the capacity of his lands for raising fat mutton. If his feed is not abundant and sweet he need not attempt the producing of fat mutton as a specialty. This condition of feed is also essential in the propagation of the larger breeds of sheep; for large, heavy-feeding animals, kept for a few generations on light, poor pastures, will soon deteriorate, and each successive generation will fall below the preceding, until the stock will show but few points of resemblance to the original.

But it may not be profitable to lengthen this report by considering conditions which do not, as a general rule, exist with the farmers within the limits of this society. We are not in close proximity to a market, and our feed is not very abundant, although what we have is sweet.

Without question the grand idea with our farmers is, From what breed of sheep can we get the most wool, and at the greatest profit on the money and labor expended?

If we were to examine this question at length, and discuss all its various points, we should overstep the proper limits of a report. We will casually glance at only a few leading ideas. Our society in its offers of awards and premiums recognizes only two classes of sheep, the long-woolled and the fine-woolled—the long-woolled including the Cotswold, Leicester, and their grades, and natives; the fine-woolled including the Merinoes and Southdowns, with their grades. The natives not being a distinct breed, we will leave them out in our remarks which are to follow. In the four breeds named we have the four leading breeds of sheep to be found in New England, if not in the country. It is not our purpose to institute close comparisons between these truly excellent breeds of sheep, but simply give a few ideas gathered from observation, and what information we have been able to obtain. The pure Merino is emphatically a fine woolled sheep, yielding a large fleece of heavy wool, and the farmer who shears a flock of this breed of sheep can boast of a large product of wool in weight. But in this wool we find a large amount of foreign substance, which disappears on the application of the soap and warm water, leaving a proportionate small amount of clean wool for the manufacturer. It is a well-known fact that so long as fine woollen goods continue to be worn so must fine wool find a market; but it is also a well-established fact that dealers in wool begin to look with care and suspicion upon the heavy, soggy fleeces of pure-blood Merino wool, and ask that a reasonable discount shall be made for dirt.

Our farmers are doubtless honest in their endeavors to rid their Merino fleeces of their yolk and grease by a careful washing of their sheep in cold water; but the yolk and grease of Merino wool do not readily start in cold water. That an enormous weight of fleece has in many instances been taken from Merino sheep none who are acquainted with the facts will deny. Instances of eighteen pounds to the fleece are by no means rare, if we are to credit the published reports of the yield of some small choice flocks; and if this wool can be sold at one-fourth more price than can be obtained for the common grades, then, at first view, this is the breed to which our farmers should turn their attention. But there are drawbacks to rearing this breed of sheep which must be taken into the account. As a breed, their young are very tender, and it is only with the greatest care and pains that they can be reared; and the dams yielding but a very small quantity of milk at first, for the sustenance of their young, renders it still more difficult. A former delegate of this society was in the habit of keeping watch over his flocks almost constantly, day and night, during the time they were dropping their lambs, and as soon as a lamb was born taking it from the mother and nursing it by a fire, kept in his barn for the purpose, and feeding it upon warm milk, and in this way succeeded in rearing most of his lambs. We think if those lambs had been exposed to the keen winds and pitiless storms to which we have seen young and tender lambs exposed, but few of them would have survived.

Of the Southdowns we can only say that they are generally hardy, yet their fleeces, so far as we have seen, are not proportionate to their bodies; and being truly a mutton sheep, they have not, with us, shown those points of excellence for which this breed is so justly celebrated in more favorable localities. They have never, so far as we have observed, shown the large saddle, such as may be seen gracing the stalls in Faneuil Hall Market.

With reference to the long-woolled sheep, we have found the Cotswold to be an excellent breed, standing the rigors of our climate remarkably well, and yielding a large fleece of good clear wool, coarse in texture, and strong in fibre. The lambs of this breed are easily reared. It is true we have seen but few of the pure blood, as nearly all we have known of them have been crosses with either the natives or Merinos. Our experience with the Leicester has been limited, but our observation has shown us that they are hardy, and their lambs easily reared, and when mature yield a large fleece of light, open wool, of longer staple than the Cotswold. The latter breeds have more carcase than either the Merino or Southdown.

We have thus sketched briefly the four leading breeds of sheep found in our country, and will now offer a few suggestions in relation to wool.

For years back, up to the time of the war of the rebellion, fine wool was *the* wool in the market.—During the war the demand for coarse army goods called for a coarse grade of wool of long staple, and from all the lots coming into the hands of dealers the fleeces possessing these qualities were carefully selected, and a high price obtained for them. At the same time, the demand for the finest grades was good, but the demand for the medium grades was not so good. The two extremes, the long coarse, and the fine, commanded the highest prices. Since the close of the war a demand for another grade of wool has gained the attention of dealers.

For many years the manufacture of worsted goods was principally carried on in Europe, and no attempt was made in this country, or only to a limited extent, to produce goods of this kind.—Recently factories for the manufacture of worsted goods have sprung up in different parts of the country, creating a demand for combing wools, and at the present time these are the wools which command the highest prices. The chief characteristics of these wools are a long, moderately fine staple, of strong fibre. To the production of these wools would we call the attention of our farmers, as answering the question first proposed, viz:—From what breed of sheep can we get the most wool, and at the greatest profit on the money and labor expended? With the breeds of sheep we have already named, with our climate and soil, we have the elements necessary to raising the most valuable grade of wool. We suggest that our farmers cross the Merino and Leicester, or the Merino and Cotswold, and by the admixture of these breeds get the open, long, coarse staple of the one, thickened and made finer by the fine, close staple of the other, and thereby produce the true combing wool. And let our farmers be agreed upon this one point, and let the bulk of the wool in the county be of this desirable grade, and the county will be as justly celebrated for the production of the most valuable wool grown, as it now is for the cleanness and beauty of that which it now produces. It has been claimed by some that sheep of such opposite characters as the Cotswold and the Merino do not produce a good stock when crossed; but our observation has led us to believe the contrary of this to be true, for the finest buck we have ever seen in this county was from just such a cross, and we have seen numerous instances where such a cross has produced excellent sheep. Beyond the enhanced value of the wool we have a hardy race of sheep, which stands the rigors of our climate well, does well on our feed, and rears its young without trouble.

We remarked that our farmers should be agreed upon this subject. This concert of action will appear important when we consider that the individual lots of wool in our county are small, and when a dealer makes a price he must make it to correspond with the value of the average of the wool produced, and if the bulk of the wool was of the staple suitable for combing purposes the price would be for combing wool. If one party raise fifty pounds of combing wool, and all the others raise the medium grades, the dealer will hardly recognize so small a quantity; but let our farmers turn their attention in this direction, and the dealer expects to get a superior grade of wool and pay a price accordingly.

We might offer some suggestions in relation to the care of sheep; but we leave this part of the subject, trusting that our farmers have long since learned the difference in profit of properly caring for and feeding their sheep in winter, and letting them eke out a miserable existence cropping the dead grass of our old fields, and finding a shelter from the wintry blasts under the lee-side of a stone wall.

For the Committee,
Daniel A. Cleaveland.

—Would not Mr. Fish be more in his element if he were Secretary of the Navy?

—A lock of hair from a young woman's head is often a key to a young man's heart.

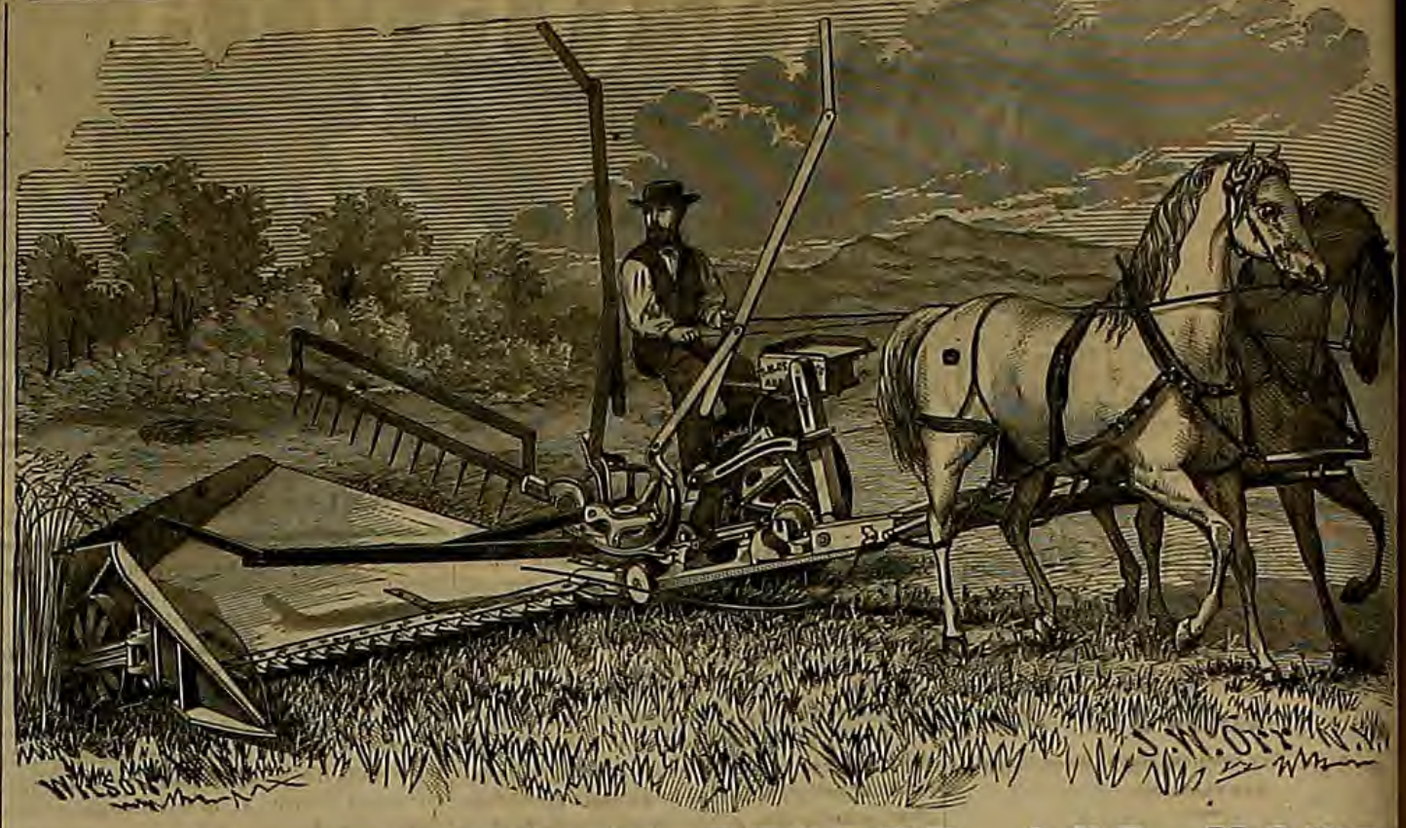
Country Homes Wanted

There is wanted at this time, several **Homes in the Country**, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will buy them if they communicate with this office immediately

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Addres the FARMER OFFICE.



KIRBY'S COMBINED REAPER AND MOWER

WITH COMBINED SELF-RAKE AND REEL

TWO COMBINATIONS IN ONE MACHINE.

This is the only TRULY COMBINED MACHINE in the world. While many machines PROFESS to be Combined, and some of them are very good Mowers, there very good Reapers, there are none that Combine both qualities like the KIRBY, and work in either capacity as well as if designed for no other purpose. The

"MONITOR"

Self Raking Attachment IS THE MOST PERFECT THING IN THAT LINE EVER INVENTED.

It is COMPLETELY SUCCESSFUL in any or all conditions of Grain, either Heavy, Light or LODGED, or in the heaviest Mustard; as over a Hundred Farmers the Pacific Coast, who are successfully using them this year, can testify.

The Kirby can cut the largest Mustard without any trouble, and rake it off also, if necessary.

We shall keep a large supply of EXTRAS of all kinds on hand.

The working of the "MONITOR" is so complete, that the closest scrutiny cannot discover that the team works any harder when it is taking off the heaviest In fact, it is easier for the team to run the KIRBY COMBINED REAPER with the "Monitor" Self-Rake on it, than it is to carry a man to rake off, and the are left in much better shape for the binder; so much so, that many claim that it saves the work of one binder, to say nothing of the difference in scattering the grain

By a device lately invented, the size of the gavels can be regulated at the will of the driver, according as the grain stands heavy or light; it consists of a treadle operates on one of the ways of the Rake-arm, so that the Rake can be thrown and pass over the grain until a gavel of the right size is collected upon the platform then the Rake, of its own accord, will sweep it off.

This machine can be set to cut at any desired height from the ground, from two to eighteen inches, by merely changing two bolts, one in the grain-wheel slide, the n the axle-plate, where the joint or independent action is obtained.

This machine never had an equal in heavy lodged grain or grass, as it is in such cutting that it shows its superiority to the best advantage.

TREADWELL & CO.,

Sole Agents for the Pacific Coast.

TRUE'S

IMPROVED

POTATO PLANTER.

This is, undoubtedly, one o the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

Horticulture.

CRANBERRY CULTURE.

There are large quantities of land all over our country that will grow large crops of fruit, that are now comparatively worthless—too wet and cold for grass. Other localities, that would produce grass, but the subsoil is quite wet throughout the year, ten or twelve inches below the surface—where also good crops of corn or other grains would flourish. The preparation of the ground of the latter description will not be so great as the former. If such soil is of a rather light nature, a plough can be used and the ground thoroughly prepared; after which the plants can be set out. If the lot is extensive, it is better to plant the vines two feet or more apart, so as to cultivate between them, which always needs to be done, in order to keep out the weeds for two or three years, after which the vines will cover the ground and mostly take care of themselves; often yielding, after two years, from one hundred and fifty to two hundred and fifty bushels per acre. Where small lots are planted out, they would cover the ground much sooner by placing the vines only one foot apart. If the soil is heavy, three or four inches of sand (sea sand is best) should be carted on the surface and the whole made level. The plants should in all cases be set four or five inches below the surface of the soil, as they take root from the stem; they can safely be set deeper than many other plants, and as they thrive mostly on air and water, the deeper they are set out, the most likely they are to live. The vines may be planted out as late as June.

In regard to the land that is wet and spongy, it should be drained, and the surplus water left about ten or twelve inches below the surface. The ground can be leveled, and the more thoroughly it is prepared the more successful will be the culture. Should sand be covered over the ground to the depth of three to five inches, in order to keep the surface loose, and to prevent foul grass and weeds from choking the plants, and it is much easier to keep them clean afterwards.

As to flowing the land, which has been thought indespensable to success, it is not necessary; but where it can be done without inconvenience or great expense; it will tend to keep the plants back until the late frosts are over, which often destroy the crop; it will also aid them sometimes during the summer droughts, at the time the berries are forming. Still it is not absolutely necessary, and that is a question of some importance to know.—*Magazine of Horticulture.*

OVERSTOCKING THE FRUIT MARKET.

The small fruit growers of New Jersey, although having the promise, from present appearances, of a bountiful stock of strawberries, raspberries and blackberries; do not feel very sanguine in regard to the profitableness of small fruit cultivation: their impression being, that the market will be overstocked, and that as a consequence, remunerative prices cannot be obtained. This is only what was to have been anticipated. It is but a few years, since the special adaption of the soil and climate of New Jersey to small fruit culture, became generally known. No sooner was the fact widely announced, than thousands of persons, eager to reap a portion of the rich harvest which which had been so easily gathered by a few enterprising pioneers, rushed into the field, each confidant of being able to realize a fortune in a season or two. What added to the excitement and delusion, was the publication and wide dissemination of several attractively written books, the authors of which, without that scrupulous regard for the truth which should characterize volumes intended for public benefit—drew grossly exaggerated pictures, thereby misleading a great many credulous persons.

Our horticultural friends in New Jersey have at length been awakened to the fact, that small fruit growing is nothing more nor less than a legitimate business; which, if properly followed, will always yield fair, remunerative returns. In exceptional cases it may take a speculative form, but the plain truth of the matter is: that, like farmers, fruit growers must content themselves with moderate profits.

The idea of overstocking the market, is a very absurd one—at least with the present quantity of small fruits grown. The people of the United States have not yet been fully educated in regard to the healthfulness of fruit diet. Ten times greater quantity of fruit is consumed to day by the people of large cities, than was the case ten years ago; and this consumption will increase in precise ratio with the price at which fruit can be obtained. So soon as the masses of the people are satisfied that fruit is cheaper than meat, so soon will they use it as habitually as they now do meat. But that point has not yet been reached, although we are gradually approximating to it. Small fruit growers must abandon the idea that a fortune is to be made from a single acre, or from ten acres. They must content themselves with such profits as are made by cultivators of general farm crops. They must bring to bear upon upon their cultivation, all the latest appliances and discoveries of art and science. When this is accomplished they will be certain to find a ready market for all they can produce, and secure prices which—if not equal to the almost fabulous ones from time to time reported in the newspapers—will at least enable them to realize a fair living profit, which is all they can reasonably expect.—*Journal of the Farm.*

GRAPE SALES IN NEW YORK.

Moore's *Rural New Yorker*, of 2d inst., contains an exceedingly interesting review of the New York City Grape Market for 1868, from which we copy so much as relates to Southern Grapes:

The first arrivals in our market were sent from South Carolina, and at an earlier date than former years; but the fruit was so poor that it sold at the mere cost of transportation. These were Catawbas; and, packed in the octagon quart berry boxes, they arrived early in July. A few days later another lot was received from the same State, grown on the Derby farm, which were a fair article of grapes. Arriving in good condition, they sold from 20 to 25 cents per pound; unfortunately they had been packed in a box that was not stiff enough to protect the fruit from bruising—yet, with this disadvantage, they gave good satisfaction: but they were not thoroughly ripe, according to the standard of Northern fruit growers.

On July 29, a few more Catawbas were received from Dr. Vampill, S. C., arriving in good order; they sold at 25 cents per pound.

Aug. 22, some very good Hartford Prolifics were received from Southern Ohio, and sold at 20 cents per pound; and, on the same date, some Catawbas from another section of South Carolina, which sold at 15 cents per pound. This fruit was riper than any I had previously seen from that State; yet the stems had begun to turn black and the berries to drop from the stem, but fruit being scarce, it sold readily at the above price.

Aug. 27, there was an arrival of Concords from West Virginia, which sold at 18 cents per pound; and, on the 29th some Hartford Prolifics from Milford, Del., this latter place being a few miles further north than the former.

While speaking of Southern grapes, permit me to make a few remarks in regard to them. I find that although this fruit prospers while growing in the hot sun of the South, the intense heat of those months in which the grape ripens, is much against the fruit after picking: the heat causes them to rot very quickly after they are packed. Although they may look well before packing, during the transportation they become so damaged that if not sold the same day they arrive, it becomes so apparent on the next that it is almost impossible to dispose of them at a fair market price. The first effect, and least noticeable feature of this damage to the unitiated, is a dimming of the skin to a deadness that indicates a speedy decay, or the blackening of the stem and dropping of the berry, which is alike fatal to the sale of them. This dullness of the skin is followed by the juice oozing from the grape and standing on the skin for a short time, when they unite and wet the entire package, spoiling the fruit.

I had almost overlooked one variety of grapes grown in the South, and that is the Scuppernong. At the earnest request of several growers, I introduced them in our market, but they did not give satisfaction to our consumers. I had some of them packed in our best boxes, and sent them to prominent Agricultural writers, editors and dealers, but they would not take, and the bulk of this fruit was sold at a few cents per pound to the waggoners. This grape, in size, compares with the Northern Fox grape, and, while green, resembles it very much in color; but, when thoroughly ripe, they change to a clear and beautiful brown, spotted with a darker shade of the same, which gives them quite an attractive appearance. The skin is thick, and the pulp moderates down as it ripens to a mere sweet, spicy juice, which is quite pleasant to the taste. It is quite certain that, however palatable and popular this fruit may be in the South, it never will answer to send North to compete with the Northern grapes.

HENS.

After all that has been done for the improvement of fowls, not more than one-half of those who keep hens succeed in having them lay through the year. There are some who always do succeed, and of course reap large profits. What is the secret of success? It is neither difficult, or beyond the reach of every family who occupy a few rods of land. The hen-house need not be expensive, but should be so constructed as to be neither too hot in summer, nor too cold in winter. It should be washed with a mixture of lime and salt on the inside. Select the best breeds and put several kinds together; feed regularly, and let them always have sufficient clean water. They should have both animal and vegetable food, plenty of pounded mortar, brick, burned bones, etc. Bones not burned but pulverized make a most excellent food for laying hens. Give them peppers and pickles. They need acids to prevent their becoming too fat. Pickled peppers are better than cayenne. A slight seasoning of salt in their food is good. Sand or ashes should be provided for them to dust themselves in. If they wish to set, let them stand in a tub or barrel, with one or two inches of water, for a day or two. Above all, they should have regular attention every day. In this way, some do succeed in having their hens lay the year round. We should be glad to find more accomplishing the same thing; as it would contribute not only to the health of the family, but be of great advantage to the pocket.—*Mobile Register.*

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the article they have to sell is wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seeds, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

FRANCIS & VALENTINE

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,
(Of the firm of Hucks & Lambert.)
No. 708 Lombard street, North Beach.

VALUABLE PLANTS FOR SALE.

☞ **Persons who are desirous of securing a few** very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials o character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....MAY 20, 1869

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is TWO DOLLARS for five lines or less of space, in Nonpareil type, for *one* insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best edium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with his paragraph marked, may understand that it is sent to them for their examination hoping it will meet their approval nd induce them to subscribe, and ask their neighbors to do so Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of our *Journal*, to which we would direct their *special* attention.]

We call special attention to the articles on "Cranberry Culture.—"Grape Sales in New York" and "Overstocking the Fruit Market," these are worthy of the notice of our orchardists and fruit growers, for the markets of New York and all the great cities East are open for our fruit.

SILK CULTURE.—This week we give the important and interesting letters on Silk Culture, from the leading men in that branch of our States great Industry.

We shall give a notice of the progress of Silk Manufacturing, next week.

A DARK CLOUD.—We copy this sketch from Mrs. Henry Ward Beechers excellent magazine, "The Mother at Home," and most earnestly commend the reading of it to every mother who values the peace and happiness of her child.

EARNING A WIFE.—Here is a pretty sketch, which we commend to our young men—we say to them, "go and do likewise."

We place on our 135 page, the beautiful poem of L. E. Crane, which was written for the completion of the Pacific Railroad.

Acknowledgments.

Articles Received at the California Farmer Exhibition Rooms, No. 320 Clay Street.

We acknowledge the receipt of the Fourth annual Report of the American Dairymen's Association of N. Y., to which is added, the Annual Report of the Ohio Dairymen's Association; this composes the Reports of two of the largest and most important Dairy Districts in our country, the volume is about 150 pages, and contains a vast amount of practical information, of which we shall soon give particulars—thanks for the courtesy in sending us the valuable reports.

We have recieved the address on *Agricultural Education*, delivered before the N. Y. State Agricultural Society, by Andrew D. White Esq., President of the Cornell University; this is an admirable and most valuable address, and if possible we shall give the whole or part of it at an early day.—We return thanks for the copy.

We have the Report of the Sixth Industrial Exhibition of the *Mechanics Institute* of our City, held at the pavillion, from 8h of Aug. to the 12h of September last year—the report is an interesting one and neatly printed by the Women's Co-operative Print Association.

We acknowledge a copy of The Medical History of the Year 1868 in California, being an Essay read before the Sacramento Medical Society for improvement, by Dr. T. M. Logan. This is a very interesting essay; as all such papers are, which eminate from this accomplished M. D.

The American Etemologist. We are glad to notice the regular appearance of this admirable publication, it should be in all our libraries. Published by R. P. Studley & Co., St Louis Mo.

We have the Fifteenth Annual Report of the *Young Men's Christian Association*, which now shows this valuable Institution to be in a very prosperous condition, with its own Building, with a large membership, doing great good in our midst.

We have recieved the March and April numbers, of the Monthly Reports of the Department of Agriculture, containing the present condition of the Agriculture of the country.

Floral Guide.—We have recieved the Illustrated Floral Guide and Catalogue, of W. H. Lyman of Leverett, Mass., a very handsome and well illustrated work.

TRIUMPHANT COMPLETION OF THE PACIFIC RAILROAD

CELEBRATION AT SACR MENTO.

By reason of our crowded columns last week, we could not give all the minutiae of that happy Event which has been chronicled world-wide, the "Completion of the Pacific Railroad."

Sacramento already begins to feel the life blood stirring the heart-strings of business as the increased amount of Merchandize marked for *New York, Chicago, Boston, and Philadelphia*, now daily pass through that city.

The Celebration at Sacramento was a Joyous affair, composed of Eight Divisions, under the supervision of Gen. Josiah Howell as Chief Marshal, whose excellent arrangements caused the whole affair to be completed most happily.

As we published the most important features of the Event last week, we now can only add the Poem on page 135, and some data, to show who were early in the work of Railroad making.

PIONEER RAILROAD DIRECTORS.

The Sacramento *Bee* of the 7th, published the following as the Early Pioneers of Railroad Enterprises in California. As a matter of "History" It is all important and worthy of preservation.

WHO THEY WERE!—According to the files of the Secretary of State's office, it appears that the following were the Directors of the Sacramento Valley Railroad when it was originally incorporated, August 16, 1852: C. I. Hutchinson, Wm. McNulty, J. L. L. F. Warren, J. B. Patch, Julius Wetzlar, E. J. Willis, John Bigler, Wm. H. Watson, J. C. Zabriskie, Lewis B. Harris, Thomas B. Robb, and J. M. Freeman. And when reorganized October 25, 1853, the Directors were: Wm. M. Mc Nulty, C. I. Hutchinson, Julius Wetzlar, Wm. H. Watson, J. C. Zabriskie, Lewis B. Harris, C. L. Wilson, Jos. H. Nevett, W. Fern, L. W. Hooker, Addison Martin, and Henry Winkle. These men were the Railway Pioneers of California. Let them have due credit.

The annexed is from the *Commercial Herald* of our city, and this continues the sketch:

THE FIRST CALIFORNIA RAILROAD.—"The necessity for such action was fully comprehended as early as 1852, when the Sacramento Valley Railroad Company was organized with a nominal capital of $1,500,000. But, owing to the stringent provisions of the general railroad law, and other opposing causes, nothing further was done until the succeeeing Legislature modified the law in several important particulars. The company was then reorganized and the preliminary surveys made. At that time the following well known gentlemen were officers of the company: President, C. K. Garrison; Vice-President, W. T. Sherman; Directors, E. Jones, E. W. Burr, C. A. McNulty, J. A. McDougall, W. J. Pardee, Richard Chenery, A. W. McKee, C. L. Wilson, all of San Francisco; H. E. Robinson and W. H Watson, of Sacramento, and J. C. Fall, of Marysville. E. Jones was Treasurer, H. R. Payson, Secretary, T. D. Judah, Chief Engineer, and Robinson, Seymour &Co., Contractors."

As we were personally interested in the first enterprise, and remember it well, we design at early day to furnish some important items; for, at the organization of the first Board, the enterprise was esteemed a quixotic one by outsiders; yet the members of that first Board had some grit.

The meetings at all times were held at our Agricultural Hall, on J street. We remember our first trip with the other members from Sacramento to the Nine Mile House, above Marysville, which estate the Board purchased for the depot at about $6000. We have the *Photograph* of it now; and acting as we did, Secretary and Treasurer for a season, we have among the relics of the past, the *certificates*, notes, etc., of subscribers, which, by reason of the calamitive fire which devastated Sacramento in the November following, were never called for; and that enterprise fell with the ruins of Sacramento.

By the records now made, we see death has called among many of our co-workers of that early day—Peace to their memories—We then, ere another year, left Sacramento with others, and the new Legislature called into being another company, the records of which are, we suppose, in their keeping.

One thing is certain. If the fire and flood of the eventful year of 1852, brought loss upon many of that hour, the Railroad enterprise of *that Early Day*, though small in its begining, has had a most glorious result for our State, for which, as one who labored some little, and sacrificed *not a little*, rejoice to know at this day.

CELEBRATION AT SAN FRANCISCO.

We had no space last week to speak of the Grand Celebration in our City, which was indeed, most honorable to the Metropolitan City.

The Event was Celebrated by a general display of our Military and our Civic Associations, all under the admirable direction of Col. A. P. Stanford, Chief Marshal.

The Four Grand Divisions made a very splendid appearance. Orations, Poems, Dinners, etc. made the Event a happy one. The city was brilliantly illuminated in the evening.

Among the interesting events of the day, was the large turnout of the *Pioneers—the Founders of California.*

When this body of men returned to their Hall, the following Letter of Congratulation to the President and Directors of the Central Pacific Railroad, was presented by H. Kimball, Esq., read by the Chairman, and voted to be sent immediately to Sacramento, and published in daily papers.

LETTER OF CONGRATULATION.

The present is a most eventful period in the history of California, for we are about to celebrate the completion of the great Pacific Railroad, one of the most grand enterprizes ever achieved by man. This great work, in its conception, in carrying it forward, and in its completion, is *peculiarly* the work of *Pioneers*. The early advocates of it—those who wrote for it, spoke for it, worked for it—were *Pioneers*, and the present Board of Managers, the entire Executive Board, are *Pioneers*.

This great work is a Pioneer enterprize, and one *worthy* the Pioneer's devotion; and if there is any class of our citizens who should take the deepest and most earnest interest, and act a most conspicuous part in this Grand Celebration, it is the Pioneers of California, for they have always *pioneered* every great and good enterprize, from the earliest day of our State's history to the present time.

We, therefore, as the Society of Pioneers of San Francisco, should take immediate steps to send the warmest congratulations of *this Society* to the President and the Board of Managers of the Central Pacific Railroad, for their triumphant completion of this great and grand Highway.

Never in the history of the world has there ever been conceived such a grand enterprize, nor has there ever been accomplished such a work against such almost, and, we might say, such apparently insuperable obstacles; and this triumph, now about to be consummated, has only been brought about by that indomitable fortitude and heroism and that deathless energy which belongs peculiarly to the Pioneers of California.

At this present most auspicious event it is the imperative duty of Pioneers to take an active part, and their first duty is to Congratulate the President and Board of Directors, who have, amid such fearful obstacles, sustained themselves and brought about results that will soon be felt in our city and over this State with Electric power.

This is no ordinary event; its effect will be, to revolutionize almost all the enterprizes among us, by bringing us into close connection with, and almost in speaking distance with the Atlantic States, and also with the nations of Europe.

California holds the Keys to the Golden Gate of the Commerce of the world. 'Her hills and mountains are full of gold and silver;' 'her cattle are upon a thousand hills,' and her land 'is flowing with milk and honey.' It is a 'land of Perpetual Fruits.'

The present grand and successful achievement is but the fulfilment of a prophecy in the completion of 'a great highway across the desert.'

How many of our Pioneers there are now living in our midst who can recall their perils in 'Crossing the Plains;' their long, fearful and perilous journeyings of weary months, that now will be accomplished in less than one week, and that, too, across the very pathway of our early Pioneers? Some there may be here with us, while some near and dear ones have laid down to rest, to await our coming.

But the day of great things has come; the triumph is near at hand, even at our doors; and it is this great opportunity of performing a duty which should prompt the Pioneers of San Francisco to send a message of warm congratulation to those who have achieved this mighty triumph.

The work is completed, the work nobly done,
A nation has greeted a Victory won.
O'er the length of the grade, by the lightnings 'tis told,
'The last rail is laid, and spiked with our gold!'
Let peal upon peal, by the cannon's loud thunder,
The triumph now seal of the World's Greatest Wonder!
For o'er mountains of snow, tho' piled heaven high,
Our Railway shall go where the bold eagles fly.
Now let cannon and bell, in one grand chorus, meet,
And their Anthem shall tell that the Victory's complete.
Then due honor to men who have labored for years
This great victory to gain. Let us Honor "Pioneers!"

AID FOR THE SUFFERERS.

A most laudable and honorable effort, was made in our City on Monday evening last, by our Hebrew citizens in aid of the sufferers in Eastern Prussia.

A Concert and Ball was given at the Hall of the New California theatre, which was very largely attended by an earnest and happy audience.

The Concert was a most excellent one. The singers were Mrs. Northrop, whose sweet songs are ever most graciously encored; Mrs. Moore and Miss Emma Vero, (a new debutante) who sang with much grace and sweetness: Signor Carmini Morley sang also with his usual excellence.

The Instrumental music was by the Sisters Laemlin, whose most exquisite performances are always rapturously applauded, and whose superior excellence as artists, is being duly appreciated. We learn that these gifted artists, are soon to make a tour of the States and Europe, where we know they will be recieved with due honor as California Artists.

Signor M. Y. Ferrer, our esteemed Guitarist, performed with his usual extraordinary excellence.

The address for the occasion, was delivered by B. F. Peirotto Esq., was one of much interest, "The Modern Menorah," and elicited much applause. Professor Scott presided, and thus completed the Concertal part; which was all, most excellent.

The exercises were followed by a Ball, largely attended and richly enjoyed, (rather too crowded for comfort) and an excellent supper; these carried the company into the Wee Sma hours of the morning; but the results we are happy to learn, was a liberal addition to the former generous sum of over $7000, already raised for the sufferers. This is just like our Hebrew brothers, who are ever ready and liberal in every cause of Charity and Benevolence.

INSURE YOUR GRAIN CROPS.

The very large and widely extended area of our Grain fields now should lead all our Farmers to reflect upon the *Danger of Fire*, when these fields become nearly ripe and present their beautiful "Golden" look—for *this truth* should be impressed upon their minds: Fires in our Grain fields are now much more common than in former years.

Hunters, Smokers, and wandering Vagabonds, can soon prove, that however bright and Golden our crops may seem to the Farmer, and however well he may calculate upon the harvest of his crop and the Gold it will bring in to him, *one little spark* and all his hopes are *ashes*, and all is not Gold now, that was gleaming.

We desire to call the Special attention of our Grain Growers now, in season, to the great importance of Insuring their Grain fields against the danger of Fire. The *dry season*, and the time of *high winds* is near, and the danger is of sufficient importance to awaken attention to this subject, for unless the Farmer is so rich as that the loss of his crop will not inconvenience him, he should by all means *get Insured*.

We are led to these remarks by conversing with many grain growers who are thinking of these things, many feeling the great necessity of being Safe—and Safety is all important.

Farmers should remember that even out in the old States, the losses in Grain crops by Fire was most disastrous last year, and our danger here in this dry climate is vastly greater.

We have before us a Circular issued by the Pacific Insurance Company *last year*, to their agents over the Country, signifying that this Company are willing to *Insure standing crops of Grain against Fire*, and at very reasonable rates. They Insure, however, only where there is good reason to believe the Proprietors and men who reside on the place, are *prudent, careful and sober people*. They will *not Insure* against danger arising from *Bad Habits*—and this is right. Here is a Premium for Industry, proper management, Sobriety and good order.

This Company are not at all *anxious* to take these risks, but they stand ready to shield and protect all our good Farmers from these calamities.

Circulars with terms can be found at all the Agencies of the Pacific Insurance Company over this State.

Our Subscribers who call at our Office can get them. We sincerely trust this subject will not be lightly passed by, lest *Fire come to them*, and like the *theif in the night* rob them of their all.

One thing we know is certain; those that get Insured in this Company are Safe. It is a California Company, with ample capital, well managed, and losses promptly paid.

THE PEOPLE ARE COMING.

We have the evidences now daily before us that "*The People are Coming.*"

Already the names of very conspicuous personages *have* arrived on our Golden Shores.

We notice first, the Honored name of *Dorothy L. Dix*, one whose Name, Fame, and Works in the cause of *Humanity*, stands preeminently high on the roll of those whose lives are devoted to the Godlike work of Humanity.

Hon. I. S. Deibl formerly a Californian, but late consul to Batavia and more recently an extensive traveller in the Holy Land, has just returned and has been delivering lectures on Bible Lands, in the Churches in our city to large audiences; his lectures are of very great interest.

ALL HONOR TO SUCH LABORERS.

We have also the name of George Francis Train and Brick Pomeroy, men who in the Political world, and varied exciting topics of the day, are, and have been conspicuous; their name and fame will be tested in this world and by posterity by the value of their labors, and the benefit their works acheive for Humanity.

LAKE VINEYARD WINE CO.

We call special attention to the *New Advertisment* of this Company in our columns, this week. The House of Messrs. B. D. Wilson & Co., now The "Lake Vineyard Co.," are distinguished as Wine Merchants whose wines can be relied upon as the PURE CALIFORNIA WINES. Their name, fame and high reputation are now known in all the Eastern States and also in Europe.

This House make large shipments, constantly, and their wines bear very high reputation wherever known.

It is indeed worth while for any person who takes an interest in California wines to call at their immense Warehouse and see the wines there, and taste them too. *These wines praise themselves.*

VALUABLE ORCHARDS FOR SALE.

We would invite the special attention of capitalists to the *Two Very Exteusive Orchards* advertised in our Journal.

A ide from the large and certain income of these orchards yearly, the lands are certainly rising in value, and they must become a very profitable investment.

To any capitalist who has any knowledge of Fruits—any love of the business—here is a fine opening to make a great fortune in shipping Fruits over the Rail Road, East. We can give them important information on the subject.

State Normal School.—This Institution has been in session for many days, and with excellent results for the cause of Education.

We acknowledge complimentary cards for the Anniversary Exercises to be held *to-morrow* evening at "Platt's Hall."

Rain.—Quite a little shower of rain came as a refreshing this week, which however, has done no harm to our Hay crop, but much good to other growing crops extending widely over this State.

Rain at this season has been known before on several occasions, but by the appearance of the clouds, it must be more plentuous in the country than on the seaboard, and by all appearances we shall have more before the week is out.

Eastern Correspondence.

OUR N. Y. AGRICULTURAL CORRESPONDENT.

LETTER NUMBER TWO.

Editor California Farmer:—

NEW YORK, May 11th., 1869.

AMERICAN INLTITUTE FARMERS CLUB.—The regular weekly meeting of the American Institute Farmers Club, was held at Cooper Institute this afternoon: Alderman Ely in the chair. The attendance was large, many practical farmers being present. The various topics brought forward for consideration were discussed with great animation.

DEEP AND SHALLOW PLOUGHING.

John R. Walker of Dubuque Iowa, asked the opinion of the Club, in regard to the planting of pear trees and grape vines, also as to the effect of iron filings in the soil. Dr. Primle of Newark, N. J., said that the only use of iron in the soil was to impart a very fine color to the fruit, and referred to the superb tints of the peaches raised on Iron Mountain, Missouri. Mr. Bruen objected to the use of iron, preferring manure. He said the rich colors of fruits and flowers, were derived from the atmosphere and not the soil. [illegible] was made of hyacinths raised in a glass ample. J. W. Gregory spoke of blacksparks (cinders) as manure, and the rich imparted to pears by their use.

Mr. A. S. Fuller, speaking of deep ploughing said that the custom of filling holes with manure before planting, originated in Europe where there is much moisture, and has been handed down to us like many other superstitious ideas. The depth of ploughing should be determined by the character of the soil.

RAMIE PLANT.

A letter was read from Frank A. Fowler, California, asking for information in regard to the Ramie or Fabric Plant of Jara, and the means of obtaining cuttings and seeds.

Mr. Gregory said that a plant could be seen at the office of the Adams Express, consisting of twenty-four canes growing in one tub, the height of the canes being three or four feet. It was planted in Louisiana during the month of May, and in that State, could have attained the height of nine or ten feet. There are two kinds of Ramie as of cotton. The superior quality can be obtained of Mr. Buckner, of New Orleans. An inferior quality, so called China Grass. It was raised formerly in England.

GAPES IN CHICKENS.

Several members replied to the question of S. M. Disbron, of New Jersey: What will cure gapes in chickens?

S. Edwards Todd assumed that the disease was caused by worms in the throat, and recommended the insertion of a horsehair or feather.

Dr. Sawyer thought it was partly due to inflammation, and he applied the same remedy to children as to human throats, Lunar Caustic or Nitrate of Silver, drawn once around the throat, had cured a great many chickens.

Mr. Lyman reccommended sweet oil mixed with black pepper, to be applied with a feather two or three times. Melted butter or any oil will answer

Mr. Thompson of Staten Island, reccommended putting young chickens on different ground than old ones, and feeding them with wheat screenings and cracked corn, instead of Indian meal; considering these measures preventatives which is better than cure.

SWEET POTATOES.

Letters were read from Chas. P. Thatcher of Illinois and H. W. Tingle of Kansas City, with reference to the protection of hay-stacks, and the bedding of sweet potatoes; the question being asked, whether the tubers should be covered or uncovered.

A gentleman from Pensacola, Fla., advocated a covering of two or three inches of soil.

BUGS IN PEAS.

A long discussion ensued on the cause and prevention of bugs in peas.

Col. Harris of the Ohio Farmer, made some interesting remarks in regard to the raising of corn in Southern Central Ohio.

An essay on Agricultural Education and how to obtain it, will be read at the next meeting by H. Williams, also a paper on Agricultural Chemistry by Mr. Whitney. Adjourned.

FINE HOMESTEADS IN PLEASANT PLACES.

We have so many calls at our office, for homesteads in the country, that we take pleasure in inviting all who want them, to call and see our list of Estates for sale; we can always direct to pleasant places.

We now direct the attention of those who desire fine and pleasant locations, on the most liberal terms, to the large estates at Calistoga, of P. Brannan Esq., here will be found splendid locations to please all tastes; and they can be had on easy terms. See advertisement in our column.

LOOK TO YOUR PUMPS.—The little rain that has come so refreshingly, to make the earth bud and blossom, will not bring all the water wanted, and all must resort to *Pumps*. Among the many new pumps recently known, none are more generally approved and acceptable, than the "Climax Pump," sold as fast as can be made by Messrs. Linforth Kellog and Rail.

Our farmers who need a good pump, should be sure to see the pump advertised by this Journal.

OILS, CAMPHENE ETC.—The well known house of Stanford Bro., (now Josiah Stanford,) have for long years always maintained the lead in the sale of the Best Articles in the business named. Their of experience in the manufacture and sale, and perfect experience in the business, gave to the house the opportunity of furnishing to their patrons, the *purest* and *best*, at the most favorable rates.

Home Correspondence.

SILK CULTURE, ITS SUCCESS.

SAN JOSE, May 18, 1869.

COL. WARREN, ED. *California Farmer*, San Francisco.

Dear Sir;

Your favor of the 15th, I have recieved last night. You are complaining of not hearing anything from me, but my dear Sir, I never before had so much to say about silk culture; but my moving down to Los Angelos, my mulberry plantation, and the quantity of visitors that come for information and with that, the immense correspondence that I have from all parts, has kept me so terribly in a hurry that, as you know, it has been impossible for me to find a minute to write to any Newspaper, but will do it as soon as I have a moment because it is necessary, as some enemies of that great cause, are taking advantage of my being so busy to work against it, and write nonsense in some papers. The public know that I have never said anything but the truth, I intend to let them know the truth, and what is at the bottom of all that. You ask also *if I live*, my dear sir, I have never been better and felt so happy as I do at present, to see all I have said about this so important industry for our country, so far surpassed by the results.

By the fact that all those that have tried it, in the different parts of the state, has demonstrated beyond any doubt, that the whole state cannot be surpassed for this culture; that the extraordinary capacity of the soil for the mulberry tree, and the warmer and milder and more regular climate, so favorable for the worms, is the cause that the south of California is superior to the north, and in fact I think that the southern part of our state, is superior to any other point on the globe, and Los Angeles being the outer of all the southern counties, is naturaly the place for silk culture on the Pacific Coast, as after visiting that part of the country I found it exactly as it had been represented to me. I immediately resolved to make my plantations there; I have made one in the limits of Los Angeles city, on twenty acres, and made another in the same county on a forty acre tract of Mr. Hall's purchase, one mile from San Bernardino; on both places I expect fine results, as the soil is very fine.

I brought back with me, to San Jose from there mulberry shoots of one year growth, that are 14 feet long. I am now at San Jose for about three or four weeks more, then I will have to go down again for about a couple of months, and then come back home; so you see where the friend can find me this summer.

The extraordinary success at Los Angelos' has caused a great many plantations to be made last season, and I am learning every day of more that are re preparing for next. It is not to be supposed that all those that will be deceived by that big White Plue humbug, will turn their attention in this direction; but there is a chance for everybody, without any fear of loosing the vein.

All my silk worm eggs are down in Los Angeles, in a large refrigerator made for that purpose where the thermometer is kept down at 40 degrees, to keep them from hatching too soon; the others keep theirs there also.

For want of time I am obliged to close; but I think now that I am forgetting to mention to you, that I see in my letters, that three *silk reelers* and *manufacturers* are coming from three different points, and all say, that their intention is to establish silk filatures etc. I expect that among them, there will be some, competent, and serious this time. Yours truly, L. PREVOST.

SACRAMENTO SILK NURSERY,
SACRAMENTO, May 13, 1869.

COL. WARREN—*Dear Sir:*

Yours of May 6, come duly to hand last saturday, making inquiry about Silk Worm Eggs. I have to answer, First, that our Association, i. e. the California Silk Growers Association, have not yet fixed on a definite scale of prices for the sale of No. 1 French annuals. We propose to have a meeting this week and adopt such rules and regulations, with reference to Silk Culture in all its various details, as we hope to be most conducive to its ultimate and present successful prosecution. To this end we shall act in concert and establish a scale of prices that we hope to give satisfaction to the Silk producers of Europe, and command their orders for eggs.

After we have our meeting I will advise you of its action in the matter.

I hope to produce about 15,000 dozen of No. 1 French Eggs, and also a large quantity of my Californian Hybrids. They (the Hybrids) so far are the best worms that I ever fed. They are strong and vigorous—not the least sign of weakness or delicacy about them. They are also very hearty eaters indeed, I am now satisfied that this cross are going to prove a very valuable acquisition to the Silk interest of this State, and Europe also — All my worms are doing well, having about 350,000 feeding now. W. M. HAYNIE.

PLANT CRANBERRIES.—There can be nothing more certain of success than *Cranberry Planting* on our redeemed *Tule land*.

All that is required, however, is to burn off the mass of stubble grass that would prevent the *gathering* the crop: but on all level places a simple fire to burn over it, and a harrow or rake, and the work is easy and the crop sure.

Cranberry raising will be one of the most profitable crops in this State within a year; but the large *Bell Cranberry* is the only variety that should be cultivated.

—A smile is ever the most beautiful and bright with a tear upon it. What is the dawn without the dew.

—Half an ounce of powdered alum will purify twelve gallons of water.

THE NEW MELON.

THE CASSABA MELON.—We acknowledge, from Hon. Cornelius Cole, through his Brother, the reception of a package of the *Cassaba Melon seed*, which the Department of Agriculture are now sending out as a *new Melon* from *Smyrna*. Valued at *One Hundred and Twenty Dollars* per pound.

That it is a valuable melon we are ready to admit; that it is new to many now, is also true, but this melon was raised by us, in Massachusetts, more than *Twenty-five years ago*. The seed was brought to us by the Rev. John Pierpont who had been visiting the Holy Land. From the seed then given us we raised fine melons at our Home in Brighton Mass., and exhibited them at the Rooms of the Massachusetts Horticultural Society, we also brought seed to California, and have raised the melons both at Sacramento in 1852-3, and also here. This seed, however, we shall have planted here and watch its culture and test its as compared with former times. We return sincere thanks to the Donor, however, for the kind memories it revived of our years of Friendship with the noble Poet now in Heaven.

WOOL CROP.—The spring clip already shows that we are to have a much larger clip than last year and it comes in in better condition and will bring better prices.

New Advertisements.

LAKE VINEYARD WINE COMPANY.

The undersigned, hitherto doing business under the name and style of B. D. WILSON & CO., have this day changed their firm name, and will hereafter continue their business as Wine Growers and Merchants, under the name and style of

"The Lake Vineyard Wine Company."

J. De BARTH SHORB,
CARLTON CURTIS.

We desire to call the attention of the Trade to our large stock of the celebrated LAKE AND MOUND VINEYARD Wines, and choice assortment of Wines and Brandies from the best Vineyards of California. These wines, bearing our trade-mark on package, label, and seal, we guarantee of uniform good quality, inferior to none, and ready for safe shipment to any part of the world.

Orders for the Atlantic States will be filled by our New York House from their depot, at No. 45 Murray Street, New York.

We respectfully solicit your patronage. Yours, truly,

The Lake Vineyard Wine Co

Corner Broadway and Battery Streets,
May 1st, 1869. San Francisco.
31-16

ECONOMY WASHING MACHINE!

A new lot of the above named Machines, including all the latest improvements, are now ready for sale and can be sent to any part of the State.

Ninety-one (91) Machines are now in use in this County Township, where they were Invented, and still Manufactured.

Price of Machine, ... $25.

Letters directed to JONES, BONNER, MISSION, SAN JOSE, LAMEDA COUNTY, will receive prompt attention.

20,000 NEWSPAPERS.

We have TWENTY THOUSAND Newspapers—Newspapers of the largest size among our Exchanges, suitable for WRAPPING PAPER for Dry Goods, Clothing, etc.

—ALSO—

TEN THOUSAND

Of the best agricultural Papers known, comprising our various agricultural Exchanges from all the Eastern States and Europe. Farmers who would like valuable reading matter, which contain choice Essays and Letters on Agricultural matters, can have these at low rates by the 100. Apply at FARMER OFFICE.

NEW GRAINS AND GRASSES.

We ask special attention of all persons who have low meadow lands, or Tule lands redeemed, to the New Grains and Grass Seed received by the late steamers.

As these are entire *New Varieties*, never before known here, it would be well to plant small lots in order to secure the seed for another year.

To those who can do so advantageously, and to some extent, *we will furnish Seed on liberal terms*. Apply at *Farmer Office*.

CRANBERRY PLANTS.

The Genuine *Bell Cranberry Plants*, just received by overland route, in the most perfect order, only a few days on the way.

This is now a grand chance for those who have "*Tule lands*," for if planted now, they will begin to yield the coming season. Apply at

FARMER OFFICE.

Agricultural Implements. New Advertisements.

TO THE FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS' PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by gone* Implements, but keep up with the "Progressive Spirit of the Age."

—:o:—

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULARS

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all the trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S SELF-RAKING REAPER.

This Machine stands at Front of all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

Home Miscellany.

EARNING A WIFE.

"And so you want to marry my daughter, young man?" said farmer Bilkins, looking at the young fellow sharply from head to toes.

Despite his rather indolent, effeminate air, which was mainly the rusult of his education, Luke Jordon was a fine looking fellow, and not easily moved from his self possession; but he colored and grew confused beneath that sharp, scrutinizing gaze.

"Yes, sir; I spoke to Miss Mary last night, and she referred me to you."

The ol dman's face softened.

"Molly is a good girl, a very good girl," he said stroking his chin with a thoughtful air, "and deserves a good husband. What can you do?"

The young man looked rather blank at this abrupt inquiry.

"If you refer to my abilities to support a wife, I can assure you"—

"I know you are a rich man, Luke Jordon, but I take it for granted that you ask my girl to marry you and not your property. What guarantee can you give me, in case it should be swept away, as it is in thousands of instances, that you could provide for her a comfortable home? You have hands and brains—do you know how to use them? What can you do?"

This was a style of catechism for which Luke was quite unprepared, and he stared blankly at the questioner without speaking.

"I believe you managed to get through college; have you any profession?"

"No, sir; I thought—"

"Have you any trade?"

"No, sir; my father thought that with the wealth I should inherit I should not need any."

"Your father thought like a fool, then. He'd much better have given you some honest occupation and cut you off with a shilling—it might have been the making of you. As it is, what are you fit for? Here you are, a strong, able-bodied young man, twenty-four years old, and never earned a dollar in your life! You ought to be ashamed of yourself. And you want to marry my daughter. Now, I have given Molly as good advantages for learning as any girl in town, and she hasn't thrown 'em away; but if she didn't know how to work she'd be no daughter of mine. If I choose, I could keep more than one servant; but I don't, no more than I choose that my daughter should be a pale, spiritless creature, full of dyspepsia and all sorts of fine lady ailments, instead of the smiling, bright-eyed, rosy-cheeked lass she is. I did say that she should not marry a lad that had been cursed with a rich father; but she has taken a foolish liking for you, and I'll tell you what I'll do: Go to work, and prove yourself a man; perfect yourself in some occupation—I don't care what, if it is honest—then come to me, and, if the girl is willing, she is yours."

As the old man said this he deliberately rose from the settle of the porch and went into the house.

Pretty Mary Bilkins was waiting to see her lover down at the garden gate, their usual trysting place. The smiling light faded from her eyes as she noticed his sober discomfited look.

"Father means well," she said, as Luke told her the result of his application. "And I'm not sure but he's about right, for it seems to me that every man, rich or poor, ought to have some occupation."

Then, as she noticed her lover's grave look, she said softly:

"Never mind, I'll wait for you, Luke."

Luke Jordon suddenly disappeared from his accustomed haunts, much to the surprise of his gay associates. But wherever he went, he carried with him those words which were like a tower of strength to his soul; "I'll wait for you, Luke."

One pleasant sunshiny morning, late in October, as farmer Bilkins was propping up the grapevine in his front yard, that threatened to break down with the weight of its luxurious burden, a neat looking cart drove up, from which Luke Jordon alighted with a quick, elastic step, quite in contrast with his former easy, leisurely movements.

"Good morning, Mr. Bilkins. I understand that you wanted to buy some butter tubs and cider barrels. I think I have some that will just suit you."

"Whose make are they?" asked the old man, as opening the gate, he paused by the wagon.

"Mine," replied Luke, with an air of pardonable pride.

Mr. Bilkins examined them one by one.

"They'll do," he said coolly, as he set down the last of the lot. "What will you take for them?"

"What I asked you for six months ago to-day—your daughter, sir."

The roguish twinkle in the old man's eyes broadened into a smile.

"You've got the right metal in you after all," he cried. "Come in, lad; come in. I shouldn't wonder if we made a trade after all."

Nothing loth, Luke followed.

"Molly!" bawled Mr. Bilkins, thrusting his head into the kitchen door.

Molly tripped out in the entry. The round white arms were bared above the elbows, and bore traces of the flour she had been sifting. Her dress was a neat gingham, over which was tied a blue checked apron; but she looked as winning and lovely as she always did wherever she was found.

She blushed and blushed, and smiled as she saw Luke, and then, turning her eyes upon her father, waited dutifully to hear what he had to say.

The old man regarded his daughter for a moment with a quizzical look.

"Moll, this young man—mayhap you've seen him before—has brought me a lot of tubs and barrels, all of his own make—a right good article, too. He asks a pretty steep price for 'em, but, if you are willing to give it, well and good; hark ye, my girl, whatever bargain you make, your father will ratify."

As Mr. Bilkins said this, he considerately stepped out of the room, and we will follow his example. But the kind of bargain the young people made can readily be conjectured by the speedy wedding that followed.

Luke Jordon turned his attention to the study of medicine, of which profession he became a useful and influential member, but every year, on the anniversary of his marriage, he delights his mother-in-law with some specimen of the handicraft by which he won what he declares to be the best and dearest wife in the world.

A DARK CLOUD.

I often wonder that among the thousand dangers of early life, the dreadful liabilities which lie on either side of this careless track, Parents are not more anxious as to the possible results of a passionate temper. They witness the sudden paroxysm of anger, the uplifted hand to strike, the missive, thrown at hazard, among precious eyes and limbs, and too often these youthful offenders receive only a gentle reprimand, or a threat that the next offense shall be followed by punishment.

It is frequently remarked, in reference to a daily recurring fault, that it is not well to notice every time it is committe d This is true in regard to very many of the trifling offences of childhood, for, of course, these little unreasoning and unreasonable creatures, must begin the experiment of life in a very reckless style, which their cunning and and infantile graces were, perhaps, meant to cover and excuse; and for these, a shake of the head, or a warning finger suffices. One would not wish to subject the unconscious little stranger to the terrors of the law, when the gospel of love would be so much better understood.

But we all know how rapidly these pretty little ways, so full of intelligence, begin to assume a distinctive character, and to settle into habits which call for the exercise of more effective measures. The dangers of this period are not limited to one fault; but it is of one only, that I, at this time, raise a warning voice—a passionate temper—which suddenly clouds the reason and comes crashing, like an avalanche, through all barriers of decorum, respect and affection, exploding in dreadful words, if not in fatal deeds.

It is often said of this fearful propensity, that it will be rectified when the child grows up; but why not help the child now, and thus forstall the necessity of so much self-reproach and painful discipline as will be needed when the soft pith has hardened into a rigid fibre. It seems cruel, that when the habits of early youth are ripened into the principles of manhood, our children should be still left struggling with a wayward and ungoverned temper, which early discipline might have subdued. I do not know why a stand should not be taken early against this common sin of childhood, as well as against those of lying and stealing, which, if detected, generally call forth such pungent measures as to convince the youthful culprit that no leniency or toleration can be hoped for on these points of offense.

Besides the mental suffering which inevitably comes to one who has passed the period of childhood, unchecked and unmollified by parental gentleness and firmness—for it is not violence which should be opposed to violence—there are often most tragical results from this evil temper, which bring a dark cloud over the soul, that no after sunshine has power to dispel. One moment of anger may cause a life of sorrow.

And has not God, in his gracious providence, given parents the very best time in which to secure a child against these fearful liabilities; even those morning hours, in which the first springing of thought and feeling in the transparent soul may be carefully watched?

I have now, in my mind, a little boy who, when six or seven years old, was the tyrant of the household. I have reason to think that there was opposed no discipline to his imperious temper. The parents would say it was naughty to do so; but, as his naughtiness offered no barrier to unbounded indulgence, he cared little for the "soft impeachment," and I have thought, if this child at six years spurns all control, and, when contradicted in his despotic will, roars and storms like a fury, what will he do at ten years

But I little imagined what would really be the result. It was no less than giving his father a blow, while in a passion, from the effects of which he never recovered. This was known: but how many domestic tragedies have been perpetrated and hidden deep in a parent's heart, God only knows

In regard to this case, what heart but must shrink at the mournful thought that all the sunshine of this early manhood, must frequently be quite shut off, and the soul chilled and shrouded in gloom, whenever memory brings back the *dark cloud.—By Zell, in Mother at Home.*

TREATMENT OF DYSENTERY.—Beat one egg in a teacup; add one tablespoonful of loaf sugar and half a teaspoonful of ground spice; fill the cup with sweet milk. Give the patient one tablespoonful once in ten minutes until relieved. This recipe I obtained from the wife of a clergyman, who assured me that she cured a woman with it, after she was considered past cure.

AN EXCELLENT REMEDY FOR CONSTIPATION.—Take wheat bran one pint, water one quart. Steep the bran in the hot water all night, and drink a tumblerful early in the morning.

Miscellaneous.

OUR HOME INTERESTS.

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact), and the probability that unless checked this large sum of money will be increased each year, until, in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, to be sent East for investment in the purchase of Life Insurance, instead of being retained at homes to promote and foster BY ITS INVESTMENT HERE the commercial, mechanical, and agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States of the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION, *whose capital and assets will not be impaired or injuriously affected by the change in values that will sooner or later occur by a return to specie payments in the other States of the Union.* Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to the citizen of this State, who feel an interest in its progress, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

Miscellany.

SACRAMENTO RAILROAD CELEBRATION.

The following Poem, written for the Completion of the Pacific Railroad, was most admirably read by Albert Hart, Esq. at the Celebration on the 10th.

POEM.

BY L. E. CRANE.

Let pæans sound from metal throats!
Ring out, keen bells, defiant!
We may not seek for sweeter notes
To greet our belted giant,
Nor may we look for fitter place
To clasp at last the woven monster,
Than here, where in its new, dark days,
A brave young State stood sponsor!

Not strange the act; by magic wrought
From chaos into splendor,
She felt the vigor and the thought
Her living sons could render;
She knew that men who trampled down
The prison wilds and deeps around her,
Might dare to build this iron crown
Above the Gold that crowned her.

O, weary were the early days,
When heroes bravely bore them
In toilsome march, through unknown ways,
Where dangers lay before them;
But all the discord that they knew
Was fitful prelude to the thunder
Of this grand anthem to the true,
A world now hears with wonder.

Where mountain wilds and desert plain
Once saw their silent camping,
Now, screaming back, with floating mane,
The iron-horse goes tramping.
The camp-fires yet—their early home—
Shall burn and live in song and story;
The sacred vestal fires of Rome
Less fraught with grace or glory.

While never halting ranks of years
March down the aisles of ages,
The quick-step of our Pioneers
Will echo from the pages
Of Earth's best music; here we greet
This Prince of their great House—nor wonder
At such swift manhood—rushing fleet
Through mountains reft asunder.

We love the sparkling jewels hung
On Time's broad breast by sages;
We treasure rare thoughts said and sung
In other climes and ages;
Nations have knelt to trenchant swords;
But, hushing praise of pen or saber,
Comes music from these iron chords—
A hymn to Thought and Labor!

How brief the time has been; how few
The days and years repeated
Since ground was broken first to do
The great work—now completed!
Who dare predict what Time at length
May bring to cheer mankind or frighten,
While gazing on the stalwart strength
Of this grand free-born Titan?

All honor to the work! All praise
To men through whose devotion
Nature now kneels in open ways
From ocean unto ocean!
Great mountains climbed and cleft; broad plains,
Bleak deserts and rich valleys blending
From West to East will mingle strains
Of triumph—never ending.

The belt of fire Columbia rears
Shall never lose its luster!
The flaming scroll she proudly bears
From sea to sea, shall muster,
On distant shores, in darker lands,
A host of men—and God will lead them
To seek, and guard from Vandal hands,
Our shrine of Hope and Freedom!

THE PHILOSOPHY OF ILL HEALTH.

Sickness is very largely the want of will. Everything is brain. There is thought and feeling, not only, but will: and will includes in it far more than mental philosophers think. It acts universally, now as upon mind, and then just as much upon the body. It is another name for life, force. Men in whom this life or will power is great, resist disease, and combat it when attacked. To array a man's mind and will against his sickness is the supreme art of medicine. Inspire in men courage and purpose, and the mind-power will cast out disease. "Nothing ails her. It is only imagination," said the nurse to him one day.—"Only" the imagination? That is enough. Better suffer in bone and muscle than in the imagination. If the body is sick, the mind can cure it; but if the mind itself is sick, what can cure that?—*Norwood.*

WHAT WOMEN ARE DOING.

—The church which Mrs. Samuel Colt has erected on her grounds at Hartford, in memory of her husband, is called the "finest church in America." It is small but gorgeous, and in many respects unique. The lectern is of gold plate set with carbuncles, and the tiling and various other parts are imported.

—A free school of telegraphy for women has just been opened at the Cooper Institute. Within the term which commenced February 15th and ends July 1st, 1869, the pupils are to be fully prepared to take the positions waiting for them in the Union Telegraph Co. Miss Lydia Snow, connected with that company, acts as preceptress. There are twelve young ladies in the class.

—Miss Vinnie Ream's statue of Mr. Lincoln has been recently examined by intimate friends of the late President, and pronounced by them to be a success, not only as an excellent likeness, but as representing that thoughtful, benignant mood of the subject best worth perpetuating in marble.

—It is stated that there are over three hundred graduates of female medical colleges now in active practice in the United States, some of whom are in receipt of $10,000 per annum from their profession.

Miscellaneous.

A PRINCELY RESIDENCE IN THE COUNTRY FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN, PROPRIETOR

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facie* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

AVERY TUBE WELL

COMPLETE FOR USE

THE TUBE WELL IS FORMED BY DRIVING prepared Iron Piping into the ground with a sledge Although of comparatively recent invention, these Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well, all surface water, dirt etc being excluded. The Tubing is coupled together in lengths of five or six feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Lift Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. ☞ For circulars, etc., address Postoffice Box, 17. UHRIG & DEWEY.
Office at 318, Pine street. 31-10.

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to and keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

Is on the red cover of the packages

Depot, 320 Jackson Street,

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit: five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, May 20

The Grain interest begins to show, as we have all along said, the low rates that must rule not only for this year, but for a series of years to come.

A little reflection on the part of grain growers must convince them that with such an extended area of cultivation, and with the greatly improved Implements for Plowing, Planting and Harvesting, our Farmers can raise Wheat and all other grains at a much lower cost than ever before, and consequently, a larger amount will be raised every year, and this crop must be sold, and large crops will affect the value always.

Another feature should be observed, that many persons who are not permanently located on farms, will take up large tracts of land as a *matter of speculation*. They will hire the land, hire men to plant and harvest it; they will do this as an investment, and they will sell at Harvest time for what it will bring, in order to close up the Experiment, and this *can be done*, and it *will be done* the same as any other speculation.

As an evidence that Grain (wheat) will rule low in the future, we frequently learn from parties their willingness to contract at a low figure for three or five years—we have heard of offers being made by growers to contract for the next five years at 1¼ cents, and as we have said, they can do so with profit; for by means of better Implements to work with, the cost of raising grain has been reduced more than half within the *last three years*.

The immense saving in the cost of plowing by means of the "Gang Plows" of Webster Brothers, of Stockton, and another vast saving by means of their "Steam Thresher," will work a revolution in grain growing, and if our Farmers will be content to raise grain on a large scale, and sell it at a low figure (this will pay well too,) they can supply Europe with all they can grow.

The motto of our Grain growers should be: Sell! Sell!! Sell at Harvest for whatever the market shall be. Then our Grain would go abroad, and we should get rich at Home; and there would be no complaints of scarcity of Gold, for California could raise and export Wheat to the amount of *Fifty Millions of Dollars* annually, if the Farmers would only do up their work in the right way.

Choice Wheat is not so abundant at 2d and 3d rates, by reason of our Farmers neglecting to plant pure seed, and a carelessness in cleaning. They hurt themselves by this great oversight.

Barley is lower. Oats ditto.

Corn and other products such as Potatoes, Hay, Bran, etc are generally plenty.

Oregon, by her large shipments frequently affects our Markets, and when the Railroad thence shall be completed, she will be a large shipper.

Retail Prices in the Fruit Market.

Our Fruit Market makes her best show in *Strawberries*. Large amounts to the total of *fifteen tons daily*—some days *twenty tons* come and go in a little time. This morning, by reason of a very large supply, and an excess of this fruit of yesterday laid over, it was peddled about our streets at 3 *pounds for a quarter*. The price is generally 10 and 12½ cents at retail.

Cherries come in freely now, and sell at 25 to 50c.—Some splendid samples come now, Blackberries begin to come in, and these fruits constitute the dessert at this season and a healthy one, too.

Retail Prices in the Vegetable Market.

(Brown & Arnold.)

No Market in Christendom can make a better display of "Garden Sauce" than San Francisco. Those who really wish to know what is grown, should rise early and visit Sansome Street before 7 A. M. There the long row of carts and waggons, with fresh Vegetables, would make the visitor more fond of this nourishing food. Our people eat too much *meats* and too little Vegetables and Fruits. Health would be much promoted by a change in this respect. Let everybody go down at early morn and see the *One Hundred and Fifty Tons* of *Garden Sass* that is daily used in our *little city*.

FISH

(Tessmore and Hayes.)

In spite of the abundance of every other kind of nourishing food in our markets, the Fish Market makes a good display. Lobsters, Crabs, and all kinds of shell Fish, with our splendid Salmon, and Trout over the Pacific Railroad, give our people all the best dishes in this department, and these are used largely.

Splendid Lake Trout via. the Pacific Railroad, come daily to the stall of Tessmore & Hayes, in the California Market.

POULTRY AND GAME.

This branch of housekeeping wants is not well supplied. Poultry is not plenty; but summer wants of light food such as Chickens, Rabbits, etc. clean our markets very quickly, for our people *do love to live well*.

By referring to our prices it will be seen that Poultry is scarce and high. Judicious Poultry men should get rich.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

May 8—COLORADO, Capt. W. H. Parker, connecting with ALASKA, Capt. Gray.

May 18—CONSTITUTION, Capt. Wm. H. Hudson, connecting with HENRY CHAUNCY, Capt. Conner.

May 29—GOLDEN CITY, Capt. Wm. F. Lapidge, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—If desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

oct OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m.

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, UNtil further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9 50 A. M.; Reno at 4.20 P. M.; Wadsworth at 6.30 P. M. Winnemucca at 3 30 A. M.; Argenta at 8 50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12 05 P. M. Reno at 2 19 A. M. Colfax at 9.50 A. M. and arrives at Sacramento at 1.20 P. M.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6.30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada.

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermit, Silver City, Gwyhee, and all points in Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages for White Pine, and Overland Stages for Salt Lake City and the Atlantic States.

C. CROCKER,
General Superintendent

A FINE COUNTRY RESIDENCE

A Farm of 100 acres of good land, well watered and fenced, 3 miles from Napa City. On it is a vineyard of 7,000 vines, five hundred being of foreign varieties; an orchard of, between five and six hundred fruit trees; a good new roomy house, tastefully planted about with ornamental trees and shrubs. Also, large barn stable, and other out-houses; with the above will go horses and harness, first-rate farm wagon, saddle and bridle, farming implements, gardening tools, poultry, contents of house, etc. The land, with exception of 15 acres, has not been broken up this season, and has a volunteer crop on it, which will make good hay, and is fine pasture now. If required, a portion of the purchase money could remain on mortgage at a low rate of interest.

PRICE OF ESTATE, $8,000

Persons wishing a very fine Estate, are invited to call on the undersigned, on the Premises, who will show them the Estate.

THOMAS SINCLAIR.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish *collections* of choice plants, can buy them in quantities at a very low rate, if they visit the *Gardens Corner of Mason and Pacific Street*, in this city, or address EDITOR FARMER.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLane's Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not accept any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROTHERS, Pittsburg, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the vendors of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Hepatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER COMPLAINT, BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and certain. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous of the fact. It is our sincere wish that these Pills should be fairly and for tested, and stand or fall by the effects produced when they have been so tested, that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular nostrums of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms consequent on a deranged state of that organ.

DISEASES OF THE LIVER

The Liver is much more frequently the seat of disease than is generally supposed. The function it has to perform, and on the regular execution of which depends not only the general health of the body but those of the Stomach, Bowels, Brain, and the whole Nervous System should be vast and vital importance to health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, evokes a powerful influence over the mind and its operation, which cannot be easily described. It has connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate sympathy which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminality, or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Bowels, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three fourths of the diseases classed under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increased by pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful impression of having left undone something which ought to have been done. A slight dry cough is sometimes present. The patient complains of weariness and debility; he is easily startled; his feet is cold or burn; he complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts everything. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, the termination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR M. AS LIVER PILLS in cases of AGUE AND FEVER, when Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not operate or three times by next morning, take one or two more; but a slight breakfast should invariably follow. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they may be used to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangement of the Stomach.

DR. M'LANE'S American Worm Specific Vermifuge

No diseases to which the human body is liable are better entitled to the attention of the philanthropist, in consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer's real cause is frequently overlooked, and consequently the proper remedy is not applied. But when the presence of the vermifuge, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part to other causes. It ought here to be particularly remarked, that although but few worms may exist in a child, or have ever quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it often happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause bids defiance to treatment, judicious in other respects, but which entirely fails in consequence of worms being overlooked, even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be exhibited without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, successfully with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; a leaden circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saliva, with white tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied with cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper not but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE RELIED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual in providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being present. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten, a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to counterfeit, palming upon the public counterfeit and inferior articles, in consequence of which the proprietors are forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PITTSBURG. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have a red wax stamped on the lid of the box, in red wax.

Prepared only by FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLane's Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

LETTERS FROM AN OLD CALIFORNIAN AT THE EAST.

NUMBER ONE HUNDRED AND ONE.

NEW YORK, May 13, 1869.

Editor California Farmer:

I send you, mistakes and all, an account of a meeting, which I cut from the New York *Herald*. Some of the errors are very funny, and if your readers are as much amused at them as I am, I shall feel rewarded in forwarding you the extracts. In my next letter I will give you an account of the meeting, which I hope will interest you.

M. A. S.

THE TRANS-CONTINENTAL RAILROAD.

Interesting Meeting of "Pacific Slopers"—Expression of Views on the Pacific Railroad—Pleasing Reminiscences.

A call having been made by O. H. Pierson, formerly of California, but now of 113 Pearl street, New York, for a convention of Pacific Slopers to meet at the Astor House yesterday, in order that they might, in a fitting manner, express the joy felt by them at the completion of the Pacific Railroad, the following named gentlemen made their appearance at the place appointed and organized the meeting:

Senator James M. Nye, of Nevada, 1860; Jacob P. Leese, California, December 24, 1833; Silas Goddard, San Francisco, April 1, 1849; P. J. Hickey, Nevada, September, 1849; John S. Meserne, San Francisco, 1860; M. J. Newmark, Dec., 1852; D. Mackinley, Aug. 3, 1851; Captain Bob Haley, 1849; Governor Purdy, California; Dr. H. Goddard, March, 1849; T. M. Dehon, California, September, 1849; E. C. Kemble, California, July, 1849; Wm. Henry Talmage, California, 1840; C. A. Sherry, California, August 8, 1949; W. E. Greene, May 21, 1849; John H. Still, September, 1849; E. Frank Davis, California, October 15, 1862; William E. McGrew, California, 1849; William J. Nichols, California, July 15, 1850; W. O. Clask, California, November 3, 1850; J. W. Gregory, California, 1849; George Bernard, California, 1850; John L. Craig, California, September, 1848; H. B. Meredith, California, September, 1849; J. Carmichael, California, October, 1862; Joseph S. Eohn, California, February, 1850; J. D. Baine, California, April, 1850; James M. Shield, California, October 17, 1849; Samuel S. Field, California, February, 1850; O. H. Pierson, California, 1849; M. E. Flannegan, California, May, 1850; John J. Kelly, California, 1849; Captain Edward Higgins, U. S. N., California, 1849; General W. R. Gorham, California, 1849; M. L. Marles, Benicia, 1847; George H. Strong, San Francisco, 1847; E. C. Dixon, Nevada, 1850; J. M. Noah, San Francisco, 1852; Judge Turner, of Nevada; Colonel Leeds, of California; Governor Price and many others.

The meeting took place in room No. 153 Astor House and was organized by calling Senator Nye to the chair and appointing Mr. Kemble secretary. The Governor thanked the gentlemen present for the honor conferred upon him in a neat and appropriate speech. The first business of the meeting was the appointment of a committee to draft a set of resolutions suitable to the occasion.—The committee consisted of Messrs. Pierson, Strong, Peel, Kemble, and Gov. Price.

While the committee were out preparing the resolutions, speeches appropriate to the event which they had met to celebrate were made by the president, Senator Nye, Mr. Goddard, the Rev. Mr. Blaine, Colonel Leeds, Governor Price, Mr. Clark, Judge Barry, of Nevada, and others. The committee having returned, the following preamble and resolution was submitted and adopted:

Whereas, The last rail has been laid and the last spike driven which unites the two shores of the continent, and we have heard the clink of the hammers closing rivets up and binding us with hooks of steel to our old homes; therefore be it

Resolved, That we send by magnetic wire to our brethren on the Pacific shores our joyful congratulations on the completion of the great work in which our hearts and our hopes have been so long bound up. On the shores of the broad Atlantic we have felt the thrill of the enthusiasm with which our brethren on the peaceful Pacific have celebrated the great event of the age. May the union which has thus been cemented be perpetuated, and may the blessing of God rest upon the land and upon the work which has given us full assurance that "peace hath her victories, no less renowned than those of war."

Gov. Price, who took possession of California in the name of the United States, and Captain Edward Higgins, who stood side by side with him and raised the first American flag on that soil, made brief retrospective speeches.

Mr. J. W. Gregory, an old gentleman who went out as a newsboy and brought the first gold by express from California to New York, made a very amusing speech, and gave to the California Historical Society the first receipt for gold brought by express ever given in New York. It reads thus:

NEW YORK, Dec. 26, 1849.

Received from Mr. J. W. Gregory $210 40 from Theo. Wing, from California.

PENFOLD & SCHUYLER,
per S. SCHUYLER.

Mr. Gregory carried that express, containing about $4,000 in gold, across the Isthmus on his back.

The remainder of the afternoon was consumed in brief speeches, principally made up of anecdotes and reminiscences, and after the meeting adjourned the members remained for a while in social converse. Retrospection brought up many scenes of bygone days with which all were familiar, and there was a happy time generally.

NUMBER ONE HUNDRED AND TWO.

NEW YORK, May 15th., 1869.

Editor California Farmer:—

COMPLETION OF PACIFIC RAILROAD.

If the rejoicings over the completion of the Pacific Railroad in this city were not as enthusiastic as in San Francisco, there were nevertheless public and private celebrations which will long be remembered. At Trinity Church a beautiful and appropriate service of thanksgiving to God was attended by a large concourse of people. I shall not speak of it however, only saying briefly that it was a memorable service not only because it honored a great Victory of Peace, but because it was attended by a congregation made up principally from people residing in or interested in the Pacific Coast.

During the day there was much surprise expressed that Californians, resident and sojourning in New York, did not make some movement to celebrate among themselves an event so important to their own State. At last, however, a call for a meeting did appear in an evening newspaper of small circulation, and by chance I heard of it.—At the appointed time I made my way to room 153 Astor House, where I found a small circle of well known gentlemen. I looked around for Senators Cole and Casserly, Mr. Simonton, Mr. Eugene Kelley, Mr. Huntingdon, Mr. Garrison, and other well known Californians now in New York, but they were not present. In a short time our numbers were increased, and the meeting was called to order by Mr. Pierson who nominated Gov. Nye, of Nevada, for president, and Mr. Jacob P. Reese, Ex Gov. Price and Mr. Purdy for vice presidents. Gov. Nye made quite a lengthy address in which he dwelt upon the importance of the great national work, and ventured to predict the changes which it would make. At the request of the meeting he then appointed Ex-Gov. Price, Mr. Pierson, Mr. Kemble, and Mr. Plume to draft a set of resolutions.

During their absence the Rev. Mr. Blaine made a most touching speech in which he spoke of the attachment which Californians feel to their Pacific land. He recounted his own experience, the reason he had for his personal attachment and concluded by saying that his last wish would be to rest in Lone Mountain with the loved ones who had already crossed the river of Death. I was asked to make a speech, but in the presence of so many Pioneers, I felt that they could occupy more profitably the time. Mr. Leese, Ex-Gov. Price, Captain Higgins and Mr. Kemble were then called upon and greatly interested us by their recital of incidents in the early history of the State. Judge Berry, of Nevada, severely criticised in his remarks an article in the New York *World*, which sneeringly spoke of the great national work which ought to challenge the admiration of all parties in this country, he remarked that it was in striking contrast to the editorial course of the *Tribune* and *Times*. Mr. Gregory, of Gregory's Express, made the final speech, and concluded by exhibiting the receipt which he had obtained for the first gold delivered in New York. At the request of Mr. Leese he presented it to the Society of California Pioneers. The meeting was a most interesting one and the only cause for regret was the neglect to advertise it properly. There is a large colony of Californians in New York, and they ought to have made a better show than they did. The absence of our "leading men" was noticable, but those who were present were very happy. If Senators Cole and Casserly and the leading bankers were not present, we enjoyed the rare pleasure of seeing such an assembly of Pioneers.

The resolutions were correctly reported in the *Herald*, which made such laughable mistakes in names and dates, and I will not therefore repeat them.

The article in the *World* did not surprise me.—If I had said anything it would have been to express the gratitude which I feel, and which all Californians ought to feel, to the Republican party for the steady aid they have given to the Pacific Railroad, while the Democratic party coldly advocated it as a war measure, but allowed it to be smothered because it did not start from some Southern point. The Republicans were heartily in favor of it from the first, and when they came in power made it one of the grand aims of their administration.

They have completed it! They commenced it in the hour of our National danger. They never allowed disaster to interfere with it. They voted money for it generously. The people who have sustained them applauded the action of their representatives, and it is finished. It may not be all that was intended, but if there is any failure the Republican party is not responsible for it. The glory of the victory is theirs. The work which Whitney was called a madman for advocating is accomplished.

Its possibility is no longer doubtful, and now that the Central Railroad is completed, it is but the beginning of its results is to increase the wealth and power of the Atlantic States—it will elevate California particularly and unlock the riches of the Nation's strong box in the mountains of the Pacific. California therefore has particular reason to express gratitude to the Republican party, and in this hour of triumph I hope the words of acknowledgement will not be spoken grudgingly.

Of the private celebrations I have only time now to mention one at the house of Mr. Hoyt Sanford. Among the guests were Mr. and Mrs. Coleman of Grass Valley, who had come East via. the Pacific Railroad. It was appropriate, therefore, in singing a Te Deum that Mrs. Coleman should take a prominent part, Miss Sanford and Mr. Edward Sandford and myself were the other singers, and we felt the meaning of this sublime anthem as we sang it with an enthusiasm while every one present was electrified by.

And I assure you my pen runs exultingly as I write on the address of this letter via. the Pacific Railroad.

M. A. S.

LETTER FROM PRESIDENT CLARK OF THE MASSACHUSETTS AGRICULTURAL COLLEGE.

AMHERST, May 18th., 1869.

COL. WARREN, ED., *Cal. Farmer*,

My dear Sir:

Your most kind and hearty letter, inviting me to join Col. Wilder, and other distinguished horticulturists, in a trip to your wonderful state is is most thankfully recieved, I fear however; my duties here will render the visit this year impossible, you may however, expect to see me at your office at the earliest possible moment. My wife was born at the Sandwich Islands, and I have promised to visit with her, California and her native land.

As soon as the Agricultural College is fully organized, and has graduated its first class, I hope to find the time, till then "patience" is the word.

The *Farmer* comes to us regularly and is highly prized. With many thanks for your kind mention of the College, in your valuable and enterprizing journal, and for your promise of specimens for our museum, I remain with high regard,

most truly yours,

W. S. Clark,
President M. A. C.

HOME MUSIC.—There can be no purer and sweeter music, than that of the Melodious Organ for the Circle of Home, aside from the rich and varied music for all occasions, which is enjoyed with the Piano by a true artist; there is a new and peculiar richness and beauty, in the tone of the MASON and HAMLIN Instruments, which excel all other instruments of the kind sold.

THE CASHMERE GOAT.

[The recent return to California of our old friend, Rev. I. S. Diehl, who has recently visited all the various regions of Asia, and particularly the localities and vast mountain ranges where the Cashmere and Angora Goat roam by thousands and tens of thousands, has given the subject of rearing this species of Goat a new interest and caused many persons to give their attention to the subject, for beyond all question the rearing of the Cashmere Goat will become a source of wealth to individuals and to our State.

We have enjoyed a very pleasant interview with Mr. Diehl, and received from him many oral facts touching this matter. We have also been favored with the following very interesting Letter which we are happy to give our readers, who we know will appreciate it.]

COL. WARREN, ED., *Cal. Farmer*.

My Dear Sir:

As new sources of wealth and interest, are constantly arresting the attention of our Government and people, and as the New or Occidental world, may learn or derive something from the Oriental or Old world, I take great pleasure in giving you a few items of a journey or tour of 8 months, travelling some 18,000 miles through Europe and Asia; the main purpose of which, was to investigate the Cashmere, Angora, and Asiatic Shawl or Wool Goats, and mode and manner of the manufacture of those costly fleeces and fabrics. I found most beautiful specimens of the fleece of those animals, at the Great Paris Exhibition, from India, Persia, Turkey, England, France, Germany, Algiers, Egypt etc., with as beautiful specimens of the raw or natural fleece from the United States, as from any country, if not some of the finest. I found the fleece manufactured into all kinds of fabrics, from the most costly shawls of the world, to cloths, velvets, hoisery, chalis, worsted, mohair, camel hair shawls and fancy work of many kinds, having ascertained the real permanent and prospective value of the wool and animal, proceeded to Constantinople and Asia, armed and equipped with all the necessary documents, passports, Furman's post house orders, Teskeries be both from our Goverment and the Turkish, together with a few brace of Pistols and a letter of introduction, I penetrated into Asia minor, visiting ancient Bythinia, Phryzia, Gallatia, Pontius, Cappadocia etc., the haunts and homes of these celebrated silky fleeced goats, and after some 8 months exploration, and about one thousand miles of horse back riding, I succeed in picking up or purchasing 160 head of the finest, best and most beautiful I could procure, and have landed 136 after a journey of land and water of over 8,000 miles, with four of the celebrated Angora Cats, long haired and long tailed, white as snow and no doubt the most beautiful, and finest fleeced cat in the world; also a pair of celebrated Angora and Rindish sheppard dogs, and several varieties of peculiar fowls, with several barrels of seeds for government of the various vegetables, melons, cucumbers, to which I trust may be of interest to our country. Asia minor is almost a fac asmilie of California, on every hand I was reminded of the striking similarity, and not even destitute of virgin gold, for the ancient Pactolus, Golden fleece and mines of Trebizond, are all in this delightful region; though I cannot now and here give you a full discription of it. One of the striking peculiarities in which California is so deeply interested, is the wonderful success and quality of its silks, vineyards, grapes, cucumbers, melons the best in the world, and fine silky fleece of its celebrated Goats; known as Cashimere, shawl, and Liftick or Down Goats, the fleece being so closely allied to the fleeciness, fineness of silk and the softness of down. I found in the mountain regions of Bey Bazar, Angora Changre and Costamboul, 1,200,000 of these goats; producing from 2 to 3 oakes of 2¾ oake each of wool, worth from 50 to 60 piastres per oakk in the interior, constituting the wealth and revenue of the country; over 1,000,000 pounds is shipped annually to England alone, and mainly to two manufactories near Broadford. The goats roam over the hills in care of a sheppard, by thousands, pasturing in the dry cul like pasturage of shrubs, weeds wild grasses, delighting especially in the scrub oak, coppice, volonea, oak thorn bushes, and in the winter delighting in fine limbs, and trees of which are cut down for them, and on which they mainly subsist during the heavy snows and bad weather. The country is undulating and mountainous, with beautiful and rich vallies interspersed, varying in altitude from 2,000 to 4,000 feet, giving or having the extremes of climate, from exceedingly hot in summer to terribly cold in winter. The thermometer ranges from 5° below zero in winter, to 128° Farenheit in summer, reminding me of change of climate in journeys from San Francisco to Sacramento, thence to Nevada, Downieville, Pilot Knob etc. I am satisfied that California would be admirably adapted to rear or breed these goats, by the thousands, by crossing with the common goat, which has proved so successful here, and is done in the home of the original. I am satisfied that it is the valuable and beautiful wool or fleece bearing animal of the world, better adapted to hilly, wild and poor lands than sheep, with weapons and abilities of self defence against sheep dogs, foxes, jackall, and will often fight or stand against wolves, especially with lambs. This goat was originally brought from the Asirtic steeps, Tartary and East and brought to its present beauty and perfection, in Asia minor, 27 years ago. Ancyra or Angora the Capital of this region, had 80,000 inhabitants and 1,700 looms engaged in working up the material into costly cloths and fabrics, while all the smaller towns in the country, supported more or less looms, from 10 to 100, as Istanos and others. Now most of the wool is exported to England and Europe and manufactured, and cheaper fabrics returned, which has greatly reduced the Home Manufacture, then again the high duty or tax on the Goat and its fleeece, want of proper care, attention, housing, feeding etc., has greatly reduced the quantity of goats, but increased their value and demand for exportation.

A practical test of some 18 years now in the United States has fully demonstrated our ability to successfully rear these animals, especially westward, and our great western plains and prairies, plateaus and mountains, all the way to California and Alaska could be stocked with these valuable animals, and millions of dollars of fleece raised. In fact, a thought worthy of consideration is that as the home of these Goats was no doubt once the home of the ancestors of our Indians. Tartary, Tibet, and Mongolia, where they or the people are still leading Nomadic lives, with their wealth and employment, as well as enjoyment in their flocks of Sheep, Goats and Cattle. Could not our Indians and the Country be greatly benefited by inducing them to Shepherd life, and aid them to such stock as would furnish them food, clothing, and enjoyment, for the Goats are almost as roving and general feeders as the Indians themselves, and quite readily adapted to each other. In fact, the main Cashmere wool interests, that is rearing the Goat and wool, is mostly in the hands of the Tibetians and Tartars, and to them and the people of Asia Minor do we owe the present perfection of these fine Goats. Let our Indian Agents try the experiment; if they will furnish the common Ewe Goats, I can furnish the Shawl Goat Bucks.

Asia Minor is full of historical, classical and antiquarian associations and relics. We visited a number of the renowned Sites, Ruins and Battle Fields—from the Plains of Troy, the Battle Field of the Granicus and Alexander the Great, Issus to Arbella, and of Ancyra, where Sultan Bazazet was overthrown by Timour the Tartar or Tamerlane. What armies have surged over it, what desolation has been made for 3,000 years, many of the present ruins still attest. With a delightful climate, fertile soil, magnificent scenery, mines of wealth, under and on top of ground. It only requires the hand of the Christian civilization of England or America, to make it blossom and bloom as a garden, where all is now desolation—where we may truly say, "Every prospect pleases and only man is vile." Government intolerant and oppressive, Religion fanatical and bigoted, Education limited, Newspapers almost unknown, Improvements discarded, almost everything in its most primative condition. Is it not astonishing that England and France uphold such a Government and Country retarding civilization, oppressing Christianity, and opposing development. But our Tour was full of interest; the people and officials hospitable and kind, making our visit agreeable and profitable; for the Turk and Mohamedan has many redeeming qualities, such as honesty, fidelity, temperance.—Thank Heaven there is no liquor selling and drinking among the faithful:

We intend to send some of these celebrated Goats to California next spring, although they have already been quite successfully introduced there. I made collections of the soil, minerals, shrubs and pasturage on which these Goats feed in Asia, for comparison here, and of which I hope soon to be able to give a full report. Some of the Silk Worm Eggs I collected from Brussa and Constantinople, I think would be admirably adapted to California, and would commend those interested in that branch to apply to the Agricultural department for some; as in Asia the wine grape, silk, and fine fleece seem to be peculiarly allied. We opine that large portions of the Plains of the Pacific coast will become the Wine, Silk, and Golden Silken Fleece lands of America. A brighter day is dawning upon Turkey, even amid the signs of revolution, regeneration and dismemberment of the "Sick Man," things must improve.

Our American College and American Missionaries are doing a noble work. Our engineers, our shipbuilders and mechanics are contributing their labors, knowledge and mite, and travelers transporting knowledge and wealth to both countries, and the occidental reflecting back the light and blessing once emanating and received from the Oriental World.

Respectfully Yours,

ISRAEL S. DIEHL.

Silk Convention.—Report of Silk Convention in our next.

Agriculture.

COATES BROS' WOOL CIRCULAR.

PHILADELPHIA, March 1, 1869.

The activity which characterized the Wool market in January has continued through the past month—sales being principally confined to the finer grades, of which the stocks were large, while the low and medium grades were much reduced in quantity, and held, consequently, at relatively higher prices—did not offer the same inducement to manufacturers to purchase ahead of their wants.

Although stocks of fine wools have been considerably diminished by sales in the past month prices continue very low compared with cotton or almost any other article of merchandise, and lower than was obtained for the same descriptions immediately before the war, in gold. Manufacturers, therefore, feel greater confidence in purchasing freely, although the spring trade has not yet fully opened at the advanced prices for their fabrics, which they were naturally led to anticipate, from the prosperous condition of the country generally.

As most of the fine wool remaining on hand is held in Philadelphia and Boston, and as dealers in both cities are disposed to effect sales, and to meet the views of manufacturers, it is probable that most of the old clip will pass into the hands of consumers during the present month—thus allowing dealers to close their business and make preparations for the coming clip, now only a few months off. Should the well-founded hopes of manufacturers be realized in renumerative prices, when the Spring trade shall have fairly set in, they will then be better prepared to pay the advanced prices which may be reasonably anticipated for the new clip.

Manufacturers do not object to paying growers a fair and liberal price for wool, *provided* it is well washed and in good condition; while farmers and consumers at the same time are willing to pay a fair price for goods which will warrant it. But growers must bear in mind that good manufacturers discriminate very carefully between good and bad-conditioned wools. It is the superior condition of most of the wools received in this city, and the care with which they are handled, that is attracting so large a portion of the Eastern trade to this market.

The sales for the month, of Domestic Fleeces and Pulled, foot up about 2,031,000 pounds, within the range of 50 to 65 for Fleeces, and 43 to 50 for Pulled.

DOMESTIC PULLED.

City Merino Pulled, Long	$ 44 @ 47
City Merino Short	40 @ 45
City No. 1 Pulled	46 @ 48
Western Merino	40 @ 45
Western No. 1	44 @ 46

Medium Unwashed Fleeces	33 @ 36
Common Unwashed Fleeces	30 @ 33

COATES BROTHERS,
Nos. 127 and 129 Market St.

FARMER'S COMPLAINT.

A farmer subscriber to the *Agriculturist* says the farmers complaint is when asked to subscribe to an agricultural paper, is "I am too poor, I cannot afford to take a paper."

This class of farmers, he says, will always remain poor. In consequence of not taking a paper advantage is frequently taken of them by unprincipled persons. As they don't read they know nothing of the markets, nor of the progress that is being made in improved machinery, and labor-saving machines generally. In consequence of this ignorance they frequently lose more in one season than would pay the subscription price of fifty Agricultural papers.

They are content with farming after the plan of that pursued by their fathers, grand-fathers and great-grand-fathers. He don't believe in book farming—in other words, they don't believe in progress, and consequently their crops deteriorate every year; their land, instead of increasing in fertility, is becoming less productive every year, and the inevitable result is that they are getting poorer every year, until finally they are compelled to sell out, and resort to other business for a living.—*Central Union Agriculturist.*

THE GREAT MAP.

We call especial attention to the *Advertisement* of J. T. Lloyd, Esq. of New York, of his New Map of *America* and *Europe*.

This is one of the most important Maps ever yet published, and very soon we shall show them at our Reading Room. Everybody should have one.

THE WHEAT STILL COMES.—Although Wheat does not pour into our city in such large quantities as formerly, yet enough is constantly coming to show that the country is full of it.

By the Stockton papers, we note the great San Joaquin Valley has enough of it on hand. One shipping house sent from Stockton, the present week, one hundred and ninety tuns, and another, forty tuns.

CATTLE FEED.—From every source we have constant information of the excellence of Oil Cake Meal as feed. We have met hundreds of our Stock Men and Dairymen who have used this food; all who speak of its excellence above all other kinds of food, and cheaper too than any other food known.

ANECDOTE OF HORACE GREELEY.

Hon. Augustus Maverick, one of the editors of the *New York Evening Post*, contributes the following amusing sketch of Horace Greeley, to one of the evening papers of that city.

During one of the most terrible snow storms that ever visited New York—in February, 1845—the office of the *Tribune* was burned down. The paper had "gone to press" at half-past two in the morning, and the whole edition had been delivered to the carriers, when, at four o'clock, a fire broke out in the lower part of the building, and two hours later there was only a heap of ruins. At eight o'clock, looking on from the brink of the fiery chasm whence smoke and steam still ascended, I saw Greeley trudging through two or three feet of snow, closely followed by his partner, Thomas McElrath—the latter a shrewd business man, to whom Greeley has frequently attributed the pecuniary success of the *Tribune*.

The two advanced to the edge of the gap which held all that was left of the *Tribune* establishment, and I, standing by the side of Greeley, put to him this question:

"Well, Mr. Greeley, what are you going to do? Will the *Tribune* be published again?"

Greeley replied, with that curious corrugation of brow which always indicates any perturbation in his mind, and in the odd falsetto note with which he gives ear-piercing expression to any woe that may afflict him, "I—do—o—n't know!"

Just at this moment McElrath came up. Greeley turned to him with a woe-begone expression, and said:

"Well! McElrath, this is a pretty clean smash! What shall we do?"

McElrath replied, "Get out the paper to-morrow morning as usual!"

It was done. Though the partners did not know but they were ruined; though their safe was still roasting in the ruins with all their books in it, and though their capital was exhausted, the indomitable energy of McElrath caused the paper to appear at the regular time next morning, and the event proved to be the best kind of an advertisement, for it brought the *Tribune* literally a thousand compliments, and gave its managers a lasting reputation for energy and enterprize.

Winchester's old building, No. 30 Ann street, was hired; a publication office was fitted up for the reception of advertisements; on the top floor printer's cases were speedily filled with eight or nine different kinds of type, picked up anywhere and everywhere; Greeley was stowed away in the corner of an unfurnished loft directly under the printers, and his desk was a smooth board supported by two barrels; all the other improvised appointments being of similar simplicity. Here all hands were soon busily at work, for the whole paper was to be reset. The business was done—the paper was served to its subscribers at breakfast time, and, a few months later, the building now occupied by the *Tribune* was finished.

HOW TO DETECT ADULTERATION IN ANILINE DYES.—Adulteration: Granulated sugar or salt is mixed up in proportions with the Aniline Crystals. The Crystals yield their dye so profusely that the sugar or salt at once assumes the very same hue, so that to ordinary observation the fraud is not discernible.

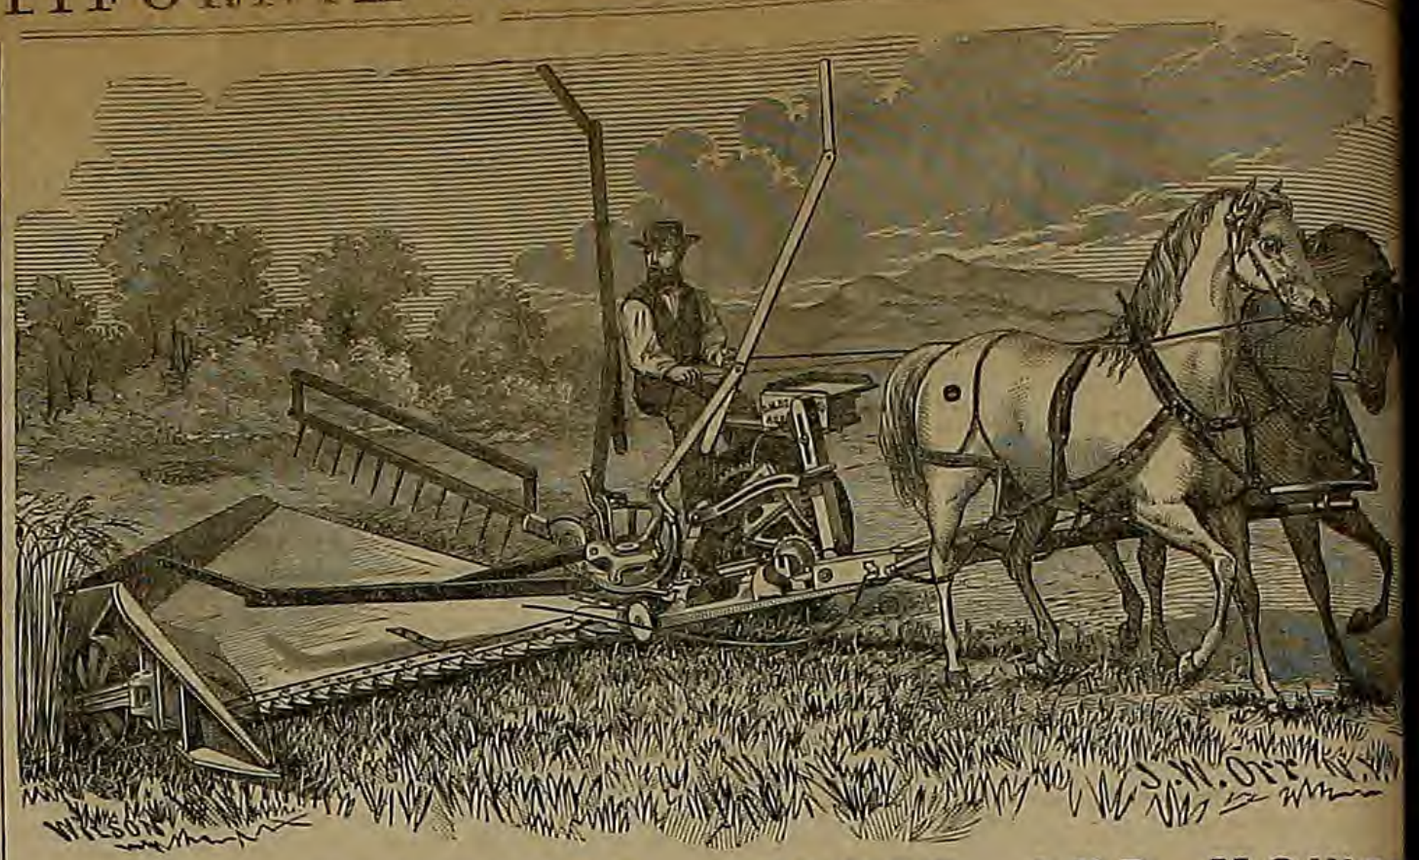
Detection: Dissolve the mixture in methylated spirit. Repeat the spirit until the dye is absorbed when the granulated sugar or salt will be precipitated, *not having any affinity for the spirit!—Macrae's Circular, Liverpool.*

—Not only sound principle, but gentlemanly courtesy make it my duty to break my ballot in twain like my daily loaf, and share it equally with my wife. The one woman whose rights I am bound to respect is an American citizen, who wants the American citizens ballot.—*Theodore Tilton.*

THE
EARLY ROSE POTATO.
THOSE WHO DESIRE TO SECURE THE
GENUINE EARLY ROSE POTATO
Can do so now, as we have received by LAST STEAMER, a lot of the same direct from
HEADQUARTERS,
From GEORGE A. DEITZ, ESQ., the well known Seedsman, whose Advertisement appears in our columns this week. We call the attention of all who wish this desirable
POTATO
To send their orders in quickly if they would secure from this stock.
We call their attention, also, to the several articles we publish this week from the best sources about this wonderful Potato. WARREN & CO.
Farmer Office.

THE NEW
OATS AND CLOVER.
We have received per last Steamer, a few bushels of these New Grains, pronounced to be very wonderful.
We shall put the Surprise Oats, and the New Brunswick Black Oats up in parcels of PINTS and QUARTS and send them free by Mail at 50 and 25 cts.
The Clover Seed in parcels of ¼ lb for $1 per package.
Orders must come immediately to secure them as we have only a small lot.
Cash must accompany the order. WARREN & CO.
Farmer Office.

To Take Charge of a Place.
A young man with some capital (from $500 to $1000) can hear of a good opportunity to take charge of a new place and have an interest if he desires.
A person somewhat acquainted with the nursery business is preferred.
No one but a steady and industrious young man need apply.
The applicant must be able and willing to work, and have a love and taste for rural life. To such a person a good chance can be given.
Address G. A. B.
Care of FARMER Office



KIRBY'S COMBINED REAPER AND MOWER
WITH COMBINED SELF-RAKE AND REEL
TWO COMBINATIONS IN ONE MACHINE
This is the only TRULY COMBINED MACHINE in the world While many machines PROFESS to be Combined, and some of them are very good Mowers, and others very good Reapers, there are none that Combine both qualities like the KIRBY, and work in either capacity as well as if designed for no other purpose.
"MONITOR"
Self Raking Attachment IS THE MOST PERFECT THING IN THAT LINE EVER INVENTED.
It is COMPLETELY SUCCESSFUL in any or all conditions of Grain, either Heavy, Light or LODGED, or in the heaviest Mustard; as over a Hundred Farmers on the Pacific Coast, who are successfully using them this year, can testify.
The Kirby can cut the largest Mustard without any trouble, and rake it off also, if necessary.
We shall keep a large supply of EXTRAS of all kinds on hand.
The working of the "MONITOR" is so complete, that the closest scrutiny cannot discover that the team works any harder when it is taking off the heaviest burden. In fact, it is easier for the team to run the KIRBY COMBINED REAPER with the "Monitor" Self-Rake on it, than it is to carry a man to rake off, and the grain are left in much better shape for the binder; so much so, that many claim that it saves the work of one binder, to say nothing of the difference in scattering the grain.
By a device lately invented, the size of the gavels can be regulated at the will of the driver, according as the grain stands heavy or light; it consists of a treadle which operates on one of the ways of the Rake-arm, so that the Rake can be thrown and pass over the grain until a gavel of the right size is collected upon the platform, then the Rake, of its own accord, will sweep it off.
This machine can be set to cut at any desired height from the ground, from two to eighteen inches, by merely changing two bolts, one in the grain-wheel slide, the other in the axle plate, where the joint or independent action is obtained.
This machine never had an equal in heavy lodged grain or grass, as it is in such cutting that it shows its superiority to the best advantage.
TREADWELL & CO.,
Sole Agents for the Pacific Coast
30-22—no1

TRUE'S
IMPROVED
POTATO PLANTER.

This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes ever introduced.
It Saves the Labor of 12 Men in Planting Time.
Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed
No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.
This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.
The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.
We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it
Particulars and Catalogues can be had at our office.
WARREN & CO.,

Horticulture.

RURAL TASTE.

It is a common mode of thought to assert that the farm and home should be the spot in which a taste for rural ornament can be most appropriately and successfully developed. This is true but as a sequence from other beginnings; and we are disposed to attribute the education of one's taste as much to the associations of the school-room and grounds as to home associations. If in our country districts the old, shaggy, red or brown weather-beaten structures for school-houses were replaced with buildings of an ornamental style of architecture, with grounds appropriately laid out and planted in something simple, perhaps nothing beyond a pretty lawn plat, surrounded by a neat fence, and planted in evergreens, we feel sure that the constant sight of this pleasant object, and the associations naturally formed in the mind of the scholar, would do far more good than centuries of lectures or libraries of books. The taste of a child comes from the school-room as well as the home, and goes from one to the other. Hence we make a plea not only for the improvement of our country school-houses, but for the importance of extending this subject even beyond, to *College Grounds*. In the minds of college managers it seems only necessary to secure the ground, "the *terra firma*," and then build their massive walls; and when that is done, all is done. Not so, indeed. Thousands of young men and women frequent these grounds day after day and year after year. If the grounds are well laid out and tastefully displayed, there is an opportunity presented for the development and culture of a refining taste, such as no musty literature ever possessed. It is practical, too, and will insensibly help to mould the future disposition and character, and act on it for years to come.—Let us then remember that if we would have rural art and taste become wide-spread, we must begin with the youth of the country, and at the fountain-heads of education.—*Horticulturist.*

MARSHAL NEIL ROSE.

This beautiful climbing rose, introduced about four years since, is now foremost among the few that have sustained the reputation given them when first brought before the public. We have had plants of it over three years, and can vouch for its excellence. The rose is of a deep canary yellow, of very large size, and of exquisite fragrance. It has received the highest commendation and first-class certificates at all the English flower shows, and must be regarded as a great acquisition. When grown in the open border, it should be protected by throwing the branches upon the ground before hard frosts occur, and placing over them as well as the roots a covering of thick sods. In the spring, train up and prune as desired. As a rose for the rafter of a green-house or conservatory, it is unsurpassed for its magnificent blooms. In the South, it will need no protection whatever.—*Horticulturist.*

A RIGHT HANDED THEORY.

Many ask, with reasonable wonder, why we use the right hand in preference to the left. Nature appears to have dictated the habit; its universality goes far to prove that it is instinctive: for among existing nations none seem to be gifted as the Benjamites of old. The left arm is the weaker, but whether naturally or from disuse remains to be ascertained. It would appear that the difference of strength extends to the organs of locomotion. When we meet an obstacle in walking, it is easier to turn to the right than to the left, as if the right leg had the most power and freedom of motion; and it is said that if a man loose himself on a plain, without any guide or land marks, he will, in his efforts to go straight forward, invariably bear to the left, the dexter imperceptibly making longer strides. Even a left handed man uses his right manual for many purposes; and a right handed mortal has to train hard to become ambidexterous. Only one suggestion can we afford to account for the general right handedness; that is, that nature has designedly kept the working arm away from the heart, that the violent actions of the one, may affect as little as possible the delicate functions of the other.

We clip the above from one of our exchanges.

We think nature designed us to use *both* hands and feet alike, if it were not so we should have been deformed, for their formation would have been different. Were parents to commence with their little children, and teach them to use right and left hand alike, the child would be much stronger and healthier; for we believe that as a general rule, disease of the lungs commences with the left lung first, and this, because by reason of little use it weakest.

We know many persons who use both hands in the ordinary uses of life, and it is a great advantage to them, and they are much healthier also; by reason of the non-use of the left arm and left leg, and the these members of the body are less in size and power, this is surely not the intention of the God of nature, this is a subject worthy of serious consideration.

ANATOMICAL MUSEUM.—This place for true Scientific and Physiological knowledge of "The Age we live in," we are glad to say is more liberally patronized than formerly. To those who seek knowledge, the Anatomical Museum presents opportunity that can be found no where else—for this knowledge is needful to all.

The price of admission has been reduced one half—it is now only 50 cents admission.

THE

PHOTOSCOPIC

Table Company.

THE NEW INVENTION of this Company is known as the ANTHROPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION

this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group FAMILIES entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changable pictures, arranged to suit the wishes an desires of each owner of the table.

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

Those who desire to PURCHASE, can see one of the Tables by calling at the FARMER Office, or addressing

EDITOR FARMER. 32-1

GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

STEAM
Printing House.
The Largest Office in the State.
No. 517 CLAY STREET,
510, 512 & 514
COMMERCIAL ST.
FRANCIS & VALENTINE

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,
(Of the firm of Hucks & Lambert.)
No. 708 Lombard street, North Beach.

VALUABLE PLANTS FOR SALE

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....MAY 27, 1869

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is TWO DOLLARS for five lines or less of space, in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞Those who receive a number of the FARMER with a paragraph marked, may understand that it is sent to them for their examination hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of our Journal, to which we would direct their special attention.]

Our readers will find a most interesting Letter from Rev. I. S. Diehl, upon the resources of Bible Lands which he has visited, and which as Mr. Diehl informs us, so much resembles California.

We had a pleasant interview with Mr. D. on our way to Sacramento, and shall give some other valuable facts gathered from him, soon.

The Letter we give this week was prepared for us sometime before he left the East, and given to us here, which will account for some expressions in it.

Our New York Correspondent gives us agreeable Letters, touching the Completion of the Pacific Railroad in New York.

The Letter of the President of the Massachusetts Agricultural College gives us the hope that California may ere long be Honored by a visit from him with other noble laborers in the cause of Agricultural Education.

ALLEN'S NEW FARM BOOK.—This is a capital book, just issued from the press of Orange Judd & Co., New York.

This book is a practical text book, giving all the details of information needed by the seekers of knowledge of farm duties—the work is over 500 pages, was originally prepared by R. H. Allen, but this is a revised and improved edition, by L. F. Allen of N. Y.

PACIFIC RAILROAD.

We call attention to the new advertisement of the Central Pacific Railroad, on our last page, under the Travellers Record, here is given all the *New Stations, Time Tables, Distances, Rates of Fare* and all the needed particulars so important to Travellers.

It will be seen that not only the rates of fare, on the Central Pacific are given, but also on the "Union," so that the whole cost of travel, from San Francisco to Omaha, St Louis, Chicago, New York or Boston, can be readily known. This will be of material benefit to travellers,

CONVENTION OF SILK GROWERS.

A Convention of persons interested in the raising of Silk Worms and the growing of the Mulberry will be held at Sacramento at Agricultural Hall, to-morrow, (Friday,) when it is expected a large amount of interesting matter will be laid before the meeting, which it is hoped will be largely attended.

It is to be hoped that measures will be taken to correct some of the very erroneous statements which have recently been promulgated in some of our daily journals.

REAL ESTATE at SACRAMENTO

SIX TO TEN BLOCKS,

Well situated in the suburbs of the City in entire Blocks, with Twenty or Thirty Lots sperate, singly, or more, all desirably located for Building Lots. Will be sold at reasonable rates, if applied for soon to

WARREN & CO., Farmer Office,
Or GEN. JOSIAH HOWELL, Sacramento City.

CRANBERRY PLANTS.

The Genuine *Ball Cranberry Plants*, just received by overland route, in the most perfect order, only a few days on the way.

This is now a grand chance for those who have *"Tule lands,"* for if planted now, they will begin to yield the coming season. Apply at

FARMER OFFICE.

OUR CROPS.

We know the *Sun* has spots—we know there is no unmixed *Good* therefore, we need not say the crops are *perfect* everywhere, but this *we do say*, and without the fear of having it shown to be otherwise, that we have never had a more propitious, more delightful, or a more prosperous Season; nor have we had so sure a prospect of a most bounteous and abundant Harvest of all the Grain Crops, and all the material products of the Earth as we now have before us at the present moment.

We have been abundantly blessed with "The Early and the Latter Rain," and if a field of grain here and there, that was heavy with its foliage or its forming heads may have fallen down by the recent rain, or if a field here and there, by reason of late or shallow plowing may have been scorched a little, or if the *Rust or Smut*, by reason of *neglect* in any of the wise cautions needed in the preparation of the soil, or seed, has blighted a small patch here and there, just enough of these "spots on the Sun" to give to croakers a chance to find the cloudy rather than the sunny side of the Beautiful prospect over the wide harvest fields that God has so abundantly blessed. Shall we murmur?

This we do know, there is no material injury to our Crops over the broad surface of our now prosperous State, but on the contrary, every good, honest, grateful heart feels joyous at the prospect of such abundance.

Our Grain Crop will be very large by reason of the widely extended area of cultivation, and a better system of culture, which will give increased crops.

The Grain Crops of Oregon promise well and will by their abundance materially affect our markets.

The old Grain growing States of the Union have promise of very large yields, and the price must rule low.

Our Wool Clip (this comes under the head of crops) crops out over and above all former years by millions of pounds, and we call special attention of our wool growers to the remarks on wool, under the Agricultural head on page 138, from Coates Brothers' Circular, for it is important that our wool growers should note the facts stated by this large firm in Philadelphia, relative to *Good Clean Wool.*

Our Business Men, as well as our Harvesters should now be making ready for this great source of wealth.

The South that in all years previous to the War drew largely on the North for Flour, Wheat, and Corn, as well as other products, are now large and successful producers of these very articles, in some places even to excess. This was the part of wisdom with them, but it will affect the prices and demand at the East.

The Crops in Europe give good promise of abundance as the *scale of prices* now indicate; and with these facts, and the knowledge that we have now *quite a large surplus of old wheat on hand*, we should be ready to meet the circumstances of the Harvest that surround us, and make the best of it by *immediate shipment* of all the *Grain and Breadstuffs* possible, and *stay the shipment* of Treasure. This *must be the policy* of the producers, or they will make a mistake they may regret.

The changes that must take place by reason of our nearness of contact now with the old States and Europe are such that our *Money Markets*, as well as our *Grain Market*, and the value of all *produce and manufactures* must be affected, and our Farmers—our producers *must wake up* and keep thoroughly advised.

CAUSES OF UNHEALTHY CHILDREN.

The following from one of our standard medical publications, is worthy of the most serious considerations of those parents who would desire to have their own children of a healthy nature.

Here we have facts the most conclusive, that it is impossible for parents addicted the *habitual use of strong drink*, to beget heal by children, their vital blood becomes tainted, and disease and crime, is likely to be entailed on all such progeny.

We presume that the same law would hold good in regard to the use of *tobacco*, that those who are habitual users of the weed, become diseased in their blood, which must unfit them to produce healthy children, here is a question for our medical men, and if they are faithful to their duty, they will certainly meet this question, and advise the public faithfully; we are now satisfied that drinkers and smokers can never beget a perfectly healthy race of childen.

HEREDITARY ALCOHOLISM.—A young pupil of one of the Seminaries of France, has just been condemned to twenty years hard labor, for murdering one of his companions and setting fire to the building. Several able physicians have examined the young man for several months, in order to ascertain whether he was insane at the time he committed the above crimes. They came to the conclusion that he did not act with any of the characteristics of insanity, but that his father having been for a long time before marriage addicted to alcoholic liquors, he may have transmitted to his son a strong predisposition to insanity, which at any moment of excitement may deprive him of his moral control. The doctors in the course of a lengthy examination declared that alcoholism, or the peculiar change produced in the brain and nervous system, by a long use of alcoholic beverages becomes incurable, and that person thus affected cannot be cured of habitual drunkenness. They transmit to their offspring impaired organs which expose them to insanity when the growing forces of the body has diminished. They have come to the above conclusion from an immense number of observations in the public asylums of France, and I have classed the different stages of the affection under the general name of Hereditary Alcoholism. We think that observations made at the New York Inebriate Asylum confirm those we have just stated.

SILK CULTURE.

There is at the present time, quite an exciting feeling in regard to this interest among those who are now engaged in the business.

We had a call from Mr. Prevost the Pioneer, he is now soon to locate permanently at Los Angeles, as is seen by his letter in our last weeks issue. We also recieved a call from other persons, who are engaged in this culture in the southern region, they all claim, with Mr. Prevost that *down south* is the place for silk culture, while our enterprising friends Haynie, Hoag and others, claim that, in the great Sacramento Valley and along our mountain sides, there is as grand a chance as anywhere else to raise the mulberry tree, rear the worm, reel the silk and spin the fibre as anywhere else.

We are fully satisfied that this interest can be made to prosper all over this state, if all those that are engaged in it will go to work *unitedly*, lay aside all jealousies of localities and of personal plans and views, and *study what is best* and what is most profitable for the *general interest.*

What is now wanted to make this interest a GRAND SUCCESS, is, to lay aside the idea of *making a fortune to morrow* from the *labors of to day.*

This business will be the work of years, and those now engaged in it, should "Learn to Labor and to Wait."

NEUMAN'S EXPERIMENT.

We received a card of invitation from Mr. Neuman, to visit his New Rooms on Commercial St., and see the process of reeling the silk from the cocoons. Mr. Neuman sent invitations to all the Press, to call and see the operation of his New Machinery.

The process is about the same as shown at the several Fairs the past year, with some improvements in the heating apparatus, by which a better drying process is given to the fibre as it passes from the cocoon to the reel, from the hands of the woman operative who handles the cocoons in the hot water, and unites various threads as they are released from the gummy cocoon in the hot water.

The process is a very interesting one, and the glossy hanks of bright yellow and white delicate fibrous threads, show we are progressing rapidly in this enterprize and certainly great credit is due to Mr. Neuman for his zeal, enterprize and industrious perseverance in this work so long, and against the fearful obstacles which always beset new and doubtful enterprizes, and it is much to be regretted that some of our wealthy men, do not take this Enthusiastic worker by the hand, counsel him wisely and aid him in a just and liberal way, and give him a chance to carry out his designs and make this work prosper.

We saw also the large hanks and skeins of silk, preparing for the MAGNIFICENT SILKEN BANNER, which we learn Mr. Neuman is to make for the STATE CAPITOL at Sacramento, which will be given to the breeze, on the opening of the next Legislature. Mr. Neuman is also to prepare a magnificent banner for the Capitol at Washington.

That the silk business will eventually succeed with us, and be made very profitable we have no doubt—but like all New Enterprizes, it must have its ups and downs, its excitements and its lulls by and by, the current blood will run steadily and the day of manufacturing will begin in earnest, our worthy Pioneers may not all live to see it in its glory, but we must *all remember this life lesson.*

Pioneers conceive, and plan great and good works, they press them into life and being, then pass away and leave others to finish what they have designed. The last few days in this city has seen that truth verified—for several of our eminent men, who were true Pioneer laborers have passed away—and others must take up the work where they left off, and carry it on to perfection.

So will it be on the Silk Enterprize, so with all Human Enterprizes, and we all must read the lessons of the day and the hours as they pass, for the *Silken Thread* of life is but a span long, and the weaver knows not how soon the brittle thread will break, or the shuttle cease to move.

SUMMER GARDENS.

We have repeatedly urged attention to a careful culture of the *Garden Spots*, in Summer.

We regret to find so many persons, who seem to think they cannot have a flourishing garden in the dry season, this is a very great error—in this climate with proper care, we can have a *Perpetual Garden*, and there is nothing easier.

With proper knowledge in preparing the soil, young plants can be transplanted from pots, to make a succession of flowering plants, and they make a continuous show of the richest of blooming gems, but to do this demands care and knowledge, and those who *love beautiful flowers* will be willing to give this *care*, and those who are *wise*, will greedily thirst for the knowledge to do so; if there are any who desire to know the way, and it seems dark to them, if they will call at our office we will most cheerfully direct them in the "way they should go."

Don't Bleach Your Hay.—As this is the Haymaking season, it is all important that our Haymakers should bear in mind that the Hay that is *cured green* will always command a much *better price* than that which has been allowed to lay in small heaps in the field and *Dry White.*

It will be found to be less labor, and much easier to cure hay *green* than otherwise, when cut down, a little time only is needed for it to lay before it should be gathered in large stocks, where it will dry green and be much sweeter, by retaining all its aroma, while hay that remains in small heaps, losses more than half its goodness.

—It is rumored that the Prince Borghese of Rome, the owner of the finest gallery of paintings in the world next to that of the Vatican, is about to sell his art treasures to Russia for the sum of 35,000,000 francs.

THE NEW STRAWBERRIES.

The new varieties of strawberries, which have created considerable interest and excitement in the old states, we believe will prove valuable acquisitions here; we believe they will luxuriate in our dry and hot climate.

We, ourselves have made an experiment with them, having imported several of the new kinds, and *planted them in this city*, and although we received them at a late date and *through the mail* the plants came in the most excellent order, and nearly every plant grew finely, and have fruited with us *this, the first season*, and they are still in bearing order and can be seen by all who wish to see handsome plants.

We have fruited the following.

The Dr. Nicaise. This famous fruit came to us with a great fame, said to produce berries, *nine to the pound.* This variety produced very handsome berries *three* and *four* to the plant, measuring *four* and *four and a half inches in circumference*, this for the first product is most satisfactory. The fruit was handsome in form, dark color and rich flavor, of the taste of the peach.

We feel confident that it will prove a fine fruit with us as a market fruit.

The Golden Queeen. Another new variety, and ranking high among *connoisseurs* of fruit. We have fruited this very successfully, and from vines imported by mail very late this season; many of this variety gave us large clusters, several berries *four inches in circumference*, a very handsome fruit, solid, a rich pine apple flavor, a healthy vigorous plant, and must do well here.

The Nicanor. Makes a healthy growth, has not yet fruited, *in blossom.*

Green Prolific. Now setting with fruit, handsome foliage.

Early Scarlet. Has fruited, fruit thus far small, but very sweet and delicious.

Agriculturist. This variety has fruited admirably with us, berries large, conical, rich color and very rich flavor, the plants bear well.

Jucunda. This variety gives us very large, dark and rich berries, the fruit however does not keep well with us, but grows soft quickly.

Seedlings. We have several new sedling strawberries that have been raised from *Hybrids* that promise well, some now *fruiting in pots* with large clusters.

City culture. When it shall be remembered that our experiments are made *in the city*, surrounded with sweeping winds and clouds of dust, and with plants that were *imported by mail in March*, we think it speaks well in favor of the *varieties*, as well as of our climate.

We shall be very happy to show these plants in their present *growing* and *fruiting* condition, to all who may wish to see them, they can do so by calling at the Office of the *Farmer*, and they will be directed to the gardens.

We are much pleased with our success with these New Fruits, as they prove the excellence of our climate for these delicious fruits.

JOURNALISM.

In eight years the entire range and method of the newspaper business has undergone a revolution. First-class editors are rarer than first-class lawyers or doctors; and a first-class reporter, like a thing of beauty, "is a joy forever," so rare is he. It is a great mistake that local reporting is a second-rate employment. It is so considered because second-rate persons so often fill the desks on a daily journal. But it is really a most important position. It requires tact, originality, industry, sobriety, good sense, intelligence, quickness. Of course, every department of a well conducted press calls for all these excellent traits, more or less; and, therefore, it is harder to equip a newspaper than to organize an army, or officer a man-of-war.

During the next fifty years the press will play the most conspicuous part in public affairs. It will be what its sycophants have always claimed for it, but what it has never really been, the "fourth estate." Ultimately, books will cease to be written. Belles lettres will be confined to the standards. The newspaper, enlarged and every way improved, will probably supply the public its daily mental food. There is little reason to doubt this; and, as soon as it comes to be generally understood, ambitious young fellows will begin to turn aside from the old fogy professions and take to journalism as their fathers took to law and physic. Editors will be less rare then than they are now, and more competent. Anybody can write. But writing is the least part of journalism. In fact, literature and the daily newspaper are only second cousin, and the one is a sort of "poor relation" to the other. Journalism, strictly, is the science of human nature; a combination of action, and the actor's art, at once a reflection and the thing itself.

The really able journalist must therefore be not only a man of thought, but a man of action also. The voluptuous litterateaur has no place in the modern printing office, for he only is useful who can work at night; give up society; subordinate his personality to his craft; consider himself, while on duty, as a man on a voyage, bound to serve out a certain time. A newspaper is, indeed, a ship at sea; and almost always in a storm. The billows of popular passion are out there on every side, seething and foaming. Keep her steady to the wind and there is no danger; but it is fearful to try to run against the current, or in the face of the wind, and the least insubordination or inebriety or the lack of skill of officers or crew may be fatal. —*Exchange.*

—A gentleman in one of the interior towns of New York bought a velocipede for which he paid $100, broke a plate glass window for which he paid $40, cut his face and neck, which cost him a doctor's fee of $5, ruined one pair of pantaloons for which he paid $11, frightened a horse so that the animal ran away and broke a buggy for which he paid damages amounting to $60, and to cap the climax, he finally smashed his velocipede by running into a brick wall, leaving him $216 out of pocket and a court-plastered face to show for it.

PASSING AWAY.

The very great Loss which our city and our State has recently sustained by the death of some of our most energetic and influential citizens, the rapid and almost weekly departure from our midst of these *Noble Pioneers*, whose labors for the past *twenty years* in various departments of business have tended to make California a great and prosperous State, should awaken serious thought in the minds of all, of not only paying a proper tribute to the memory of those who have "Passed Away," but of being just to the *little band* who "still live" and are laboring to perform *their* work ere they shall be called hence.

Within a single week the names of "Gordon," "Manchester," "Cogbill," "Pio Pico," have been enrolled upon that Scroll which is never filled. *They* have passed away from the active scenes of life with us, and their years of labor are *better appreciated* and their absence more keenly felt, perhaps because the world is so slow to appreciate *earnest workers* till they are no more with us. But there is one thing that is true, after death comes the Judgement, and the Judgement of men will be given sometimes when its words of cheer cannot strengthen and encourage those whose labors have been given to benefit the race.

Charles Mackay has most truthfully given a picture of that decree which will be always true while time shall last.

ETERNAL JUSTICE.

The man is thought a knave or fool,
Or bigot, plotting crime,
Who, for the advancement of his kind,
Is wiser than his time.
For him the hemlock shall distill;
For him the axe be bared;
For him the gibbet shall be built;
For him the stake prepared;
Him shall the scorn and wrath of men
Pursue with deadly aim;
And malice, envy, spite and lies,
Shall desecrate his name.
But truth shall conquer at the last,
For round and round we run,
And ever the right comes uppermost,
And ever is justice done.

Pace through thy cell, old Socrates,
Cheerily to and fro;
Trust to the impulse of thy soul;
And let the poison flow.
They may shatter to earth the lump of clay,
That holds a light divine,
But they cannot quench the fire of thought
By any such deadly wine,
They cannot blot thy spoken words
From the memory of man,
By all the poison ever brewed;
Since time its course began.
To-day abhorred, to-morrow adored,
So round and round we run,
And ever the truth comes uppermost,
And ever is justice done.

Plod in thy cave, gray Anchorite,
Be wiser than thy peers;
Augment the range of human power,
And trust to coming years.
They may call thee wizzard and monk accursed,
And load thee with dispraise;
Thou wert born five hundred years too soon
For the comfort of thy days.
But not too soon for human kind;
Time hath reward in store;
And the demons of our sires become
The saints that we adore.
The blind can see, the slave is lord;
So round and round we run,
And ever the wrong is proved to be wrong,
And ever is justice done.

Keep, Galileo, to thy thought,
And nerve thy soul to bear;
They may gloat o'er the senseless words they taught
From the pangs of thy despair;
They may veil their eyes but cannot hide
The sun's meridian glow;
The heel of a priest may tread thee down
And a tyrant work thee woe;
But never a truth has been destroyed;
They may curse it and call it a crime;
Pervert and betray, or slander and slay
Its teachers for a time.
But the sunshine, aye, shall light the sky,
As round and round we run;
And the truth shall ever come uppermost,
And justice shall be done.

And live there *now* such men as these—
With thoughts like the great of old?
Many have died in their misery,
And left their thoughts untold;
And many live, and are ranked as mad,
And placed in the cold world's ban,
For sending bright far-seeing souls
Three centuries in the van.

They toil in penury and grief,
Unknown, if not maligned;
Forlorn, forlorn, bearing the scorn
Of the meanest of mankind.
But yet the world goes round and round,
And the genial seasons run,
And truth ever comes uppermost,
And ever is justice done.

OFF FOR THE EAST.—At 6½ o'clock, this morning a special train, composed of the family cars and attendants, left for the East with Mr. and Mrs. Chas. Crocker and two children, Mr. and Mrs. Harry Miller, H. S. Crocker, Mrs. E. B. Crocker, Dr. R. H. McDonald. There was a number of friends on the platform to see them off. Our friend Siddons was on hand with his "Union Battery" and fired a salute as the train began to move. The train has everything—cook, waiter, sleeping accommodations, live fowls, fresh fruits, etc. It will reach Promontory in time to strike the Central Pacific train so as to lose no time there. C. P. R. R. took with him a variety of blooming flowers to show to the Eastern people what California can do in that line.—*Bee, 24th.*

[The friends of Internal Improvement and Enterprize East, will give a grand welcome to the happy group of friends.]

A LADY CORRESPONDENT FROM PENN.

LETTER NUMBER FOUR.

PITTSBURG, PA., May 13th 1869.

ABOUT ASPARAGUS.

"Will you buy the white asparagus that is abundant [illegible]?"—*Cal., Farmer.*

Will I know it; and I should not think any one could—more than once. But I am thankful to say that I am not obliged to buy any kind; I just take a pan and a knife, and go out and cut it off my own beds; such green, tender, juicy spikes capped with purple.

There was a hot sun yesterday, and last night a warm rain; and this morning I gathered a fine mess.

There are not two distinct kinds of asparagus; are there? green and white.—I have always supposed that the white was that cut below the surface, and I know that it is tough and bitter. I presume that market men are in a hurry to realize and can't wait for it to get above ground in the ordinary way. I wonder that every body that has a bit of garden, don't grow asparagus, it is so little trouble after it is started, and a good bed will last a lifetime.

Taking care of asparagus beds is real nice work for women, and I should think it might be made highly profitable too.

SAN FRANCISCO AND PITTSBURG PRICES

I see by the Market Tables in the *Farmer*, that asparagus is sold by weight in San Francisco, it is marketed at ten and twelve cents per lb in my last paper. (April 15th.)

In the Pittsburg market yesterday, it sold for ten cents a bunch, and I doubt if one of the bunches would weigh a quarter of a pound.

Rhubarb was selling at five cents for four stalks of the large kinds, which I thought a pretty stiff price for this—what is it?—it is certainly not a fruit, and it don't seem quite like a vegetable either.

I always read the market lists in the *Farmer*, with much interest, and I am consumed by envy when I find that you are luxuriating on new potatoes, green peas and cauliflowers, before we have planted ours.

But are not eggs very dear at forty and forty-five cents per doz.,—here they have been down to eighteen and twenty cents for some time.

GOING TO MARKET.

I think it is very amusing to go to market, but I should not like to go around with a big basket on my arm, laying in supplies for the household, as so many women have to do; indeed the marketing appears to be done chiefly by women.

I suppose the reason is, the men are at work in the foundries, factories and shops, earning the wherewithal to pay for the contents of the great baskets we see dragging on the arms of the weary looking women.

I have heard or read, that much of the marketing in Philadelphia, is done in the evening after working hours. The husband takes his wife on one arm, and his basket on the other, and away they go, and have quite a jolly time among the vegetable and flower stands.

Indeed I went to market once myself by gaslight, and the people really seemed to be having a good time of it. I met many family parties, and it did not seem the laborious affair, that morning marketing is, when left to the women alone.

AMONG THE FLOWERS.

I believe I have told you I was in the market yesterday.—Cousin Eve and I just took a little stroll among the flower stands. I was not going to buy anything—Oh dear, no—I had no money to spend for flowers, with my spring shopping to do yet, and I must begin to-day,—this old brown straw is shocking,—yes, I must positively buy a bonnet this very day,—and gloves—and pins—and boot laces—and a ball of twine for my morning glories to run on.

But we will just walk about and look at these lovely things, and inhale their fragrance. And that is all a millionaire could do. Thank heaven! the rich have no more senses than the poor, the best enjoyments are free to all. If I were as rich as a Rothschild, these flowers could not afford me any more delight than they do now. I was thinking some such thoughts as these, when Eve, who was at the next flower stand in advance of me, exclaimed.

"O Jenny! come and look at this carnation, is it not exquisite? Just smell it?"

"For shame! Eve, you are as bad as your namesake, and you know how easily I can be led by the nose."

For I may as well acknowledge it, I can be very philosophical as long as my olfactory organs are not appealed to; but the perfume of flowers really seems to intoxicate me; and a waft of fragrance from a heliotrope or tuberose puts all my philosophy to flight. And if I am ever taken up as a kleptomaniac, I shall not be found with a roll of silks or laces secreted about me, but with a flower pot of some sweet smelling blossoms under each arm.

Well, to be brief, I will merely say, that identical carnation is at this moment growing in the parlor under my window, along with a superb rose geranium and some other sweet things, and my new bonnet is still in somebody's shop window.

But, would a dozen bonnets from Paris, give me as much pleasure as my lovely carnation and rose-geranium? No; and I am not a bit sorry that I bought them, instead of one of those absurd little monsters—ycleped bonnets.

JENNY DARE.

REPLY.

ASPARAGUS.

We are glad to know people are begining to know the difference between good, wholesome and nutritious asparagus, grown above ground, and flavorless, tough and poisonous vegetable called asparagus, which is cut below ground before it is [illegible].

There has been occasionally the *Blanched Asparagus*, which after growing some 4 to 6 inces is then hilled up *like Celery* and blanched, that is preferable to the imitation white; but the natural green esculent, that will break off tender near the ground—that is the only kind worth eating.

OUR MARKETS.

Yes, in our markets we sell by the weight altogether, and we know we have the best and cheapest market, as well as the earliest market in Christendom. Our poultry and egg business, should make these producers rich, and although we say we have the cheapest market, yet Butter, Poultry and Eggs are in price enough to bleed a Rothschilds pocket.

Now Jenny, as the Pacific Railroad is finished, you can put on your little hat, take Eve, and come to market in San Francisco, jump into the cars on Monday morning, and you could almost carry back your next Sunday's dinner to Pennsylvania.

BUT THE FLOWERS.

Here is the place for this bright "Gift of Heaven," Carnations, fragrance! Here we need no other perfumes, natural flowers give us all we need—and here our geraniums and roses, and our fuchias and carnations, grow to trees; we ourselves have them 6, 8 and 10 feet high, and kept down to form at that—and a select flower from each of these, would make a larger and prettier bonnet than is worn nowadays by many of our fashionables, and we can give you a choice selection, if you will come and make a bonnet from them.

ECONOMY
WASHING MACHINE!

A new lot of the above named Machines, including all the latest improvements, are now ready for sale and can be sent to any part of the State.

Ninety-one (91) Machines are now in use in this County Township, where they were Invented, and still Manufactured.

Price of Machine, ... $25.

Letters directed to JONI M. HORNER, MISSION, SAN JOSE, LAMEDA COUNTY, will receive prompt attention.

20,000 NEWSPAPERS.

We have TWENTY THOUSAND Newspapers—Newspapers of the largest size among our Exchanges, suitable for WRAPPING PAPER for Dry Goods, Clothing, etc.

—ALSO—

TEN THOUSAND

Of the best gricultural Papers known, comprising our various gricultural Exchanges from all the Eastern States and Europe. Farmers who would like valuable reading matter, which contain choice Essays and Letters on Agricultural matters, can have these at low rates by the 100. pply at FARMER OFFICE.

NEW GRAINS AND GRASSES.

We ask special attention of all persons who have low meadow lands, or Tule lands redeemed, to the New Grains and Grass Seed received by the late steamers.

As these are entire *New Varieties*, never before known here, it would be well to plant small lots in order to secure the seed for another year.

To those who can do so advantageously, and to some extent, *we will furnish Seed on liberal terms.* Apply at *Farmer Office.*

ORANGE SEED.

THOSE WHO WISH TO RAISE TREES FOR AN *ORANGE PLANTATION,*
Can obtain SUPERIOR SEED at the
FARMER OFFICE.

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'
PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so consstructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULARS

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all the trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S

SELF-RAKING REAPER.

This Machine stands at Front of all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

Home Miscellany.

MRS. STIRLING'S RECEPTION.

"When thou makest a dinner, or supper, call not thy friends, nor thy brethren, neither thy kinsmen, nor thy rich neighbors"

"And so we are really settled in our own house. It seems too good to be true, don't it?"

As John Stirling's pretty wife was speaking, she let down the soft, heavy-falling, brocatelle curtains of the handsome room, half parlor, half library, where she sat with her husband; turned on a little more gas, so that the Italian peasant girl, and the dark, bright Spanish woman, on the alabaster shade of the drop-light, might display their beauties yet more glowingly; and then seated herself in a little easy-chair, beside the lounge where her husband lay stretched out in the enjoyment of the masculine comforts—evening ease and household sovereignty. Taking up a dainty bit of bright colored knitting, she went on:

"It was very nice, to be sure, boarding at mother's, but it was a sort of vacant life, after all.—This is so much better. I have something to do now."

John Stirling smiled.

"And something to govern. After all, I believe it is the love of power that makes you women so delight in homes of your own. I don't doubt, gentle as you women seem, that your servants find you as austere as the Great Mogul."

"I declare, John, you are too bad; I never scold and I'm sure every thing has gone on so nicely since we have been here—"

"A whole week and all the brooms new. But don't look sober. I have every confidence in your ability to keep the wheel moving."

She sat silent awhile, until her husband began to want to hear her voice again, and rallied her from her abstraction.

"What is it, little one? You seem in a brown study about something. Remember I'm your prime minister, and must know all the state secrets and cares of government."

"I was only wondering John, whether you would see a certain matter as I do. Do you realize how many parties we went to while we were at mother's? There were the Huributs asked us three times, and the Graysons twice, and you know we went everywhere."

John Stirling knew that very well. Somewhat reserved of nature save to those of his own household, and not fond of general society, going to a continual round of parties had been one of the sacrifices he had made during the first winter of his marriage, to please his gay little wife. The idea crossed his mind, as she spoke, that she, too, had wearied of so much excitement, and was going to propose for the future, a quieter life.

"Yes, I like it," she said, with a little embarrassment, for her woman's intuition divined the course his thoughts had taken. "I was only thinking, John, that, having accepted so many invitations, every one would say we were mean if we did not give at least one large party in return. It would be just the best time now, don't you see? Every thing we have is so fresh and new—our drawing-rooms are really elegant! I should so like to gather our friends round us, and give a sort of house-warming!"

"That's a primitive, comfortable-sounding term, Nellie. How much would this friendly little affair cost us?"

"Oh! I've thought that all over. We should have to ask every one we know. It wouldn't do to slight any. Besides, the more the merrier, you know. We could have Smith get up the supper and furnish the decorations. His bill would be about three hundred and fifty—say fifty more for music; and a new dress for me."

"Five hundred dollars, eh, Nellie?"

"Yes, I'm sure I could make five hundred do it handsomely. I could send out the invitations for week after next."

"Well, dear, you must let me dream over it. I really didn't know receptions were such expensive affairs. Five hundred dollars for an evening's entertainment; and the prospect of a hard winter, and much suffering among the poor! Well, I'll tell you in the morning. If I can make up my mind that it is right, you shall have the party."

The rest of the evening was a little constrained. The young wife, seeing that her husband did not care to talk about the reception any more just then, struggled bravely to avoid the subject, and, inasmuch as it held possession of all her thoughts, was rather an absent-minded companion.

That night, after his wife was quietly asleep beside him, John Stirling spent an hour of not untroubled thought. Unlike Nellie, he had been brought up in a quiet country home, where five hundred dollars would have been thought a by no means inadequate provision for the support of the whole family during the entire year. Was it right, could it be right, to spend it upon one evening's entertainment, for the sake, too, of people who would be in no wise benefited thereby—whose choicest pleasures were so common that they had already palled upon their senses! But then, as his wife had suggested, they had been out so much—would not this drawing back from a return of civilities look very mean? And John Stirling shrank with all the pride of a sensitive man, from the least imputation of meanness. They were not rich. True, his capital was his own, and his business was good; but he had spent all that he could spend more than three thousand a year on home expenses, and here was five hundred extra, upon which he had not counted, coming at once. Surely he could not dare, for such a cause, to stint his contributions for the relief of the suffering? Could he afford it without? Nellie, the indulged child of wealthy parents, knew nothing of such anxious thoughts; she only heard the result in the morning. Before he gave her his good-by kiss, he said in a tone a little more sober than he meant it should be,

"Well, dear, you shall have your party. You can begin making your arrangements at once.—Here is a hundred dollars for the feminine adornments. I will pay Smith and the music afterward."

That was all. John Stirling had a sunny, unselfish temper, and when he had made up his mind to grant his wife the indulgence she craved, it would not have been like him to spoil her pleasure by any indication of dissatisfaction.

Still, as I have hinted, her intuitions were strong and her nature sensitive and impressible, and she had a certain sense of having persuaded her husband somewhat against his own wishes, that rather disinclined her to commence her preparations. It was nearly eleven o'clock before she dressed herself for the shopping expedition. She was just tying the strings to her elegant fall hat when she heard a ring at the door, and presently a servant came in with the information that a little child, who had brought home sewing, waited to see her.

Mrs. Stirling was motherly by instinct, and her heart warmed at once to the shy little creature who came timidly in. It was a girl not more than seven years old—quite too young, Mrs. Stirling thought, to be trusted alone in the streets; but then she herself had been brought up under the successive rule of nursery-maid and governess.

She took the bundle from the child's hand, and said, with the same bright, kind smile which had wiled John Stirling's bachelor heart away:

"Where did you come from, and how did you find your way here alone, you poor little thing."

"Sister Annie sent me, ma'am. She had done your embroidery, and she thought, if she could get the money for it to pay Mr. Jenkins, may be he would let us stay in the room till she got a little better."

"She is sick, then?"

"Yes'm. She didn't feel well enough to come. It has been hard getting along all summer, for the ladies she works for were almost all out of town, and some of them owing her; and I s'pose the worry and not having much to eat did it ma'am."

Mrs. Stirling leaned toward the little creature, and looked at her more closely. Could it be hunger, she thought, that made those blue eyes look so large and the skin so transparent? Was this little thing actually suffering for bread, and she going to spend five hundred dollars in one evening, feasting those who never felt a want even of dainties? She knew not what thoughts had been in her husband's mind when he spoke of suffering among the poor. She said pleasantly:

"Well, child, you must have some luncheon, and then I will go with you to see your sister. I had better speak to her about the work."

"Isn't it right? Can't you pay her?" The child gave a start of alarm and spoke with the premature womanliness and natural apprehensions of misfortune which are among the saddest fruits of poverty.

Mrs. Stirling relieved her with ready sympathy.

"Yes, indeed, the work is all right. It's done beautifully; but I want to see your sister about some more, and perhaps I can do her good."

It would have made the kind lady's heart ache could she have seen the eagerness with which the half-famished child devoured the lunch which was set before her in the kitchen.

In a few moments they were ready to start. Mrs. Stirling had replaced her velvet mantle by a Scotch shawl, her French hat by a simple straw; and with a basket in her hand containing a few dainties with which she hoped to tempt the sick girl's palate, she followed the child across the city toward C—— street—a locality hitherto *terra incognita* to her.

In a half-dilapidated wooden house, in a narrow court, she found the object of her search. She went up two flights of stairs and entered a back room lighted by one window. The atmosphere struck her, in spite of her warm attire, with a sudden chill.

Evidently the sun never came there. The dampness on the wall, the general aspect of gloom and cheerlessness, was only relieved by an air of scrupulous neatness which pervaded every thing. Mrs. Stirling had already noticed this quality in the attire of the child, which, though cheap and poor and patched, was as immaculate in its cleanness as her own.

At the window, attempting to sew, the older sister sat, but she was evidently very ill. Every now and then a spasm of coughing seized her, which compelled her to lay down her work and clasp both her hands to her side, while the paleness of her thin cheek flushed into hectic. Mrs. Stirling had not seen her before since spring, the work returned that morning having been sent to her by a servant. She went to her and sat down in a chair which stood near.

"Your sister said you were sick, and so I came to see if I could be of any use to you," she said, in gentle tones, which, of themselves, carried a certain comfort with them. "You have changed terribly since spring. I must hear all about it; but I want you should eat what I have brought you; here is some jelly, and a bit of cold chicken—they will do you good."

The poor girl looked at the viands with the involuntary greediness of hunger. Then she blushed deeply, and said in a low voice:

"I am very grateful, madam; but if you please, I will wait until you leave me. Allow me at present to attend to you."

"No, indeed!" Mrs. Stirling spoke in her pretty absolute fashion. "I am not going yet. I want to talk with you awhile, and I shall not do so until you have taken something to strengthen you. Little Jane has lunched already."

So the gay, bright lady sat, and waited, feeling, in the new prospect of being actively useful, a genuine glow of delight. When the girl had finished her generous meal and taken up her work again, Mrs. Stirling began to talk to her.

"Is this consumption, Annie?" she asked gently, "Your cough alarms me."

"No, ma'am, I am very sure it is nothing of the kind yet. There is no consumption in our family. My father was a country minister, and had a strong and healthy constitution. He died young, but it was from a violent fever, caught in attendance on a sick stranger. I think it was grief which made my mother follow him in three months. She had always been delicate, though not sickly, and she lacked the strength it required to live and suffer. It is seven years since she died, on the very day little Jane was born."

"How old were you then?"

"Fifteen, and there were no living children between us two."

"And you have supported yourself and her ever since?"

"Oh! no. My father's books and furniture sold for enough to keep us some time, and my aunt, who lived here, brought us to Boston. We both lived with her. She took care of Jane, and I worked in a shop, and earned enough to buy our clothes and help Aunt Martha with the living. It is only since she died—three years ago, that I have been all alone with Jenny."

"You came out of the shop then?"

"Yes, because I could not have Jenny there with me, and she had no one else to see to her, and indeed I have made more money since, I have embroidered so much."

"But surely you have suffered more than usual this summer?"

"Oh! yes, ma'am. The ladies that I work for are mostly out of town in the summer always, and so winters I try to save something to help us through. But last winter was so hard that I had not as much work as usual, and this summer we have not been very well off. I had to give up the comfortable room I used to have, because I could not earn enough to pay for it, and I suppose the dampness here has not just agreed with me."

She tried to smile, but the tears came instead. Mrs. Stirling took her hand with a comforting pressure.

"Don't cry. Better times are coming to you now. I am sure I can influence you a great deal more work. You shall have enough to do, and we must see that you move out of this damp, unhealthy place."

Sister Annie smiled sadly.

"The landlord has seen to that, madam. I can only stay here three days longer. He wants to let the room to a tenant who will pay more; and I have been troubled for fear I should not be able to go out and find another place."

"Well, you must not feel anxious. Just leave that till to-morrow. Then if you are not able to go, I will find a place for you. I cannot be a difficult matter to find one as good as this. At any rate, to-morrow you shall see me again; and in the mean time the pay for the work little Jane brought home will make you comfortable."

So saying, she put into the girl's hand twice the customary price for the embroidery she had done, and without waiting for the thanks which trembled on Annie Hadley's lips, she went out of the room, down the stairs, and returned home after this, her first charity visit.

On the way she stopped but once, and that was not to look into any of the windows gay with autumn goods, or to exchange her hundred dollar note on the Suffolk Bank for silk and satins. She only went for a moment to a neat, respectable-looking house on Myrtle street, and then hurried home.

She met her husband, when he came to his five-o'clock dinner, with a beaming smile. The meal was well cooked and neatly served; the wife opposite him was young and fair; and when John Stirling rose from the table and went with her into her evening room, it is no wonder he said to himself, that this being in one's home wasn't so bad a thing, after all.

"What is it, Nellie?" he asked, after a while, in answer to a questioning look in his wife's eyes.—She drew near him.

"You are sure, John, you can spare me that five hundred dollars without putting aside any rightful claim?"

"I hope so, Nellie; if I had not thought so, I should not have given it to you, much as I love to please you."

"Then what," she spoke hesitatingly, "what if I wanted very much indeed to use it for something else?"

"I do not understand what you can possibly mean."

For answer she detailed to him the different events of the day. When she was through, she said:

"It seems so hard, John, for that poor girl, a minister's daughter, too, to be suffering for want of food; and living, or rather dying, by inches, in that miserable, damp, unhealthy place. I can see how, with five hundred dollars, I could make her so comfortable. I stopped in at Nurse Smead's on my way home to-day, and I found that she had a nice, bright, good-sized room, which she will let for seventy dollars a year. There is a stove in it already, and a carpet on the floor, and thirty dollars more would supply it with everything needed for comfort. Now, if I could pay the rent of the room a year in advance for Annie Hadley, and fit it up neatly, what a fine start it would be for her! It would give her such rest—such freedom from care. She would have time to get well. She's very skillful with her needle, and, with the work she could easily do, she could live so nicely, and Jenny could go to school. I have it all planned, and there, with your permission, goes the hundred dollars in my pocket."

John Stirling looked at his wife, and it seemed to him, with the generous, unselfish light illuminating it, her face was the face of an angel. But he did not say so then.

He answered her, in the tone of one raising an objection, "But what would you wear to the party Nellie? I should not like you to look shabby."

"Trust me for that. I can wear my wedding dress. It is such a rich heavy white silk, and it is not soiled at all. With a little different arrangement of the trimmings, it will be as handsome as anything I could get But are you quite set upon giving the party, John?"

"Are not you, dear?"

"I was."

There was a pause for a few moments, in which Nellie tied and untied the tassels of her little silk apron several times. When she looked up, an eager light shone through the mist which had somehow gathered before her eyes.

"I suppose there are many people in the city, John, just as worthy as Annie Hadley, and needing help just as much?"

"Without doubt, Nellie; plenty of worse cases, especially now as winter is coming on."

"Could you help me to find them?"

"I think I could. Some of the cases of destitution, which he cannot afford to relieve, make a business man's heart ache almost every day."

"Then four hundred dollars extra, which you would not have given otherwise, will do a great deal, won't it?"

"Yes, a great deal. It is a large sum."

"Yes, it is a large sum, as you said last night, John, to be spent on a single evening's entertainment for those who do not need it, but not large when we compare it with the wants of those who suffer. John, I have no wish to give that party. Will you take the money for doing good?"

"But those who have invited us, Nellie? The Hurlbuts, the Graysons; all your many friends? One wouldn't like to be thought mean."

"We can ask them all, a few at a time—all those we care for. Your ordinary housekeeping allowance is liberal enough for that. If that does not please them, after all, John"—and the little woman hid her face on her husband's shoulder, for she was one who seldom uttered her deepest thoughts, or mentioned, even to him, the emotions which she held most sacred—"if they should not approve it, it matters so much more what He thinks who told us to invite to our feasts the poor, the maimed, the blind. I have been blind till to-day John. I don't care for large parties any more."

"You shall do as your heart has counselled you Nellie. The money shall be at your disposal to-morrow. We will give our reception to the guests whom God himself graciously chose for us."

He said no more just then, but Nellie Stirling had unconsciously gained in that hour a new and holier hold on the heart of her husband. He had loved the gay, half-spoiled girl; what word expresses what he felt for the noble, self-sacrificing woman whom that day had revealed to him?

Annie Hadley's heart was lightened next day of a weary burden, and she was as grateful for Mrs. Stirling's delicacy as for her aid.—*Wood's Household Advocate.*

Miscellany.

THE KOH-I-NOOR.

This has hitherto been a fatal jewel. May its present re-cutting have broken the spell. Its history well authenticated at every step. This stone of light seems never to have been lost sight of, from the days when Ala-ud-deen took it from the Rajah of Malwa, five centuries and a half ago, to the time when it became a crown jewel of England. Tradition carries back its existence in the mines of India, to the year 57 B. C., and a still older legend would fain recognize in it, a diamond first discovered near Masulipitam; in the valley of the Godavery, 5,000 years ago. The Koh-i-noor is reported by Barber, the founder of the Mogul Empire, to have come into the Delhi treasury from the conquest of Malwa, five centuries and a half ago. The Hindoos trace the curses and disastrous ruin inevitably brought upon its possessors to the *genius* of this fateful jewel, ever since it was first wrested from the line of Vikramaditya. A glance over its history since 1304, its malevolent influence far excels that of the necklace for which Eriphyle betrayed her husband, or the Egyptian Scianus of Greek and Roman tradition. First falls the vigorous Patan, then the mighty Mogul Empire, and, with vastly accelerated ruin, the throne of Nadir, of the Doorance dynasty, and of the Sikh. Runjeet Singh, when it was in his possession, was so convinced of the truth of his belief that being satisfied with the enjoyment of it during his own lifetime, he sought to break through the ordinance of fate, and the consequent destruction of his family by bequeathing the stone to the shrine of Juggernaut; for the good of his child and the preservation of his dynasty. His successors would not give up the baleful treasure, and the last Maharajah is now a private gentleman. In 1850, in the name of the East India Company, (since, in its turn, defunct,) Lord Dalhousie presented the Koh-i-noor to Queen Victoria. Perhaps we should have been better without it; such, at least appears to be Mr. King's opinion. The Brahmins will hardly relinquish their faith in the malignant powers possessed by this stone, when they think of the speedily following Russian War, which annihilated the prestige of the British army, and the Sepoy mutiny three years later, which raised England's existence to hang for months on the forbearance of one man.

The public saw the Koh-i-noor lustreless at the Exhibition of 1864, then weighing 166 carats. Its recutting performed in 1862, though executed with the utmost skill and perfection; has deprived the stone of all its historical and mineralogical interest. As a specimen of a gigantic diamond, whose native weight and form had been interfered with as little as possible, (for with Hindoo lapidaries the great object is the preservation of weight,) it stood without a rival, save the Orloff of Europe. As it is in the place of the most ancient gem in the history of the world—older even than the Tables of the Law and the Breastplate of Aaron, supposing them still to exist—we get according to Mr. King, a bad shaped, because too shallow, modern brilliant, a mere lady's bauble, of second-rate water, because it has a grayish tint, and besides, inferior in weight to several, being now reduced to 102½ carats. The operation of recutting was performed in London, under the care of Messrs. Garrards, the Queen's jewellers, who erected for that purpose a small four horse engine on their premises. It was conducted by Voorsanger and another skillful workman sent over by M. Coster from Amsterdam. In consequence of the advantage gained by using steam power, the actual cutting occupied no more than forty working days—a striking contrast to the two years necessary for cutting the Pitt diamond by the old hand process. In some parts of the day, as when it was necessary to grind out a deep flaw, the wheel made three thousand revolutions per minute.—*English paper.*

SINGING FISH.

The Sirens of the ancients are not mythical, after all. I myself have touched and even eaten one, (in spite of the warning representations of a black,) one of these harmonious mullets, and suffered no inconvenience from it. One day, as I was returning to Tallahassee from a hunting excursion to Florida, we were rowing along by the shore, about sunset, when suddenly a strange, sweet and prolonged sound struck my ear. At first I thought it must be a drone, or fly of extraordinary magnitude; but seeing nothing, I questioned my guide as to what it could be.

"Oh, massa," replied he, "dat is de fish what sing. Some call it Siren, or mermaid fish, and some musico."

A little way on, we heard a greater chorus of these strange voices, reminding me faintly of the sound of church organs. I stopped the canoe, the better to study this strange phenomenon; when at my request, my sable oarsman threw a net into the water, and soon laid at the bottom of the boat about a score of little fish, each about ten inches long, resembling the gray mullet very closely in shape and form.

"Dese be mermaids, massa," said the negro; "but its de name ob hebben, don't eat dem."

"Why not?" quoth I.

"Cause dey hab de lub poison."

"Lub poison! And pray what is that?

"Why, massa; when you eat one ob dese fish, you fall so deep in lub you can neber git out again."

I tried to laugh my black friend out of his notion, but in vain. In spite of what he said however, I had my musicos fried that evening, and found as I expected, that I was none the worse for the experiment. The mucician fish is white, with a few blue spots near the belly. It is about when these fish begin to sing, and they manage their music during the night; imitating the grave and sonorous droning of an organ, just as it reaches your ear, when you stand outside a church.

Miscellaneous.

A PRINCELY RESIDENCE
IN THE COUNTRY
FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

☞ To correct a erroneous impression which some may have, we wish it understood that though we keep the largest Wholesale Stock in the country, small Orders and Retail Customers will receive every attention and benefit that they can at smaller establishments.

FARMERS and others will do well to call on us before purchasing, as the rate of Eastern Exchange justifies us in offering goods at REDUCED RATES.

N. B.—

We have the Exclusive sale of HILL CONCORD HARNESS, for the Pacific Coast.

AVERY TUBE WELL

COMPLETE FOR USE

THE TUBE WELL IS FORMED BY DRIVING prepared Iron Piping into the ground with a sledge. Although of comparatively recent invention, these Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well, all surface water, dirt etc. being excluded. The Tubing is coupled together in lengths of five or six feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Lift Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. ☞ For circulars, etc., address Postoffice Box, 17. UHRIG & DEWEY.
Office at 318, Pine street. 31-10.

Valuable Patents FOR SALE

We invite the attention of energetic Mechanics' to several very

VALUABLE INVENTIONS

for which we hold the

PATENT RIGHT

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as will return for labor and capital can be made from.

WARREN & CO.

BOUND VOLUMES FARMER

☞ Volumes of the "California Farmer" for The last EIGHT YEARS, uniformly bound, can be had at the Farmer Office at $8 per Volume.

These Eight Volumes contain more useful matter touchin the practical workings of Agriculture as adapted to California Culture than any Book or Books Extant, as they comprise hundreds of Experiments, Letters and Essays upon the Culture of Cotton, Rice, Coffee and Tobacco; Grapes, Strawberries, and all other Fruits, with the Culture of Hops, Castor Beans, Flax, Hemp, &c. and the Whole series of Essay of L. Prevost on Silk Culture, from early beginning.

This set of Volumes would be a Library of itself and is valuable to the Cultivator of the Soil.

Orders sent to Farmer Office will be promptly attended to

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance*. We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once at our office, or addressing EDITOR FARMER,

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to and keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

Is on the red cover of the packages

Depot, 320 Jackson Street,

THOMAS H. DOUGLAS,
Storekeeper and Wharfinger.
Or to I. FRIEDLANDER,
112 California street.

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer on the wharf or landing places.

Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, May 27

The Grain Market may be said to feel a little firmness by reason of some little news of short crops and famine among stock in a portion of Australia; also a demand from China and one or two other *new places* we are now supplying with Breadstuffs.

The recent rains have done vastly more good than was anticipated. This can be seen in the rapid filling of the Grain Heads. Many fields now put on their Golden look, and will soon be ready for the Reaper.

Our Harvest will be very large, and the grain will be good. It is to be hoped our grain growers will use only the *best Implements* to Harvest their crops, so it can be done well, with clean and unbroken grain.

Retail Prices in the Fruit Market.

This week our people can luxuriate in Strawberries to their heart's content, for the large, tempting *Jucunda's* come to market freely and sell at low figures.

The "Triumph d' Gand" Strawberry is also in Market.

Apricots begin to come in freely.

Cherries, too, these come in now in splendid order, and are had at reasonable rates. They make a fair display.

Blackberries begin to come in more freely, and these with Pine Apples, Oranges, and Bananas, make up a satisfactory feast.

A CARD.

Advertising Abroad!

WE CALL THE SPECIAL ATTENTION OF ALL Manufacturers, Agricultural Men, Nurserymen, Booksellers, and others having interests connected with the PACIFIC COAST, that now is the time to secure the business of this region by wisely ADVERTISING WITH US.

The full effects of the completion of that Grandest of all HUMAN ENTERPRIZES, the PACIFIC RAILROAD, must open a large and wonderfully increased business between the Eastern States and the Pacific Coast, and they who wisely ADVERTISE NOW, will be the FIRST TO SECURE IT, and when once secured, they CAN HOLD ON TO IT.

We therefore invite all those who have valuable IMPLEMENTS, MANUFACTURES, INVENTORS, BOOKS, PAINTING the Columns of the CALIFORNIA FARMER, that will give them a wider circulation than any other medium they can adopt.

WARREN & CO., Eds. and Prop'rs.

CLARKES' NEW METHOD

FOR

Melodeons and Reed Organs.

JUST PUBLISHED,

A Comprehensive System of Instruction, and an Improvement on all other Methods for the Simplicity and Progressive character of its STUDIES, EXERCISES, SCALES, VOLUNTARIES, and RECREATIVE PIECES—containing an admirable selection of Choice Pieces of every grade of difficulty, from favorite and popular authors thus relieving the tediousness of Studies and Exercises, and making the Method interesting, as well as Instructive to pupils; adopting, in this respect, for Reed Organs the System so successfully carried out for the Piano-Forte in "Richardson's New Method" for the latter Instrument. Arranged expressly for Cabinet, American, Metropolitan, Prince & Co., Cathart & Needham, Burdett, Esty, and all other Reed Organs; also for the Melodeon and Harmonian. By WILLIAM H. CLARKE, Author of "The American Organ Instructor" Price in Boards, $2 50. Sent post-paid on receipt of price. OLIVER DITSON & CO., Publishers, No. 277 Washington Street, Boston, CHAS. H. DITSON & CO. 711 Broadway, New York, 31-18

Wanted.

A Gentleman residing a few miles from the city, is anxious to meet with some one, who can Superintend the construction of Trout Ponds, or give information as to the best mode of constructing Fish Ponds. Such parties will be amply compensated for all trouble and knowledge. Address, B. L. D., FARMER OFFICE.

P. S.—A personal interview would be preferred at the Farmer Office.

Traveling.

May 18—CONSTITUTION, Capt. Wm. H. Hudson, connecting with HENRY CHAUNCY, Capt. Conner.

May 29—GOLDEN CITY, Capt. Wm. F. Lapidge, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

e24 OLIVER ELDRIDGE, Agent.

CENTRAL PACIFIC RAILROAD

COMMENCING MAY 17TH, 1869. EXPRESS Trains will run as follows:

EASTWARD.	Miles.	Time.
Leave Sacramento	—	6.30 A. M.
" Colfax	54	9.50 "
" Truckee	120	2.10 P. M.
" Reno	154	4.20 "
" Wadsworth	189	6.30 "
" Winnemucca	324	1.45 A. M.
" Carlin	445	8.30 "
" Elko	468	10.00 "
" Toano	539	3.15 P. M.
Arrive at Promontory	690	11.05 "

WESTWARD.	Miles.	Time.
Leave Promontory	—	6.15 P. M.
" Toano	131	3.00 A. M.
" Elko	222	8.25 "
" Carlin	245	9.35 "
" Winnemucca	356	4.10 P. M.
" Wadsworth	501	12.05 A. M.

(Rates are subject to change.)

May 17th, 1869. 31-8

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings. Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish *collections* of choice plants, can buy them in quantities at a very low rate, if they visit the *Gardens Corner of Mason and Pacific Street*, in this city, or address EDITOR FARMER.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge, now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure u are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S

CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER and BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It has been our sincere wish that these Pills should be fairly and fore tested, and stand or fall by the effects produced. That they have been so tested, that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the proper action of the Stomach, Bowels, Brain, and the whole Nervous should be vast and vital importance to human health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has so close connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal atrocity or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Menses, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing by pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful impression of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts everyone. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken in connection with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow them. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are infallible to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S

American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, judicious in other respects, but which entirely fails in consequence of worms being overlooked. Even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed, with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an areola or circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or frothy tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a gnawing sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently streaked with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hooping cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual in providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water in the morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten years a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by
FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post-paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

FARMERS' CLUBS.

...We take the following admirable sentiments ...an Address on "Intellect in Farming," by ...rander Hyde, Esq., before the Hoosac Valley ...ricultural Society of Massachusetts, and pub...ed in the Annual Reports of the Board of Ag...lture of that State.

...the closing portion of the Address Mr. Hyde ...speaks of the benefit of "Farmers' Clubs."

...We have great faith in farmers' clubs, not only ...means of acquiring knowledge, but also as a ...of practice for imparting it. If you will ...llow an illusion to my individual experience, I ...y that I have been a member of such a club ...the past ten years, and have made it a matter ...conscience to be present at its meetings. Our ...ject has been to designate beforehand some ...ics for discussion, and appoint some one or ...ore persons who are expected specially to pre...are themselves to enlighten us on the designated ...ic, and afterwards all the members present are ...lled upon to contribute their quota of informa...n. In speaking we seldom rise from our chairs, ...d use the same freedom that we do by our fam...fireside. The result has been increased know...dge; and with the increased knowledge came ...creased crops, improved stock and greater thrift. ...e club has numbered about twenty, and if two ...ads are wiser than one, much more must the ...mbined wisdom of twenty men be greater than ...at of the individual. The practice of this pub...speaking makes us more accurate observers and ...inkers, and this comparing of experience takes ...e sting out of those wise merely in their own ...ncit. The farmers' club does not cover so much ...und as the agricultural society, but it culti...es the ground it does cover more thoroughly, ...d much as it awakens more thought, and thought ...s the base of good farming. It may be add...d, in favor of this public speaking, that it is not ...ike painting and poetry, in which medio...rity is laughed at and only excellence is praised. ...A degree of skill in public speaking is desirable, ...d the art is just as attainable by farmers as by ...thers like. There is no power that man wields ...er his fellow-men like that of the orator; and if ...we are not fitted to instruct and guide a senate as ...id Daniel Webster, it is certainly desirable and ...ould be that we should edify a club and "speak ...ing."

...Analogous to public speaking, in its effects on ...e mind, is the art of communicating our thoughts ...writing. In writing our ideas we are apt to be ...re accurate even than in speaking them, and ...accuracy involves digestion and arrangement. ...It must be confessed that farmers, as a class, are ...ficient in this art. In handling the hoe and plow ...ey become a little rigid, and the use of the ...en a burden, and in some instances, we ...ve dropped altogether. This is neglecting ...e great means of mental discipline and public ...efulness. Next to the power of a fluent tongue ...mes that of a nimble pen. The press is becoming more and more the fourth estate. I remember hearing in my youth the question debated, "Which has the more influence, the press or the pulpit?" It may be difficult to compare the two and decide this question; but the power of the press in this free country has rapidly increased, and is now immense. If farmers wish a share in this fourth estate they must write; I repeat it, they must write, or they will be left behind in the struggle for place and power. The reading of the community in these latter days is much concentrated on newspapers, and towards the newspapers the talent of the country greatly flows. These papers are open to communications from all, and thoughts expressed in them will reach thousands of minds and make lasting impressions. Agricultural papers are multiplying rapidly, and no farmer can afford to be without one, and should not be content without contributing his mite to the general stock of knowledge. He will find that giving knowledge so far from impoverishing the giver, will enrich him rapidly. If he does not benefit his readers he will benefit himself.

It is a blessed thing that we live in an age when knowledge is increasing and many are running to and fro in search of it. The schoolmaster is abroad in the land, and after many years of trial and struggle we finally have schools established for the express purpose of training boys for the occupation of agriculture. We expect great things from these schools, and if the next generation does not furnish wiser and better farmers it will not be for the want of superior advantages. Agriculture, we hope, will be reduced to a more perfect science, and New England be cultivated like a garden. In our rugged climate and sterile soil is just the place for an agricultural college to flourish. On the fertile prairie little need is felt for the aid of science. As Cadmus sowed dragon teeth on the plains of Greece, and forthwith armed men sprang out of the ground, so our Western farmers, if we may credit their story, have only to drop the kernels of corn in the furrows in the spring, and in the autumn their hogs rise up to do the harvesting, and in this lazy, slovenly way of farming the hogs become fat and the farmer rich. I have not seen much of Western life, but what I have seen has convinced me there is truth in the story of the Western emigrant who said he went West to become rich, and his wife to become comfortable—He had grown rich, but as for the comfort he could not see it. As I was once passing through Wisconsin I met two old friends who had moved to the prairies for wealth and comfort, and one of them asked me if I had come out to settle, and the other quickly replied, with an emphasis which told more than the words, "Come from New England, where the sun shines all the year, to this country!"—Their farms were large and productive, their stock abundant, but I must confess the sunshine of comfort did not surround their homes. In contrast with the prairie farmer, the New Englander has a hard row to hoe; but there is a large compensation for his toil. The very obstacles he encounters call out his energies and make him strong and self-reliant. I glory in the rugged hills and beautiful valleys. And they are not so unproductive as some may think. We now raise more corn to the acre than Illinois. No State in the Union raises so much corn per acre as bleak, mountainous Vermont. This is the triumph of mind over matter. We wish to see still greater triumphs.—Who shall put a limit to the productiveness of an acre of land? It used to be thought a thing incredible that an acre should produce one hundred bushels of corn. Now our figures run much higher than this. Eight hundred bushels of carrots, worth half as many dollars, seem a large product for one acre. We can easily raise one thousand. Who shall say to the live Yankee, with determining power of the will inherited from Miles Standish, and taught by Jonathan Edwards, "Thus far thou can go, but no farther." His answer would be, "I'll see if I can't." And when he wills to do a thing he does not wilt in the attempt.

I have endeavored thus briefly to inculcate the value of mind, especially to the New England farmer, in the cultivation of the soil, feeling confident that if the farmer is developed mentally the farm will show it, the stock will show it, home will show it. If any one feels stimulated to increased mental culture I shall feel rewarded for my labor.

THE WEATHER, HARVEST, ETC.

The weather in our city has been of a character between storm and sunshine—heavy fogs, strong chilly winds, and big efforts to get up a rain storm, has prevailed for some days, and should this weather continue a few days more we shall *probably* get rain.

The weather in the country has been hot and dry, and the *Hay makers* have used their time wisely. Soon Haying will be over save in low wet lands, and the Grain Harvest begins; already it has begun in some places, and promises well, and it is to be hoped that the crop as it is gathered will be sent forward to market, and shipped away as fast as possible, and thus really enrich our Farmers and our State.

TRADE.

We hear continual complaints from certain mercantile sources relative to *Trade* and its present dull prospects, that *Trade* is in a peculiar and anomalous condition no one can doubt, there is a doubt and a dread of something, no one knows what—some fear the Currency is to change from hard money to paper currency—others fear that Chicago will monopolize the trade of Utah and the Mines—others dread a money panic consequent upon the scarcity of Gold, and a general pressure.

That there is to be a change in the business relations and business habits of our people, is most certainly true, for as we have all along felt and said this must be so.

There is however *one remedy only* that can restore business to a healthy and prosperous state, and that is to *Export* more than we *Import*, and husband well the value of these products, and not *waste Capital in reckless and foolish Speculations*.

Every Merchant and Business man, every Trader and Mechanic who places the means that he needs for his daily business, will *feel the pressure*, and the amount of Capital now taken away from the legitimate channels of *Trade* to *White Pine*, and in *Homestead Associations*, will be found to work a most serious injury, and we are now beginning to feel the Effect of it in this city.

The desire also for large and expensive places of trade, showy offices, dwellings etc., is consuming the vital sources of *Trade Life*—and these are happily prescribed in the following article, which we cut from one of our New York Exchanges.

The renting season has gone, leaving unoccupied, in the city and suburb, dwellings and stores enough to make comfortable the people now packed like herrings. Landlords in general covet, not a fair rent and constant letting, but high rents, even with some of their dwellings vacant. In trade few men are content to grow rich steadily and slowly, making many sales with smaller profits; but aim at fewer sales and larger individual profits. Hence only a small part of the good business is done that might be done, few of the good bargains are made that might be made, and a small part of the capital, the time, and the labor power of any American community is constantly put in use.

The great fear of laborers and mechanics is that they may "work too cheap," and that of the traders that they may "sell too cheap;" to avoid that horrible result, the former would rather "strike" through two thirds of the year, working the other third, and the latter trust to bleeding a few rich, careless, or ignorant customers, rather than supplying the whole community, including the thrifty and economical, with their wares. If the reader happens to know of Popp and Plaisted, he knows them to be very skillful, energetic, industrious young men of the plumbing persuasion—rather, *to have been* such, since *now*, success has turned them to idle ornaments of office stools. Instead of their former cheap and sufficient cellar, they hire a large and expensive first floor, with nothing to drape its vacuity but a few basins and rolls of lead pipe leaning against the walls, while their windows are placarded with dreary bills of "houses for sale"—every bred plumber dreaming of working one day into the "real estate business." In place of a modest account for any little job done by Popp's own hand, I now get a monstrous charge under the gorgeous bill head of "Popp and Plaisted, Practical Plumbers—Polydorus Popp, Manager." The "managing" consists in setting three good for-nothing apprentices to botch the jobs, the partners used to do swiftly and merrily, while they pick their teeth in the great "office," and charge you and me for the new rent and the responsibilities of the management.

Half the world rides through life on the shoulders of the other half—a commercial as well as a political truism. Propable losses in business from "bad debts," are, as we all know, averaged, and put upon the prices; that is to say, the responsible and honest part of the community not only pay their own expenses, but those of the irresponsible and dishonest. Of course, credit is necessary to commerce; and the resulting evil of high prices cannot be laid to the charge of the credit system *per se*, but the reckless abuse of it. Most petty tradesmen would rather risk a running account with some bullying pretentious fellow, of whose responsibility they knew nothing, but who never questions their exorbitant prices, than have the steady patronage of a "closer" man. There is nothing your tradesman despises like "niggardliness" in his customers; and so long as he can charge them all a double profit, he can afford to loose by the lordly few who are not "mean," but don't pay. Or, take this current topic of rents; to judge from appearances, most landlords would rather squeeze out $2,000 a year for a house which would pay well at $1,500, and never collect the fourth quarters rent, than let it for $1,500 to a trustworthy tenant. A large proportion of the dwellings leased in and around New York last year, were not paid for according to the written agreement—a quarters rent was lost, or there was much loss of time, trouble, and legal or agents expenses in running for the due. But what remedy suggests itself to most landlords? To gather a good and permanent tenantry at fair return for capital? No, but to take the men who offers most, if that "most" be enough to cover a possible loss of a month or a quarters rent. In this way prices range high, the good tenants have no advantage over the irresponsible, and the latter ride on the former's shoulders. A man that does not intend to pay any more of his rent than he can help, cares little how high this rent is—he will delight the landlords heart by the profuse liberality of his proposals; but some tenant who pays can thereafter get a similar house only at a similar rate. Oh, wise American landlords and tennant system, wise customs of trade, never looking to the past and future, but only to to-day!

SACRAMENTO SEMINARY.

We take the annexed commendatory notice from the Sacramento *Bee*, and cheerfully endorse the excellence of that institution, having had the pleasure of seeing it in its practical good works. Ed. *Farmer*.

Messrs. Editors: I desire to speak a true and earnest word in behalf of the Sacramento Female Seminary. Its last anniversary took place in its fine new building, on Friday evening last, it being the second since the corner stone of the edifice was laid. A large number of parents and friends from the country and citizens interested in the prosperity of the Seminary, filled the spacious halll. The evening was devoted to vocal and instrumental music, by the classes; an elaborate and fit oration by Rev. C. R. Hendrickson, D. D., of San Francisco; the essays of the graduates, and the conferring of diplomas, accompanied by a most excellent address to the graduates, by Professor Hermon Perry. This Seminary has grown up silently in this rising city to a first institution of learning, second to none in the state, in the culture and devotion of its teachers, in the number and range of its studies, and in the scholarship of its graduates. I was profoundly impressed by this as I listened, hour after hour, in the examinations of last week, and heard on Friday evening the essays of its graduates. The essays were read, one by Miss Emily J. Van Trees, on "Harmony Universal;" one by Miss Helen Smith, on "Religion the Cement of Society;" that greatly delighted and surprised us all. They showed that the four years of hard study in their youthful lives, had given them strength and dicipline of mind, that promised for them a bright and honored future. It was never our lot to attend "the commencement" of a female seminary where the graduates showed more strength of mind or culture than on this occasion. A felling of surprise and gladness filled every heart, and found ample expressions in the congratulations at the close of the exepcises, and and through the city the next day. Let San Francisco examine the merits of this school for the education of its daughters, away from the superficials and folies of city life, let the mountains and the vallies of the state send their daughters to the Capital, doubting nothing that they are safely folded from harm, and where nothing better can be done for their education in any seminary of our land. Let the friends of education throughout the state, and especially in Sacramento do all they can to extend the influence of this institution, now so prosperous. The next session commences on the first day of August, and promises a large increase of scholars, requiring we hope, the erection of the new building at no distant day. Visitor.

Fish, the Food for the Brain.—Professor Agassiz says that fish is a kind of food which refreshes the system, especially after intellectual fatigue. There is no other article that supplies the waste of the head so thoroughly as fish diet; and the evidence of it is in the fact that all the inhabitants of the sea-shores the world over are the brighter population of the country. Fish contains phosphorus to a large extent, a chemical element which the brain requires for growth and health.

Volcanoes in Oregon.—The high peaks in Oregon have commenced to emit smoke, and the inhabitants anticipate earthquakes, or some other internal comotions.

Mount Hood, 13,000 feet high, Mount Jefferson, 11,000 feet, and the Three Sisters, 11,000 feet, which are mentioned as exhibiting signs of activity, are extinct volcanoes; but Mount Hood has been in a state of eruption, according to the traditionary accounts of the Indians.

IMPORTANT MEDICAL PREPARATIONS.

There are times and seasons when the condition of the body of adults and of children all need care and attention so as to save life.

It is not the *quantity* of medicine, but the *kind*, that is all important, and there are diseases of the seasons, and diseases resulting from exposure and peculiar laborious employments that will demand the wisest care and the most skillful preparations to save the body from decay and death.

We find in the daily records of Death many reported as from Heart disease, Liver Complaint, Dyspepsia, etc., and in this list the record of death is fearful indeed. Yet *Impure Blood* will be found the *cause* of the most of these ailments, and for which there is a *safe and sure remedy, always certain and readily found in*

DR. M'LANE'S LIVER PILLS.

Editorily and personally we know of many cases where all other remedies failing, *these Pills* have wrought a perfect cure. We state this as a matter of duty, that life may be saved.

The number of Deaths of *little children* is indeed frightful in all our cities, and in many cases ordinary medicines fail to effect a cure, and very often the Physician does not know the cause of the illness of the little one that is fast hurrying on to the grave, yet the whole cause of its suffering arises from Worms, which are so prevalent among children, who by kind and indulgent mothers (?) and nurses (?) have by false feeding filled the little sufferer with *worms* that are eating up its vital life. For this evil there is a remedy in

DR. M'LANE'S WORM VERMIFUGE

Which we know has saved the lives of thousands of children. It is simple, sure and efficacious—it is literally "Death on Worms," and Parents who desire to save their little ones should by all means try this sovereign remedy.

These two valuable medicines are the preparations of Fleming Brothers, of Pennsylvania, and a full description of their use and value can be found on our outside page. These *two Medicines* are for the cure of the evils they aim at, and for these only. Messrs. Fleming Brothers do not say they are "Cure Alls," that they will do for *all diseases*, but each preparation is made with reference to its own particular malady; and for this these Medicines stand unrivalled the World over.

LIFE OF JEFFERSON DAVIS.

We acknowledge the receipt of advance sheets of the Life of Jefferson Davis, and the History of the Southern Government, by Edward A. Pollard, Esq., and to be issued by the National Publishing Co. of Philadelphia.

In glancing over the pages of these sheets, we see enough to know that the Book will create a great excitement and a large demand for it.

We give a couple of paragraphs from the prospectus of the author, which explains the motives which caused its preparation. The Book will be in great demand.

"The writer may say, without vanity or self assertion, that he is peculiarly fitted to be the biographer of Jefferson Davis. He was near him during the whole war. He had occasion to study his character assiduously, and to pursue him in his administration with a curious and critical industry; and his opportunities as a journalist in Richmond enabled him to learn much of the veiled mysteries and inner scenes of the weak and anomalous government that wrecked the fortunes of the Southren Confederacy. The writer thus obtained much of the secret and unwritten history of the Confederacy, involving Mr. Davis; information which, for obvious causes, he could not give to the newspaper press, and which, since the war, he has not yet published in any of his memoirs, for *peculiar and impressive reasons*.

The fact is, the writer has been for a long time persuaded by friends standing between him and the Confederate President, to withhold the work he now contemplates, as it was thought it would give information concerning various conspiracies and vengeful plots in the war, which might be used against Mr. Davis on his expected trial, or might inflame against him a fatal prejudice. For this reason alone, the writer has for a long time deferred the publication he has now determined upon; and he may claim that in this he has shown an extreme and punctillious regard for Mr. Davis' safety. But he can no longer defer to this solicitude for Mr. Davis; it has become a more punctilio, since there is no longer now a reasonable expectation that the Ex-President will ever be brought to trial, or be disturbed in the foreign land, in which he is reported to have descended to the commonplaces of trade and an unnoticed existence. At least, it would be unreasonable that the writer should longer weigh a calculation so tender and remote against a debt severely due to history."

The work is sold by subscription only:

Freight.— We have seen a Central Pacific Railroad Circular, dated May 21st, which states that that road is now prepared to transport freight between Sacramento and its terminus—first class at $3 25 per hundred or $65 per ton—second class at $45 per ton, in quantities not less than 2,000 pounds. These are the currency rates.

Agriculture.

THE ORIGIN OF CHOCOLATE.

The following interesting account is given by the Brazilian correspondent of the New York *Evening Post*:

When Cortes, in 1520, penetrated with his adventurous followers the empire of Montezuma, he found large cocoa plantations, which dated from "time immemorial." The Mexicans attributed the plant to divine origin, and indeed paid to it certain honors. They planted it, harvested it, and made it into chocolate with religious ceremonials. The fruit served them as money, and when roasted, ground, and mixed with water and scented with vanilla, a beverage was obtained which they considered not only to be appreciated by the noblest of the earth, but fitted for the gods to drink. In glowing language, worthy of Brillat de Savarin, Mr, Prescott, in his Conquest of Mexico, has described the reports of Montezuma, wherein chocolate plays such an important part. From the "Conquistadores', Europe first learned of the use of chocolate as beverage and food—for it is both. When, however the Mexicans learned to brown the fruit of the cacociros and make it into delicious drinks and cremes, no one knows. Suffice it to say that those who were left of the "Conquistadores" took back to the West Indies and thence to Spain the cacoa and knowledge of its manufacture. For a long time Spain, true to her narrow notions, would not allow cacoa to be exported to foreign ports, and for many years other countries of Europe did not know what chocolate was.

But prohibition and monopoly always work badly, for they are sure to produce breaking of laws and connivance at fraud. The Hollanders were the contrabandistas who ot length made known to Europe the worth of chocolate, despite the laws of Spain, and, in fact, finally ruined the monopoly of the Peninsula. From Holland, chocolate was introduced into England and Germany. A little later Italy relieved it from Spain. A short time after some Spanish monks crossed the Pyrenees and made France acquainted with the delightful beverage, which they had so often enjoyed in the cities of Andalusia. This was only a few years after coffee had been introduced into France. How many good things came to the Old World on the heels of the discovery of America, even if they did not in every instance originate on the western continent! The fragrant weed regaled millions of Europeans and Asiatics before Abyssinian (not Arabian) berry from the province of Kaffa, near the White Nile (hence the name coffeee,) had furnished a wholesome drink to the people of Stamboul, Paris and London.

The "turkey," called *peru* by the Brazillians and Portugues, and "of the Indies" (*dindon*, corruption of *coeq d'Ind*) by the French, is a purely American bird. Why we of the English tongue should call it by the name of a moder European country, I know not. The "Irish potato" as we call it, also furnished, it is true at a later date, food for the millions of Europe, and we know that it had its origin amidst the sublime regions of the Andes. The cocoa grows wild amidst the forests of the upper Amazon, in that region which almost every geographer in our school maps incorrectly writes *selvas*, a word unknown in Brazil but meaning forests in the Spanish tongue. In the Portuguese poetry the word *silvas* is often used; but the term for plain prose and every-day talk, is *matto virgin*—virgin forrest, therfore Messieurs les Geograpers, please write either Portuguese, or, which is far better, good English in your next edition of Brazillian maps. In 1862 I saw on the western verge of Brazil, the cacociros, of small muskmelon-shaped fruit, which contains the precious seed from which the chocolate is made.

CONSUMPTION OF CACOA.

Although France was the last great division of Europe into which chocolate was introduced, she has become the greatest and the best manufacturer of cacoa in the world. All Europe imports forty-two million pounds. The commercial movement of chocolate in Europe is represented by about $42,500,000. Spain is the greatest consumer, and is the only country where chocolate forms a principal ingredient in the alimentation of the common people. France consumes a third part of the European importation. The remainder is distributed among Italy, Portugal, Germany, England and Russia. The United States imports scarce two million pounds, while an equal population in France makes away with nearly thirteen million pounds, and is constantly increasing in its consumption. In 1849 France imported 3,132,771 kilogrammes of two pounds each; in 1865 her importation was 6,484,767 kilogrmmes.

PRODUCTION.

In the production of cacoa Brazil is the second second country, although she has the largest area in the world that might be used for this easy, clear and profitable culture. The demand of the world for coffee and sugar has caused the Brazilian planters to enter largely into their cultivation.

In 1866 she exported to Europe 8,121,132 pounds of cacoa. Ecuador is the greatest producer, for in the same year; she sent to Europe no less than 22,000,000 pounds. The various countries which furnished Europe with cacoa in 1866 were as follows, according to their rank as exporters, viz

Ecuador	22,000,000
Brazil	8,121,132
Venzuela, New Grenada and Nicaragua	4,000,009
Trinidad	3,000,000
Cuba and Porto Rico	3,000,000
The French West Indies and Guiana	720,000
Other countries—Inia, English West Indies, canaries, Phillipine Islands, etc.	1,358,868
Total	42,200,000

But this by no means represents all the cacoa raising countries or the whole products of those mentioned. Mexico, for instance, harvests 4,000,000 pounds, yet sells but very little—consuming nearly all within her borders. Guatamala, Honduras, Hayti and some other countries, do not rank among the exporters. It is calculated that nearly as much chocolate is consumed in the Western hemisphere as in the Eastern. Ecuador has made the most rapid strides in producing cacoa. In 1855 she raised, principally in the provinces of Esmeralda and Guayaquil, 10,456,000 pounds; in 1865 she more than doubled her harvest, it being 22,779,384 pounds.

Note by Editor.

Why not produce it in California? Our southern counties can produce it successfully.

CUT GRASS EARLY.

[The following good counsel relative to Haying from the *Germantown, Pa. Telegraph*, is in accordance with the advice we gave last week about Haying, and we hope our Hay makers will profit by this information.—ED. FARMER.]

MR. EDITOR.—There has been considerable discussion on this subject, but not much improvement has been made in cutting grass early. Some say "We shall begin haying earlier next season." The time soon comes round and finds them in a hurry about other work; the hoeing must be done and the few days in which they might take advantage of the haying has passed away, and now they must hurry and drive both early and late, while they are losing much in the quality of the hay. There are many tons of hay put into the barn the latter part of August that are not worth more than half price. A farmer had better pay three dollars per day to get the hay crop secured before the seeds are hardened, than to pay one dollar per day after the seed is ripe. I have known intelligent farmers to put off hiring help till the latter part of haying, because they could hire fifty cents cheaper per day than at the beginning of haying. Such men are penny wise and pound foolish. If June grass will make nice yellow butter, why will not June cut grass made into hay make nice winter butter? Then how pleasant to have such nice hay to feed out in the spring?

My stock has always done well on early made hay. I had rather have early made hay without grain, than late cut hay with grain.

Perhaps some would like to know what is late and early cutting. Last season if my haying could have been finished the 18th of July it would have been secured in good order. I did not finish till the 15th of August and find the hay very poor and the cattle know it. It will spend well, but the cattle do not lay on much fat, neither does it increase the flow of milk. Some of my neighbors did not finish till the first of September, and this was June grass. The seed had nearly all fallen out, so that it was not worth cutting. If this grass is cut early or when in blossom, it will make excellent fodder; but cut as late as some cut it, you will find it worth no more than rye straw.

How can the hay crop be secured in better season? We must employ more help or use labor-saving machines. The mowing machine, the horse-rake, and the hay-tedder are great helps; but if the farmer does not begin soon enough with these the grass may get too ripe.

It would be very pleasant to be all done haying by the 10th of July, then you would have plenty of time to secure your grain crops in time, and the rest of the season before fall-work you could be plowing, picking rocks, cutting bushes, dragging muck, etc.

Farmers, think of these things, and try to make a little improvement each year, and in a few years you will make decided progress.

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the articles they have to sell are wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seeds, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their gains largely increased by giving attention to this plan and particularly in everything appertaining to Agriculture and Horticulture.

Newsposters and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* is the life of trade."

THE NEW

OATS AND CLOVER.

We have received per last Steamer, a few bushels of these New Grains, pronounced to be very wonderful.

We shall put the Surprise Oats, and the New Brunswick Black Oats up in parcels PINTS and QUARTS and send them free by Mail at 50 and 25 cts.

The Clover Seed in parcels of ½ lb for $1 per package.

Orders must come immediately to secure them as we have only a small lot.

Cash must accompany the order. WARREN & CO.
Farmer Office.

To Take Charge of a Place.

A young man with some capital (from $500 to $1000) can hear of a good opportunity to take charge of a new place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

None but a steady and industrious young man need apply.

The applicant must be able and willing to work, and have a love and taste for rural life. To such a person a good chance can be given.

Address G. A. B.
Care of FARMER Office

KIRBY'S COMBINED REAPER AND MOWER,

WITH COMBINED SELF-RAKE AND REEL

TWO COMBINATIONS IN ONE MACHINE.

This is the only TRULY COMBINED MACHINE in the world. While many machines PROFESS to be Combined, and some of them are very good Mowers, there are very good Reapers, there are none that Combine both qualities like the KIRBY, and work in either capacity as well as if designed for no other purpose. To

"MONITOR"

Self Raking Attachment IS THE MOST PERFECT THING IN THAT LINE EVER INVENTED

It is COMPLETELY SUCCESSFUL in any or all conditions of Grain, either Heavy, Light or LODGED, or in the heaviest Mustard; as over a Hundred Farmers on the Pacific Coast, who are successfully using them this year, can testify.

The Kirby can cut the largest Mustard without any trouble, and rake it off also, if necessary.

We shall keep a large supply of EXTRAS of all kinds on hand.

The working of the "MONITOR" is so complete, that the closest scrutiny cannot discover that the team works any harder when it is taking off the heaviest lodged Grain, than it is to carry a man to rake off, and the grain is left in much better shape for the binder; so much so, that many claim that it saves the work of one binder, to say nothing of the difference in scattering the grain.

By a device lately invented, the size of the gavels can be regulated at the will of the driver, according as the grain stands heavy or light; it consists of a treadle which operates on one of the ways of the Rake-arm, so that the Rake can be thrown and pass over the grain until a gavel of the right size is collected upon the platform, then the Rake, of its own accord, will sweep it off.

This machine can be set to cut at any desired height from the ground, from two to eighteen inches, by merely changing two bolts, one in the grain-wheel slide, the other in the axle plate, where the joint or independent action is obtained.

This machine never had an equal in heavy lodged grain or grass, as it is in such cutting that it shows its superiority to the best advantage.

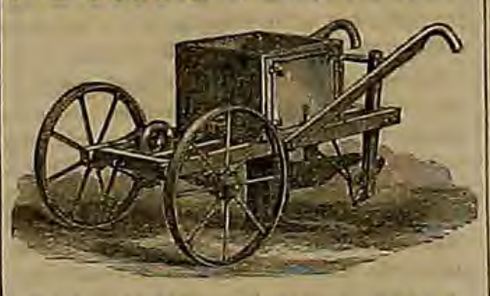
Sole Agents for the Pacific Coast.

30-22—no1

TRUE'S

IMPROVED

POTATO PLANTER.



This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatoes in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

WINE AND ALIMENTATION.

Wine taken in certain doses acts exciting and stimulating, an effect which does not only agree with the constitution of many people but is for some a necessity. It moderates in a quiet sanitary way, the too strong effect of the formation of hydrate, produced by drinking nothing but water. But wine plays still another part in the alimentation of the human race. The greasy and saccharine substances contained in the wine in minimum proportions produce, during the act of digestion the phenomenon of combustion, to which is due the animal heat of the body and the formation of carbonic acid gas and water. The salts of lime, potash, salsola kali and silica concur in rewarding the salinous elements peculiar to our cellular tissue which are usually carried away with our excrements. The azotic substances replace, however small an extent, the functions of their degenerous elements. The water finally, which represents about 88 per cent in most of the ordinary wines, is indispensable with the process of fermentation, even if never taken otherwise but in wine. In the wine districts of Europe there are many people who use exclusively wine for drink, never drink anything else than wine, however little recommendable this may be.

The caloric effects attributed to the alcohol in humid combustion are at least doubtful, as a large portion if not the locality of it, is eliminated by different actions of animal economy.—*Monthly Bulletin*

FRUIT IN THE WEST.—From almost every point in the great west, we have accounts of the encouraging prospects for fruit the present season. From our correspondent, Suel Foster, Esq. of Muscatine, Iowa, we have received the following note on this subject:

"I never saw trees so full of bloom and buds — the pear, cherry and plum are in full bloom, (May 1st) and the apple just coming into bloom. Land is sufficiently dry for plowing, and corn-planting is beginning. Grass and small grain look very fine."—*Germantown, Pa. Telegraph.*

THE GROWING CROPS.—We never remember a more favorable spring for getting in the oats, the potatoes, and the corn crops. It was all that the most exacting farmer could ask, and thus far the season have come opportunely and nothing has suffered from too little or too much rain. The wheat, oats and grass crops are scarcely up to those of last year in this section at the same period. We may be mistaken in this, but such is our impression from the scant observation we have been enabled to make. As to fruit generally we never saw the prospect to be better.—*Germantown Pa. Telegraph.*

OUR NATIVE CROP HUNTERS.

The *Alta* recently gave a sketch of the Farmers' neighbors near by.

Within two hours' ride of San Francisco all the native denizens of the primeval forest may still be found. In San Mateo county, among the hills on the western side of the lovely valley of San Antonio, within hearing of the whistle of the locomotive which drags the trains back and forth on the San Jose Railroad, wild game of many a rare species still abounds. For the past two years a huge grizzly bear has been making himself entirely at home on the hill northwest of the Mission Valley Water Company's new reservoir, between San Bruno and Crystal Springs. As he disturbs nobody, and nobody around there has lost sheep recently, he is left undisturbed, and watches his clover in peace, with no one to molest him or make him afraid. When the clover begins to dry up and the berries ripen, he will go back to the coast range and be seen no more for the season. On Saturday a party riding down the road along the Feliz Rancho, between the new reservoir and Crystal Springs, saw a beautiful deer standing within 100 feet of the road, and but a few rods from a house. The deer stood looking at the party without a sign of fear, until a dog approached, when he bounded away into the chapparrel on the hillside and disappeared. Rabbits, doves and quail literally swarm in the thickets, and the pretty school couples—now preparing to 'bring out' their little families at an early day, and wisely protected by law from the ravages of the pot hunter—may be seen trotting along in the roads, at rods or a few rods, for many miles. Wildcats are seen occasionally, and now and then a wolf is seen in close proximity to the houses of the ranchers. If the wild turkey could be once got into the chaparrals which cover the mountains along our coast, the species could never be exterminated, and the region would become a perfect hunter's paradise.—*Alta.*

LATER HOURS.—Lost wealth may be restored by industry; the wreck of health regained by temperance; forgotten knowledge restored by study; wasted friendship smoothed into forgetfulness; forfeited reputation won by penitence and virtue. But who ever again looked upon his vanished hours, recalled his slighted years, stamped it with wisdom, or effaced from heaven's record one blot of wasted time?

THE CENTRAL SUNDAY TRAIN.—The Central Pacific left at 8 A.M. and came in on time yesterday. It was the first Sunday train. Fifty-five through and one hundred and twenty way passengers started by it, and forty-five through passengers arrived.

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULAR.

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reaper yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all to trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S

SELF-RAKING REAPER.

This Machine stands at Front or all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

COMMERCIAL ST.

FRANCIS & VALENTINE

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,

VALUABLE PLANTS FOR SALE.

☞ **Persons who are desirous of securing a few** very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us.

CALIFORNIA FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....JUNE 3, 1869

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Grasses Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum the FARMER Office. Members of the Press and Strangers particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is TWO DOLLARS for five lines or less of space, in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

Acknowledgements.

Articles Received at the California Farmer Exhibition Rooms, No. 320 Clay Street.

We were greeted to day with a most acceptable offering from the Alhambra Gardens at Martinez.

We found on opening the large box, such a display of lucious CHERRIES, as would be fit for the desert before a king.

The Early May Cherry, the Black Tartarians and other splendid kinds, made a perfect boquet, rich to look at and glorious to the taste.

One branch of fruit also contained, or the same limb with ripe fruit, a cluster of blossoms; this is indeed an anomaly in "cherry time." Our most sincere thanks to Dr. Strenzel, for his liberal gift, a long life to you Dr.

We acknowledge a parcel of valuable seed from the Department of Agriculture at Washington, as follows.

The *Cassaba Melon*, from Smyrna, of which we spoke in previous numbers.

The *Magnesia Melon* from Smyrna. This variety is a long keeping melon, retaining its goodness for months.

The *Kirkaghatsch Melon*, also from Smyrna.

The *Achapesnorricher Melon*, a superior green flesh melon from the *Ionian Islands*, said to be very hardy.

The melon seeds from Smyrna, was sent to the Department by the Gov. General of Smyrna, and consequently are a select kind; these are sent out for careful experiment—and we shall be glad to distribute small parcels where we are confidant they will recieve due and proper care, ordinary cultivators would not properly test them.

VALUABLE ORCHARDS FOR SALE.

We would invite the special attention of capitalists to the *Two Very Extensive Orchards* advertised in our Journal.

Aside from the large and certain income of these orchards yearly, the lands are certainly rising in value, and they must become a very profitable investment.

To any capitalist who has any knowledge of Fruits—any love of the business—here is a fine opening to make a great fortune in shipping Fruits over the Rail Road, East. We can give them important information on the subject.

WHERE TO ADVERTISE.—The advantage of advertising in the *Farmer* can be proved in many cases where valuable Real Estates are for sale, or wanted.

We advertised two weeks since, an estate for sale in Napa, within ten days there was two applicants direct from the Farmer, and the Estate was sold to one of these purchasers, advantageously and profitably. While from other advertisements and agents, not a word or a customer; so much for wisely selecting *where* to advertise.

SALAD OIL.—We recieved a sample bottle of "Salad Oil" from G. E. Ball, which we have found to be superior to any Salad Oil we have ever tasted, it has a fine nut flavor, rich and delicious; those who wish an extra Salad Oil, should ask for "Ball's"

—The Cunard steamship China arrived at this port on the 5th inst., in two or three hours less than eight days from Queenstown, Ireland. Her greatest run on any one day was 375 miles, and averaged fourteen knots an hour all the way over. —*New York Exchange.*

The FLORENCE is warranted to be the best and most reliable Sewing Machine in the world. It seldom gets out of order. If there is one within a thousand miles of San Francisco not working well, I will fix it for nothing and pay all express charges.

SAMUEL HILL, Agent,
111 Montgomery street,
San Francisco.

31-19

THE AGRICULTURAL COLLEGE.

This most Important Institution, which should now have been in successful operation and giving to the young men of our State that preparatory Knowledge to fit them to act *their part* as the men of the future of our State, has now come to a "*Stond Still*," or what is worse, it is in our *Courts of Law*, as will be seen by the papers of the day.

It appears that after the laying out of the grounds at Berkley and spending some $7,000, the Gift of the Building and Land at Oakland and Berkley are to be withheld if the Law can do it.

What a commentary is such a state of things upon the management of this hoped for College, and what a disgrace to our State, which, known for its unbounded liberality, can witness a Nation's Gift of 150,000 acres of valuable land, and other Donations and Gifts, that if properly managed would *to-day* have been worth *One Million of Dollars*, now doing no good.

More than a year ago we foresaw this result and knew when the whole thing was arranged politically in the Legislature that the Rich Blessing intended for the *Young Men* of our State would be almost wholly lost.

Where now is the *One Hundred and Fifty Thousand* acres of land, which if it had been properly and judiciously selected and segregated at the proper time and leased or sold in alternate sections, would to-day have formed a fund that would have yielded a princely revenue, and been a source of income enough for all the wants of a College of the First class?

We consider that the Interest of the Agricultural College have been most wretchedly trifled with and prostituted to political and partisan purposes, and our Farmers whose interests in behalf of their Sons have been thus lost, should take immediate steps to right the wrongs which has been done to them by a *Memorial* to the next Legislature, to take this matter in hand and save from this wreck of the Nation's Gift, some little of what it bestowed to their So

It is a most sad thought for reflection, to know that other States with not half the resources we had, have now their Agricultural Colleges in the full tide of success and doing great good, and sending out the present year Graduates that will honor the Institutions from whence they emanate.

We design to ascertain the whole cause of these delays and the bad management of this trust, and hope to have the aid of all who desire to secure the Grant and Benefits of the Agricultural College for our Farmers' Sons.

THE CLINTON BAGGING MILLS.

The "Oakland Cotton Mills" which was built at Clinton some years since by Messrs. Rector and Sons, from Oregon, and which were run as Cotton Mills till recently, when they were merged into a Company and changed into a manufactory for Benlaps and Grain Bags, will soon be in active operation and ready to furnish the Bagging Material and also Bags to our farmers, of the very best quality, and at greatly reduced rates from former years.

It should also be known to our Farmers that this Manufactory would have been in readiness to work now, had it not have been for the hindrance occasioned by the sinking of a schooner in our harbor, whereby thirty-nine cases of machinery was sent to the bottom of the bay in sixty and seventy feet of water, and which, by extreme good fortune, thirty-four cases of the same was raised and is now being put in place ready for work—five cases only were lost.

We were kindly shown through the Manufactory by Mr. Rector, Jr., and we feel certain, from what we have seen, that this machinery is of the very best kind known, having been selected in Scotland and England, by Mr. Rector, Senior, whose experience in manufacturing and machinery entitle him to a high place among scientific and practical manufacturers.

Eighteen large looms are now ready, and the number will be increased to thirty for the making of the material for Bags 28 x 40, and also the making of Seamless Bags.

We noticed a new sewing machine that sews right and left, a kind of cross or lap stitch to give strength.

The new Flax Breaker is a powerful machine.—This and the other new and complete machinery will take the Flax or Hemp in the straw and soon turn it into the Grain Bags for our Golden Grain.

It was remarkably good fortune to recover so large a portion of the machinery that was buried in our Bay, as it would have greatly delayed the works, which will now soon be in operation, as a large stock of "Jute" is daily expected to set the Mill in motion.

The Company imported several Scotch Women, who are experts in this kind of manufacture.—These and other experienced European workmen will soon show what can be done, and our Farmers will feel the benefit of it.

We noticed the unpacking of some of the Cards of the Heckel Machines which was truly fine.—Messrs. Rector and Sons are deserving great praise for their energy and perseverance in pressing on to completion this all important enterprize.

Messrs. Heyneman & Co. are the Agents of the Company. They are well known and enterprizing Merchants of long standing and widely known. They will, as soon as the Mills are in operation, make their Goods known over our State.

We are truly glad to herald the present hopeful prospects of this Important Enterprize.

Family Music.—In the Music needed either for Sacred use or Family worship, or for social joyous occasions, there is no Instrument that has yet been Invented that sends forth sweeter sounds or more beautiful tones than the Mason & Hamlim's Melodeons; and however great the sale may be of all other Musical Instrements, the Mason & Hamlim Instruments are in universal demand and give universal satisfaction.

CONVENTION OF SILK GROWERS.

Perhaps we should not say Convention of "Silk Growers," but rather of *Growers of the Mulberry Tree*, and *Raisers of the Silk Worm*, but the *Interest* is all the same. Silk manufactures could not be had without the Tree was produced upon which they feed the Worm that spins the material that makes the fabric.

We were very much gratified to be present at the Convention named above at their meeting on Friday evening last, as the very good attendance and the earnest interest that was manifested by all present, the united good will and the generous feeling was good evidence that there was a unity of purpose in all to promote the real welfare of this cause.

There were some *Twenty-five* persons present.—Two Ladies who are engaged in the cause were present also, which was a source of much interest, as it is clearly shown now that women and children will become great cooperators in this enterprize.

We herewith give the full Report of the meeting with much pleasure, and while we recall their doings, we feel glad to say in justice to those present, that we have never attended a meeting in our State, connected with its Industrial Interest where so much real, earnest, united energy was manifested as at their meeting; all selfish considerations seemed to be laid aside, and a general desire was uppermost to advance the general good over the entire State.

SILK GROWERS MEETING AT SACRAMENTO.

Persuant to call, a meeting of those engaged in Silk Culture in the vicinity of Sacramento, was held in the Rooms of the State Agricultural Society on Friday Evening last, the 28th. I N. Hoag, Secretary of the Pioneer Silk Growers Association. in the absence of the President, called the meeting to order and stated that the object of the meeting was to compare notes, or interchange thoughts and experiences in regard to the business in which we are engaged. He believed that those present represented an industry, which in the future would be of greater value to the people and State of California than any other. That so little was known practically of the business, by many of those engaged in it, that he thought it very important that frequent meetings of the growers be had, for the purpose of mutual improvement. That he was exceedingly anxious that success attend the efforts of all engaged in the enterprize, for the benefits it would bring not only to those immediately interested, but for the general benefits. That since the last meeting of the Association, the number engaged in the business had greatly increased—and that an opportunity would now be given for all the old members to pay in their annual dues, and for all who desired to become members to do so.

I. N. Hoag, J. S. Harbison, Wm. M. Haynie, T. B. Flint and A. P. Smith, paid in their dues of one dollar each, and the following persons paid in two dollars and a half each, and became new members, viz. G. R Clark, A. F. Goddard, C. W. Reed, Wm. Blanding, W. R. Clances, John Smith, E. F. Aiken, D. A. DeMerit, H. A. Burnett, G. F. Glover, L. Waldrum, Wm. M. Millard, A. A. Goddard, G. L Henry and Sydney Smith,

Col. Warren of the *Farmer*, was elected an honorary member, also two ladies being present. they were elected honorary members of the Association, their names we did not learn. Capt. William Blanding of San Francisco, was elected President pro tempore.

Several amendments to the Constitution, were offered by Mr. Haynie, and under one of the requirements of the Constitution were laid over till the annual meeting in September next.

Capt Blanding the President pro tempore, made some very interesting remarks in reference to the industry, showing its profitableness and importance, and read a statement of facts, called from his correspondence from Japan and Europe, which we hope to be able to publish next week.

A Committee of Correspondence, consisting of Wm. Blanding, I N. Hoag and Wm. M. Haynie, were elected. The Rev. I. S. Deihl coming into the room was introduced by the Secretary, and upon invitation made some very interesting remarks on Silk Culture in Asia, where he has been travelling for the last ten years. On motion an invitation was extended to Mr. Deihl, to deliver a lecture before the Association at such time as will suit his convenience. The invitation was accepted and due notice of the time and place of the lecture will be given.

The committee of correspondence, were instituto procure a uniform paper, to be stamped with the Seal of the Association, for the use of the members in saving the eggs of the worms. The object being to prevent imposition by traders in European countries, in counterfeiting California eggs which has been done the past year, to a very great extent. All other Associations of Silk Growers in this State, were invited to cooperate in this last matter.

Col. Warren thanked the Association for the compliment paid him, and promised to do in the future. as he had done in the past, all he could to forward an industry in which he had long had so much faith, and which he now saw, about to be made so successful. He believed it would soon take rank as one of the first and most profitable industries of the State.

The meeting adjourned to such time as the Rev. Mr. Deihl should select for his lecture.

THE GREAT MAP.

We call especial attention to the *Advertisement* of J. T. Lloyd, Esq. of New York, of his New Map of *America* and *Europe*.

This is one of the most important Maps ever yet published, and very soon we shall show them at our Reading Room. Everybody should have one.

Crops in Oregon.—The *Oregonian* states that the Crops in Washington County are exceedingly promising; that the estimated yield will be *one-third more than ever before.*

OUR SILVER WARES.

In former years in this State, every table fork, tea spoon or mustard spoon, had to be imported either from Europe or the Eastern States; not even a "tooth-pick" could be made here, and yet there lay sleeping in the mountains and hills of our Pacific Slope, the *raw material*. Enough, as we see daily almost, pass our streets in solid bricks, to build a Palace for Aladin.

But as the Silver was here and the Gold was here, so was the Mind and Genius that was soon not only to develop these rich mines, but to convert these precious materials into those wares for our home use, so needed, not only for our daily use, but also to give due employment to our own skilful artizans, and save the necessity of sending away these precious metals; not only draining our country of its wealth which was placed here by Providence, for the up-building of a great and mighty section of country, but destined to wield a most important influence in the advancement of our whole country.

We remember well when Mr. Vanderslice, then with Mr. Sherman, first began to manufacture home made silver ware in this State, on Washington street near our office. It was indeed small beginnings, but like all new enterprizes, it was like the "acorn" small when first planted, but soon from this true germ, it has now become a mighty Oak, among the various enterprizes of the day, beneath whose branch will be found the manufactory of VANDERSLICE & Co., (on Montgomery street, near the Pioneer Hall) about twenty-five men of skill and genius, who now send forth Silver and Gold Wares that cannot be surpassed in skill of workmanship, or beauty of style by any manufactory in America or Europe.

It must be a source of pride and gratification to every Californian, to know that our State is making such progress, and also winning a name, fame and applause abroad that is exciting envy almost from all other countries.

Already Mess. Vanderslice & Co., have recieved liberal orders from several of the other states for their manufactured wares, and sets of ware to a large amount have ordered from Europe; strangers from abroad come to us, and take the *native silver* and have it made up into "Service Plate," and various "Memorials" and "Gifts," and these are sent abroad, showing the real wealth of our State in mineral riches, and also the capacity of our manufacturers; and this business must largely increase every year, for in this business, like all others undertaken by true Californians; we are bound to *Excel* in manufactures of all kinds.

Mr. Vanderslice began this manufacture in 1858 on a very small scale, now the works of Vanderslice & Co., employ 25 men, and their orders are always in advance of their power to fill; their machinery and patterns for work are all of the newest and best..

Mr. Vanderslice having been the Pioneer Manufacturer in this enterprize, knows what is needed and Mr. Thompson, long connected with Messrs. Geo. Shreve & Co., now the partner of Vanderslice & Co., knows the tastes and wants of our community, and is happily qualified to attend to the Sales Department, which will always present as rich a display of wares as the longest purse or the most refined taste can desire.

Strangers from abroad, who desire testimonials for friends, to show what our State can do, should by all means visit this establishment as it presents conclusive proof of the wealth of our hills and mountains, and also the excellence of our manufactures and the skill and genius of our artizans. Each and all of them bearing the motto of EXCELSIOR.

SAN FRANCISCO PACKAGE EXPRESS CO.

By reference to our Advertising Columns the new City Express Company's plan of business will be seen.

This enterprize has long been needed in our city. *Public convenience* demands it, and public carriers like this Company at *low rates* (their plan) is just what the people want.

This Company are now well established, with fine waggons, with active, energetic express carriers—men prompt, reliable, and expeditious—just such men, and they will do the work in just such a way as to inspire *public confidence*, and thus win the favor of the entire Public.

Our friends in the Country who send *Produce* to market—Fruit of all kinds, or any products that needs care and prompt attention, by sending to the care of this Company, will have their work done with promptness, and they can at the same time have all their purchases made and forwarded by Steamer or Railroad, and thus make a large saving of time and expense.

The Officers of this Company are well known in our city as reliable men. The Company have already secured a large business which is steadily increasing, which is a guarantee of future success.

We call special attention to this Company, and heartily comment the enterprize.

STEINWAY & Co's PIANOS.—While we are always pleased to hear the cheering and soothing strains of music, day or evening, and while the mind is soothed from the restless cares of the day, are so touchingly described by Longfellow in his inimitable poetic strains, which is also music to the soul that loves harmony; it is always right proper and just, that in our enjoyment of these *life preservers*, we should not forget those gifted minds that *prepare the instruments* that give us that enjoyment, therefore to Messrs. STEINWAY & SONS' should ever be accorded that meed of praise and honor, which belong to those inventors who have attained the *Highest Excellence*, which is now accorded to their Instruments.

GYPSUM.—This most important fertilize can now be had in any quantity, from a ton to a cargo; it is all important and worthy the attention of our Farmers, we shall publish an interesting essay on the subject next week.

THE HARVESTERS BENEFIT.

We call the especial attention of our Harvesters at this time to the IMPROVED "HALL'S THRASHER" as advertised in our Journal by Wm. Lyne, Esq., on Davis street.

Among the Improvements now offered is the following:

The Wheel is back of the Grain delivery. The Shoe is one foot longer *than any other Machine*, this gives more surface to clean on and so clean grain, *one foot longer* in the straw carrier, thus better and cleaner work.

This Machine is so constructed that the *feeder* can work all day and be free from dust save what comes from throwing the grain on the table. It never throws dust in the feeder's face, a great gain over other Machines.

Mr. Lyne has also an *Oil Feeder* for this and all other Machines. It is a self-feeder and thus saves all the time which is otherwise required and the Machinery is always in working order. Our Grain growers when in this city should call and see this Machine; it is as handsome as a piece of and the work as well finished, a perfect Machine that the maker may well be proud of, being made of the most thoroughly seasoned material.

This year Mr. Lyne has Imported the Improved Steam Threshing Machines, which will give the Harvesters much greater facilities for doing their work well and cheaply.

Harvesters should by all means obtain his Self-Oilers as a matter of economy, as they save more than half the cost of oil, and all the time required to oil the machinery.

Mr. Lyne is now prepared and is determined to sell his Machines at a very low rate, and guarantees to suit all who will call upon him.

PUMPS WANTED.

As the Dry Season is upon us, although the plan of furnishing water to the *Earth* and to [illegible] by means of windmills and long troughs is well done away, there is still a need, an actual necessity for every Farmer and every Homesteader having Water at this season of the year, and it is therefore necessary that the Inventions of the present day that are devised, by which water can be the most readily drawn from the earth and furnish as wanted, should be made known; therefore in our Columns will always be offered the most important and useful Inventions of the age for this purpose.

We therefore invite attention to the Advertisement of the American Pump Co., of their excellent Pump, which has already found a very large sale, the merits of which are set forth in the Columns of the Farmer by their New Advertisement this week.

We have before us a Letter from "Brigham Young," who having tested this Pump at "Salt Lake" the last year, send orders for more for this year.

This company are making them in large numbers, and the rapidity of their sales is conclusive evidence that they are approved of. It will be interesting to all who are seeking Pumps to call at the rooms of the Company, where can be seen all the practical workings of this Pump and the Proprietors will explain the value of the [illegible] to the purchasers.

THE PARLOR PHOTOSCOPIC TABLE.

As we are frequently written to relative to a New and Beautiful invention, we give from the Artist a description and directions relative which will answer many of the inquiries made to us.

The "Photoscopic Table" weighs about [illegible] pounds. It stands on central legs, is octagon in form, and about forty inches high. The pictures revolve horizontally on a conical [illegible] floor inside. The optical arrangement for magnifying and giving life effect to the pictures or scenery, is also inside the table. The [illegible] without pictures, ranges from $50 to $[illegible] Walnut finished in oil for $70 to $75.

Unless a person has seen one of these in actual use, and had the manner of preparing and setting the pictures fully explained it would not be well for them to attempt to [illegible] the pictures themselves, as this requires skill and experience, and they might spoil [illegible] Any person desiring one of the tables, their way will be to do up all their good photographs in a package, and send them to this office, and will *have them prepared and placed in the table properly before it is sent up.* It will cost about [illegible] per dozen to have this done, but it will be done well, and full directions for using the table will be sent with it.

Any sized photograph, from the Cabinet [illegible] to the smallest sized Carte de Visite and Vignette there is a place for each class in the table.

LOOK TO YOUR GARDENS.

Now that the dry season has come, it will be well for all who have *Garden Spots*, to look to them and care for them at once; all *trees*, shrubs and *vines*, should be carefully trimmed of all suckers and useless branches, and [illegible] flowering plants, should have decayed bulbs and blossoms removed, weeds and useless vines removed, as all these take the moisture and nourishment away from the plant.

Mulching should now be attended to, [illegible] rotted manure should be spread over the surface of the ground, 3 to 6 inches deep, this protects the soil from burning, and guards the roots of the plants; where it can't be done to the whole surface ground, have it done by all means to the most valuable plants and vines—when this is done, a good copious showering from the hose at night, over all the *foliage* to wash it off will accomplish great good.

When the earth is covered with manure, the water falling on the manure, keeps it from [illegible] the surface earth below is kept cool and moist, never bake.

—The Stockton Land Office is now open for business.

GYPSUM. (Sulphate of Lime.)

This well known but most wonderful fertilizer has not yet been practically introduced into the Agricultural interests or before the minds of our California cultivators, for the reason that there was no supply, and because it was hard to make them believe our lands needed manuring.

The time, however, has arrived when, by the admitted fact of the deterioration of our soil and the lessening of crops, something must be done to restore the soil and bring it into that state of fertility necessary to make it profitable to cultivate the soil.

Gypsum is a compound of Sulphuric Acid and Lime, and the object of this fertilizer is the fixing of Ammonia, thus making it the direct food of plants, either by supplying the Sulphate of Lime or by its decomposition, affording the Sulphur so necessary to the due development of certain plants.

Sprengel's Analyses shows the quantity of Lime and Magnesia, Sulphuric and Phosphoric Acids to be very large in the following plants, and for these this fertilizer has no superior:

Wheat, Barley, Oats, Potatoes, Cabbage, Swedish Turnips, Clover, Beets, Turnips, and root crops generally; thus ensuring to a certainty its great importance to the Farmers.

Liebig's Natural Laws of Husbandry gives conclusive proofs of its superiority as a fertilizer on Clover and Grasses, furnishing details of experiments made by distinguished men in various parts of Europe.

According to the experiments made by Buckholtz, Gypsum is composed of *thirty-three* parts of Lime, *forty-three* of Sulphuric Acid, and *twenty-four* of the water of crystalization.

Gypsum is often called Plaster of Paris, but this is wrong—it only takes that name and character when it has been deprived of its water of crystalizates by fire; there it becomes *Calcined Gypsum* or Plaster.

Gypsum for Dry Countries like California, will prove immensely valuable, as when used as a fertilizer in our hot and dry soil, its waters of crystalization are seperated by means of our hot climate and go at once to benefit the plants, while the Acids and Sulphate of Lime is taken up by the soil, enriching it to a very great degree.

The undersigned is now prepared to furnish this valuable fertilizer by the quantity to all who desire to try its well attested virtues.

TO THE FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

30-24 STOCKTON, SAN JOAQUIN COUNTY.

Home Miscellany.

MY YOUTHFUL GUIDE.

BY MRS. C. M. STOWE.

Looking o'er the dim old past,
Dreaming of what might have been,
'Til my heart grew young at last,
Guileless, pure, and free from sin—
Ah! methought the wheels of time
Had turned backward in their flight,
While my childhood in its prime
Welcomed in the rosy light.

Seated 'neath the willow tree,
Jamie playing by my side,
Wee pants rolled above his knee,
Proud was I of such a guide;
Hand in hand, and feet all bare,
Jamie led me to the brook,
Bade me step, *now here, now there*—
Pointing out each pebbly nook.

Bright stones glittering in the sun,
As we held them in our hands,
They were counted one by one,
Washed like jewels from the sands.
Ah! we prized our goodly store—
Some were round, or red, or gray—
As we waded to the shore,
Laughing, talking, all the way.

Jamie's years were more than nine,
We were young and both so small,
In that far off summer time,
When to me he seemed so tall;
With his blue eyes laughing, bright,
And his wealth of sunny curls,
Clust'ring o'er his brow of white,
Fair as any dainty girl's.

But his blue eyes long ago
Closed upon this world of light;
Jamie's form is lying low,
While I sit alone to-night.
I have waded sorrow's stream,
With no hand to point the way;
Where the shining pebbles gleam
I have gone alone to play.

But to-night I feel his hand
Clasp me as in days of yore;
Jamie! in the better land,
Can we live the old time o'er?
Can we wade the stream above,
Gathering jewels rich and rare?
Will the blue eyes, filled with love,
Guide me with such tender care?

—*San Jose Mercury.*

HOW TO WASH EASILY.

A house keeper, in the *Prarie Farmer*, says: "I am neither a news paper correspondent, nor an authoress; but for the benefit of the sisterhood who do their own washing, I want to give a recipe, which I have proved and know to be good. It was given me by a friend who has used it a number of years, and says it will not injure the clothes. Washing-day is the most tiresome of the week; to be sure machines and wringers have done much to lighten the labors, but even with these, I wash more easily by using the fluid. I wish some one would try this recipe and report how it works. Here it is: Five pounds of sal soda, one pound of borax, one pound of unslacked lime. Dissolve the soda and borax in one gallon of boiling water; slake the lime in the same quantity of boiling water; stir a few times, and let it stand until morning, when the clear fluid should be run off into jars, ready for use. For two pails of water use a half a pint of the compound. Soak your clothes over night putting soap on the soiled parts. In the morning wring them out and put them on to boil, first putting some of the fluid and soap into the boiler. After boiling ten or twelve minutes, take them out into your machine or tub and the dirt will rub right off; then rinse well in two waters. Some will say 'it will not do to boil dirty clothes,'—just try it and your clothes will look nicely, and you will not be near as tired."

THE DANGERS OF A BELLE.—If there is a weak spot in any woman's armor, it takes a woman to find it out, and thrust a needle into the quick just there. There is nothing so dangerous in society as for a girl to be pretty and too clever. She runs the risk of rising above mediocre females, thus becoming a target for all the women who receive less attention than she does, and therefore exciting their wrath. The laurels of a belle are often won through feelings wounded and sensibilities grieved. Women are never grateful to the men for making one of their sex a belle, and when a beauty, by the sheer force of her loveliness and intelligence, carries everything before her, and makes all men her willing captives, it is just here that her own sex set to work like beavers to decry her. Hence it is a fearful and responsible thing to be the belle of the season.

INDOLENCE.—If you ask me which is the real hereditary sin of human nature, do you imagine I shall answer pride, or luxury, or ambition, or egotism? No, I shall say idolence. Who conquers indolence will conquer all the rest—indeed, all good principles must stagnate without activity. —*Zimmerman.*

—At 16, a woman prefers the best dancer in the room; at 22, the best talker; at 30, the richest man.

A CLERGYMAN'S JOKE.

I was spending the night in a hotel in Freeport, Illinois. After breakfast I went into the sitting-room, where I met a pleasant, chatty good humored traveler, who, like myself, was waiting for the morning train from Galena. We conversed freely and pleasantly on different topics, until seeing two young ladies meet and kiss each other in the street, the conversation turned on kissing, just about the time the train was approaching.

"Come," said he, taking up his carpet bag, "since we are on so sweet a subject, let us have a practical application. I'll make a proposition to you. I'll agree to kiss the most beautiful lady in the cars from Galena, you being the judge, if you will kiss the next prettiest, I being the judge."

This proposition staggered me a little, and I could hardly tell whether he was in earnest or in fun; but as he would be as deeply in as I could be, I agreed, provided he would do the first kissing, though my heart failed somewhat as I saw his black eyes fairly dance with daring.

"Yes," said he, "I'll try it first. You take the back car and go in from the front end, where you can see the faces of the ladies, and you stand by the one you think the handsomest, and I'll come in from behind and kiss her."

I had hardly stepped inside the cars when I saw at the first glance one of the loveliest looking women my eyes ever fell on. A beautiful blonde, with auburn hair, and a bright, sunny face, full of love and sweetness, and radient and glowing as the morning. Any further search was totally unnecessary. I immediately took my stand in the aisle by her side. She was looking out of the window earnestly, as if expecting some one. The back door of the car opened and in stepped my hotel friend. I pointed my finger at her, slyly, never dreaming that he would dare to carry out his pledge, and you may imagine my horror and amazement when he stepped up quickly behind her, and stooping over, kissed her with a relish that made my "mouth water." I expected, of course, a shriek of terror, and then a row generally and a knockdown; but astonishment succeeded astonishment when I saw her return the kiss with compound interest.

Quick as a flash, he turned to me and said:

"Now, sir, it is your turn," pointing to a hideously ugly, wrinkled old woman who sat in the seat behind,

"Oh, you must excuse me! you must?" I exclaimed. "I'm sold this time. I give up. Do tell me whom you have been kissing?"

"Well," said he, "since you are a man of so much taste, and such quick perception, I'll let you off." And we all burst into a hearty peal of laughter as he said, "This is my wife. I have been waiting for her. I knew that it was a safe proposition.

He told the story to his wife, who looked tenfold sweeter as she heard it.

Before we reached Chicago we exchanged cards and I discovered that my genial companion was a popular Episcopalian preacher of Chicago, whose name I had frequently heard. Whenever I go to Chicago, I always go to hear him, and a heartier, more eloquent preacher is hard to find. He was then a young man; he is now well known as one of the ablest divines of the Episcopal denomination in the West.—*Harper's Weekly.*

BEAUTIFUL THOUGHT.—A writer whose life has passed its meridian, thus eloquently discourses upon the speedy flight of time:

"Forty years once seemed a long and weary pilgrimage to make. It now seems but a step; and yet along the way are broken shrines, where a thousand hopes are wasted into ashes;—footprints sacred under their drifting dust, green mounds where the grass is fresh with the watering of tears; shadows even which we should not forget. We will garner the sunshine of these years, and with chastened steps and hope push on toward the twinkling where the waters are still and the storms never beat."

—Nothing sets so wide a mark between a vulgar and noble soul as the respect and reverential love of womanhood. A man who is always sneering at woman is generally a profligate or bigot.

COMPLIMENTARY PRESENT.—On the occasion of the Moonlight Excursion train, last evening, given by Superintendent Binney to the ladies of Marysville, the recipients of this favor, as well as of others of the same kind annually, responded by presenting Andrew J. Binney with a magnificent gold headed cane. The presentation was made at Oroville last evening, and was a great surprise to the gentleman so deservedly complimented. We expect to hear next that some lady's hand will be presented to and duly acknowledged by the gentlemanly Superintendent. So mote it be.—*Marysville Appeal.*

To cut a glass bottle in twain.—An experiment.—The following plan, to break a bottle or jar across its circumference, so as to form a battery cup, or vessel for other purposes, may be of some service to our readers. I have performed the operation successfully many times. Place the bottle in a vessel of water, to the height where it is designed to break it; also, fill the bottle to the same height. Now pour coal oil inside and out on the water; cut a ring of paper, fitting the bottle. Saturate with alcohol or benzine, so that it touches the oil. Pour also, some inside the bottle. Set on fire; the cold water prevents the glass from heating below its surface, while the expansion caused by the heat will cause the vessel to break on the water-line.—*Scientific American.*

BLACKBERRYING PARTIES.—Parties of gentlemen and ladies leave this city daily for a hunt after wild blackberries, which are said to be very plenty this season. A thousand or less persons were along the Yuba bottoms on Sunday in search of these fine berries.—*Marysville Appeal.*

Country Homes Wanted.

There is wanted at this time, several **Homes in the Country**, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will buy them if they communicate with this office immediately.

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Addres the FARMER OFFICE.

OUR HOME INTERESTS

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact and the probability that unless this large sum of money will be increased each year and in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, to the East for investment in the purchase of Life Insurance instead of being retained at homes to promote and [illegible] ITS INVESTMENT HERE the commercial, mechanical, agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States on the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION whose capital and assets will not be impaired or [illegible] affected by the change in values that will sooner or later be by a return to specie payments in the other States of the Union. Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to every citizen of this State, who feel an interest in its progress, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

THE CALIFORNIA

MUTUAL LIFE

Insurance Company

Miscellany.

WONDERFUL SURGICAL OPERATION.

For a couple of years during the last decade, ...s attention of visitors to the Museum of the Med...al College, in Boston, was attracted to an iron ...r about three and a half (3½) feet long, and ...bout as large round as a crow-bar. This object ...d an inscription carved upon it, from which in...cription, and from the verbal statements which ...ere given to satisfy the curiosity aroused, it was ...earned that the bar had been driven through the ...ead of a man, by the accidental explosion of a ...harge of blasting powder, and, that this man, so ...r from being instantly killed by the injury, had ...ecovered from its effects, and was actually walk...g on this planet, attending to the ordinary af...irs of life. Such was the outline of a case which ...s become of classic celebrity.

The physician who attended the patient whose ...erebral organism had been comparatively so little ...isturbed by its abrupt and intrusive visitor, was ...r. J. M. Harlow, the writer of the pamphlet we ...e noticing, and who reported the case in the ...oston Medical and Surgical Journal, Vol. 39, No. ... In a foot note to the present pamphlet Dr. ...arlow says:

"Soon after the publication of this case in the ...oston Medical and Surgical Journal, in Novem..., 1848, I received a letter from Dr. Henry J. ...igelow, Professor of Surgery in the Medical De...rtment of Harvard University, requesting me to ...d Gage to Boston, generously proposing to de...y his expenses and compensate him for loss of ... Gage being quite well, and the hole in the ... of his head entirely closed, accepted this pro...sition, and remained in Boston, under the ob...ration of Prof. Bigelow, eight or nine weeks, ...re he was examined by many medical men, ... Bigelow being thoroughly convinced, at a ... when the accident had very few believers ...er in the medical profession or out of it, that ...lusion was as represented—that the iron had ...ersed the brain and cranium as stated. With ...concurrence he reported the case, with illus...tions, in the American Journal of the Medical ...ences for July, 1850."

... Bigelow having thoroughly investigated the ..., and satisfied himself of its genuineness, fin... succeeded in forcing its authenticity upon the ...dence of the profession in this city, as could ...ly have been done by any one in whose sagac...nd surgical knowledge his *confrères* had any ... confidence. But for his persistent efforts, we ... assume, with no disrespect to Dr. Harlow,* ...s great report of the case might have slumbered ...oticed in an old volume of this Journal, and ...r have secured its rightful place in the annals ...rgery—never have been accepted by the med... public, as a record of important facts, to be ...d upon by the physiologist and the metaphy...n. It was Dr. Bigelow, also, who had the ...ription made on the tamping-iron,† and who ...aded the patient to allow it to be deposited ...e Museum of the Medical College. As we ... from Dr. Harlow's pamphlet, the accident ...red in Cavendish, Vermont, on the 13th of ...ember, 1848. The subject of it was residing ...alifornia when he died, which was on the 18th ...y, 1861; between twelve and thirteen years ...g thus intervened between the date of the ...y and his decease. During a short period ...re his death he had several severe convul...

... Harlow had the enterprize to obtain the cra... and the iron bar; and having exhibited them ...he last annual meeting of the Massachusetts ...cal Society, has most generously presented ... to the Museum of the Medical Department of ...vard University. He also gives his obliging ...nt to our using the blocks which furnished the ...rations in his paper, as it appeared in the ...ications of the Massachusetts Medical Society, ...n it is now published in pamphlet form. It ...ows that we have come by the woodcuts in the ...ce of our present number. The pamph... describes the original accident, and the wound... from the outset; also the course of the ..., and the treatment till recovery. It further ... a sketch of the subsequent history of the pa... and concludes with a description of the ex...nal and internal *post mortem* appearances of the ...ion.—*Boston Med. and Surg. Journ. for April.*

* The accident happened, it should be remem..., more than twenty years ago, when Dr. ...low did not reside in this State.

† An implement used in blasting. It was sub...uently reclaimed by the patient.

Short Will.—A man recently died in New Or..., leaving one of the briefest wills on record. ...sisted of five words, "Mrs. Roper is my heir"—with a codicil of four or five words more.—...n folded the sheet, stating in an indorse...t that it was his will, to be opened only in ... of his death, and to be executed by a certain ...ed person, and that a copy of it was in the ... of his heiress. This will was contested in ..., but its legality was sustained.

Cast Iron vs. Sheet Iron for Stoves.—General ... related some comparative expertments ... had been performed by M. Carret, and ..., he said, corroborates his theory. Thus af... remained one hour in a room heated to ...grade) by means of a sheet iron stove, ... perspired abundantly, got a good appe..., felt no sickness whatever; he had ob...the same result with an earthenware stove ... experiment, when performed during only ... half hour with a cast iron stove, had brought ... headache and sickness.—*London Lan...*

A wealthy gentleman in New York died recent... of the glanders. He caught the disease from a ... horse. This is the fourth death of a bu... being from glanders, since the organization ... the New York Board of Health.

Miscellaneous.

A PRINCELY RESIDENCE IN THE COUNTRY FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

PROPRIETOR

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facie* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

We have the Exclusive sale of HILL CONCORD HARNESS, for the Pacific Coast.

AVERY TUBE WELL

COMPLETE FOR USE

THE TUBE WELL IS FORMED BY DRIVING prepared Iron Piping into the ground with a sledge. Although of comparatively recent invention, these Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well, all surface water, dirt etc. being excluded. The Tubing is coupled together in lengths of five or six feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Lift Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. ☞ For circulars, etc., address Postoffice Box, 17. UHRIG & DEWEY.
Office at 318, Pine street. 31-10.

Valuable Patents FOR SALE

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a return can be had for labor and capital can be made from.

WARREN & CO.

BOUND VOLUMES FARMER

☞ Volumes of the "California Farmer" for The last EIGHT YEARS, uniformly bound, can be had at the Farmer Office at $3 per Volume.

These Eight Volumes contain more useful matter touchin the practical workings of Agriculture as adapted to California Culture than any Book or Books Extant, as they comprise hundreds of Experiments, Letters and Essays upon the Culture of Cotton, Rice, Coffee and Tobacco; Grapes, Strawberries, and all other Fruits, with the Culture of Hops, Castor Beans, Flax, Hemp, &c. and the Whole series of Essays of L. Prevost on Silk Culture, from early beginning.

This set of Volumes would be a Library of itself and is valuable to the Cultivator of the Soil.

Orders sent to Farmer Office will be promptly attended to

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance*. We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once at our office, or addressing EDITOR FARMER,

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

Is on the red cover of the packages

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credits five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, June 1.

The Grain Market shows a little firmness this week, which we attribute to the small arrivals here which is caused by the attention of our producers being confined at Home at Haying, and preparing for the Harvest of the Grain crop.

Already Wheat has been harvested, and in many places the fields are already "White for the Harvest."

Although here and there we may hear of blight or rust, the harvest will be a large and a noble one, and we trust our producers will act wisely and press it upon the market, and out of the State as fast as possible.

It is the bounden duty of the producer to send his crops to market early and while there shall be a demand for shipment. Send it abroad and keep the Gold at Home. Our Farmers will feel the benefit of such operations to as great an extent as any class in our community, for should there come a *money panic* their interests will be affected more than any other class in the country.

Retail Prices in the Fruit Market.

Our Fruit Market shows abundance, and the display is fine. Our people can luxuriate on Fruit now.

Cherries have never been so abundant or fine, and the price is within reach of all.

Strawberries are getting scarce; a few of the Triumph d' Gand's, *Jucunda's*, and the White Chili are on sale.

Raspberries, a few only are in the market and bring a good price.

Currants are fine and plenty, selling reasonably.

Apricots are now plenty and better in quality.

Gooseberries come in very abundantly and are cheap.

A CARD.

Advertising Abroad!

WE CALL THE SPECIAL ATTENTION OF ALL Manufacturers, Agricultural Men, Nurserymen, Booksellers, and others having interests connected with the PACIFIC COAST, that now is the time to secure the business of this region by wisely ADVERTISING WITH US.

The full effects of the completion of that Grandest of all HUMAN ENTERPRIZES, the PACIFIC RAILROAD, must open a large and wonderfully increased business between the Eastern States and the Pacific Coast, and they who wisely ADVERTISE NOW, will be the FIRST TO SECURE IT, and when once secured, they can HOLD ON TO IT.

We therefore invite all those who have valuable IMPLEMENTS, MANUFACTURES, INVENTIONS, BOOKS, PAINTINGS, etc. to the Columns of the CALIFORNIA FARMER, that will give them a wider circulation than any other medium they can adopt.

WARREN & CO., Eds. and Prop'rs.

CLARKES' NEW METHOD

FOR

Melodeons and Reed Organs.

JUST PUBLISHED.

A Comprehensive System of Instruction, and an Improvement on all other Methods for the Simplicity and Progressive character of its STUDIES, EXERCISES, SCALES, VOLUNTARIES, and RECREATIVE PIECES—containing an admirable selection of Choice Pieces of every grade of difficulty, from favorite and popular authors thus relieving the tediousness of Studies and Exercises, and making the Method interesting, as well as Instructive to pupils; adopting, in this respect, for Reed Organs the System so successfully carried out for the Piano-Forte in "Richardson's New Method" for the latter Instrument. Arranged expressly for Cabinet, American, Metropolitan, Prince & Co., Cathart & Needham, Burdett, Esty, and all other Reed Organs; also for the Melodeon and Harmonian. By WILLIAM H. CLARKE, Author of "The American Organ Instructor" Price in Boards, $2 50. Sent post-paid on receipt of price. OLIVER DITSON & CO., Publishers, No. 277 Washington Street, Boston, CHAS. H. DITSON & CO. 711 Broadway, New York. 31-18

Traveling.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates as given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

June 9—MONTANA, Capt. E. S. Farnsworth, connecting with ALASKA, Capt. Gray.

June 18—COLORADO, Capt. W. H. Parker, connecting with HENRY CHAUNCY, Capt. Conner.

June 30—CONSTITUTION, Capt. Wm. H. Hudson, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman' and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se4 OLIVER ELDRIDGE, Agent.

For Marysville and Intermediate Landings. Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance*. We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once at our office, or addressing EDITOR FARMER.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLane's Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not accept any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Do not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER COMPLAINTS, BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINTS and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the Warm South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and sure. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It is our sincere wish that these Pills should be fairly and fo tested, and stand or fall by the effects produced. If they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms consequent on a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is called to perform, and on the regular execution of which depends not only the general health of the body but that of the Stomach, Bowels, Brain, and the whole Nervous System should be vast and vital importance to the health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has a connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate sympathy which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal nature or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will epumerate some of them:—Indigestion, Stoppage of the Bowels, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three fourths of the diseases common under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increased by pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful impression of having left undone something which ought to have been done. A slight dry cough is sometimes present. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning; he complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts everybody. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, proving the termination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are unequalled to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is ignorant the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is aware, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, judicious in other respects, but which entirely fails in consequence of worms being overlooked, even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be expelled before loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even hopeless with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip, occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy matter on the tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a sickening sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting, violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently mixed with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by a hacking cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual in providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water every morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten years a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by

FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLane's Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

CALIFORNIA FARMER AND JOURNAL OF USEFUL SCIENCES.

VOLUME XXXI. SAN FRANCISCO, CALIFORNIA: THURSDAY EVENING, JUNE 10, 1869. NUMBER 20.

The California Farmer AND Journal of Useful Sciences.

PUBLISHED EVERY THURSDAY EVENING.

GYPSUM AS A FERTILIZER.

...he following paper was read by Professor J. H. ...more of the University of Rochester, before ...Western New York Farmer's Club, February ...1869.

...mong the inorganic constituents of every part ...very plant—root, stem, leaf, or seed—lime and ...phuric acid may be almost universally detected. ...se two substances when combined form *sul...te of lime, or gypsum*—a mineral widely diffused ...most soils, and often occurring in vast masses. ...en crystalized in transparent plates it is *selenite*, ...n of fibrous structure it is *satin spar*, when ...quet and somewhat translucent it is *alabaster*. ...more or less colored by earthly impurities, ...is then called *gypsum*.

...e composition may be approximately stated by ...ng that one-third of its weight is lime, one- ...d sulphuric acid (oil of vitriol,) and one-fifth ...er. When pulverized and heated from three ...dred to four hundred degrees Fahrenheit, the ...er is expelled, and gapsum becomes *plaster of ...ris*, which possesses the remarkable and useful ...perty of returning rapidly to its solid condi- ...n, or *setting*, when moistened with water.

...Gypsum is soluble in the proportion of one pound ...fifty or sixty gallons, and is found in the water ...most wells and springs in varying quantities. ...We are to consider what relation gypsum sus- ...ns to plants. Since all plants contain sulphur, ...y must obviously obtain it from some soluble ...stance which contains it. Gypsum, being such ...bstance, may be absorbed by the roots of the ...nt, both the lime and the sulphuric acid being ...ctly appropriated to its nourishment. Indeed, ...ans of the microscope, minute crystals of ...sum have been detected in the cells of some ...nts. But, besides furnishing the only known ...ural sulphur to plants, gypsum, no doubt, con- ...ibutes *indirectly* to vegetable growth in an emi- ...nent degree.

...When carbonate of ammonia, which is a volatile ...t always tending to escape in the air, is brought ...o contact with gypsum, an exchange of consti- ...nts spontaneously takes place, resulting in the ...rmation of carbonate of lime and sulphate of ...monia. The importance of this change appears ...n we remember this new ammonia salt, though ...y soluble like the other, yet is not volatile, ...d consequently not in danger of being lost by ...poration, but remains in the soil, ready to be ...ken up by the roots of plants. The carbonate ...ing thus newly formed as an impalpably fine ...wder is in a favorable condition for the use ...plants.

...Besides its property of fixing the ammonia with ...ich it meets in the soil, its power of absorbing ...m the atmosphere, renders it an excellent trap ...r catching that valuable game, which is always ...ng about, but which the plant seems powerless ...ure until it is brought within its reach through ...e help of some such agency. This properly also ...kes it a valuable ingredient of the compost ...ap to prevent the escape of ammonia generated there by the decomposition of nitrogenous substances.

Both the constituents of *gypsum* are among the most energetic bodies in their chemical action upon others. In case of their decomposition taking place by any means, each of them would enter into new compounds, and thus promote changes conductive to the general improvement of the soil.

As in the case of other fertilizers, the results of experiment will necessarily vary with the physical and chemical condition of the soil to which it is applied, with the temperature and humidity of the season.

There seems to be, however, a quite general agreement as to the value of gypsum, when applied especially to leguminous plants, such as clover, beans, peas, etc, and also for root crops generally. This is in perfect accordance with the results afforded by the analysis of these plants, in which both lime and sulphuric acid are more abundant than in the grain straw of the cereals. Its favorable influence on grass is probably due rather to the ammonia which it supplies, than to its own fertilizing effect directly

It is highly probable that in some cases the effect really due to gypsum may be erroneously credited to some other fertilizer of which it forms a part. Especially may this occur in the use of the superphosphate of lime, as often prepared.—This will appear if we consider that in treating, for example, a ton of bone dust with the requisite quantity of sulphuric acid to produce the largest possible quantity of soluble superphosphate of lime, *a somewhat larger quantity of gypsum is also unavoidably produced at the same time*, so that the fertilizer thus obtained is, in fact, *a mixture of two distinct substances*, in which gypsum predominates. Such mixtures are sold as "superphosphate of lime."

When the soil already abounds in lime, other sources of sulphuric acid might be employed, or the acid itself might be applied, properly diluted, directly to the soil, where, meeting with the lime, it would instantly form sulphate of lime. But gypsum commends itself to us by its abundance and consequent cheapness. As before stated, a ton of gypsum represents nearly half a ton of sulphuric acid. If the gypsum costs five dollars per ton, the acid is obtained nearly at the rate of half a cent per pound while the market price is from five to ten times greater.

It is well to bear in mind that stock raising and wool growing, as well as grain growing, exhausts the sulphur of the soil, as this element is a necessary constituent of a large number of animal substances.

For example, one hundred pounds of wool contain about five pounds of sulphur.

To restore to the soil this loss, requires fifteen pounds of sulphuric acid, or thirty pounds of gypsum.

In view of the facts now presented, gypsum commends itself to our consideration as a candidate for still further trials.

First—As a direct source of plant food, supplying both lime and sulphuric acid.

Second—As the only known natural supply of sulphuric acid. Other sulphates, as that of soda, would of course furnish plants with this article. But besides its greater cost, as it is highly soluble, the danger of an excess would require great caution. On the other hand, gypsum being far less soluble, however great the quantity of it present in the soil, its solutions could never become concentrated to an injurious degree. It is self-regulating.

Third—As a possible source of lime even in soils where lime is already abundant, but in a physical condition less favorable to its appropriation by plants than the lime furnished by the decompositions of gypsum.

Fourth—As a preserver of ammonia, as already explained, absorbing it from the atmosphere and fixing it as a non volatile salt, available by the roots of plants.

Fifth—As a promoter of the decomposition of organic substances already in the soil, thus rendering them more speedily available.

A consideration of the chemical qualities of gypsum would suggest the following hints as to its use and application as a fertilizer:

First—That it should be as finely pulverized as possible to facilitate solution.

Second—That it would probably produce the most marked effects, other things being equal, on such crops as are known to contain a large percentage of its constituents, such as clover and other leguminous plants, root crops, etc.

Third—That to secure the conditions most favorable to the absorbtion of ammonia from the air and rain, it should be applied on the surface, or as near to it as possible. Its tendency to dissolve and filter down through the soil would suggest the same precaution.

Fourth—As the ammonia thus secured exerts a powerful influence, especially on the formation of the leaves and tender shoots of plants, it should be applied at such a time as to exert its highest stimulating effects upon the growth of the plant during its early stages, when it is most feeble, and most liable to suffer from a variety of causes, such as extremes of temperature, excess or lack of moisture. An earlier maturity might also be thus secured.

GREAT EXPOSITION OF TEXTILE FABRICS

AT CINCINGATTI, AUGUST, 1869. UNDER THE AUSPICES OF THE WOOLEN MANUFACTURERS' ASSOCIATION OF THE NORTH WEST.

Office of the Executive Committee,
CINCINNATI, May 8, 1869.

To the Ed. *Cal. Farmer*:

Dear Sir,

An Exposition of Textile Fabrics will be held in this city, August 3, 4, 5, 6, 7th, 1869. This being a public enterprise in which the interests of a leading branch of industry are involved, you are respectfully requested to call attention to this movement in the editorial colums of your journal.

Some facts relative to the history of the Association, the work it has done, statistics of the manufacturing interest, and an outline of the plan of operations are, herewith appended.

Should you feel disposed to grant this favor, will you send a marked copy of your journal to this office?

For the Committee.

JAS. M. CLARK, Sec'y.

A general meeting of those interrested in the Great Exposition of woolen, cotton, silk, and other textile fabrics, to be held in this city on the first four days of August next, was held yesterday afternoon, April 5th, in Room No. 11 of the Burnett house.

A large Executive Committee was appointed to prepare and lay out the work for the convention. Committees on Finance, General Arrangements, Invitation, Reception, Transportation, and Premiums, were appointed and the following resolutions were adopted to carry out this very Important Convention.

"*Resolved*, That having a deep interest in the prosperity of our city, and the growth of Western enterprises, we hereby cordially invite the manufacturers of textile fabrics in the Southwest and Northwest, to hold an exposition of their products in our city during the month of August next.

"We fully realize at this early day that our work is to be one of great labor but having full confidence in the business men of our community, we shall exert ourselves to make this an occasion worthy of our city and of the vast interests to be represented

"*Resolved*, That our invitation is extended alike to manufacturers of cotton, wool, flax, hemp, and silk, and also growers of wool and cotton.

"*Resolved*, That the Committee of General Arrangements is hereby instructed to procure a suitable room for regular business meeting, which shall be known as the office of the Exposition Committee' where regular meetings shall be held every Friday afternoon at 2½ o'clock.

"*Resolved*, That the Finance Committee is hereby instructed to continue its efforts until the subscriptions to the funds of the Exposition shall reach the sum of $10,000.

"*Resolved*, That all shipments of merchandise be marked with the owners name in full, and also marked, 'For the Cincinnatti Exposition, care of James H. Laws & Co.'"

It will be seen by the above that the executive committee has already arranged matters in good shape, and that, from the names and character of the gentlemen selected for the different committees vigorous action may be expected. Without donbt the contemplated exposition will be one of the most important, and bring to our city one of the largest crowds of people ever assembled here.

[We have recieved important information relative to this Exposition, and shall give more light upon it in our next. An Exhibition of this importance is worthy the attention of the Growers of Textile fabrics and our Manufacturers, and is to be hoped that California will take an interest and be Represented in both the Departments, and in each variety of manufactures, for California is now taking Rank among the Manufacturing States of our Union.—Ed Farmer.]

VALUABLE ORCHARDS FOR SALE.

We would invite the special attention of capitalists to the *Two Very Extensive Orchards* advertised in our Journal.

Aside from the large and certain income of these orchards yearly, the lands are certainly rising in value, and they must become a very profitable investment.

To any capitalist who has any knowledge of Fruits—any love of the business—here is a fine opening to make a great fortune in shipping Fruits over the Rail Road, East. We can give them important information on the subject.

ETC.

[We take the following happy Poem from the June number of the *Overland Monthly*, which as a Magazine, has no superior in the UNITED STATES.]

The *Overland* for June crosses the continent on the completed Pacific Railroad. As there are few readers who have not been told before, that it is the "greatest work of the Age," they will, perhaps overlook the omission here of much of the popular rhetoric in regard to "indissoluble ties," "wedding of the East to the West," etc. But some who remember to have read that "the two locomotives moved up until their pilots rubbed together, symbolic of the friendly salute of their respective owners," did not perhaps hear

WHAT THE ENGINES SAID:

What was it the Engines said,
Pilots touching—head to head
Facing on the single track,
Half a world behind each back!
This is what the Engines said,
Unreported and unread!

With a prefatory screech,
In a florid Western speech,
Said the Engine from the WEST:
"I am from Sierra's crest;
And, if altitude 's a test,
Why, I reckon, it 's confessed,
That I've done my level best."

Said the Engine from the EAST:
"They who work best talk the least.
'Spose you whistle down your brakes;
What you 've done is no great shakes:
Pretty fair—but let our meeting
Be a different kind of greeting.
Let these folks, with champagne stuffing,
Not their Engines, do the *puffing*.

Listen! Where Atlantic beats
Shores of snow and Summer heats;
Where the Indian Autumn skies
Paint the woods with wampum dyes:
I have chased the flying sun.
Seeing all he looked upon—
Blessing all that he has blest—
Nursing in my iron breast
All his vivifying heat,
All his clouds above my crest;
And before my flying feet,
Every shadow must retreat.

Said the Western Engine, "Phew!"
And a long, low whistle blew.
"Come now, really that 's the oddest
Talk for one so very modest—
You brag of your East! You do?
Why, *I* bring the East to *you!*
All the Orient—all Cathay—
Find through me the shortest way.
And the sun you follow here,
Rises in my hemisphere.
Really—if one must be rude—
Length, my friend, aint longitude."

Said the Union: "Don,t reflect, or
I 'll run over some Director."
Said the Central: "I 'm Pacific,
But when riled, I 'm quite terrific.
Yet to-day, we shall not quarrel
Just to show these folks this moral,
How two Engines—in their vision—
Once have met without collision."

That is what the Engines said,
Unreported and unread.
Spoken slightly through the nose,
With a whistle at the close.

NATIVE MARBLE.

The Placerville *Democrat*, May 29th, thus speaks of the Quarry of Marble at Indian Diggings, in the county of Eldorado. Messrs. Luce & Aiken Sacramento, the owners, are among our best marble workers in this State.

"Among the numerous resources of this county, which as yet are not sufficiently developed to attract general attention, we may mention our marble quarries. Prominent among these, and the only one perhaps that has been worked to any extent, is that at Indian Diggings. It is owned we believe, by Messrs. Luce & Aiken, of Sacramento. Works were erected upon or near it about 1861, which were destroyed by fire. The company soon after erected another mill, with four gangs of saws, which has been succesfully worked during favorable weather since. The machinery is propelled by a ten horse power engine, which, we are informed, is in fine working order and soon will be put in operation for the summer. The marble is beautiful and inexhaustible in quantity, and by competent judges has been pronounced as fine and succeptible of as high a polish as the best Italian. The machinery on the claim reduces the marble as taken from the quarry, to blocks and slabs of the requisite dimensions and in convenient size for transportation, and it is then conveyed to Sacramento, where the company's works are located, and worked up as the trade demands."

TEN REASONS WHY EVERY FARMER AND STOCK-RAISER SHOULD TAKE THE 'CALIFORNIA FARMER.'

1st. Every Farmer and Stock-raiser should be a reader of the Journal connected with the interests of his own profession in his own State.

2d. Every such person should give his sanction and support, generously and voluntarily to a Journal that advances his own particular business in his own State.

3d. Every such person is *benefited* by the publication of such a Journal, and is in justice bound to reciprocate such labors.

4th. No person engaged in these employments can be without such a Journal without the loss of many times its cost annually.

5th. The Farmer and the Stock-raiser will always be better advised of the markets, and that kind of information so important to his interests by constant access to a Home Journal.

6th. The *California Farmer* has faithfully advocated the best interests of the Farmer and Stock-raiser for nearly sixteen years, and is the *only Agricultural Journal in California.*

7th. The *California Farmer* contains the most important information relative to these interests in every branch of Agricultural science.

8th. The *California Farmer* contains the announcement of all New Seeds, Grains, Grasses, etc., together with all New Implements that will advance the cause of the cultivators of the soil.

9th. The *California Farmer* contains the arrival and introduction of all the best Stock of all kinds as soon as known, together with the full Market Reports of all the interests appertaining to Agriculture.

10th. The *California Farmer* is now the *only paper* on the Pacific Coast that is continued by its *original Editor and proprietor*, commencing at the time this Journal commenced; and having been constant in its efforts for the good of these interests, deserves the cheerful patronage of all good men.

COATES BROS' WOOL CIRCULAR.

PHILADELPHIA, June 1, 1869.

With the near approach of the new clip, dealers have felt disposed to meet the views of manufacturers, so as to enable them to close out the old stock and be prepared for the new wools; consequently there have been pretty heavy sales within the past ten days of both fleece and pulled, at several cents below the asking prices, at which they had been firmly held for several months past. The market is now pretty bare of both descriptions, with sufficient however, to meet the current wants of manufacturers who are not disposed to purchase except at extremely low rates, as many have stocks of woolen goods still on hand, and those who have closed out their spring productions, have had to do so at such rates as will not warrant any advance in the price of wool.

It seems probable, therefore, that the new clip will open at about the same price as last year. In some sections, farmers have been looking for an advance, and may be disposed to hold their wools until satisfied that the manufacturing interest cannot and will not pay it. This may delay the moving of a portion of the clip for a month or two; but, from the scarcity of money in other sections, there seems to be no doubt but that farmers and growers will be glad to accept the prices paid last year.

Business of all kinds is exceedingly depressed, and everything seems to be tending to a lower scale of prices. The trade in woolen goods especially has been exceedingly unsatisfactory—in very few cases paying cost to the manufacturer.

Although the market is now very dull, and the expectations of holders have been greatly disappointed, yet it seems probable that there may be some reaction as the season progresses, and that as soon as the dry goods market is placed on a sound basis we may see a fair trade for wool.

The sales for the month, of Domestic Fleeces and Pulled, foot up about 1,450 000 pounds, within the range of 40 to 55 for Fleeces, and 35 to 44 for Pulled.

DOMESTIC PULLED.

City Merino Pulled, Long.....	$ 42 @ 43
City Merino Short.....	42 @ 44
City No. 1 Pulled.....	40 @ 42
Western Merino.....	38 @ 40
Western No. 1.....	40 @ 41

Medium Unwashed Fleeces.....	30 @ 34
Common Unwashed Fleeces.....	23 @ 28

COATES BROTHERS,
Nos. 127 and 129 Market St.

A CROAKER DOWN BELOW.—In sinking a well at San Jose recently, a frog was found 120 feet below the surface of the earth. That is a good place for "croakers," it would be a good thing if all croakers could be buried just as deep or deeper, we would not help resurrect them.

Agriculture.

AMERICAN BEET ROOT SUGAR.

Many causes are now at work to interest the capital of this country in the production of beet root sugar. Among these may be enumerated, first, the depression of the sugar trade of the West Indies consequent upon the competition of European beet root sugar, which threatens to compel the abandonment of the business on many plantations. Second, the changed condition of affairs in the sugar growing districts of the United States on account of the abolishment of slavery and the increased cost of labor resulting therefrom. Third, the recent introduction and success of the diffusion process in the East Indies, which renders it extremely probable that the same process will very much cheapen the production of beet root sugar. Fourth, the success which has been achieved by some establishments already devoted to this industry in this country, which demonstrates the feasibility of a further extension of the manufacture.

We have not yet learned the success which the Roberts diffusion process has met with in its application to beet root sugar extraction in Germany where it is now undergoing a term of probation; but whether it succeeds or fails, we do not entertain a doubt that the beet, and not the cane, is to be the chief source of sugar supply for the future.

The beet has the advantage that it can be raised on a very much more extended portion of the earth's surface; it can be worked for a long time after it is harvested, a very great advantage over the cane; and, with labor at equal rates, it will yield a given rate of sugar of equal quality at a less cost than cane. These are facts capable of demonstration. Our attention was called to this subject at a time which presented much less favorable auspices than the present for the establishment of this industry in America, the period when the blight of civil war was resting upon the land. At that time we obtained from some gentlemen, one of whom had become familiar with the matter by long practical experience as superintendent of a beet root sugar manufactory in Europe, estimates of the cost, expenses and probable profits of a similar establishment here, which we may at some future time, after some changes to suit the altered condition of affairs, lay before our readers.

Very few are aware of the enormous quantity of sugar used in this country, and the extremely small proportion grown here. The reports of the Commissioners of Agriculture, show that the United States consume over one billion of pounds of sugar, and forty-five million gallons of molasses annually. Of this great total not one per cent is of home production, while every pound ought to be grown on our soil.

The fact has long been established that, owing to peculiarities of our soil and climate, beets grown in this country contain from one or two per cent more saccharine matter than those grown in Europe. In the manufacture of beet root sugar circumstances are all in our favor except the one item of labor, but as labor only represents 34 per cent of the cost of production, the difference between its value in this country and in Europe is nearly counterbalanced by the cheapness of our lands and the increased product, so that without taking into account the tariff on sugar, we could nearly compete with French and German producers.

The amount of revenue received by France from the sugar industry is greater than from any other one source. In this respect it is to France what the malt tax is to England. Now possessing advantages superior to France in every particular except cheap labor, it is, we think, impossible to show why this industry should not spring at once into healthy activity, if capitalists would open their eyes to the promise of profit it offers.

Agriculture in China.—The chinamen, who walk over bridges built two thousand years ago, who cultivated the cotton plant centuries before this country was heard of, who fed the silk-worm before King Solomon built his throne, have fifty thousand square miles around Shanghai which are called the Gardens of China, and which have been tilled by countless generations, and are as productive now as ever.

The area is as large as New York and Pennsylvania combined; and is all meadow land raised but a few feet above the river; lakes, rivers, canals—a complete net work of water communication the land under the highest tilth; three crops a year harvested; population so dense that wherever you look, you see men and women in blue pants and blouse, so numerous that you fancy some fair or muster is coming off, and all hands have turned out for a holiday.

Rhubarb Poisonous to Swine.—We have, within two weeks, seen several statements in which swine have been poisoned by the refuse of rhubarb after preparing it for market, consisting of course principally of leaves. In one instance it killed nine Chester Whites. We believe it, and are of the opinion that the whole plant is unwholesome and unfit for food. We said so a dozen years ago, and have seen nothing since to change this opinion.—*Germantown, Pa. Telegraph.*

[Let this matter be investigated by our Medical men.—Ed. Farmer.]

HOW TO SET A HEN.

When a hen begins to brood, put her in a quiet dry, warm place, make her nest on the ground, the size she can comfortably fill, nearly flat at the bottom, and wide enough to allow the eggs to lay side by side. We prefer the nest on the ground, because we think a more even temperature is preserved there. Box nests get too hot and the eggs are killed, if lice are not bred and the hen driven off. We have always found, too, that hens that stole their nest off under some bush, or among the weeds, but always on the ground, were sure to bring off larger and stronger broods than those set in the hen house, no matter how much care was taken to fix things right. So we are only following nature by putting the nests on the ground. It will sometimes happen however, that it is not convenient to make their nests on the ground; in such cases, the next best thing is to line the bottom of the nest with a fresh piece of turf. Cut straw, leaves, or any soft material, may be used for nests. We have adopted the habit of sprinkling in all nests, a few tobacco stems, chipped fine, to keep off the lice. Dry ashes answer the same purpose. Do not fail to set your hen in a quiet place.—No hen likes a noise about her when sitting, nor does she like company either. Too much of either will make her sit badly, and often cause her to break her eggs. If at any time an egg is broken in the nest, remove the shell and wipe off any egg that have become soiled, as the stiff coating that the egg forms when dry, may keep the chicken from breaking the shell.

If you have a hen-house, you will save trouble by separating the setting from the laying nests. The hens coming to lay are sure to annoy those sitting, if the nests are near, and often they persist in laying to sitting hens.

Set your hens where you may, you must feed them regularly once a day with plenty of good food and clean water, besides furnishing a convenient supply of dry ashes, dust or sand for a dust bath. Corn meal mixed with warm water to a stiff dough, and shelled corn, we have found to suit sitting hens.—*Dixie Farmer.*

House Plants—the Secret.—A lady who lives in the country recently showed us a box of flowers which she had brought to a friend in the city, the products of the plants in her own dining room windows. These were geraniums, roses, hyacinths, crocuses, fine variagated leaves of the beautiful Mrs. Pollock geranium, a calla, and other things—all as beautiful as if they came from the florists. There are few private greenhouses that could afford a better cutting than this lady's window-garden. The secret of her success is this she lives in an old fashioned house, built before entries or halls were invented; the room is heated by an open fire place as long as the weather will allow; a stove being put in only when the cold weather requires it, and no gas is burned. Gas and a furnace are very great conveniences, yet we doubt not that this lady's success in floriculture compensate for their absence. Every time the door is opened the air of the room is more or less changed, and the plants are under the very best circumstances that they can be in a dwelling house. Let those who complain of ill luck with house plants make a note of this and imitate the conditions as much as possible.—*American Agriculturist.*

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the articles they have to sell are wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seeds, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their gains largely increased by giving attention to this plan and particularly in everything appertaining to Agriculture and Horticulture.

Newsposters and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* is the life of trade."

THE NEW

OATS AND CLOVER.

We have received per last Steamer, a few bushels of these New Grains, pronounced to be very wonderful.

We shall put the Surprise Oats, and the New Brunswick Black Oats up in parcels of PINTS and QUARTS and send them free by Mail at 50 and 25 cts.

The Clover Seed in parcels of ¼ lb for $1 per package.

Orders must come immediately to secure them as we have only a small lot.

Cash must accompany the order. WARREN & CO.
Farmer Office.

To Take Charge of a Place.

A young man with some capital (from $500 to $1000) can hear of a good opportunity to take charge of a new place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

None but a steady and industrious young man need apply.

The applicant must be able and willing to work, and have a love and taste for rural life. To such a person a good chance can be given.

Address G. A. B.
Care of Farmer Office

ORANGE SEED.

THOSE WHO WISH TO RAISE TREES FOR AN *ORANGE PLANTATION*,
Can obtain SUPERIOR SEED at the
FARMER OFFICE.

LAKE

VINEYARD WINE

COMPANY.

The undersigned, hitherto doing business under the name and style of B. D. WILSON & CO., have this day changed their firm name, and will hereafter continue their business as Wine Growers and Merchants, under the name and style of

"The Lake Vineyard Wine Company."

J. De BARTH SHORB,
CARLTON CURTIS.

We desire to call the attention of the Trade to our large stock of the celebrated Lake and Mound Vineyard Wines, and choice assortment of Wines and Brandies from the best Vineyards of California. These wines, bearing our trade-mark on package, label, and seal, we guarantee of uniform good quality, inferior to none, and ready for safe shipment to any part of the world.

Orders for the Atlantic States will be filled by our New York House from their depot, at No. 45 Murray Street, New York.

The Lake Vineyard Wine Co

Corner Broadway and Battery Streets,
May 1st, 1869. San Francisco.

TRUE'S

IMPROVED

POTATO PLANTER.

This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed.

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatoes in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the Potato Planter from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

WARREN & CO.,
320 Clay street, up stairs.

SAN FRANCISCO

—:o:—

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULAR

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all s trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S

SELF-RAKING REAPER.

This Machine stands at Front of all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

—ALSO THE—

MARSH HARVESTER!

AUBURN HARVESTER,

SWEEPSTAKES

AND

VIBRATOR THRESHER

WHELER & MELICKS'

Two Horse Power and Separator,

HAINES' IMPROVED HEADERS,

THE VINE IN EUROPE.

OBSERVATIONS BY AN AMERICAN VINE GROWER.

Letter Number One.

HOME ASSOCIATIONS.

a tour through some portions of Eu- car 1868, the subject of the cultiva- ne and its treatment, both in vine- products in vine-making, was to the great interest.

For several years he had at home given this subject much thought and attention, and had plant- ed vineyards of most of the prominent American varieties, and cared for them until they had come into fruit, while he was familiar with the efforts made in various sections of this country to produce still wines, and those of Mr. Longworth, and of the late Mr. Anderson who succeeds him, at Cincinnati, Ohio, and the more recent and highly successful efforts made at Hammondsport, N. Y., by "The Pleasant Wine Company" to make champagne on the French method, and had witnessed at the lat- ter place the details of this work in the hands of the most skillful of Frenchmen, experienced in the practical part of the work by long service in some of the most prominent cellars of France, from which country they had been imported by the pro- moters of that company.

These considerations gave the writer more than ordinary interest in the question abroad, and in traveling through Southern Europe he observed in the different countries the peculiarities of each in their treatment and culture of the vine and their methods of handling the grapes in wine mak- ing, and proposes to give such general views and reminiscences as a hasty look taken by the travel- er would furnish through Switzerland, Italy, the Tyrol, Austria, Prussia, Germany, the Rhine, and France, with such information and facts as came into his possession, and under his notice; and to commence the series by the present article upon the grape

IN SWITZERLAND.

The hillsides on both sides of Lake Neufchatel, in Switzerland, are covered with the vine.

The plants are quite small, and are set very close together, as near as three or four feet, and more frequently the former than the latter distance. The vineyards are usually walled, and the terraces are always faced with stone, laid up in a good strong wall with lime and sand. The soil seemed thin and quite poor. The plants are trained to light sticks, about an inch and a half in diameter, driven into the ground, and the vines never seem more than four or five feet in height.

On Lake Geneva the vineyards present the same appearance, and if the main cane is one or even two inches in thickness it is never seen more than four feet high, and is cut back constantly to that, and becomes a sort of tree or pole standing almost alone, which this slight stake merely steadies rather than supports.

These stone walls, facing terraces and dividing vineyards, are quite common on all the Swiss lakes and throughout Switzerland generally, but are not universal. In many of the vineyards these walls are laid in the most substantial manner, to the height sometimes of seven or eight feet on a par- allel wall, and of durable masonry.

In the higher altitudes among the mountains, as at Sion and the valley of the Rhone below, the vine is cultivated in the same way, and I here inspected the vineyards and cellars more closely.

I saw vines at Sion over one hundred years of age, in good bearing, that were about one and a half inches in diameter, four feet high, cut back to a single stalk without laterals, and were simply a timeless trunk or tree of that size, which nearly stood alone. The crop per vine is light, but per acre is quite heavy, because of the great number of vines. These old vines never crowded each other as ours would have done. They are very small feeders and light growers. The fruit hangs low down and close to the main stem I could on- ly judge of the quality of this fruit by the wine, as I was not in these vineyards in the vintage, and by the test should not consider the fruit good.—The Swiss wines are inferior to the French wines and are made on the German method, which is far behind the French system. As a rule each propri- etor keeps his own wine cellar and the machinery for wine making.

The cellar I visited at Sion was much better than the average of Swiss wine cellars, but I should despair of ever making good wine in it. It was not sufficient depth for uniformity of temper- ature, and generally there was not that cleanliness and sweetness essential and indispensable to suc- cess, and the wine showed all these faults in its flavor. Through the courtesy of Monsieur Antoine de Riedmatten, one of the most prominent citizens of Sion, and who is himself a vineyard proprietor and a gentleman of culture, I had access to the vineyards and cellars at the latter place, and ob- tained much information and detail about vine- yards and wine making. It is usual among the Swiss to put their wines in smaller casks than in Germany. When the wine is one year old the Swiss bore a hole two thirds of the way up to the head of the cask and drink the wine down to this hole, and then renew the cask each year, so that the same cask is never emptied, and, thus renewed, may have been in a family for generations.

The vine throughout Switzerland is planted in the strangest places; on high in the mountains; in nooks in the valleys; on a ledge at the base of a precipice barely wide enough for a chamois to tread, and there trained to the face of the perpen- dicular rock which, warmed by the sun in summer, hastens the ripening of the fruit.

Frequently you will see little patches of vines- yard, one, two or three terraces wide and a dozen vines long on the face of a mountain, on the only spot of arable land on its side, with a narrow path leading by a tortuous and zigzag course to vines, every other part of the face of the mo- tain being perhaps barren rock or precipice ravine.

There is no piece of land so small but the proprietor will face it with a stone wall laid lime and sand, and perhaps eight to twelve high, if by this means he can produce a terra permanent enough for the life of a vine.

THE SWISS WINES.

Switzerland can never be a large exporter wine, as she barely supplies enough for h consumption, and the wine is as generally on tables of all classes here as in every continenta country.

While some white wines are produced, the ma- jor part of the Swiss wines are red.

The best white wines are probably those made in the canton named "Grison," and this is made from a dark red grape.

A fine and luscious white wine is also produced in the "Valais."

In one district in Switzerland, "the Valteline," a superior and generous red wine, is made. The grape is suffered to remain on the vines until, in some seasons, early November.

It is then picked stem by stem and hung up by the stems for two or three months in the large outbuilding to dry. When ready for the wine- press, every decayed berry is removed, and every cluster carefully examined.

The must for fermentation is placed in an open vessel, and the surface skimmed every morning and evening for about twelve days. When the fermentation ceases, it is set by in a close vessel for one year before it is tasted. This is a very remarkable wine, very strong, with considerable body, and it is said that it will keep well for a century.

Wine making in Switzerland, although in no sense equal to the business in Germany, in every respect should be classified with Germany as to its methods and products—as it more resembles the latter country in the character and culture of its vineyards as well as in the handling and treat- ment of its vines.

In speaking of Switzerland I have confined my- self to that part of it lying on the French side of the Alps, leaving the Italian side to be classified with Italy, which it closely resembles.

CLARE BELL.

DISTILLATION.

The origin of this art is extremely obscure. It appears, that when at sea, the Phœnicians used, in extreme cases, to get potable water by boiling that of the sea, and collecting the steam in spon- ges. It is also related, that a monk, of the name of Marcus, who belonging to the suite of St Remi collected the vapor of boiling wine in a piece of flannel, and squeezed it out upon the wounds of the soldiers at the seige of Rheims; with the same liquid mixed with honey, he would make a cordial for the dying, and it seems that the great Clovis himself did not disdain taking it. When alem- bics were discovered is not exactly known; but it is, that in the thirteenth century, Arnaud de Vil leneuve, or Arnaldo Villnovano, professor of medicine at Montpeliar, was the first to improve the rude apparatus then in use for distillation, an art which he seriously studied and promoted. He wrote several volumes on his labors, and states, among other things, that by a chemical process, there may be extracted from wine, a liquid which has neither its color nor its usual effects. This wine water is a water of immortality, since it pro- longs the days of man, dissipates peccant humors, revives the heart and keeps up youth. It cures colic, dropsy, paralysis, etc. Arnaldo died in 1313, leaving his MSS. to his pupil Raymond Lul- le, who became the most celebrated alchemist of the middle ages. He continued his masters re- searches, and soon succeeded in obtaining fire- spirit or alcohol. Having fallen in love with a beautiful maiden, and paid his addresses to her for some time in vain, she at length discovered to him the fact that she was suffering from an in- curable cancer. He was so struck with horror at this, that he entered a monastry, not, however, without directing her to dress the sore with alco bol. The remedy proved of no avail, but this was the first instance of the new liquid's being applied to the healing art. Distillation soon spread, and the wines of the Charentes were subjected to it about the 15th century, but various ordinances and police regulations soon restricted the art to a few priveleged persons. The distillers and vines- gar manufacturers were incorporated by Louis XII it 1514, and invested with the sole right of mak- ing brandy and spirits of wine.—*Paris Galignini.*

CLARKES' NEW METHOD

FOR

Melodeons and Reed Organs.

JUST PUBLISHED.

A Comprehensive System of Instruction, and an Improvement on all other Methods for the Simplicity and Progressive character of its STUDIES, EXERCISES, SCALES, VOLUNTARIES, and RECREATIVE PIECES—containing an admirable selection of Choice Pieces of every grade of difficulty, from favorite and popular au- thors thus relieving the tediousness of Studies and Ex- ercises, and making the Method interesting, as well as Instructive to pupils; adopting, in this respect, for Reed Organs the System so successfully carried out for the Piano-Forte in "Richardson's New Method" for the latter Instrument. Arranged expressly for Cabinet, American, Metropolitan, Prince & Co., Cathart & Need- ham, Burdett, Esty, and all other Reed Organs; also for the Melodeon and Harmonian By WILLIAM H. oncern.

The unde[r]sig[ned] ...d of over thirty years, devoted himself to ...e preparation of lubricating compounds; and ha[s] succeeded, both in this country and in Europe, in producing a chemical ar- rangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to con- cede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufac- turers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar pre- paration before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or up- wards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable team- ster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,

VALUABLE PLANTS FOR SALE.

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to con- servatories or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collec- tions of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great induce- ments to purchase of us. WARREN & CO.,

John Vanderbilt & Brothers New Trade list Catalogue also recieved.

Whitlocks Exposition Record.—We have the number for June and with it many valuable reports.

We have recieved the Fourteenth Annual Report of the "Odd Fellows Library Association," this Report furnishes the List of Officers of the Association; By Laws and a full statement of the condition of the Institution.

This Association shows by their Report, a very prosperous condition. The Library now numbers 16,788 volumes, the property of the institution valued at $43,092.12, being an increase in value for the past year of over $7,000.—We are pleased to record so very favorably of this Noble Institution.

We return thanks to the proprietor of the "Merchants Reading Room," for their courtesy in sending us liberal files of papers, from the Islands and elsewhere.

We call attention of all *Parents* to the several Essays in our Home Department, they are worthy *serious attention.*

Vine Growers.—Will find the Letter on Vine and Wine Making, by *Clark Bell*, to be deserving a careful reading, many things there we know will be new to them.

NEW AND SPLENDID FURNITURE.—We would call attention to the Furniture Warehouse of Messrs. N. P. Cole & Co., who are now opening New Patterns of Rich and Beautiful Furniture worthy the attention of all purchasers.

Messrs N. P. Cole & Co., have one of the largest and most select stock of Rich Furnitire on this Coast.

THE BEE-KEEPERS' JOURNAL,

And Agricultural Repository.

A large and handsome monthly, at $1 a year. Specimen copies sent free. Edited by Homar A. King, and Ellen S. Tupper; the former, author of "The Bee-Keepers' Text Book, (Which has reached its eighth edition, having run 7 editions of 16,000 copies in two years,) and the latter Iowa's noted writer on Bee-culture. A specimen copy with liberal premium offers and "Hints to Bee-keepers" sent free. Write now and not forget it. Address

H. A. KING & CO., Nevada, Ohio.

Until Sept. 1, 1869, and thereafter in New York City.

31-19

SHIPPING CALIFORNIA FRUIT EAST.

It is well known to our old and permanent readers, that for several years This Journal has urged upon our Orchardists, to make preparation for growing particular kinds of choice fruit, for the special purpose of sending East over the Pacific Rail Road; this journal has also presented the plan of *Refrigerator Cars* a long time since, and named the plan of operation for a success in this business, it should not be undertaken however at random or by persons ignorant of the kind of fruit appropriate for such an enterprise, because that would be sure to end in loss.

To make such an enterprise a complete success, there should be Partners at each end of the line; a *shipping* partner here and *selling* partner there, and a *Capital* of $8 to $10,000 in cash to work with, for losses would accrue occasionally, and these should not discourage for they must arise from various causes; but with good capital and intelligence, and constant and continued attention for a few years, a Fortune can be made.

It is expected in the Eastern States that Californians will do this business exclusively, as they think we know our season and fruits best.

We clip the following on this subject, from the Cheyenne Leader of may 13:

"Now that the Pacific Railroad is completed, we may look for California Grapes, Peaches' Apricots, and Nectarines in July, instead of waiting two months later for Eastern fruits. These fruits are not only two months earlier than those of the Eastern States, but, so far as the grapes, nectarines and apricots are concerned, they are two hundred per cent. better; and are considerably cheaper. Grapes for instance, are the most expensive of Eastern fruits, while they are the cheapest products in California. Fresh figs also, that connot be had in the East at any price, can be obtained from California—although they are a very perishable commodity. There could be no better paying business during the coming Summer than an agency or Depot for the sale of California fruits."

INSURE YOUR STANDING GRAIN.

Now is the time to make sure and save your Crops, the present and the next month surrounds our Farmers with great danger, from loss of ripened grain in the fields, which is now exposed to many perils

A few days since, we learn, that about 175 acres of standing grain near Vacaville, on the ranch of Cannon and Staples, and also 10 acres on another ranch together with a large quantity of Hay, was was destroyed by fire; we suppose by the sparks from a locomotive.

Whatever may be the cause, the danger now is imineut, and every careful Farmer should guard against such dangers.

We would again urge them to seek safety by a Policy of Insurance, which can be effected with the Pacific Insurance Co., of our city on fair terms.

The Agents of the Pacific Insurance Co., in all the counties, wil furnish plans of safety, and it is to be regretted that anyone should remain, and be exposed to ruin almost, while precaution is safety.

OUR TAX PAYERS.

Our Daily papers are now presenting the list of our RICH MEN; those who pay "Big Taxes," and show heavy incomes from $1,000 to $100,000 each.

We see also that St. Louis Mo., shows some *Rich Men*, also some whose Annual Income rank as high as Half a Million Dollars.

We notice some curious facts in these lists; some men that we supposed were *very rich*, only reader in $20,000 and others we did not suppose *very* rich, stand higher upon the list; but we suppose there will always be a mystery about the wealthy.

We think that the *Toy Business* and *Piano Trade* must be very good, if it will enable Mr. Kohler to show a larger income than the ruling spirits of the *Bank of California*, for in the list we see that W. C. Ralston Esq., rates $20,000 income, while the Toy Shop Man, Mr. Kohler, rates $30,000. The "Doll Trade," must be good; who would not sell dolls if they could rate $30,000 income annually?—But we suppose our Tax Books would show that the Prince of Bankers had been clipped of a *cipher* in the data—and it should read, not $20,000, but $200,000—but never mind, who wouldn't sell Dolls? and who wouldn't be a Banker?

WHITE PINE.

We see in our streets, the sure evidences of the richness of the Silver district of White Pine, but however great may be its resources, there will be many persons *seek* but they will not find it.

We hope soon to lay before our readers, some interesting letters from thence, from one who is a resident there for a time, but at present not able to write.

In a letter just recieved relative to other business, the writer says in closing his letter.

"This is an *awful climate*, the *Excitement* is *dead*, but real developing, and results are bringing out the *real silver*. Imeet many Old Californians here. Will write soon as able."

Thus we see the work in earnest has began, and speculation and false excitement is done; this is well and it would have been better if excitements of some kind had never been known there.

We have no doubt but that there will yet be a revealment of rich treasures, surpassing all yet known in White Pine.

DEATH.

Death has no terrors ever for me!
Beyond a beautiful arch, I see
My Father! saying, Welcome to thee.

There has been a very great wrong done by Parents, in creating or allowing a wrong impression to be made on the young minds of their children, respecting Death.

"The King of Terrors," "a Leap in the Dark,' and the "Grave, to a Bourne whence no Traveler returns." these "Old sayings" are impressed so strong on the minds of children and youth, that even in their maturer years, young men and maidens are afraid to pass a Graveyard or see a coffin, without fear and alarm, and numerous signs are told that forebode Death; the conversation too, of parents about Death, are often of that nature as to inspire a *dread of Death*, which, besides the injury done to the nervous system, leads to very wrong impressions that often are of serious import to them in after life, mentally, morally and spiritually.

The Blessed Saviour said: I go to MY FATHER, I go to *prepare a place* for you. and I will come again and bring you.

Why should we fear Death? We most assuredly know *we must all die*, we must all take this long Journey, then why fear?

In all the ordinary Journies of life, we make due preparation for them, *we inquire the way*, we procure maps and charts of the route, we learn all the particulars, carefully noting everything, and we *prepare ourselves for it.*

Why then should we not prepare for *this Journey.*

We are going to OUR FATHERS HOUSE. Why should we fear? Rather we should rejoice that we are making *Ready to go Home* to that "Mansion not made with hands Eternal in the Heavens."

Death is a *sweet release*; should not this, rather be the thought of the "Traveller here below," than that "Death is the King of Terrors?" There has been a great wrong done in the world, by the Education of children on this subject, and it is time the evil done should be corrected.

Ministers of the Gospel should teach the true doctrine of this *Journey Home*, and our Medical Men should also awaken a true spirit of inquiry about the *the House we Live in.* Medical Men are not the builders of all these houses, but to them the people go that *repairs* may be made; but alas! they too often pull down and destroy the tenement they are called upon to save, and this arises from the fact of their ignorance of that *Temple of the Spirit*, which has been entrusted to their care for a season.

It is time that our Ministers of the Gospel, our Medical men, Parents, and all intelligent minds should *seek truth* and *preach truth* upon this subject, and make this journey we must all take, one of Hope and Faith of a brighter and better life.

Death has been at work recently in our city among the Old and the Young. Many of the Early Pioneers of our State have entered upon that *Journey Home* and the last week *nearly one-half the deaths* in our city was the *Little Ones*, under five years of age, these have all "Gone Home."

Let us then more truly view this matter of Death this departure from the *Clay Tabernacle* to a brighter land, and thus viewing it rob Death of those terrors which a false Education; both Social and Religious, has too long attached to it.

Most truly has that noble bard spoken upon this subject, we read in "Young Night Thoughts" the following:

Death is the "Crown of Life."

Were death denied, poor man would live in vain,
Death wounds to cure; we fall, we rise, we reign;
Spring from the fetters, fasten to the skies,
Where blooming Eden withers from our sight.
This *King of Terrors* is the PRINCE OF PEACE.

NO ENEMIES.

A man without enemies is a man without friends, is an old and true saying. The *good fellow* who never gives offence never accomplishes much.

A writer on this subject thus speaks:

"Heaven help the man who imagines he can dodge enemies by trying to please everybody. If such a gentleman ever succeeded we should be glad of it—not that we believe in a man going through the world trying to find beams to knock and thump his poor head against, disputing every man's opinion, fighting and elbowing and crowding all who differ from him. That, again, is another extreme. Other people have a right to opinions, so have you; don't fall into the error of supposing they will respect you less for maintaining them, or respect you more for turning your coat every day to match the color of theirs. Wear your own colors in spite of wind or weather, sunshine or storm. It costs the vascillating and irresolute ten times the trouble to wind, and shuffle, and twist, that it does honest, manly independence to stand its ground."

A man without enemies may truly be called an "old fogy," a do nothing. A writer speaking of a class of *plodders*, says:

"They are laughed at by the world, and generally live long enough to laugh, if they will, at the fools who pass judgement upon them. Plodders are philosophers. They anchor on the rocks of ages. They seek the good, true, and substantial, and never miss it. They select with caution, but hold on with courage. If there is merit, they discover and develop it. All honor to the plodder. He may not be the sun that shines but is that which warms, nourishes, builds up.

Gypsum.—Our readers will see that we have occupied a large space in this number to this very important Fertilizer, by a valuable Essay which we found in the Carolina Farmer. In the South and in all dry and hot climates, Gypsum will be found invaluable, and as much of the long cultivated soil in this State needs new life, this article is just what is wanted, and we can most earnestly commend it to the Farmers of California. We hope the Essay on Gypsum on our first page will be carefully read.

THE FOURTH OF JULY.

We are glad to notice that preparations are being made to pay the proper observation to the day, that secured the Independence of our Nation.

We sincerely trust that in celebrating the day, all Political, Sectarian and Partizan feelings will be laid down at the Altar of Liberty and Equal Rights, and that all persons will feel that the Love of Country, and the full enjoyment of the Liberties which such a country as ours offers, should crush out, at least for that day, every selfish or intolerant feeling, and thus let all enjoy the day to the utmost.

BATTLE OF BUNKER HILL.

While the preparations are being made to celebrate the Glorious Fourth of July, our *National day for a Jubilee*, should we not all remember the day that *ushered in that Glorious event.*

There can be no doubt but that the Battle of Bunker Hill, and the blood poured out that day in behalf of Liberty, was the *Baptismal waters* that gave life to the Infant Child of Freedom, for that day's sacrifice and that day's martyrdom, sealed the event and hastened on the work which was crowned with success on the *Fourth of July*, immediately after, and we hope this day, also, shall be remembered and observed in a due manner, as one of the days sacred to the cause of Liberty and Freedom.

PREMIUMS AT FAIRS.

We are glad to notice that at many of the Agricultural and at Mechanical and Industrial Fairs the present year, the managers propose to give Services of Plate, Pitchers, Goblets and Premiums o lesser value, also Books, Newspapers, etc., these for the Premiums instead of money.

This is a wise plan, and one we have always advocated as more likely to do away with much of that selfishness, so manifest always at our fairs, in the effort to obtain the *First Premiums.*

We feel confident that if suitable and *liberal Premiums* were offered in season, for each and all departments much good would be the result.

The winners of handsome Plate Premiums, would value them and preserve them in the family, but money Premiums are not esteemed, but quickly spent and with it the interest in the exibition

We hope the present year in *California*, that this plan will be generally adopted of giving Plate Premiums, and now that we have our own Silver Manufactory, they should be patronized, and in this connection we invite attention to the Silver Manufacturers of our city, Vanderslice & Co., whose manufactures are esteemed equal to any made in the United States.

THE PALACE CARS.

Much has been said of the splendid Coaches or Palace Cars of the Pacific Railroad, which were prepared for the occasion of the trip of Chas. Crocker Esq., his family and friends on their recent trip East.—The Cheyenne Leader of the May 27th says:

"This morning's passenger train was belated some four or five hours. When it did come, however, it came crowded, as usual with through passengers. Attached to the regular Union Pacific train were two splendid coaches from the Central Pacific. The two last mentioned cars are built of California laurel wood, skilfully and tastefully put together, and were occupied by Charles Crocker, Superintendent of the Central Pacific railroad; H. S. Crocker, of the firm of Crocker & Co.; Henry Miller of the firm of D. O. Mills & Co., and Dr. R. H. McDonald, accompanied by Mrs. Charles Crocker, Mrs. B. R. Crocker, and two children, all of whom were en route to the East on a visit of pleasure and business. These cars are perfect in all their interior arrangements. Meals are served on board. One of the cars is simply a splendid saloon, the carpeting and upholstery of which are suggestive of luxury and comfort to the inmates. Closets are provided for the safe carriage of china, glass and silverware. In both cars we noticed heaps of California flowers, rich ripe cherries, enough to make one's mouth twist entirely out of shape, trying to subdue its own passion for "goodies" like these, and we felt onrself breathing the aroma and fragrance of the Golden State, and yet a thousand miles from its nearest edge. We return the party our heartiest thanks for a present of fresh roses and a handful of cherries. May their journey be unattended by care or accidents."

IMPROVEMENTS AT CALISTOGA.—The steady, important and valuable improvements that are constantly being made at the Calistoga Watering Place, in the grounds, and the beautifying the same is constantly adding to the attractions of the place, this induces to a constant and increasing attention thither.

Calistoga has become the SARATOGA of New York and the NEWPORT of Rhode Island: it will be one of the principle points of interest to visitors to our State, via. Pacific Rail Road.

Mr. Brannan is constantly adding improvements both ornamental and practically important, to make it a place of business as well as a place of pleasure and a healthful resort.

The Williamette *Farmer*, Oregon, says:

We have had refreshing showers of rain during the past week. Crops and gardens will be greatly benefitted by it.

OBITUARY.

"Suffer little children to come unto Me and forbid them not, for of such is the Kingdom of Heaven."

How beautiful is this thought as we associate with Heaven, a place where little children shall gather in countless millions, there in their innocence, their mirthfulness, and their young gushing affections to be permitted to live and act out that is pure and lovely.

Of *little children* the Blessed Saviour has also said, "Unless ye become as *little children*, ye shall in no wise *enter the Kingdom of Heaven.*"

It is undoubtedly to be understood, that unless we become *pure* and *sinless*-like *little* children, before they have become corrupted by the contact with *older* children, (for we are *all* children of our Father,) that is meant by this teaching; for little children are types of Heaven before the beauty face of these types are worn off by corruptions of the world. Then how beautiful must *Heaven* be where these *Types of Humanity* have been tried in the purifying furnace of the perfect Love of Heaven.

We have *to-day* been standing beside the form of a *little child* robed in its *Bridal* grave clothes to fit it for the journey of its body to the Tomb. Its little spirit took wing *two days ago* in brighter Robes than even the most loving hands of devotion could prepare.

Before the Robes for Earth were given,
In Angel Robes he'd fled to Heaven.
Friends gather'd round, a weeping crowd,
They see his *Body* in his shroud;
But joy! his Spirit has gone before,
And now he's safe on the Heavenly shore.

As we stood beside the little coffin, the abiding place of the clay of which the body was made, as we saw the closed eye and felt the cold brow, we waited, but we could not hear the sweet voice that we had so often heard calling *Papa, Mamma*, and *Grandpa!* That little voice is not lost but only stilled to our *earthly hearing; it is hearing, it is calling*, though we hear it not. And the stricken Parents, and Grand Parents, and little Sister, and other kindred, and its little playmates, stand beside the little coffin that now holds all that is left of *Little James*, however sad, however hard it must seem to be, to part with dear and loved children, Tears and Lamentations cannot now bring back the loved one passed away, *he cannot come to us, but we must go to him.*

We read upon the coffin lid these words:

JAMES M. M. WHITE:
DIED JUNE 8, 1869,
AGED 3 YEARS, 11 MONTHS AND 2 DAYS.

Passed away—gone before—Dead. While words of comfort in the hour of sorrow like that of a *Parent* laying away their *first born* in the Tomb, always the spontaneous offering of every feeling heart, Alas! how few that speak can realize that sympathy so needed in an hour of trial like this; it is only those who have *suffered* the loss that can truly feel what a Parent's heart called upon to endure.

We can sympathize with the afflicted, for we have been called *twice* to see our own loved ones in their little shrouds, and these sad and afflicting occasions to us were of a nature to try the heart. *We* saw our own *first-born* brought from the cold waters of the river, still in Death, and *our own* "Little James," with his skates upon his feet—speaks to us now; and as we read the name of *James* upon the coffin-lid of this little *asleep* in his *shroud*, the wound of long past years is opened afresh, so that *we can* offer sympathy as we do now most deeply, to those heavily afflicted Parents.

We can say to them:

Weep not, fond Parents, weep no more,
Little James has only *gone before;*
His sufferings ended, his pains are gone,
And now he is safe in his Heavenly Home.
You can look on his *face* and touch his cold form,
But he *sleeps* and cannot *speak* to you now;
When he wakes he will stand on the Heavenly shore,
And tell you he cannot come to you more.
Look! look! Mother, *cross the river* and see
Little James says *Mother*, come over to me.
Come! Father, come! here on Golden wings
Little James in his white robes an angel shines.
Then weep no more, Parents, to you it is given
To meet your loved child at the gateway of Heaven.
Be resigned to God's will, and dry up each tear,
Little James now in Heaven stands waiting there.

TO THE MEMBERS AND FRIENDS
OF THE
Mercantile Library Association

The very heavy expense attending the Removal and Furnishing the New Library Building has much embarrassed and is seriously impairing the usefulness of the Association, and we find ourselves really in very great need.

Will every one who feels at all grateful for the comfort and benefits furnished by the Association make some personal effort to render the heavy debt weighing upon us less burdensome?

The most practical and best means of doing this, is by increasing the number of Subscribing Members, thereby increasing our source of revenue and extending the benefits of the Library to a larger number than at present.

Every one has it in his power to do something for the general prosperity.

You owe the Library something more than initiation fees and quarterly dues, and as an annual appeal is made to each and every member to do so. Get at least, one new member; many may do much more, but be sure that you at least do that.

By order of the Board of Trustees,

THOMAS R. HAYES, Rec'g Sec'y.

San Francisco, June 8th, 1869.

[We received the above Circular by mail, and cheerfully give it in our Columns, and would call the Public to a prompt and generous aid to this truly deserving, worthy, and Noble Institution. ED. FARMER.]

Our Agriculturists will find a word for the Beet Root Sugar, from one of our Exchanges.

GYPSUM. (Sulphate of Lime.)

This well known but most wonderful fertilizer has not yet been practically introduced into the Agricultural interests or before the minds of our California cultivators, for the reason that there was no supply, and because it was hard to make them believe our lands needed manuring.

The time, however, has arrived when, by the admitted fact of the deterioration of our soil and the lessening of crops, something must be done to restore the soil and bring it into that state of fertility necessary to make it profitable to cultivate the soil.

Gypsum is a compound of Sulphuric Acid and Lime, and the object of this fertilizer is the fixing of Ammonia, thus making it the direct food of plants, either by supplying the Sulphate of Lime or by its decomposition, affording the Sulphur so necessary to the due development of certain plants.

Sprengel's Analyses shows the quantity of Lime and Magnesia, Sulphuric and Phosphoric Acids to be very large in the following plants, and for these this fertilizer has no superior:

Wheat, Barley, Oats, Potatoes, Cabbage, Swedish Turnips, Clover, Beets, Turnips, and root crops generally; thus ensuring to a certainty its great importance to the Farmers.

Liebig's Natural Laws of Husbandry gives conclusive proofs of its superiority as a fertilizer on Clover and Grasses, furnishing details of experiments made by distinguished men in various parts of Europe.

According to the experiments made by Buckholtz, Gypsum is composed of *thirty-three* parts of Lime, *forty-three* of Sulphuric Acid, and *twenty-four* of the water of crystalization.

Gypsum is often called Plaster of Paris, but this is wrong—it only takes that name and character when it has been deprived of its water of crystalizates by fire; there it becomes *Calcined Gypsum* or Plaster.

Gypsum for Dry Countries like California, will prove immensely valuable, as when used as a fertilizer in our hot and dry soil, its waters of crystalization are seperated by means of our hot climate and go at once to benefit the plants, while the Acids and Sulphate of Lime is taken up by the soil, enriching it to a very great degree.

The undersigned is now prepared to furnish this valuable fertilizer by the quantity to all who desire to try its well attested virtues.

ORNAMENTAL TREES.

The Oregon Fir Tree Association.

We are now prepared to Ship to all parts of the country, all the handsome varieties of the Fir Tree that so abound in Oregon. The trade of the Association is at present promising much greater success, especially on the Pacific Coast, than they have formerly anticipated. The nurseries of California do not seem to have adopted the Oregon Fir, only as we have recently taken some of their orders from them.

We find them to possess an attraction as an ornamental tree rarely equaled. The Yellow Pine and the Balsam Fir are the most popular varieties; the Yellow Pine the most hardy—thriving in almost any soil or climate. Our trade with the East is promising; our trees have arrived there in good condition and are growing.

The Association is prepared to supply a large demand for Trees, from six inches to four feet in length, but we cannot fill orders for any more than four feet.

Efficient Agents wanted in all parts of the country, to whom we will extend the most promising advantages. We shall be glad to receive a communication from any one who might desire such an agency, on the most paying terms, or from any one who may desire our Trees.

Orders for Trees to be set in the fall should reach us as early as October, and those for the spring supply as early as February.

We Ship none but perfect and healthy Trees.

All communications should be addressed:

REV. C. W. TODD,

Oregon City, Oregon.

To Hay-Makers!

The Great Stacking Fork.

WE OFFER TO THE HAY-MAKERS OF THE PACIFIC Coast, the Celebrated

HARPOON HAY STACKING FORK

One of the best inventions of the age. With this Fork, A Great Saving of Time, Strength, Labor and Expense is made, as it is indeed a very valuable and important implement, both to Hay Makers and Grain Growers. This machine is used to load and unload Hay or Grain Waggons to Barn or Stacks, and is very extensively used at the East.

We have received a few of these Implements which can be seen at our Office. Having more on the way, we are prepared to take orders for them in quantities to suit the trade, as we have the Agency for the sale of them for the Pacific Coast.

Sample Implements, and all Particulars at our Office.

WARREN & CO.,

"Farmer Office," 320 Clay Street, up stairs.

CAST-STEEL DAIRY KNIVES

WE HAVE RECEIVED INVOICES OF THE CELEBRATED

Cast-Steel Dairy Knives,

Manufactured by D. G. Young of New York. We have them of all sizes, from those of FOUR BLADES to cut FIFTEEN INCHES, up to THIRTEEN BLADES to cut TWENTY INCHES.

These Knives are of very great advantage to Dairymen, and are worthy their attention.

For sale by WARREN & CO.,

"Farmer Office," 320 Clay Street, up stairs.

SUPERIOR MELON SEED

FOR LATE PLANTING.

We have just received from New York, a small Invoice of *Superior Melon Seeds*, of the following kinds for late planting.

PURE ICE CREAM MELON,

TRUE NETTED CANTALOUPE,

LONG GOLDEN MUSK MELON,

GREEN FLESH MELON.

Now is the time to plant Melons on our river-band lands, and on all alluvial soils; planted now, they spring into bearing quickly.

For sale at FARMER OFFICE, 320 Clay St., up stairs.

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

30-24 STOCKTON, SAN JOAQUIN COUNTY.

Home Miscellany.

YOUR HOME.

Be true to yourself at the start, young man,
Be true to yourself and God;
Ere you build your house mark well the spot,
Test well the ground, and build not
On the sand or the shaking sod.

Dig, dig the foundation deep, young man,
Plant firmly the outer wall;
Let the props be strong and the roof be high,
Like an open turret toward the sky,
Through which heavenly dews may fall.

Let this be the room of the soul, young man—
When shadows shall herald care;
A chamber with never a roof or thatch
To hinder the light—or door or latch
To shut in the spirit's prayer!

Build slow and sure; 'tis for life, young man,
A life that outlives the breath;
For who shall gainsay the Holy Word?
"Their works do follow them," saith the Lord,
"Therein there is no death."

Build deep, and high, and broad, young man,
As the needful case demands;
Let your title deeds be clear and bright
Till you enter your claim to the Lord of Light,
For the "House not made with hands."

IS IT A WHIPPING THEY NEED.

BY MRS. J. E. FOOTE.

All the beautiful book theories as to the best methods governing children fade into utter insignificance, when tested by the daily, actual experience of mothers. It is wonderful to observe how differently children of the same family require to be managed. What is good and wise restraint for one, appears to be the worst course possible for another.

"We hardly know how to manage our little boy," said the wife of a young clergyman, in a sad tone. "We try always to be decided with him, and endeavor to secure implicit obedience, but, really, it seems to do little good. We conquer him at the time; but *it don't last*. He will do the same thing the next day—or the very next hour, perhaps."

"I can sympathize with you," said Mrs. J., "for we have had very much the same trouble. I see now, better than when I had but one, how it is.—*Children are not all alike.*

I never saw a more obedient child than our oldest. His father and myself, each, had a 'little tussle' with him, before he was three years old.—He did not hold out long in either case; but I shed many bitter tears over it that night, to think it had been necessary to correct my darling baby. It was the first exhibition of real stubbornness he had ever shown, and I feared, perhaps, I had done wrong in noticing it at all.

But that was a final *victory*, for never since, though now seven years old, has he refused to obey. If he does wrong and grieves me, I have only to tell him of it, and he will say at once, 'Don't feel bad, mamma, I *am sorry*,' and is not likely to repeat the offence.

My 'rules' were all laid down in regard to the government of children, before his birth. With much thought and prayer I put my theory into practice; and, with God's blessing, it worked well. I really looked with pity, not unmingled with pride at my own success, upon the mothers who found it difficult to secure obedience.

When our second child came, to add to our happiness, demanding its portion of love and care, I don't know that I had a doubt but that we should, by the same methods, succeed in having another *'almost perfect child.'* To our surprise, however, our carefully studied plan of discipline didn't work at all, with the youngest. The little thing seemed to think it quite necessary that she should *conquer us*, instead of *our conquering* her.

For some time we always corrected her, and often quite severely, until she would yield obedience; but at last we became satisfied that we were doing wrong. *Love* is now doing what the rod could not. We were *cultivating*, rather than subduing, an obstinate disposition in the joyous, but very loving little one, committed to our care. And now we have made up our minds until she is old enough to be reasoned with, we will avoid, as much as possible, the use of the rod, and all occasion for controversy."

As nearly as I can recall it, the above was the conversation of two pious mothers—and good mothers they were too. Their experience was not unlike that of many others, perhaps, who still fail to see where the trouble lay.

All unnecessary commands, for the purpose of seeing "that a child is thoroughly conquered," we believe are hurtful, and calculated to foster a willful spirit, rather than to correct it.

With many dispositions it is very desirable to avoid, as much as possible, a commanding tone, when wishing any service from a child. "Does Mary wish to help mamma?" or, "Be so kind as to do this for me, Johnnie," usually goes a long way further toward securing prompt obedience, than "Go do this or that," as if they were little slaves, rather than part and parcel of our own being.—Most children will do your bidding for *love* far more readily than from any amount of reproof or punishment.

Is it not possible that we often make sad mistakes, and fancy our little ones "in need of a whipping," when it it is our own irritable tempers that should be subdued.—*Mother at Home.*

HOW TO MANAGE PRECOCIOUS CHILDREN.

[The following excellent and brief Essay should be carefully considered by all PARENTS, and as they read of the different *kinds* of food necessary for children in different states of health, they will see the *necessity of that knowledge of Chemistry and Physiology* so important to those Parents who wish to and b[illegible] rth a healthy race of children, who also wish [illegible] guard those children from disease and premature death.—ED. FARMER.]

Many of the most prominent children are sacrificed by a desire to bring them forward in advance of other children, and this desire is stimulated by natural instincts. Every living creature rejoices in the faculties which God has given it, "as a strong man to run a race." The boy whose muscles are well developed will never keep still, but is ready for anything, good or bad, in which he can stir himself. To such a one study is a punishment. But the boy whose muscles are well developed, sits still and reads, and he appetite, of course, conforms to the kind and amount of exercise. If he wastes his muscles in exercise, his appetite will demand the muscle-making nitrates to supply the waste. If he wastes the phosphorus of the brain by study, he will desire phosphate food to restore it. While the fat and stupid boy, who has neither muscle nor brain, will crave carbonaceous articles to feed his stupidity; and indulgence in these appetites will, of course, increase the peculiarity.

I have seen the little kingbird, after an hour of extraordinary exertions in driving from the neighborhood an intruding hawk, devote the next hour to catching bees and hornets, which abound both in nitrates and phosphorates, as a means of restoring his muscular and vital energy. The bird is safe in following his inclinations, living as it does according to natural laws; and having no abnormal development of faculties, and no abnormal appetites, it can eat what it desires, and as much with perfect impunity.

But the child, changed in its condition as it may be by the ignorance and folly of its parents, even before its birth, is abnormally developed, and of course has abnormal appetites.

Indulging these appetites, in case of precocity of the brain, of course increases the excitement of the brain, and the result is inflammation and premature death.

A child with precocious brain, or who is very forward, to use the common expression, is of course more liable to dangerous diseases of the brain than other children; but if parents would give the subject thought, and use their reason in this, as in other less important matters, these diseases might generally be warded off.

If our eyes have been overworked, or are weak and liable to inflammation, we avoid overusing them, especially in the strong light, and if so inflamed that too much light and all use of them gives pain, we shut our light altogether, and give them rest till they recover. Both light and seeing are pleasant to the eyes in health, and absolutely necessary to give them health and strength, but, when diseased, are both alike injurious, and we avoid the influence of both till they recover. And when only weak, and not absolutely diseased, we are careful to have the light or use the eye only moderately or carefully. So of any other organ of faculty—that which is necessary to it in health must be carefully used in tendency to disease.

Apply this principle to a precocious brain. The brain is dependent on appropriate exercise and a supply of phosphorous in health as is the eye on exercise and light; and as we withdraw the exercise and light in weakness and disease, so should we allow the brain from exercise and phosphatic food in case of disease or premature development. —*Bellows Philosophy of Eating.*

THE UNHOLY DESIRE OF DRESS.

You wish to dress your wife better than your circumstances will a[illegible] have you. She is a woman of spirit, as it is said, and she does not mean to be a drudge. "Why should our neighbors," she says to her husband, "dress any better than we? They are made of the same flesh and blood that we are. See how they come out. I don't think any man of any spirit would let his wife and children go to church dressed as you let us go. Look at these children—you would think they had just come out of some slop house. If I had married as I might have married we should have had different times—I and my children." How many men are stung to the quick by such remarks by their wives. Oftentimes their moral sense revolts, at first, and they feel indignant, but "continual dropping wears a stone," and by and by the man is dressed a little better than he can afford, and his wife and children are dressed better than he can afford, and some one has to pay for the extravagance. I do not say they are tempted to steal, but I do say that they grind. They mean somehow to get it out of the milliner, out of the dressmaker, or out of the merchant.—They intend to make one hand wash the other somehow and they go into petty meannesses to bring it about. And this desire to dress better than they can afford is taking off the very enamel of their virtue, and taking out the very stamina of their religious life. Unimportant as it seems, ostentatious vanity in dress has ruined many a family and damned many a soul.—*Beecher.*

THE UNAIMED GOOD.—The prayer which Socrates taught his disciple Alcibiades deserves a place in the daily devotions of every Christian. "That he should beseech the supreme God to give him what was good for him, though he should not ask it, and to withhold from him whatever would be hurtful, though he should be so foolish as to pray for it."

—A few days ago two women living in Mansfield, Webster county, Ill., were observed, in full Bloomer costume, returning from a hunting excursion each sporting a double-barrelled shot-gun, carrying numerous snipe, woodcock and tomtits, the fruit of one day's campaign.

THE

PHOTOSCOPIC

Table Company.

THE NEW INVENTION of this Company is known as the ASTHNOPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION

this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group FAMILIES entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changable pictures, arranged to suit the wishes an desires of each owner of the table.

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

Those who desire to PURCHASE, can see one of the Tables by calling at the FARMER Office, or addressing EDITOR FARMER. 32-1

GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles, and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both Eurcpean and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

Address WARREN & CO.,
Farmer Office.

OUR HOME INTEREST

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact and the probability that the amount of this large sum of money will be increased each year, and in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM) is the Best for investment in the purchase of Life Insurance instead of being retained at homes to promote and build up ITS INVESTMENT HERE the commercial, mechanical and agricultural interests of our State, a large number of our most prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States on the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION whose capital and assets will not be impaired or affected by the change in values that will ensue on a return to specie payments in the other States of the Union. Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now ask every citizen of this State, who feel an interest in its welfare, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing and supporting a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

Miscellany.

CHOATE AND WEBSTER RAISE "THE WIND."

The intimacy of Webster and Choate is well known. There can scarcely be a doubt that they loved each other. While the former was Secretary of State, the latter was in the Senate from Massachusetts. At some point during this period, Choate is reported to have found himself short of money, and being away from home, was in a strait how to relieve himself. He sat in his seat in the old Senate Chamber, with a contracted brow, plowing with both of his hands those long black locks of his, as his habit was, in a vain effort to conjure up some way of meeting his engagements, when an idea struck him. "I will go to Webster," he said to himself; and seizing his hat he made his way rapidly to Fourteenth street.—The great man was at home, and received him with unusual cordiality. "But what is the matter with you, Choate?" he asked; (the latter had on that woe begone expression which everybody remembers;) "are you sick?" Choate took a chair and began to run his fingers through his hair, in a way of doubt as to how he should approach the subject of his visit. "Not exactly sick, Mr. Webster; but I am short of money, and have come up to see if you could lend me five hundred dollars." Webster leaned back in his chair, and with eyes twinkling, and the faintest possible gleam of humor on his face, looked at Choate: "Choate, I am just five hundred short myself," he said. (Choate's face dropped.) "But look here, brother Choate," continued Mr. Webster, "I'll tell you what we'll do—we'll make a note, sir, say at sixty days for one thousand dollars, payable in Boston. You shall sign it and I'll indorse it, and by the time it comes round, we will be at home to provide for it." Choate looked up with astonishment. He could see how easily the note might be made; but how the money was coming out of the note was not so clear, and he said so to Mr. Webster. "Leave that to me," the latter replied.

Suffice it to say, the note was made; Choate went back to the Senate to await the result of his friends financial experiment; and his great friend, placing the note in his vest pocket, donned that well remembered broad brimmed black felt hat which he wore in those times, and directed his steps towards Corcoran's. Entering the banking house with head erect and shoulders well set back, "Is Mr. Corcoran in?" in the measured and magisterial tones that inspired so much awe, he asked of the clerk at the counter. "Yes, sir," he replied deferentially. "Please say to him that Mr. Webster would like to see him for a moment." Corcoran appeared with alacrity from his private room and the usual salutations were exchanged. "Mr. Corcoran, my brother Choate is a little short of money, and has made a note for a thousand dollars (which I have cheerfully indorsed for him,) payable in Boston in sixty days. Would you discount it for him?" "Certainly," replied Corcoran, with the greatest pleasure;" and turning to the clerk, he said, "Give Mr. Webster the proceeds of the note after deducting the interest." The clerk made his figures, and bringing out a small bag of gold emptied it upon the counter. He counted out a sufficient sum to satisfy the proceeds of the note; and Mr. Webster, putting it into his pantaloons pocket, called a hack and went immediately to the Capitol. Walking into the Senate Chamber, he found Choate, with his head in his hands, in the most distraught frame of mind. Going directly up to him he gave him a smart slap upon the shoulder: "I've got it, Choate." "The d—l you have!" he replied. The great man sat down beside him, and they divided the money as nearly equally as they could; and thus Choate's mind obtained relief. The story omits to follow the note to maturity, and tell us who paid the thousand dollars finally. We suspect there is where the real point would come in.

ON FORGING, HARDENING, AND TEMPERING MILL-PICKS.

The following hints, which we extract from the columns of the *Milling Journal*, are thoroughly practical and trustworthy. It is obvious that the principles involved in these special directions are applicable to the production of other articles besides mill-picks.

"Use double refined cast steel made expressly for mill-picks. In drawing out the pick, use an anvil and hammer with smooth faces, and be particularly careful not to heat the steel higher than a dark cherry red. Do not strike the pick on the edge when finishing it, but hammer it on the flat side, striking light and often, until the steel is quite dark, letting the blows fall so as to close the grain of the steel. When a dozen picks are ready to temper, get two gallons of rain water, into which the chill should be taken, if in winter add a pint of strong hot iron in it; add two pounds of salt, and your bath is complete. Heat your pick gradually from the center, let the heat run to the point, and when it is a dark cherry red dip the point vertically into the bath and hold it still. When the heat has left the part immersed, take it out, and cool the balance of the pick in ordinary water used in the shop. When taken out of the tempering bath, the part of the pick tempered will be a silvery white. The salt is used to clean the scale from the steel and make it tough. Picks tempered in this manner will be able to put in a good deal of work before they will crack. The whole secret is in the heating and hammering. If not hammered enough the steel will sprawl off; and if heated too hot, it will crumble."

A droll story is related of an honest old farmer, who was attempting to drive home a bull, got suddenly bucked over a fence. Recovering himself, he found the animal on the other side of the rails, pawing the air with his head and neck and pawing the ground. The good old man looked steadily at him a moment and exclaimed:—"Darn your ugly picture, you needn't stand there you eternal critter, lookin' and scrapin' you did it on purpose, to show your curly picture!"

Miscellaneous.

A PRINCELY RESIDENCE
IN THE COUNTRY
FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

GOLDEN EAGLE HOTEL.
Corner Seventh and K streets,
SACRAMENTO.

THIS HOTEL IS OFFERED TO THE PUBLIC AS a "Home for Families" and for the Traveler.

The Proprietor has spared neither expense or care to make his Hotel one that shall always be acceptable and pleasant to all that may favor him with a call.

With ample accommodations by means of spacious Suites of Rooms for Families, and by recent enlarged accommodations, he is confident that visitors will always be satisfied and feel at Home.

Particular attention will always be paid to the comfortableness of the apartments, by well ventilated Rooms, clean Beds and Bedding, and strict attention to the wants of Boarders; while the TABLES will be provided with the very best the season affords.

CARRIAGES, to and from the Hotel to the Railroad Cars and Steamers, at all times, Free of Charge to the Patrons of the Hotel. Hotel open all night.

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facia* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

Miscellaneous.

A COMPLETE TRIUMPH!

Harness. Saddles.
MAIN & WINCHESTER

Manufacturers AND Importers of

HARNESS,
Saddles, Bridles,
WHIPS, COLLARS
SADDLE-WARE, &C.,
Nos. 214 and 216 Battery street,
SAN FRANCISCO.

☞ To correct a erroneous impression which some may have, we wish it understood that though we keep the largest Wholesale Stock in the country, small Orders and Retail Customers will receive every attention and benefit that they can at smaller establishments.

FARMERS and others will do well to call on us before purchasing, as the rate of Eastern Exchange justifies us in offering goods at REDUCED RATES.

N. B.—
We have the Exclusive sale of HILL CONCORD HARNESS, for the Pacific Coast.

AVERY
TUBE WELL
COMPLETE FOR USE

THE TUBE WELL IS FORMED BY DRIVING prepared Iron Piping into the ground with a sledge Although of comparatively recent invention, these Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well, all surface water, dirt etc being excluded. The Tubing is coupled together in lengths of five or six feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Lift Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. ☞ For circulars, etc., address Postoffice Box, 17. UHRIG & DEWEY.
Office at 318, Pine street. 31-10.

Valuable Patents
FOR SALE

We invite the attention of energetic Mechanics to several very

VALUABLE INVENTIONS

for which we hold the

PATENT RIGHT

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a handsome return for labor and capital can be made from.

WARREN & CO.

BOUND VOLUMES FARMER

☞ Volumes of the "California Farmer" for The last EIGHT YEARS, uniformly bound, can be had at the Farmer Office at $3 per Volume.

These Eight Volumes contain more useful matter touching the practical workings of Agriculture as adapted to California Culture than any Book or Books Extant, as they comprise hundreds of Experiments, Letters and Essays upon the Culture of Cotton, Rice, Coffee and Tobacco; Grapes, Strawberries, and all other Fruits, with the Culture of Hops, Castor Beans, Flax, Hemp, &c. and the Whole series of Essay of L. Prevost on Silk Culture, from early beginning.

This set of Volumes would be a Library of itself and is valuable to the Cultivator of the Soil.

Orders sent to Farmer Office will be promptly attended to

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance*. We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once a our office, or addressing EDITOR FARMER.

HUCKS & LAMBERTS'
CELEBRATED PATENT
H.&L.
AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to and keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

Is on the red cover of the packages

Depot, 320 Jackson Street,

For storage, apply at the Warehouse to
THOMAS H. DOUGLAS,
Storekeeper and Wharfinger.
Or to I. FRIEDLANDER,
112 California street.

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit: five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, June 10.

The Grain! the Grain! the *Golden Grain!*
It gleams on the Mountain, Hill and Plain;
With *heavy heads* it bows to the breeze,
It soon will be harvested and sent o'er the Seas.

Now, now is the time for our Grain growers to reflect upon what is best for them to do with their incoming crops.

That they will be large, *very large*, no one at all well informed, can doubt, and no wise man can hope that the *price of Grain* can possibly rule above present rates, but rather go below, and it *may be*, much lower.

From the very best information we can gather, we learn of abundant crops in all the Grain growing States of the Union, and also in Europe, and while the English reports may vary from one to four pence the cental; this is only a *local* change, which any large importation from other countries would quickly alter and send the price further downward.

The little squibs of *Saul* here or *Rust* there, will not affect the real value of our Grain Market a thousandth part of a mill. Such dodges of Speculators should never influence our own sturdy Farmers.

Barley, Wheat and Oats of the *New Crop* have come to hand, and heavy lots will soon be "knocking at the door" of our Markets, and wise will those growers be who put their crops *into their pockets first*, instead of into a warehouse.

Grain Growers! please remember the counsel of *This Journal* last year—and now, our counsel is *still the same*; and if you sell at *Harvest*, remember your *money* is then daily adding to the principal, which will be the same to you as if you *held on* to your Grain, and that should rise, you that sell now are sure of an increase of the *price* of your crops even should *Grain fall*—for you have the *money* and the interest is daily *making it more*.

Retail Prices in the Fruit Market.

Our Fruit Market is really splendid. All the most choice Fruits of the season are spread out in our Markets in great abundance, and in superb quality, and at a low price, so that all can eat and be satisfied.

It is a fact, we have never had a season of such abundance, and prices so low, and so early.

The second crop of *Strawberries* with the noble *Jucunda's*, just now begin to come in.

Peaches just begin to come to Market, and look tempting enough to eat.

Retail Prices in the Vegetable Market.

(Brown & Arnold.)

Where on the face of the earth can so abundant supply be found for all the Culinary wants of the kitchen, in the way of Garden Sauce, as in the markets of *San Francisco*. *Ours beats the World.*

Sacramento, Stockton, and Marysville, send to this Market for *Vegetables*, and even for some kinds of Fruit. What a rebuke to many owners of good lands who might *make a fortune* in this business if they would only give proper attention to it. Alas for the *Drones*. How many Farmers are too lazy or shiftless even to raise enough to supply *their own tables*.

Why will purchasers pay 10 cents for *white* Asparagus which is *poisonous*, when they can buy the *green* for 8 cents which is delicious and healthy, and one pound go as far as *four* pounds of the white.

MEATS.

(Leopold Miller)

The Meat Markets remain without material change. The supplies of Beef, Mutton, Lamb, Veal and Pork, which make the *solid* dishes of the table, can be had in our Markets equal to any Meats that can be shown in any market on the Continent of America—this is the assertions of new comers to our city from eastern cities, such as New York, Boston, and Philadelphia, that boast of *their* markets.

DAIRY—BUTTER, CHEESE, EGGS ETC.

(M. B. French & Co.)

Butter, Cheese, and Eggs are about the same as our last report. The *best* Butter is none too plentiful.—Some of our dairymen are now packing down Butter, but we think so long as they could realize the *present rates in hand*, it were much better than to pack down; for they must remember we have now the *Railroad* that will bring us Butter quickly if the price rises, and this will hereafter *stop* all high rates. Will our dairymen remember this?

Some Eastern Butter is now arriving.

For Bacon, Hams, and Lard, there is a steady market, and prices do not alter much.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southhampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

STEAMERS FOR JUNE

The following Steamships will be dispatched on dates as given below.

June 9—MONTANA, Capt. E. S. Farnsworth, connecing with ALASKA, Capt. Gray.

June 18—COLORADO, Capt. W. H. Parker, connecting with HENRY CHAUNCY, Capt. Conner.

June 30—CONSTITUTION, Capt. Wm. H. Hudson, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman' and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—If desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandize and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se4 OLIVER ELDRIDGE, Agent.

CENTRAL PACIFIC RAILROAD

COMMENCING MAY 17TH, 1869. EXPRESS Trains will run as follows:

EASTWARD.	Miles.	Time.
Leave Sacramento	—	6.30 A. M.
" Colfax	54	9.50 "
" Truckee	120	2.10 P. M.
" Reno	154	4.20 "
" Wadsworth	189	6.30 "
" Winnemucca	344	1.45 A. M.
" Carlin	445	8.30 "
" Elko	468	10.00 "
" Toano	559	3.15 P. M.
Arrive at Promontory	690	11.05 "

WESTWARD.	Miles.	Time.
Leave Promontory	—	6.15 P. M.
" Toano	131	3.00 A. M.
" Elko	222	8.25 "
" Carlin	245	9.35 "

May 17th, 1869. 31-8

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays, and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

Advertising Abroad!

WE CALL THE SPECIAL ATTENTION OF ALL Manufacturers, Agricultural Men, Nurserymen, Booksellers, and others having interests connected with the PACIFIC COAST, that now is the time to secure the business of this region by wisely ADVERTISING WITH US.

The full effects of the completion of that Grandest of all HUMAN ENTERPRIZES, the PACIFIC RAILROAD, must open a large and wonderfully increased business between the Eastern States and the Pacific Coast, and the who wisely ADVERTISE NOW, will be the FIRST TO SECURE IT, and when once secured, they can HOLD ON TO IT.

We therefore invite all those who have valuable IMPLEMENTS, MANUFACTURES, INVENTIONS, BOOKS, PAINTINGS, etc. to the Columns of the CALIFORNIA FARMER, that will give them a wider circulation than any other medium they can adopt.

WARREN & CO., Eds. and Prop's.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS,

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge, now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER, BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINTS and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It is our sincere wish that these Pills should be fairly and for or ed, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms consequent on a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the proper action of the Stomach, Bowels, Brain, and the whole Nervous System should be vast and vital importance to human health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has no distinct connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal nature or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Stomach, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increased by pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful notion of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, and complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts everything. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow them. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are unequalled to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an infant, the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked. Even in cases of great violence, if a potent and rompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or frothy tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a craving sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently tinged with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough; cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water every morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten years a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

HOME FINANCES.

The fact that our savings and loan societies have again commenced to make loans indicates that their deposits are increasing, a fact which goes far to show that the monetary pressure to which we have been lately subjected is slowly relaxing.—Advices from the East, the raising of rates by the Bank of England, the variform uses and demands for cash among ourselves in prosecution of new and costly emprises, the crushing excess of imports over exports, the collection of income tax and attendant locking up of funds in the National Treasury, the necessity for money to move the incoming crops, and a number of other equally cogent reasons, operated to induce an economy seldom practised by Californians. Business has been somewhat stayed on these accounts for the time being, and no purchases were made beyond actual temporary requirements. It is gratifying to add, that this condition of affairs is passing away, and a degree of confidence established in its place which promises well for the future. Our area of commerce and trade has been measurably increasing, offering new and inviting fields, which have not been ignored by our business men.

Since our last issue, $1,170,052 in treasure have been shipped to Oriental countries, divided as follows: To China, $150,469 in gold bars, $308,389 in silver bars, $189,872 in Mexican dollars, $91,268 in gold coin, and $3,000 in gold dust—total $743,-000; to Japan, $136,373 in silver bars, $74,431 in gold bars, $216,150 in Mexican dollars. Our shipments via Panama have been as follows: To New York, $40,000 in gold coin; England, $235,366 in silver bars; France, $38,852 in gold bars; Central America, $139,112 in gold bars, $12,046 in gold dust, and $10,000 in silver bars; Panama, $23,200 in gold coin—total, $498,576.

In this market bank rates rule from 1¼@1½ per cent per month, according to securities. Bullion is in fair supply with equally fair demand, but nothing pressing.

We quote gold bars at 850@880; silver bars remain steady at the prices long ruling, viz., from par to ¼ per cent premium. The export of $690,000 in silver bars in one week has not interfered with the market value of that sort of treasure.—Currency bills on Atlantic cities pay 36 per cent premium on gold; coin drafts, 1½ per cent premium; telegraphic transfers, 2 per cent premium; sterling exchange, 48¾d; commercial exchange, 48½d. Mexican dollars command a premium of 5@6 per cent. Gold in New York, June 10th, 139¼; Legal Tenders with us, 72¾@73¼.

We have been astonished at the seriousness with which the jocose enunciations of a Sacramento journal have been treated by the daily press of this city. Evidently in a moment of frolic, just to see what effect it would produce, the Sacramento *Bee* announced as the removal of the California Branch Mint from this city to the capitol. Instead of treating the proposition with the silence it merited, several of our prominent journals have met it with serious discussion, giving it a prominence it could never otherwise have achieved, and inducing the originators to believe they had opened up a rich vein of promis.

Our local money market is not pressed for funds for legitimate business; but there is no disposition to advance on stock securities or speculative adventures. A great deal of cash has been followed on mortgages, and is not yet available for business operations, while large sums have been employed in a variety of new and expensive enterprizes which require time before making returns. The low prices commanded by farm produce, the uncertainties of the market, and the heavy loans already made on that kind of security, render it difficult for farmers to obtain the sums required to harvest and market their incoming crops; but as bread is a matter of absolute necessity, and the supply on hand is not over abundant, it is quite within bounds to expect that the difficulty will be removed in time to meet all requirements.

The export of treasure from June 1st to date, have been as follows:

June 1—Per Golden City—		
To New York	$ 87,524 81	
To England	669,960 54	
To France	7,000 00	
To Panama	20,000 00	
		$ 784,485 35
June 4—Per China—		
To China	$743,098 30	
To Japan	426,954 08	
		1,170,052 38
June 9—Per Montana—		
To New York	$ 50,000 00	
To England	235 365 76	
To France	38,852 17	
To Cen. America	151,158 42	
To Panama	23 200 00	
		498,576 35
Total since June 1st, 1859		$2,453,114 08
Previously this year		15,970,193 98
Total since January 1st, 1869		$18,423,308 06
Corresponding period, 1868		18,080,059 72
Increase this year		$343,248 34

The duties paid at the Custom House in this city from June 4th to date, have been as follows:

June 4	$11,273 68
June 5	12,190 73
June 7	7,925 57
June 8	9,861 38
June 9	43,082 30
June 10	20,021 48
Previously in June	83,998 01
In June to date	$188,353 15
In May	575,030 24
In April	554,882 05
In March	780,447 40
In February	602,340 00
In January	532,997 97
Total since January 1, 1869,	$3,234,050 81
Corresponding period, 1868,	3,588,899 52
Decrease this year	$354,848 71

A WANT THAT OUGHT TO BE SUPPLIED.

Oregon has much good stock, and her citizens have shown commendable enterprise in its introduction.—There is probably no community in America of the same population that can make a better show of good horses than can the farmers of Oregon. Of cattle we have the Short Horn and the Devon, the first pre-eminent as a feeding animal, under an artificial system of feeding; and the latter having no superior as a grazing animal, upon the short sweet grasses which are natural to this country. Of hogs, we have the Essex, the Suffolk, the Berkshire, the Grazier, the small China, and Cross's large cross bred hogs, the last named of which are perhaps second to no other breed. Of sheep, there are the Cotswold, Leicester, Hampshiredown, Southdown, and New Oxfordshire, together with the Australian, Spanish, French, and American Merinos, and grades of all these breeds with the common stock.

It seems to us however, that we yet lack something in the breeds of neat cattle, and that some stock which can be counted on for improvement in the milking qualities of our dairy cows, would now pay for bringing into the State. The dairy interest is to recieve increased attention from this time forward. Men are not going to continue to raise the best article of winter wheat at 55 cents per bushel. and buy California or Eastern Butter at 50 to 70 cents per pound. The time is therefore ripe for the introduction of breeds of cattle which have well deserved reputations as milkers; and all the breeds we have heard of in that connection, the Ayrshire would be our first choice to make trial of. It is to be hoped that some man will turn his attention toward this famous milking stock, and introduce them into this State soon.—*Williamette Farmer.*

WHERE TO ADVERTISE.—The advantage of advertising in the *Farmer* can be proved in many cases where valuable Real Estates are for sale, or wanted.

We advertised a few weeks since, an estate for sale in Napa, within ten days there were two applicants direct from the Farmer, and the Estate was sold to one of these purchasers, advantageously and profitably. While from other advertisements and agents, not a word or a customer; so much for wisely selecting *where* to advertise.

THE COMING CROPS.

A recent trip through several of our leading agricultural counties, has forced upon us the conviction that the incoming crops will be largely in excess of any ever harvested in California. In some localities the grain is thin and will fall short of former averages per acre; but these instances are exceptional, as well as those in which rust is said to exist. But the greatly increased area seeded in wheat, and the superior methods of cultivation adopted in many portions of the State, overbalance any defects from other causes. A considerable breadth of new land was sown late in the season, and the process was much slighted, the ground being barely scratched with the harrow instead of being plowed. However rich and fertile the land may be, it is scarcely possible to expect heavy returns from such a course of treatment. The loose system of cultivation which has obtained in this State cannot be too much deprecated. There is something else to gain besides crops. Our reputation as a grain producing State rests upon actual returns and not upon mere assertion. Immigration depends upon statistical data for the knowledge requisite to set it in motion. Although we may revel in the conciousness of possessing a rarely fine and propitious climate, and the most generous of soils, pains must be taken to impart a satisfactory knowledge of those facts. When the harvest returns are compared with the area of land under cultivation, a just average of the yield may be had, and to this average farmers appeal as evidence of our capabilities. Elsewhere in the Union, farmers have adopted and practice the latest and most approved methods of cultivation. They are impressed with the conviction that we do likewise. They cannot conceive the policy which would induce an agriculturist to sow 1,000 acres of wheat, producing an average of 20 bushels to the acre, when, were one-half the quantity properly treated, it would yield an average of 60 bushels to the acre. We confess our inability to fathom the wisdom of such proceeding; nevertheless the fact of its being widely practiced is undeniable. The market value of lands so abused is also greatly impaired, and even the owner becomes indifferent in the course of time, and turns his back upon his old possessions to occupy new tracts, under the impression that the old have become exhausted and unremunerative, whereas the fault is entirely his own.

Careful and well directed husbandry has never failed to meet with abundant reward in this state; but careless, negligent and superficial treatment, accompanied by Micawberish expectations, are just as certain to terminate in disappointment and disgust. Everywhere throughout California, land that has been properly and systematically laid under contribution, promise returns far surpassing those of former years. In some localities the prospects range as high as 80 bushels to the acre, and the area so promising is by no means insignificant. For miles the waiving grain stands thick, heavy and handsomely headed. The eyes and hearts of Eastern farmers would be gladdened at the bare sight of so great redundancy, and it is to be regretted that the superficial system pursued in other districts; should materially lessen the general average returns per acre. Generous as our soil is we cannot expect that its resources can be continually drained without giving some compensation for its liberality and bounty. Information derived from reliable authorities bears us out in asserting that the next crop will be much the largest ever harvested in California. There are fields of grain nearly ready for harvesting, which will return from 75 to 85 bushels per acre. and there are thousands of such acres teeming with bread. We learn of no movement on the part of grain dealers. We hear of no attempts either to buy or sell in advance of the actual arrival of the grain. The disposition to let the market chalk out its own course and follow its own bent, seems to be in the ascendant. Speculative action is entirely dormant. Producers and dealers are in a state of quiet expectation, awaiting the natural laws of demand and supply. We have reason to believe that the policy adopted last year will not be repeated, but that the market will be followed from time to time, as occasion may serve. The severe experience last year, will not have been in vain, and a more natural, healthy, and a less excitable condition will supervene.

In relation to fruits, the current year has been attended with abundant and remunerative returns. The strawberry crop exceeded all anticipations, the fruit being of large, fine and excellent quality, prices well sustained. Owing to recent drouth, or lack of moisture, the second crop will proably be light. Cherries have been marketed in great abundance, especially those of more ordinary kinds. Finer qualities have not come forward in quantities equal to the demand, and prices rule high. Apricots and other stone fruit are commencing to make their appearance, and will doubtless be more than usually prolific. Apples and pears promise exceedingly well, while the grape crop gives the appearance of a most generous return.

A company of Japanese agriculturists are about to essay the cultivation of tea on a large scale. We can adduce no reason why the attempt should not prove successful; at all events, it demonstrates the faith those versed in the business have in the adaptability of our climate and the capability of our soil.

So far this year, our farmers have been most generously rewarded, while the future is pregnant with hopeful anticipations.

THE HEROINE.

IDA LEWIS.—At the close of a stormy March day of this year two soldiers were crossing from Newport to Fort Adams in a sail-boat managed by an inexperienced lad. When they were partly across a blast suddenly struck the craft; the boy was confounded, the boat capsized, and for half an hour, clinging to the keel, the hapless men and boy struggled with the waves. Then the hold of the boy relaxed, and he sank, but a boat had put off from the Lime Rock Lighthouse, about half a mile away, and before the men were exhausted it had reached them, and they were saved. The persons who saved them were Ida Lewis and her brother Hosea, children of the keeper of the lighthouse.

Ten years ago in the same harbor four young fellows were upset in a boat, and the same girl hastened in her skiff to rescue them. A little later three drunken soldiers stove a hole in their boat not far from the light. Two swam ashore, the third was saved by Ida Lewis when nearly exhausted. Two years ago some men were driving a sheep upon the wharf in Newport. The animal plunged into the water, and three men running along the shore in pursuit at length found a skiff and put out into the harbor. A heavy sou'wester was blowing, and the skiff was swamped. Once more Ida Lewis pushed off for them, and bringing them safe to shore, returned and landed the sheep. In the next winter a scrape-grace stole a sail-boat from the wharf and made off. But the gale drove it upon the little Lime Rock, a mile from the light; and the thief clung to the mast from midnight until morning, when Ida Lewis saw him, and rowing to his relief, found him, as she said, "shaking and God-blessing me, and praying to be set on shore."

This is a girl in her twenty-eighth year, slender, blue-eyed, with light-brown hair, frank and hearty, and likely to be more famous next summer than any Newport belle.

But the heroic story of which these are the incidents suggests some very improving reflections upon the sphere of woman. No one can read the report in the newspapers, no one certainly read the brief telegraphic notice upon the following morning, without a thrill of admiration and sympathy. But are we to understand that such emotion was natural and proper? Are we to believe that it is "feminine" for young women to row boats in storms? Is it "womanly" to tug and strain through a tempest, and then pull half-drowned men into a skiff?

Now, speaking soberly, no man will be such an —let us say donkey, as to insist that it was unfeminine in Ida Lewis to pull off in her boat to save men from drowning. It was no more unfeminine than to sing a babe to sleep. And if this be so, then it was perfectly womanly to learn the use of oars—to acquire the means of doing so great a service to her fellow creatures, a service which touches the heart and the imagination, and, as in the instance of Grace Darling, will become a poetic tradition.

When we have come so far as this there is certainly no need of asking whether such actions fall within the sphere of woman, or whether they are competent to row boats. Ida Lewis has shown that she can row to some purpose, can row indeed to such purpose that every generous heart applauds. This seems to settle the whole vexatious question about women. Indeed there is really no more question about women than about men. And unless the whole debate upon the subject of the rights of men, which has shaken society now for so many years, and often to such tremendous results, is folly, that upon the rights of women can hardly be smiled away.—*Harper's Magazine.*

THE RAMIE GRASS.

The Hawaian *Gazette* thus announces the introduction of this famous grass into the Islands.

Among the many benefits resulting from the efforts of the Agricultural Society, in the introduction and distribution of new plants, suitable to the soil and climate of these Islands, not the least promising is the plant called *Ramie*, the scientific name of which, is *Boemeria tenicissima* from which the beautiful texture called "pina" or grass cloth is manufactured, and which has been proved by experiment, to be admirable for successful cultivation on large tracts of land in this country. It appears to have lately become a great favorite in the Southern States of America. Senator Sprague is at present engaged in planting over one thousand acres of it in Florida. The labor requisite to prepare and separate the fibre for market is simple and inexpensive, and the plant is remarkably easy of propagation so that it is capable of becoming a valuable article here.

OMAHA, TRAIN, AND PACIFIC RAILROAD.

The Omaha *Herald* of a recent date gives the following sketch relative to that now important City:

"When, four years ago, the charter for the Pacific Railroad had become a law, and the Union Pacific Company had organized to commence the great work whose progress is the wonder of the age, George Francis Train dragged a few of our citizens to a spot near the locality at which these lines are written to celebrate the inauguration of the continental railway with a formal breaking of ground, speeches and other ceremonies. He made nearly all the speeches himself, was conceded master of ceremonies, did all the reporting, and telegraphed the proceedings all over this country at his own expense, advertising Omaha in one hour more effectually than all the rest of us had done in ten years. He proclaimed Omaha as the initial terminus of the National Highway, and as the New Chicago of the West. He also proclaimed that, in five years from that time, the mails from China, Japan and the Indias would pass through Omaha to Liverpool, and that the teas and silks, and the Mandarins of the Celestial Empire would travel across the American continent to England. All there was of Omaha at that time giggled, and pronounced Train a lunatic, and we joined in both the giggle and the verdict. When, at about the same time, Mr. Peter A. Dey, the then accomplished engineer, called upon us at Fort Kearny and announced in his candid way that work was soon to commence in the Platte Valley and at Omaha, we smiled our incredulity, and reminded him of similar remarks about the Missouri and Mississippi line which were made by himself, and Dodge, and Farnam, as long ago as 1855-6-7. The result is what we now witness. The Pacific Railroad, an empty dream to Benton, in part realized by Curtis, so many years ago, stands before us a living reality."

THE WESTERN GRASSHOPPER.

Mr. B. O. Driscoll, of Doniphan City, makes the following suggestions in regard to the grasshopper or locust of the Western States.

"I would reccommend plowing all clear naked spots, roadsides, &c., especially north, and when eggs are found along hedge rows, the surface should be scooped into a ditch or furrowed, and then covered deep with a plow. Where there is danger of an incursion of those wingless grasshoppers, I would suggest a ditch, as is often used in Montana and elsewhere, or a close fence four feet high, or, better still, a bed of straw in their line of march, to be burned when their advance guard are passing over, or have gathered upon it when those not destroyed will turn back and seek other fields of pasture. As to the kind of crop to plant, I have no suggestions to make, for I find that no *green thing* is exempt from their ravages, and that when one crop is wanting another will suffice, but that hemp, cabbage and barley, are preferred to many other kinds, and to protect cabbage and potatoes, I would reccommend strong salt water. Air slacked lime will answer a good purpose for many kinds of crops after the salt water. Many fruit tress have been injured by grasshoppers, but none have been killed to my knowledge."

A HOUSE BUILT IN 19½ HOURS.

The new house and how it was built. We neglected to state the other day that the house built by Mr. Mishler, which was to have been commenced and finished in thirty hours, with the exception of painting, which Mr. Pool with his five assistants, completed in twenty-five hours, including pencilling, painting the front, the roof and the interior, everything complete, and all of which was done in a workmanlike manner. The house was partially occupied at 3¾ o'clock on Wednesday afternoon. Ruth & Jeffries bricklayers, employed ten hands and completed their work in twelve working hours; John Broch & Co., plasterers, in fifteen hours; John D. Boring, carpenter, in nineteen hours; Miller & Hess, sash factors, in nineteen hours; Jacob Gable, plumber and tinner, in five hours; Frederick Coonley, brickmaker, delivered the brick in eleven hours; and A. Lechler, put up the lightning rod in fifty minutes. The house is forty by eighteen feet, three stories high, and required 42,350 brick. All parties who worked on the building did their work in a satisfactory manner, and it is the intention of Mr. Mishler to publish a list of their names as soon as they can be procured.—*Lancaster, Pa., Register.*

There is to be four days' trial of our hay making implements on the farm of the Mass. Agricultural College, commencing the 22nd of June, and a fine opportunity will then be offerdd for those desiring to make an examination of the machines at their work, to do so, and make their selection.

[When our Ag. Colleges are under their full tide of succes, our Ag. Fairs will be under their direction.—ED. FARMER.]

A paregoric wedding is the latest matrimonial novelty. It takes place about the end of the first year.

Agriculture.

THE RAMIE PLANT.

In consequence of the great interest which we are glad to see our country planters and city merchants are taking in this new staple, we have taken much pains to procure reliable information about the ramie, its cultivation, etc. We condense from a circular obtained from a gentleman who has for three years cultivated it profitably, and hope our account will induce our farmers at least to experiment with it. The ramie belongs to the nettle family and in appearance resembles a luxuriant growth of that noxious weed. The leaves, however, being shorter and broader.

At first planting, standing single, it is inclined to make many side shoots or laterals. After being cut down once or twice about an inch under the ground the roots become stronger, a large number of ratoons will sprout from them and few or no side shoots show themselves. The shoots from the roots or ratoons stand close and push each other up.

These close standing shoots contain the best fibre; they are hollow, almost as much as a cane.—As soon as the fibre has the proper strength, the stem begins to color a little darker near the ground—when the stems have reached a height of a little more than four feet, the fibre will be of good quality, but does not get hurt if left uncut until it reaches ten feet in height.

The following is a good method to commence planting in the garden or nursery. The soil has to be worked twelve to fourteen inches deep, pulverized and cleared of all weedy roots; so that when they are afterwards hilled the ground becomes nearly level. As soon as the plant is six to eight inches high, the top ought to be nipped off, in this way side shoots will start from every leaf. When they have reached four or five inches in length, the plant ought to be covered with earth and nothing but the tops of the side shoots left to be seen. All these side shoots will soon make roots, when they can be cut off from the mother plant and transplanted. The mother plant has now strong roots and will soon have ratoons which have to be treated like the side shoots mentioned above—and when strong enough and rooted, can be transplanted. The bed should be kept clear of weeds and the ground loose around the plants.—A rich, rather sandy soil, is believed to be best for the nursery.

FIELD CULTURE.

The land should be deeply cultivated, subsoiled—fourteen inches is not too deep. The field ought to be laid off in pieces for about twenty rows in width, and passage left for a wagon to pass; in this way the plants will not be hurt by the wheels in gathering. The rows ought to be four feet apart and the plants in rows two feet apart. After the land is plowed, cleaned and harrowed, a furrow is made every four feet, and in these furrows the plants are placed.

Rooted plants as well as layers ought to be covered with earth nearly to the tops, and if the shoots are too long on rooted plants, cut back two or three leaves. Roots ought to be covered with earth two or three inches deep.

As soon as the plants have reached seven to eight inches they ought to be topped, to force the plants to form side shoots. When these latter are grown to about five or six inches in length, the plant has a kind of bushy appearance; then the plant is hilled nearly to the top, and at the same time all weeds are destroyed. The plant is left to grow now until it has reached the height of about three feet, when it is cut down an inch below the ground The fibre of this growth can be used, but is not perfect yet, because the roots and bulbs are not yet large enough, and there are as yet too many side shoots.

After the second year there is but little trouble, one plowing between the rows early in the spring, spreading manure over the fields during the winter.

The planting in the field ought to be done in the spring, but can be continued late in August.—Those planted late, to be covered in winter with straw or leaves to enable the young plant to resist the frost. Those planted early in spring or summer, will not require this protection, as they will make roots eighteen to twenty-four inches deep.

All refuse matter falling off in cleaning should be fed or dried and put in barn for use. All the manure coming from the plant ought to be carefully gathered up and brought back on the field—will give a rich return for many years without being replanted.

The ramie is useful in two ways. It contains first a silk like fibre of uncommon strength and fineness, and second, the refuse matter furnishes excellent food for stock—milch cows fed with it give more milk than if fed with clover. Fences must be kept in good order as cows and hogs after once tasting it will break down a poor fence.—Perhaps the most important point, is its easy and almost certain cultivation, because the first year its cultivation does not give more work than sweet potatoes, and afterwards the main and almost only labor consists in harvesting.

The quantity of fibre will be more than cotton, and the price per pound more than double.

PUGET SOUND.—From the Olympia *Transcript* of the 8th, we condense the following news: The crop prospects are good. A large amount of grain has been put in the ground, for which the spring has been exceedingly favorable, and they all look well.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

CALIFORNIA & BATTERY STREETS,

SAN FRANCISCO

—:o:—

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULAR.

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all o trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S

SELF-RAKING REAPER.

This Machine stands at Front or all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

—ALSO THE—

MARSH HARVESTER!

AUBURN HARVESTER,

SWEEPSTAKES

AND

VIBRATOR THRESHER

WHEELER & MELICKS'

Two Horse Power and Separator,

HAWLEY & CO.

Stand, Cor of California and Battery Sts.,
SAN FRANCISCO.

TRUE'S

IMPROWED

POTATO PLANTER.

This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatoes in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

WARREN & CO.,
320 Clay street, up stairs.

AVERY

TUBE WELL

COMPLETE FOR USE

THE TUBE WELL IS FORMED BY DRIVING prepared Iron Piping into the ground with a sledge Although of comparatively recent invention, these Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well, all surface water, dirt etc being excluded. The Tubing is coupled together in lengths of five or six feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Lift Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. ☞For circulars, etc., address Postoffice Box, 17. UHRIG & DEWEY.
Office at 318, Pine street. 31-10.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the articles they have to sell are wanted by those who have delayed to the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a great amount of trade by this delay.

Agricultural Implements, Trees, Seeds, Fruits and all other goods should be advertised in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their trade largely increased by giving attention to this, and particularly in everything appertaining to Agriculture and Horticulture.

Newsposters and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* the life of trade."

To Take Charge of a Place

A young man with some capital (from $300 to $) can hear of a good opportunity to take charge of a place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

No one but a steady and industrious young man need apply.

The applicant must be able and willing to work, have a love and taste for rural life To such a one a good chance can be given.

THE VINE IN EUROPE.

OBSERVATIONS BY AN AMERICAN VINE GROWER.

Letter Number Two.

SWITZERLAND.

Leaving Switzerland for Italy, you do well to leave the valley of the Rhone at Brieg, and commence the ascent and passage of the Alps by that magnificent road constructed by the first Napoleon, known as the "Simplon Pass."

You leave behind you the region of cultivated fields. You see no more the vine or vineyards, and are shortly in the land of eternal snows and ice. You pass by the wonderful galleries and arcades, made to resist even the avalanche, over the sublime impassible steeps of these magnificent mountains. As you approach the summit you pass the houses of refuge erected for the help of storm-stayed travelers, and the Hospice of St. Bernard, with its monks, and the celebrated race of the breed named after their order, right on the very summit of the pass, with the enormous glacier of the Simplon overhanging the mountain behind it, while quite near you is the majestic Monte Rosa, with its whole top capped with an enormous glacier that overlaps and rolls down like a mantle on its enormous shoulder.

Looking forward you see, at the great distance spread out before you, the beautiful fertile fields of Italy, and behind, you take your last look at the Valley of the Rhone and of French Switzerland.

Descending more rapidly than your ascent, you soon leave the uncultivated heights behind you and come by this route to the Italian Frontier and enter shortly

INTO ITALY.

On the Italian side of the Alps, even while you are still in Switzerland, the grape, the vine, and vine culture seem wholly Italian, differing as widely in their characteristics as the people themselves; and on all the Italian slopes of the Alps down to the plains of Lombardy, the vine and its treatment is wholly different from that upon the French side.

The vine on the Italian slope is planted in rows, about twelve feet apart, and often a much greater distance, and these vines are suffered to grow to the height of six or seven feet, and then they are tied out on a rude arbor, usually six or eight feet from the ground, so that the fruit is picked from underneath this overhanging arbor, and from above the head of the picker.

Now in many vineyards the vine staked out laterally from the row, and trained and cultivated to the lateral stake, instead of an overhanging arbor, this culture was exceptional and the former almost universal.

This method of culture was in vogue at Domo d'Ossola and all the villages after you pass the Italian frontier, on the Simplon route over the Alps, and indeed all through the country of the Italian lakes which are surrounded by mountains.

It is safe in speaking of Italy to say that this culture is universal on all the southern slope of the Alps, and for the whole of Northern Italy in the region of the mountains, and until you strike the beautiful and fertile plains of Lombardy, where it wholly changes.

In the valleys of the rivers that flow down from the Alps into the lakes of Italy the silk worm is largely grown and constantly in connection with the vine. The vine will be planted in rows trained on its arbor trellis; then a row of the mulberry trees will be planted, twenty to thirty feet apart, and sometimes even more, and often-times crops of cereals will be grown in the strip of land between the row of vines and the row of trees.

The vine itself is wholly different as you reach Italy, and is very much larger and more luxuriant than in France or Switzerland.

The contrast is extraordinary in the vine between Italy and the French portion of Switzerland.

In a ride between Domo Dozola and Baveno, on the Maggiore, as I drove along the valley of the Toce River, grape vines at least seven inches in diameter, looking almost like trees, which, I have been told, were not as old as the Swiss vines I examined at Sion, a century old, but not two inches in diameter.

The vine in this portion of Italy more resembles the strength and luxuriance the vines in America usually spreading and reaching over a large tree, more luxuriant and strong in growth than I found in New York or the celebrated vineyards at Hammondsport, N. Y.; more like the vines I have observed in Kansas or have heard of as in California.

IN NORTHERN ITALY.

Before you leave the mountains and strike the broad and beautiful plains of Lombardy, which seemed to me to be the very garden of Europe, I encounter a wholly different method of culture.

In accordance with, this is the most fertile, productive, and highly-cultivated land of all Europe. There is in America no cultivation of soils that I am familiar with, except in gardens or in single exceptional instances, that at all compares with the cultivation of Italy.

Throughout all this extensive and lovely country, in rows of from sixty to one hundred feet, the mulberry tree, which is always trimmed off at the top, and which, no matter how old, is never allowed to grow high. These trees are planted usually from twelve to twenty feet apart in the row, and between these rows of trees crops are planted and grown of roots, cereals, and in some cases grass and even meadow. The face of the country, therefore, resembles one vast orchard, or rather garden, with the mulberry trees set thus regularly and carefully throughout it.

At the root of each of these mulberry trees are planted the vines, and never less than three roots and sometimes as many as even seven or eight are thus planted at the base of each of the trees, and the vine trained direct into the tree. The tree and the vine oftentimes planted at about the same time grow thus together, the tree even supporting the vine and bearing the burden of its fruit.

This culture prevails about Milan, Florence, Genoa, Turin, and indeed, all of Northern Italy. In some parts the tree thus supporting the vine was willow, and sometimes fruit trees, but with occasional exceptions near Florence on the hill sides, and in some parts of Tuscany I observed no other culture.

There is much to be said in favor of this culture, as the grape thus allowed to spread and planted so sparsely must needs produce enormously, as all know who have observed in our own country what astonishing results are very often seen from a single vine when thus allowed to grow into a tree.

It is very ancient at all events, for the old classic writers, in speaking of the vines, often allude to them as growing in the trees, and for centuries this has been the Italian system of culture. The system of close pruning, as practiced in France and Germany, is wholly discarded, and the soil is nowhere devoted, so to say, exclusively to the vine, but ever used for crops and for the silk worm, whose labor forms a very important product of Italy.

In many parts of Italy the vine thus planted is festooned from one tree to another in the row, by the extension of the growth of the plant, so as to connect the whole row of trees by the most graceful festoons of the vine, and nothing can excel the beauty of this manner of culture, as the distance the trees are apart make the branches of the vine bend down and form the most graceful and picturesque effects.

THE WINES OF ITALY.

While it cannot be for a moment disputed that Italy possesses by far the most favorable climate and natural facilities for the culture of the vine in the highest perfection, it must be as certainly conceded that her wines are far inferior to those of France or of Germany.

The result of my observation led me to attribute this result to three causes.

First—The culture itself; being planted so sparsely, trained so high, with little or no pruning, and consequently with little care, is not calculated to save and husband all the best qualities of the fruit.

What could be expected of a vineyard in this country which would be suffered to run so at large and to waste, with the use of the knife almost wholly ignored.

Second—There can be no question but that the system of planting crops between the vines, and raising the cereal products of a country from the same identical soil that produces the fruit, must enervate the grape; and what is worse, doubtless, make its culture and production secondary, in the mind of the proprietor, to his other crops.

A vineyard to be brought to the highest perfection should be planted to the vine alone, and it should be asked to produce nothing else but the grape. Again, this mixture of husbandry with the work of the vineyard strikes at the necessary elements of cleanliness, care, and delicacy of handling the wine, which is not found in Italy, and which in France and Germany are deemed absolutely and indispensibly essential to success in making a good wine.

Third—Italy, mainly for political reasons, and on account of her anomalous and peculiar position, has not been an exporter of wines to a large extent.

She has had an enormous home consumption, which she has always supplied.

She has thus lost one of the great incentives to excellence in the production of her wines, and this has perhaps been one powerful reason why so low a standard of excellence is maintained in the manufacture of wines in Italy.

The grapes are never carefully separated as in France or Germany. The fruit, ripe and unripe, sound and unsound, is taken and all crushed together, and all varieties promiscuously intermingled and trodden, the press being rarely used. They are then turned into vats, usually that have remained uncleaned from the last year's vintage.—They will not suffer the wine to ferment separately and undisturbed, but often they will add new must to that which is undergoing fermentation, when fermentation is at its height. In short, all those essentials which in France are esteemed indispensable to good wine, are ignored in Italy, as a rule; but there are some exceptions, and, consequently some most excellent wine is produced.

If the culture was as carefully conducted, and the same treatment of the must observed as in France, there can be no question but that very superior wines would be produced, for the climate is neither equalled or excelled in all Europe.

Some idea may be formed of the extent to which the vine is cultivated here when the enormous quantity necessary to supply the home demand is considered, to say nothing of the production for purposes of commerce.

Throughout Italy, as indeed the most of Continental Europe, the bottle of wine is ever placed on the table at meals by the side of each plate. It occupies there, as prominent a place as water does at our own.

Water is very rarely drank except it is mingled with wine, and all drink wine at meals—men, women and children—and it is very rare to find in Northern Italy any so poor but that they can take the common or ordinary wine with their food.

If that meal consisted of only bread, it would be washed down with "vin ordinaire."

What lager is to the German, ale or porter to the Englishman, wine is to the Italian.

The use of spirits, as whisky, rum, gin, or brandy, so universal in Great Britain and many parts of Northern Europe, is quite unknown in these countries, and the contrast between these people and the gin and whisky drinking poor of Great Britain, so far as temperance is concerned, is very marked and very much to the credit of the former.

While the wines usually served at table in Italy are poor, there are good wines in this country.—That splendid wine grown at Naples known as the "Lachryma Christi," is too well known to be lost sight of. It is called "The Tears of Christ," and is the wine which, after drinking, a Dutchman is said to have exclaimed, "O Christ, why didst thou not weep in my country."

There are some brands of very good wine made in the Roman States, as the "Albano," but perhaps the best wines produced in Italy are those of Tuscany, where more pains are taken by certain proprietors in the manufacture, and where particular vineyards and brands have established reputations based mainly on their assimilating more to French methods in the making and treatment of their wines, and where all the essentials of cleanliness in the casks, care in the fermentation and in assorting the ripe and unripe fruit, are as carefully considered as in the most celebrated of the French or German vineyards.

CLARK BELL.

LAKE

VINEYARD WINE

COMPANY.

The undersigned, hitherto doing business under the name and style of B. D. WILSON & CO., have this day changed their firm name, and will hereafter continue their business as Wine Growers and Merchants, under the name and style of

"The Lake Vineyard Wine Company."

J. De BARTH SHORB,
CARLTON CURTIS.

We desire to call the attention of the Trade to our large stock of the celebrated LAKE AND MOUND VINEYARD Wines, and choice assortment of Wines and Brandies from the best Vineyards of California. These wines, bearing our trade-mark on package, label, and seal, we guarantee of uniform good quality, inferior to none, and ready for safe shipment to any part of the world.

Orders for the Atlantic States will be filled by our New York House from their depot, at No. 45 Murray Street, New York.

LELAND STANFORD, President.
H. F. HASTINGS, Vice President.
JOS. CRACKBON, Secretary.
J. M. GREY, M. D., Physician-in-Chief.
SCHREIBER & HOWELL, General Agents.

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,

Valuable Patents

FOR SALE

We invite the attention of energetic Mechanics' to several very

VALUABLE INVENTIONS

for which we hold the

PATENT RIGHT

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a handsome return for labor and capital can be made from.

WARREN & CO.

VALUABLE PLANTS FOR SALE.

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us.

WARREN & CO.,
11 Farmer Office.

Wanted.

A Gentleman residing a few miles from the city, is anxious to meet with some one, who can Superintend the construction of Trout Ponds, or give information as to the best mode of constructing Fish Ponds. Such parties will be amply compensated for all trouble and knowledge. Address, B L. B., FARMER OFFICE.

P. S.—A personal interview would be preferred at the Farmer Office.

ORANGE SEED.

THOSE WHO WISH TO RAISE TREES FOR AN *ORANGE PLANTATION*,
Can obtain SUPERIOR SEED at the

Or GEN. JOSIAH HOWELL, Sacramento City.

A Young Man Wanted!

A live Young Man wanted—one who wishes to do *his duty*, and by his true merit work his way up, and become of value to himself and his employer.

To such a young man, who can bring good recommendations a good situation will be offered in this office.

Apply only between the hours of 8 and 9 o'clock, A. M., and 5 and 6 o'clock, P. M., in the Printing Department of the FARMER OFFICE.

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish collections of choice plants, can buy them in quantities at a very low rate, if they visit the *Garden Corner of Mason and Pacific Street*, in this city, or address EDITOR FARMER.

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....JUNE 17, 1869

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Grasses Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is TWO DOLLARS for five lines or less of space, in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best edium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with a paragraph marked, may understand that it is sent to them for their examination hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of our *Journal*, to which we would direct their *special* attention.]

We give this week a sketch, relative to the "Coming Crops," and also our "Home Finances," from our Cotemporary the Commercial Herald and Market Review, one of our most reliable Journals; we do this to show that other and leading Journals take the same view of these subjects that we do.

We note our Letter from "Jennie Dare," and reply yes! We have the Beautiful Nemophila as a wild flower, over our broad Prairies, and *Geraniums* and *Fuchias* grow here ten and fifteen feet high in the open ground.

If Jennie wishes to see Beautiful Flowers, California is the place for such a view.

We call special attention to the article on the "Eyes." It is all important and especially to those Parents who are reckless of their childrens' welfare and permit them to sit up night after night to a late hour and read. Their after years will tell in days of suffering.

Acknowledgements.

Articles Received at the California Farmer Exhibition Rooms, No. 320 Clay Street.

BOOKS RECEIVED.—"Farm Implements and Machinery."—This is truly a practically useful book, and just published by Orange Judd & Co., of New York.

This book furnishes all the needed information relative to the principles of construction and use with simple and practical instructions and explanations of the "Laws of Motion and of Force, as adplied to the farm.

J. J. Thomas Esq., is the author of this book, it contains nearly three hundred illustrations, embracing all the principle implements used by our Farmers. A. Roman & Co., have the work for sale in this city.

"FARMING BY INCHES, or with Brains Sir" This is a capital book, it has some very good hits at guess Farmers, and is very witty and pungent; it should be universally read, even by those who never yet gave much brains to their business.

The book is made up of familiar conversations, and is practical in its nature and will do good.

The book is by the author of "My Ten Rod Farm," "How I became a Florist etc.," published by Loring, Boston and sold by A. Roman & Co., of this City.

HOW TO READ CHARACTER.—This is one of the books issued by Saml. R. Wells the well known Phrenologist of New York. It is a hand book of Physiology, Phrenology and Physiognomy, and is fully illustrated, it is indeed an interesting, instructive and useful book, and will prove valuable to all who will read it attentively—for sale by A. Roman & Co.

We acknowledge many Pamphlets and valuable Reports, from the Agricultural Department, at Washington D. C.

We have the Circular of the Tax Payers Union, setting forth their plans of action, relative to Political Conventions, and their plan of general action for the People.

It is certainly high time that the *people* should take an interest in the Government for Harpies have controlled it long enough.

ANATOMICAL MUSEUM.—We acknowledge the receipt of a very courteous letter, and card of invitation to this most interesting and important Institution of Knowledge.

Most earnestly we commend this Museum to all, for we should certainly learn all about "The House we Live in."

BATTLE OF BUNKER HILL.

This is a Day *Sacred to Liberty*, and a day that should be kept in perpetual remembrance by every lover of human freedom.

Ninety-four years ago this day the *Baptismal Blood* of American Liberty and Freedom was poured out upon the memorable heights of Charlestown, where now stands the lofty and noble Monument, completed through the noble efforts and influence of woman as her consecrated tribute to Liberty.

We remember well that memorable day when the Corner Stone was laid. We remember, too, the presence of that Noble Patriot and companion of Washington, the Marquis d' Lafayette. His presence drew out on that day the people of New England and the Middle States by the tens of thousands.

Although this was long years ago, we were most deeply interested, and performed military duty, and felt it a great honor to join in the escort of the Noble Lafayette.

We shall never forget that event or the scenes of those long bygone days. We were very fortunate in being near to the Orator on that occasion, the renowned Webster, and we shall never forget his most brilliant oration; his closing words still thrill the pulsations of our life-blood.

Webster when about to close, pointing to the battle ground, to the noble companion of Washington near him, Lafayette, the *Guest of the Nation*, and alluding to the Monument which had there been consecrated by the foundation stone.

Webster then said, as he raised his arm and with his finger pointing eastward, then westward, in his most thrilling tones he spoke of the future of the rising Monument until it should be finished, and said when the last stone shall be laid, "The morning sun shall gild it with its beams, and its last lingering ray shall play around its summit."

These words were uttered forty-four years ago, and his words have been happily verified.

We feel that we could do no less on this memorable day than to give the beautiful Poem of the gifted "Pierpont," which was written for the occasion, June 17th, 1825.

BUNKER HILL.

O, is not this a holy spot!
'T is the high place of Freedom's birth!
God of our fathers! is it not
The holiest spot of all the earth?

Quenched is thy flame on Horeb's side;
The robber roams o'er Sinai now;
And those old men, thy seers, abide
No more on Zion's mournful brow.

But on *this* hill thou, Lord, hast dwelt,
Since round its head the war-cloud curled,
And wrapped our fathers, where they knelt
In prayer and battle for a world.

Here sleeps their dust; 't is holy ground;
And we, the children of the brave,
From the four winds are gathered round,
To lay our offering on their grave.

Free as the winds around us blow,
Free as the waves below us spread,
We rear a pile, that long shall throw
Its shadow on their sacred bed.

But on their deeds no shade shall fall,
While o'er their couch thy sun shall flame;
Thine ear was bowed to hear their call,
And thy right hand shall guard their fame.

TRIAL OF THE STEAM LOCOMOTIVE.

BAXTER'S BIG WONDER.

A public trial of this machine will be given on Saturday next, June 19th, in Stockton.

A threshing machine and set of Derrick forks will be operated by the Engine after its hauling and locomotive powers have been thoroughly tested.

Farmers and Mechanics from all parts of the State, are invited to be present and witness the triumph of this great mechanical Invention.

The Stockton Daily *Independent* of June 14th, speaking of the first trial, says:

"'Baxter's Big Wonder' steamed up again on Saturday and traveled about for a considerable length of time in the city, dragging after it two large threshing machines and another steam engine. The streets were thronged with people, who gazed with profound astonishment at the modern juggernaut moving slowly along, a tower of strength. It terminated its journey at Webster Brothers' Agricultural Warehouse, on El Eorado street, where the crown-piece was removed from he smoke-stack, so as to allow the machine to tenter the building, when steam was again put on and the machine, without any apparent difficulty, moved up the steep ascent, dragging the train of machinery after it into the building. Three cheers and a tiger were given by the crowd present for the novel machine and its inventor, which was acknowledged by a shrill whistle from the locomotive in response to the compliment."

COMPLIMENTARY, *Santa Clara College*.—We acknowledge a most courteous invitation to the commencement exercises of the Santa Clara College of the 22nd and 23rd inst., and we anticipate a *Rich* intellectual feast.

TURKISH BATHS.—We have received a complimentary card of invitation, to the New Bath House of Dr. Zeille, which is to be formally opened on the 19th, (Saturday) after the style of the *Turkish* and *Roman Baths*.

Dr. Zeile stands high as skilled in this all important aid to health and long life. We assuredly wish success to this enterprize.

SANTA CLARA COLLEGE.

This highly distinguished College announces their *Eighteenth* Annual Commencement and Exhibition, to take place on Tuesday and Wednesday of next week, the 22nd and 23rd inst.

It is wholly unnecessary for us to speak words of Praise for this Institution, for it has already *won the highest honors*, by the most excellent system adopted by the Fathers in Educating their Pupils, and by the many most highly educated students which have graduated from this College.

The Santa Clara College has the finest buildings, the most valuable Library and the most complete Philosophical Apparatus of any College on this coast.

In addition to these, all the various Sciences are thoroughly taught by practical labor in all these sciences, Astronomy with an apparatus complete: Electricity with the most powerful apparatus known; Botany with Herbornius Plates and Books, the best known; Mineralogy with a cabinet of Minerals of rare beauty and value, and so with all departments of Natural History. Electrotyping, Photography, Printing, Military Science, Gymnastics, Physiology, Phrenology, Physiognomy, Painting and Music are here perfected, and the other Literary studies in the College, and to these the *Drama*, is added.

It has been our pleasure to be present at the Exhibitions of this College for the last successive thirteen years, and we can attest to the excellence of this College and its management, and the great proficiency of the students.

The Programme of the Exercises sent us, offers a general "Literary Feast," which must be a source of pleasure to all that attend.

The San Jose morning cars will take passengers in due time for the opening Exercises of Tuesday the 22nd. It is to be hoped that all who desire to witness most interesting College Exercises will be present, as this is the season for a visit to the country, and Santa Clara is one of our most beautiful, as well as one of our most prosperous Vallies, and the Santa Clara College is one of the best and most complete Colleges of the Pacific Coast.

THE GREAT PITCHER.

Whoever passes along Sansome street or Washington street to the Market or Post office, cannot fail to notice the Mammoth Pitcher of Messrs. Haynes & Lawton, which stands upon the extensive Crockery and Glass Warehouse, near the corner of Washington and Streets.

Messrs. Haynes & Lawton are among our early *Pioneer Merchants*; in their present business they are indeed Pioneers, for their Crockery Store has been known for long, long years back to early date, and their business and New Manufactures, added to their trade, now places them in the front in their line.

Messrs. Haynes & Lawton have greatly enlarged their premises, making a spacious Warehouse of two stores, and is two stories high with basement, so that with their large stock, they are thus enabled to supply not only families, but Hotels and Public Associations with a complete outfit at short notice, as the stock of this house is very complete.

The Crockery department offers from the Richest Dinner Set of near a Thousand dollars each, downward to those for families of the ordinary means, and Coffee and Tea Setts to match; many of these are made *to the order* of this house exclusively. Cut Glass and China Wares in extensive collections, Cutlery and Table Wares of the very best style, Ornamental Statuary, Vases &c.

A Department also for Glass Lamps and Lamp Wares, Brittania Wares, Water Coolers, Butter Jars and all family wants of the kind. A Department for Time, and family Time keepers of all needed Patterns, and to all these are added *Preserving Jars* so very necessary at this present moment, when fruit is in its best condition.

We found much to interest us in the *Plating Manufactory*. This is the Pioneer Establishment of this kind of work to any extent, and the wares furnished here are worthy special notice of all Housekeepers. We examined some of the New Wares now being finished, most of them are superb designs. Tea and Coffee sets, Cake Baskets, Castors, Pitchers, Goblets, Spoons, Forks, Soup, Butter and other Spoons are patterns entirely new and never before shown here and made for this firm expressly. Tea setts of six pieces at about $70, equal in beauty to solid silver costing $400, Castors $12 to $20, equal to those of $150, and other wares equal.

Many of these things would be excellent *Premiums* for our Fairs. the best of workmen are employed by the firm, and their business is certainly increasing. H. & L. have also a spacious store in Stockton, and they have just furnished the New Hotel Yosemite, with their Crockery, Glass and Silver Wares, having their own express wagon, they send goods to steamers and Railroads free.—We urge our friends from the country to visit this Warehouse when in want of goods.

DISTINGUISHED ARRIVALS.

These words will now form daily paragraphs in all the Journals of the day, for, from this time henceforth not a week or a day, but we shall be agreably surprised by the announcement of "Distinguished Arrivals," for when we consider that it is only a weeks journey from New York to San Francisco and fifteen days from Paris or London to *our* City, we need not be surprised if everybody comes—they shall be welcome.

FIREWORKS.—As the Fourth of July is near at hand, those who intend to celebrate that glorious Jubilee with the usual night illumiuators, with rockets and other brilliant fireworks, should by all means give their patronage to "Home Manufactures," and these can now be had as well as be seen, by the card of A. GEORGIANI on Washington street, who is one of our Old Pioneers, and whose manufactures are equal to any made, besides he will sell them on the most favorable terms.

SHIPPING FRUIT EAST.

We are in receipt of many letters making inquiries relative to the ripening of certain kinds of Fruits, the quantities raised here, the localities of such fruits, also the cost of Freight between our city and the principal Fruit districts and Chicago.

We have also many inquiries relative to the period of *ripening* in the different sections of our State, as it is now well known that we have the same fruits ripening at different periods at different points

These and many other inquiries show us conclusively that there is a spirit of earnest inquiry, and also a determination by people abroad to avail themselves of our Fruits for shipment to the Eastern section, and it will be well if our Fruit growers shall make themselves acquainted with these facts and be prepared for the active enterprise that awaits them in this *new branch of business*—that of supplying the markets of New York, Boston, and Philadelphia, *with* the Fruits of California.

This business, however, cannot be entered into without *brains*, nor can speculators *go it blind*. It will require knowledge, good judgement, and a cash capital. With these pre-quisites, and a good partner at both ends of the route, a good and profitable business can be made of it, and one of permanency too.

In our next we shall give time of *ripening*, and the kinds best to send East.

THE HOMESTEAD BUSINESS.

The number of homestead associations which have been formed in San Francisco from 1861 to date, according to the *Real Estate Gazette*, is 166, aggregating a capital of $18,047,470. Most of these associations have been profitable to shareholders, as well as to the persons who organized them. This was owing to the low price of real estate in the city when these companies were instituted, lots having since advanced in some cases to an extraordinary extent. The organization of homesteads was first undertaken in San Francisco for the purpose of making available outside property, but it has now been extended to the division of farming lands, and with a view to selling the same at extraordinary profits. It has become the duty of purchasers now to study the value of lands in which they propose to invest their money.

The *Bulletin* is wise on the Homestead Business. It is all very well to have a lot 20x100 in the city, but when we live in the country we want a place big enough to swing a cat round.

SUMMER FALLOWING.

The good effect of summer fallowing for wheat is shown by the favorable comparison it makes with the volunteer crops in the same vicinity.—Volunteer crops in dry seasons have generally done better than was expected, while spring sown have disappointed the growers. On Maine praire, says the Solano *Advertiser*, the summer fallowed adobe lands will yield a splendid crop of grain this year, while volunteer crops will be light. This is only one of many instances in which farmers have met with a handsome reward for the labor they have bestowed on their lands in summer fallowing.—The practice is more extensively followed every year, and if there is any farmer who has not yet given it a fair trial he should not neglect doing so another year.

We take the above paragraph from the *Bulletin*, and rejoice to see them talk so earnestly about "Summer Fallowing," The California *Farmer* has been urging this system for over *Twelve years*, and always foretold success.

OUR EXPORT OF WHEAT.

The wheat deficit of Great Brittain, always comparatively large, was less than usual in 1868, and the imports were consequently reduced from 34,645,569 cwts. in 1867 to 32,639,768 cwts., or 60,927,566 bushels. This country has advanced its position to the second place, displacing Prussia; Russia still occupying the first in supplying the bread deficiency. The United States sent 5,908,149 cwts., or 11,028,544 bushels. This is quite as much as could be expected in the present condition of production, more than the future will probably average, and more perhaps than is desirable to send abroad, as we can never expect to gain anything but the impoverishment of lands and the dwarfing of national industries by exporting cereals or other bulky products of agriculture. The export, respectable as it is, is but 18 per cent. of the receipts of Great Britain from foreign sources.

In addition to the wheat, the amount of flour imported was 3,093,022 cwts., which is a slight decrease. Of this the United States sent 676,192 cwts., or 386,395 barrels, equivelent to 1,931,975 bushels, which added to the unmanufactured grain would swell our wheat exports to 12,960,579 bushels.

SILK AND GRAPE CULTURE.—The Nevada Sericulture and Vinicultural Association has filed a certificate of incorporation. It is organized for the purpose of buying and selling land, engaging in the culture of the mulberry tree, raising eggs and silk worms for market, manufacturing silk and cultivating the grape in the county of Nevada. The Capital Stock is $25,000, divided into shares of $500, each. The Trustees are John Cashin, W. L. Tisdale, R. M. Hunt, E. F. Bean and I. Williamson. The Assoceation was presented with 160 acres of land.—*Sac. Bee, June 12.*

A NICE CUP OF COFFEE.—Those who may desire a very nice dish of Coffee made quick, easy and delicious and made upon the table as you want it should call at Mr. Kohler's Music and Fancy good Warehouse, cor. Sansome and Clay streets, and see a great curiosity, and a new and valuable invention to *make a nice cup of Coffee*.

—The Thirty-Second Volume of the FARMER commences in July.

GRAND PEACE JUBILEE.

The Telegraphic Reports give us the following as the opening services of this wonderful occasion:

BOSTON, June 16.—The Peace Jubilee was inaugurated this afternoon. The programme was exactly carried out. Rev. E. E. Hale asked the divine blessing; Mayor Shurtleff delivered the welcoming address and Hon. A. H. Rice pronounced the oration. Admiral Farragut, Commodore Rogers and many other distinguished persons were present. The chorus and instrumental performers number from 10,000 to 12,000. The audience probably number 25,000, notwithstanding a heavy shower. The view from the balcony is beyond description. Nothing like it was ever seen on the continent. The view embraces three and a half tiers of heads. The opening chorus was by 10,000 voices, the orchestra was composed of 4,000 instruments, and the grand organ was under the direction of Gilmore; the vocalization was as distinct and clear as a church choir. Parepa Rosa and Ole Bull were among the performers, and they were greeted with simultaneous applause from the audience and performers. The *Anvil Chorus*, given by the whole force, with 100 anvils and artillery accompaniments, created intense enthusiasm, and the audience demanded a repetition.

The national air, *My Country, 'Tis of Thee*, was the last piece, and was sung by the whole chorus with all the accompaniments, including the organ, full orchestra, big drum, etc. The chimes of artillery was the crowning success of the day. The audience stood in their seats, abounted and made extraordinary demonstration. The last piece was repeated by the whole mass of performers, and again at the conclusion there were repeated shouts both from the audience and performers.

The building was soon vacated. Every paper is loud in praise of the success of the inaugural day jubilee.

TROPICAL FRUIT.—We would call the attention of our readers, to the notice in this week's issue of A. Georgiani, who is largely engaged in the Importation and Sale of Tropical Fruits; on Washington streeet near the Post Office. Mr. Georgiani has been engaged now nearly thirty years in the *Foreign Fruit Trade*, abroad and in this city, and has made himself familiar with it.

Mr. Georgiani is now one of the largest dealers in our city in the fruit trade, and is always prepared to offer the Choicest and Best Fruits, and had on the very best terms—dealers in the country would well to call on him when in the city.

YOSEMITE HOTEL STOCKTON.—This is a New Hotel, completed and to be opened on Wednesday next. This Hotel was very much needed at Stockton, as the place is growing very rapidly. Travellers for Yosemite and the Big Trees now have a "Good Home."

The Yosemite Hotel will be a popular and favorite Hotel, and must be a success.

TO OUR SUBSCRIBERS—DELINQUENT.

Those who have received bills from us and who know they are indebted to this office, would desired to remit to us without any further delay.

We commence our New Volume—*Thirty-Two*—in a few weeks, and desire to make many improvements, and it is only an act of *Justice* that the indebted aid us in this our work, cheerfully promptly, and save us the trouble and expense sending these Bills through Expressmen or city collectors, or put them to any expense.

There are Bills sent out a long time since these *must be paid*.

Those who promptly respond to our call, we shall esteem our friends and cooperators, and shall record their names gratefully as such. Those who neglect this call will be sure to hear from us again.

WHO MAKES SCRAP BOOKS

'Tis said "In the making of Books there is no End," and we know there are many persons who are always interested interested in Scrap Books, and now to all such persons, we have some very important information which will benefit them.

It will be seen by our advertisement of NEWSPAPERS FOR SALE that we can furnish *right material for Scrap Books*, for we have a collection of Old Newspapers, a series of years of 10 to 16 years and from every State in the Union, and also European papers; also scientific and literary papers, Journals of all kinds. In these papers will be found much of the Poetry of the age, also Stories, Anecdotes, Recipes &c., all very valuable, and these we offer at the low rate of $2.50 to $3, per bale. Many of these are 12, 16 and 20 page papers and magazines and other periodicals, those who want these collections will address

EDITOR CAL. FARMER.

FLORENCE

The FLORENCE is warranted to be the best and most reliable Sewing Machine in the world. It seldom gets out of order. If there is one within a thousand miles of San Francisco working well, I will fix it for nothing and all express charges.

SPLENDID CASHMERE GOATS

We Invite the attention of all who desire to purchase PURE BLOOD Cashmere Goats, to call and advise with us.

We have a List of the SPLENDID GOATS Imported by Hon. I. S. Diehl from Asia, and having been appointed to act for him, we are now ready to fill orders for the same.

As the value of this fleece is now steadily increasing in demand, we shall soon have more for the manufacture of the same.

Address EDITOR FARMER.

THE CALIFORNIA FARMER!

OUR THIRTY-SECOND VOLUME.

In the opening part of the next month we shall commence our THIRTY-SECOND VOLUME of the

"California Farmer."

It now numbers more and we begin the closing volume of our SIXTEEN YEARS' LABORS with this number.

We do not feel that it is necessay we should come out with any new promises of what we will do for the *Cause of Agriculture* and its kindred interests, for the past must speak for us; and those who can look back to the time when we launched our little bark, will now justly recognize what has been done to advance this great and important source of wealth to our State by this journal during these long years.

One thing we do know, "*We* have done what we could" and we hope with our New Volume to enroll many New Voluntary Subscribers. For all past cooperation we shall ever be duly grateful.

We return our most sincere and heartfelt thanks to all our Patrons for their many kindnesses, and hope to continue to walk with them many years in the pleasant scenes of Rural Life and Rural occupations.

The Terms of the FARMER will remain the same ($4 per year, $3 for six months, (gold price,) and $1 extra when payments have been delayed; but these terms are unchangeable. A liberal allowance for clubs; when five copies are paid for, six copies will be furnished.

WARREN & CO., Editors and Publishers,
320 *Clay St.*, San Francisco.

TEN REASONS WHY EVERY FARMER AND STOCK-RAISER SHOULD TAKE THE "CALIFORNIA FARMER."

1. Every Farmer and Stock-raiser should be a reader of the Journal connected with the interests of his own profession in his own State.
2. Every such person should give his sanction and support, generously and voluntarily to a Journal that advances his own particular business in his own State.
3. Every such person is *benefited* by the publication of such a Journal, and is in justice bound to reciprocate such labors.
4. No person engaged in these employments can be without such a Journal without the loss of many times its cost annually.
5. The Farmer and the Stock-raiser will always be better advised of the markets, and that kind of information so important to his interests by constant access to a Home Journal.
6. The *California Farmer* has faithfully advocated the best interests of the Farmer and Stock-raiser for nearly sixteen years, and is the *only Agricultural Journal in California.*
7. The *California Farmer* contains the most important information relative to these interests in every branch of Agricultural science.
8. The *California Farmer* contains the announcement of all New Seeds, Grains, Grasses, etc., together with all New Implements that will advance the cause of the cultivators of the soil.
9. The *California Farmer* contains the arrival and introduction of all the best Stock of all kinds as soon as known, together with the full Market Reports of all the interests appertaining to Agriculture.
10. The *California Farmer* is now the *only paper* on the Pacific Coast that is continued by its *original Editor and proprietor*, commencing at the time this Journal commenced; and having been constant in its efforts for the good of these interests, deserves the cheerful patronage of all good men.

TO THE MEMBERS AND FRIENDS OF THE

Mercantile Library Association.

The very heavy expense attending the Erection and Furnishing the New Library Building, has very much embarrassed and is seriously injuring the working Issues of the Association, and we find ourselves really in very great need.

Will every one who feels at all grateful for the favors and benefits furnished by the Association, make some personal effort to render the load of those assisting upon us less burdensome?

The most practical and best means of doing this is by increasing the number of Subscribing Members, thereby increasing our source of revenue and extending the benefits of the Library to a much larger number than at present.

Every one has it in his power to do something for the general prosperity.

Then give the Library something more than initiation fees and quarterly dues, and an earnest effort is made to each and every member to assist. Get, at least, one new member; many can do much more, but be sure that you at least get one.

By order of the Board of Trustees,

THOMAS R. HAYES, Rec'g. Secy.

San Francisco, June 8th, 1869.

THE BEE-KEEPERS' JOURNAL,

And Agricultural Repository.

Large and handsome monthly, at $1 a year. Specimen numbers sent. Edited by Homer A. King, and Ellen S. Harmer, author of "The Bee-Keepers' Text Book," which has reached its eighth edition, having had a sale of 16,000 copies in two years, and the most practical writer on Bee-culture. A specimen number and liberal premium offers and "Hints to Bee-keepers" sent free. Write now and not forget it. Address

GYPSUM. (Sulphate of Lime.)

This well known but most wonderful fertilizer has not yet been practically introduced into the Agricultural interests or before the minds of our California cultivators, for the reason that there was no supply, and because it was hard to make them believe our lands needed manuring.

The time, however, has arrived when, by the admitted fact of the deterioration of our soil and the lessening of crops, something must be done to restore the soil and bring it into that state of fertility necessary to make it profitable to cultivate the soil.

Gypsum is a compound of Sulphuric Acid and Lime, and the object of this fertilizer is the fixing of Ammonia, thus making it the direct food of plants, either by supplying the Sulphate of Lime or by its decomposition, affording the Sulphur so necessary to the due development of certain plants.

Sprengel's Analyses shows the quantity of Lime and Magnesia, Sulphuric and Phosphoric Acids to be very large in the following plants, and for these this fertilizer has no superior:

Wheat, Barley, Oats, Potatoes, Cabbage, Swedish Turnips, Clover, Beets, Turnips, and root crops generally; thus ensuring to a certainty its great importance to the Farmers.

Liebig's Natural Laws of Husbandry gives conclusive proofs of its superiority as a fertilizer on Clover and Grasses, furnishing details of experiments made by distinguished men in various parts of Europe.

According to the experiments made by Buckholtz, Gypsum is composed of *thirty-three* parts of Lime, *forty-three* of Sulphuric Acid, and *twenty-four* of the water of crystallization.

Gypsum is often called Plaster of Paris, but this is wrong—it only takes that name and character when it has been deprived of its water of crystalization by fire; there it becomes *Calcined Gypsum* or Plaster.

Gypsum for Dry Countries like California, will prove immensely valuable, as when used as a fertilizer in our hot and dry soil, its waters of crystalization are seperated by means of our hot climate and go at once to benefit the plants, while the Acids and Sulphate of Lime is taken up by the soil, enriching it to a very great degree.

The undersigned is now prepared to furnish this valuable fertilizer by the quantity to all who desire to try its well attested virtues.

CHAS. J. JANSON,
222 BATTERY STREET.

ORNAMENTAL TREES.

The Oregon Fir Tree Association.

We are now prepared to Ship to all parts of the country, all the handsome varieties of the Fir Tree that so abound in Oregon. The trade of the Association is at present promising much greater success, especially on the Pacific Coast, than they have formerly anticipated. The nurseries of California do not seem to have adopted the Oregon Fir, only as we have recently taken some of their orders from them.

We find them to possess an attraction as an ornamental tree rarely equaled. The Yellow Pine and the Balsam Fir are the most popular varieties; the Yellow Pine the most hardy—thriving in almost any soil or climate. Our trade with the East is promising; our trees have arrived there in good condition and are growing.

The Association is prepared to supply a large demand for Trees, from six inches to four feet in length, but we cannot fill orders for any more than four feet.

Efficient Agents wanted in all parts of the country, to whom we will extend the most promising advantages. We shall be glad to receive a communication from any one who might desire such an agency, on the most paying terms, or from any one who may desire our Trees.

Orders for Trees to be set in the fall should reach us as early as October, and those for the spring supply as early as February.

We Ship none but perfect and healthy Trees.

All communications should be addressed:

REV. C. W. TODD,
Oregon City, Oregon.

To Hay-Makers!

The Great Stacking Fork.

WE OFFER TO THE HAY-MAKERS OF THE PACIFIC Coast, the Celebrated

HARPOON

HAY STACKING FORK

One of the best inventions of the age. With this Fork, A Great Saving of Time, Strength, Labor and Expense is made, as it is indeed a very valuable and important implement, both to Hay Makers and Grain Growers. This machine is used to load and unload Hay or Grain Waggons to Barn or Stacks, and is very extensively used at the East.

We have received a few of these Implements which can be seen at our Office. Having more on the way, we are prepared to take orders for them in quantities to suit the trade, as we have the Agency for the sale of them for the Pacific Coast.

Sample Implements, and all Particulars at our Office.

WARREN & CO.,
"Farmer Office," 320 Clay Street, up stairs.

CAST-STEEL DAIRY KNIVES

WE HAVE RECEIVED INVOICES OF THE CELEBRATED

Cast-Steel Dairy Knives,

Manufactured by D. G. Young of New York. We have them of all sizes, from those of FOUR BLADES to cut FIFTEEN INCHES, up to THIRTEEN BLADES to cut TWENTY INCHES.

These Knives are of very great advantage to Dairymen, and are worthy their attention.

For sale by WARREN & CO.,
"Farmer Office," 320 Clay Street, up stairs.

SUPERIOR MELON SEED

FOR LATE PLANTING,

We have just received from New York, a small Invoice of *Superior Melon Seeds*, of the following kinds for late planting.

PURE ICE CREAM MELON,
TRUE NETTED CANTALOUPE,
LONG GOLDEN MUSK MELON,
GREEN FLESH MELON.

Now is the time to plant Melons on our river-land lands, and on all alluvial soils; planted now, they spring into bearing quickly.

For sale at FARMER OFFICE, 320 Clay St., up stairs.

Home Miscellany.

REST.

Inside thy hand lieth mine,
And my cheek is touching thine;
On thy shoulder is my head,
And no syllable is said.

Then flies Rest into my heart,
Stir thou not lest she should start;
Let me hear the lulling song
Of gentle bird away so long.

Keep me folded thus to thee,
Let thy breath a language be,
Yet nor speak nor stir, I pray,
Lest white bird Rest should fly away!

—*C. F. Bates, in Galaxy.*

FORESHADOWINGS.

Pilgrim I am, and make my way alone;
Sometimes I pitch my tent, when not for rest:
Then, as I sit and muse, there cometh one,
My heart's unbidden, yet most welcome guest;
I know her nigh by neither word nor sign,
Only a sweeter light within the rich sunshine;

Or, if it be the saintly close of day,
And the day's so beguiled march be o'er,
Then by a starrier clearness in the ray
Of Love's clear star, from that deep sunset shore,
I know my Angel is within my tent,
And her gold-shadowing spirit o'er my spirit leant.

Or, if at midnight, while I lie asleep,
A secret glory down the moonbeam roll;
Or some serene transfiguration creep
Over the clustering stars that crowd the pole,
Tingeing my dreams, then waking me to dreams,
I know that these are her annunciation gleams.

Fresher than morning, when the morning breaks—
Breaks from my East the morning meant for me:
East is to me the way my Angel takes
To reach my tent, what'er that way may be;
To her my tent door opens, self withdrawn,
And to the bridegroom sun swing wide the gates of dawn.

So noonday, evening, midnight, morning, I
Lonely am not, although I dwell alone;
But my blind poet-heart doth prophesy,
Dreaming a dream and vision of her own—
Own tent, not far, by Elim's springs and palms,
And two that, side by side, sit singing pilgrim psalms.

CARE OF THE EYES.

BY DR. J. H. HANAFORD:

Having but two eyes, and both being absolutely necessary to good and acurate sight, measuring distances, &c., it becomes necessary to take good care of our eyes, and to learn, not only what injures them, but how we can avoid danger, and improve the sight. If one supposss that he can see as well with one eye as with both, let him close one, and then try to quickly bring together two pointed objects, as two pencils, or the finger or the finger ends, one of each hand, first extending the arms, and he will learn that his sight is not very accurate, that he cannot measure distances accurately.

But how shall we avoid injury of the sight? A glare of light is always more or less injurious to to the eye, generally causing pain, which is usually a warning, a caution. When the eye "waters," the ball feels sore or aches or smarts, when it seems as if "sticks" were in the eyes, as some children complain, it is as if the eye should say, "My little boy, or girl, take care; you are spoiling these eyes, and soon may become blind, unless you stop your abuse." None would wish to exchange places with the blind, who see nothing—no beautiful flowers, no sunset skies, none of their friends; but grope their way through the world or are led by some friendly hand

We cannot look safely at the sun, even when in eclipse, without a "smoked glass," seeing as "through a glass darkly. A steady look at the sun, shining in all his brilliancy, would soon destroy the sight, as in the case of criminals, whose eyelids are sometimes cut off, in some barbarous countries, the poor creatures looking at the sun without any protection. For the same reason, the glare of the sunlight reflected from new snow, is oppressive and painful, always injuring the sight. The same is true of very bright light, as that of gas shining directly on the page when one is reading, or writing, producing a glare and pain, particularly if the light is reflected to the eye. A shade on the lamp or gas, or one worn over the eyes, will do much towards obviating the injury. Again, while too much light or too much of a glare is injurious to the sight, too little is also unfavorable. Reading, writing or sewing at twilight, or by an inferior light, is nearly as bad, taxing and weakening the eyes, sometimes producing inflamation or redness of the eyes. If we overtask the eye or any member of the body, we are sure to suffer. While proper exercise and a proper use of any member of power, increases our strength, too much effort or abuse, will always weaken or destroy.

Artificial light, such as that of a lamp or gas, taxes the light more than the natural light—the light of the sun. So far as we are able, it is best to avoid taxing or straining the eyes by such light. If we must read, study or sew by lamp light, it is well to have our evenings in the morning—retiring early and rising early enough to secure sufficient time before the dawn of day, since the eyes are taxed more to read &c., by lamp or gaslight than by daylight, it is safer to use such light after the eyes have been rested by a nights sleep, using them under the most favorable circumstances. It is also true that the eyes are taxed far less when we simply open them and let them see, than by straining them, trying hard to see, compelling them to see. We never gain time by using them at an improper time, or in an improper manner. Blindness, inflamed and painful eyes, weak eyes,—so weak that we cannot use them for weeks or months,—will teach us how much we loose in this way. What we seem to gain by reading, &c., at twilight in the cars, or under any circumstances in which we overwork them, we lose in the end.

Never rub the eyes, either when dust gets in, or when grieved. If the dust has sharp edges or corners, such rubbing is sure to injure them. It is safer to draw the lids away from the eye, and let the tears wash the dust away, or, with a syringe, throw warm water into the eye for the same purpose, which is easily done and not painful. Soft water is said to be the best "eye water." Wash them out with such in the morning, and wear a wet cloth several thicknesses, over them at night, if they are red, hot, or inflamed, keeping them and the head cool.

OUR LADY CORRESPONDENT FROM PENN.

LETTER NUMBER FIVE.

GREEN TREE, PA., June 5th, 1869,

Dear Col:

"I want to know," as the Yankees say, does the Nemophila grow wild in California? In writing of one of your excursions in the vicinity of San Francisco, you say: "the grass was gemmed with the Golden Eschscholtzia and Cerulean Nemophila," from their being found among the grass, I take it they grow wild by the road-sides, just as mullein and ragweed do here. A lady that formerly lived in San Francisco, tells me that she saw geraniums trained against the walls of the houses, and that they grow as high as the second story window; "indeed," she added, "when things begin to grow out there, they never know when to stop.

I was forced to swallow the geraniums; for the lady's veracity is unimpeachable, but that these delicate flower that I have grown up with so much so much care, really run wild about your fields is a little—just a little difficult of belief. The Nemophila is the only annual that I have in bloom; my Stocks and Zinnias and Phox, were only transplanted from the cold frame the other day, and have gotten no further than their fourth leaves, and these are in advance of most in the neighborhood. But I must tell you how I managed to have the Nemophila bloom so early. In March, when the ground was still frozen hard, I had a pile of rails removed, and made a bed where they had lain all winter; after the seed was sown, I built a low fence of rails about the bed, and filled it with dried grass, than covered it with boards. Every sunny day I took off the boards and put them on again at night, I did this until the hard freezing was over, for after it is started, the Nemophila will bear a good deal of cold, indeed it endures cold better than heat. They bloomed first on Decoration Day, and henceforth will always be associated with that day in my mind.

At present there are seven varieties in bloom, there are nine described in Vick's Catalogue, and I hope to add the other two to my list, as a number of the plants have not bloomed.

I have thirty two plants all raised from one paper of mixed seed, cost of said paper of seed five cents. It seems absurd dont it?

Such a source of delight as they have been—and are—and cost five cents. Really it is surprising that farmers don't grow flowers instead of weeds, there are so many beautiful hardy annuals that might so easily be made to take the place of the Burdock and Plantain that reign supreme in so many door yards.

I never see such a yard, that I don't make a mental estimate of what it would cost to make a perfect Eden of it. Why, all my seeds were bought for sometning less than two dollars, but then I got them from Vick, and that makes a difference. His seeds have a habit of growing, and they are cheap too.

From one paper of Phlox Drummondii seed, I nised enough plants for a bed.

I am very fond of massing flowers, I have a bed of Pansies too, all from one paper of seed. I wish you could see it, it is a lovely little basket-bed made of cherry twigs; I have two other basket beds, one is of grape vines and the third of last years hop vines.

They are truly beautiful, and have afforded me so much enjoyment already, I am so happy while working at them, I think my cup of bliss will overflow when they are full of lovely blossoms, I fancy the round childish faces of the China Asters will be charming, leaning over the little rustic fence of hop vines. But when I begin to write or talk about my flower garden, I am as irrepressible as the vegitation of the Golden State, I don't know when to stop. Never mind, I wont stop, I'll just make believe to, and I'll go on like the novels in the newspapers, marked to be continued.

JENNY DARE.

BOUND VOLUMES FARMER

☞ Volumes of the "California Farmer" for

The last EIGHT YEARS, uniformly bound, can be had at the Farmer Office at $8 per Volume.

These Eight Volumes contain more useful matter touchin the practical workings of Agriculture as adapted to California Culture than any Book or Books Extant, as they comprise hundreds of Experiments, Letters and Essays upon the Culture of Cotton, Rice, Coffee and Tobacco; Grapes, Strawberries, and all other Fruits, with the Culture of Hops, Castor Beans, Flax, Hemp, &c. and the Whole series of Essay of L. Prevost on Silk Culture, from early beginning.

This set of Volumes would be a Library of itself and invaluable to the Cultivator of the Soil.

Orders sent to Farmer Office will be promptly attended to

OUR HOME INTEREST

APPRECIATING THE INJURIOUS EFFECT that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact and the probability that nearly this large sum of money will be increased each year), in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, which is sent East for investment in the purchase of Life Insurance Policies instead of being retained at homes to promote and foster the COMMERCIAL, MECHANICAL AND AGRICULTURAL interests of our State, a large number of our most prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL might be checked, and the citizens of this and the other States on the Pacific Coast be given an opportunity to invest their insurance on their lives in a reliable HOME INSTITUTION, *whose capital and assets will not be imperiled or lessened, effected by the change in values that will soonor or later be effected by a return to specie payments in the other States of the Union.* Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to every citizen of this State, who feel an interest in its prosperity, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing and supporting a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

Miscellany.

THE PARADISE OF OLD SAILORS.

...e river Thames is but a muddy and insignifi... stream, to have watered so great space in ... fiction and history. There is scarcely an ... book that does not, in some form, pay tri... to it. That fine old knight, Sir Roger de ..., sails down the Thames in the *Spectator*, ... makes several reflections on the greatness of ... nation, as "that one Englishman could ... Frenchmen; that the Thames was the ... river in Europe, and that London-bridge ... greater piece of work than any of the seven ... of the world." I am inclined to say amen ... Roger's opinion of London-bridge; it is one ... grey old structures, dotted over Eng... that seem to grow out of the earth, rather ... have been built upon it, by men's hands, ... might have come into being with the ... they stand on, that they might serve as ... to build from thereafter.

...e opaque water has often closed over

"One more unfortunate,
Rashly importunate,
Gone to her death,"

...e many sorrowful sights, results of the ...ed misery accumulating in London, as in ...y great city, but it bears on its surface, an ...ant and busy life, that gives small thought ...ything but its own daily cares.

...ty of gay little steamers, like the one which ...arded at the bridge, ply up and down the ... all day, carrying deck-loads of passengers, ...ere is no cabin accommodation. Londoners ... rain as easily as a flock of ducks; if they al... went in when it rained, they would *stay in* ... of their lives.

...'s take a long look at the "Traitor's Gate," ...h opens from the river, into the "Tower" ..., through which so many souls, innocent as ... as guilty, have passed to the tender mercies ... headsman; we pass over, without knowing ...at tremendous *bore*, the Thames Tunnel, and ...ually leave behind us the dingy walls and ...portable suburbs, that always hang over the ...s of rivers in a city.

...ter a while the river begins to clear its char... from the stains of man's imperfections, and ...right green grass slopes down on either bank ...eet its caresses.

...reenwich (or *Grinnidge* as the English call it) ...t find favor in all eyes that approach it from ...water. The Hospital rears a noble front close ... the river, and on an eminence beyond, rises ... Observatory where Longitude begins. A young ...lishman accompanied us, whom we had looked ... as a most valuable guide, but it came out as ...anded, that this was also his first visit to the ...ital. Knowing he could see it any time, he ...never seen it at all, like the old farmer whom ...ell found among the White Hills, who had al... lived within a mile of the "Old Man of the ...ntain," and had never cared to look towards

...e went first into a grand entrance hall of no ...t ag..., hung round with portraits of naval he...; the ceiling was one vast fresco on some my...egical subject, and I was content to believe it ...racle of art, rather than to break my neck in ...ing to examine its merits.

...is hall opens into the "Painted Chamber," ...ng one whole side covered with an allegorical ...re of those Hanoverian despots, the Georges; ...painter, not content with his name or mono... in the corner, has introduced a full length of ...elf, and is decidedly the finest looking man ...he group.

...are is exhibited in a glass case the coat and ..., with a bullet-hole in it, which Nelson wore ...n death found him at Trafalgar.

...Here too are the relics of Sir John Franklin's ...pedition, found among the Esquimaux—spoons ...forks, coins, a jack-knife, and a little book, a ...y of tract, which must have excited Esquimaux ...der. Nelson is made a sort of demigod by ...ures, busts and portraits, but the irredeemable ...ioness of his features, has defied the skill of eve... artist to soften them. It must be a cross griev... ...t to be borne by brethren of the brush and ...self, that so many heroes shock every rule of ... by personal defects. In future time, our own ...ncoln's rugged face will probably be a thorn in ...e flesh of our historical painters.

...One small room is wholly devoted to pictures of ...ships; in one, called his "immortality," he is ...ng carried to the upper world by angels, and ...ittle cherubs, who seem actually to puff over ...r labor; one of these holds a scroll with the ...ds, "England expects every man to do his du...," and the whole picture is a conglomeration of ...ships, tritons and water surrounding one heavy ...: one is surprised to find the name of Benja... West in the corner. It must have been one ...f the pictures that he painted to please the people ...d not himself.

...The chapel is rich in wood-carving, and marble ...ament, but the seats are nothing but wooden ...s, plain and cushionless; and I could not ...think this noble chapel might have spared a ...ed pillar or two, for the comfort of the aged ...n that come every day to those hard seats. Be...nd the pulpit is an immense picture of "St Paul ...wing off the viper," by Benjamin West, valued ...$40,000.

...After a long paved walk, bordered on either side ...f the freshest of green grass, we reached that ...on of the building, which was formerly a royal ...lace, but has now become the domestic part of ...e hospital. The great hall, once the ball-room ...Charles 2nd, that merry and worthless king,

"Who never said a foolish thing,
And never did a wise one,"

...is now divided into bedrooms for the old pension... each one has a room to himself, all opening ...on the common hall; the doors were open, dis...aying the little devices of their owners to make ...them homelike. All had small pictures, and some ...boasted great store of little nick-nacks, such as sailors love to collect. Several battered old men were lounging about the room, one spelling out the newspaper, others arranging their little museums; all were quiet and apparently happy.

There is nothing about the room to remind one of the time when virtue went clear out of fashion for want of patronage under the Stuarts. The walls must often have looked down on the neglected queen, poor Catharine of Braganza, whom the lowest of her subjects could not envy, least of all women in the eyes of her husband, who forced her to treat courteously, the unworthy creatures who had supplanted her.

Here, too, in the height of her glory, reigned the pretty orange-girl, Nell Gwin, who boasted herself, the "Protestant mistress;" perhaps she was more "sinned against than sinning," for she held her place even in the dying thoughts of the king.

At the end of this great room is a statue of the everlasting Nelson, and on the pedestal lay a small dirty bundle, which I supposed to have been overlooked in the daily putting-to-rights, but it proved to be a pair of stockings, worn by Nelson on some remarkable occasion. Methinks, if the shades of the departed ever revisit the earth, the ghost of Nelson will wear a bitter smile over the hero-worship, which could give a place of honor to his stockings and leave his beloved Lady Hamilton to die of want!

In a little ante-room is exhibited the battle of Trafalgar in miniature, but the room is more noteworthy as having furnished a hiding-place to Charles 2nd before he fled to France.

Thence we descended to the old men's smoking room, without which no sailor could be happy.—A long row of them were puffing away at their pipes, a sight for Parton and his "coming man." Long tables and benches scoured to snowy whiteness, were ranged along an immense dining-room. Half a dozen old cooks in white frocks were lounging about the kitchen, among the enormous ovens, and troughs for mixing bread and puddings. An old negro, the only one we met among the pensioners, rose to receive us and did the honors of his kitchen with a pompous affability never-to-be-reached by a white man. His hair and beard were pure white, as if he had stood uncovered in a snow storm and the flakes had changed to hair.

The great tanks for tea and cocoa sent up a pleasant odor, and a bowl was filled with tea for us to taste. We found it very good. The allowance to one brewing is 3½ lbs. for 400 men. I know not if this is the same computation on a large scale as that supposed to have been established by the first old maid, "Two teaspoonsful for each person and one for the teapot."

Most of the old veterans in the Hospital have lost a leg or an arm, or bear other honorable scars from their country's service. They must have served fourteen years in the navy, or have been wounded in an action with the enemy, before they can be admitted as pensioners. Many of them have wives outside and draw their rations to be shared with them.

It has long been a mooted point whether the wives should be included in the hospital charity, but nothing has been done about it, and it would seem to be an axiom in the study of womankind that no great number of them can live together in peace.

The quiet comfort of the hospital seems to renew the lease of life usually given to men. One lean and withered old fellow hopped after us on his wooden leg, through several rooms, chirping out like a superannuated cricket, that "he was 92 and his wife 88, and they never missed their rations."

Everywhere, on door-steps, and lying on benches in sunny spots, we came upon these battered old hulks, safely moored at last; an air of garrulous contentment hung about them all; only one thought he did not have tobacco enough; but who ever saw an old sailor who could be satisfied in that particular? The necessary order and discipline of so large an establishment cannot oppress them, because they have always been used to it on shipboard.

In the same grounds is a full-rigged ship of war, in which a school of boys, children of the pensioners, is taught the rules of the naval service.

Late in the afternoon we took steam again for London, full of admiration for this noble English charity. The English do a thing well, if they do it at all, and one cannot but cherish a warmer feeling toward a nation, which holds out such kindly arms of protection to its aged and feeble servants.—*Hours at Home.*

PAINTING ZINC.

A Difficulty is often experienced in causing oil-colors to adhere to sheet zinc. Boettger recommends the employment of a mordant, so to speak, of the following composition: One part of chloride of copper, one of nitrate of copper, and one of sal-ammoniac are to be dissolved in sixty-four parts of water, to which solution is to be added one part of commercial hydrochloric acid. The sheets of zinc are to be brushed over with this liquid, which gives them a deep black color; in the course of from twelve to twenty-four hours they become dry, and to their now dirty gray surface a coat of any oil color will firmly adhere. Some sheets of zinc prepared in this way and afterwards painted, have been found to entirely withstand all the atmospheric changes of winter and summer.

Good.—A newspaper published in the regions of Lakes Memphremagog and Winnepesaukee, says that the "fish in Lake Holleymunkemunk Maine, are said to be superior to those of either Lake Weeleyobacock or Moosetockmegantuck. Those of Chaubungogungamaugh were very fine, but they all got chocked to death in trying to tell where they lived."

An editor in Alabama had some iron ore dug from his land last week, made into iron, the iron into plows, and the plows running before the close of the week.

Miscellaneous.

A PRINCELY RESIDENCE IN THE COUNTRY FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

Is on the red cover of the packages

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

Corrected Weekly, by Editor Farmer.]

San Francisco, June 17.

The Grain Market is specially worthy the serious consideration of those who have most at stake—Our Farmers, and especially the Grain growers, for the condition of the Grain and Flour Market affects the general business of our State, more than any other of our great staple products, for

Grain is King now.

Some two weeks since there was a slight advance in Grain and Flour, but we then said it would be but temporary; and so it has proved, for we now have a full again and a dull market.

We notice that from several quarters come reports of *Rust* and *Smut* in the grain, and we hear of several parcels that have been cut for Hay on this account.—But these things should not have much weight, for when we consider the vastly extended area given to the grain crop this year, it must be expected that there will be many places where the land was *not properly prepared*, or it was *sowed too late*, or the seed was *not guarded by Blue stone*, or poor seed, or poor soil, and by new and inexperienced persons who planted on a speculation. All these things are to be considered, and it will be well for Grain growers wherever the smut or rust has appeared, for them to examine carefully all the surroundings and find out the cause possible. This, if sought out, will be of inestimable service in all future years.

It must be seen that the advices from abroad are such as not to hope for better prices for Breadstuffs at present. General report marks the last week and the present as the dullest of the season, and nothing can possibly give us a rising market of anything important, except some news from abroad of a peculiar character.

Old Wheat comes in freely, and some new, yet there are no export buyers of any amount.

The demand for Flour for export is nothing, and only two mills running in our city. Prices rule low, and prospects of large shipments from Oregon.

Barley is very dull, with heavy stocks of *old* barley on hand, while the *new* comes in freely.

Oats find a quicker and better demand than Barley and at much better prices.

Wool comes in freely and in good condition, and is mostly sorted and packed for export.

Produce of all other kinds are plentiful and at fair rates. See prices below.

v17-13 J. WHITNEY, JR., President.

Advertising Abroad!

WE CALL THE SPECIAL ATTENTION OF ALL Manufacturers, Agricultural Men, Nurserymen, Booksellers, and others having interests connected with the Pacific Coast, that now is the time to secure the business of this region by wisely ADVERTISING WITH US.

The full effects of the completion of that Grandest of all Human Enterprizes, the Pacific Railroad, must open a large and wonderfully increased business between the Eastern States and the Pacific Coast, and the who wisely advertise now, will be the first to secure it, and when once secured, they can hold on to it.

We therefore invite all those who have valuable Implements, Manufactures, Inventors, Books, Paintings, etc. to the Columns of the California Farmer, that will give them a wider circulation than any other medium they can adopt.

WARREN & CO., Eds. and Prop's.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure u are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Heplatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. And our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced, they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the vigor of the Stomach, Bowels, Brain, and the whole Nervous System should be vast and vital importance to human health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has a close connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate sympathy which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal nature, or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Bowels, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes, of which we afterwards ashamed; last, though not least, more than three fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing by pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful notion of having left undone something which ought to have been done. A slight dry cough is sometimes present. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, he complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts everybody. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are unequalled to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is aware of the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child at any time, however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked, even in cases of great violence, if a potent and prompt remedy be exhibited, so that they could be expelled, the loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy matter on the tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a craving sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently streaked with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by a dry cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual, providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water, in the morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten years, a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by

FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLane's Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

Eastern Correspondence.

LETTERS FROM AN OLD CALIFORNIAN AT THE EAST.

NUMBER ONE HUNDRED AND THREE.

NEW YORK, June 12, 1869.

California Farmer:

THE GREAT MEMORIAL CONCERT.

I did not attend the other meetings of the "Parepa," for the reason that the time for a public demonstration was allowed to pass, and one would be untimely.

The great event of the moment is the Memorial in honor of the late Charles C. B. Seymour, the most just and educated musical critic of New York, and the most distinguished artists volunteered their services for both the matinee and evening entertainments. The object of the memorial is, if possible, to place his widow, rendered by his untimely death, in comfortable circumstances.

I attended the concert last Saturday evening and enjoyed both the audience and performance. Among the people present the most noted and women in every walk of life. 'Parepa' was [illegible] of the evening, but she has not yet recovered the effects of sickness. She distinguished herself in the duet with Leroy, "Let the Bright [illegible]," and in Gounod's Ave Maria. In the latter composition she was assisted by S. B. Mills, [illegible] Carl Rosa, violinist, and Morgan, organist. The performance was therefore perfect.

[illegible] OF EDWIN BOOTH—ACADEMY OF DESIGN, &C

The marriage of Edwin Booth has disappointed many young ladies. His matinees will not, therefore, present such a constellation of beauties, unless they are determined to make a "pet" of him, [illegible] single. All the old bachelors think he made a wise selection.

The exhibition of the Academy of Design this year is a failure. It has been very severely criticised, and I think deserves to be spoken of [illegible].

[illegible]'s new Niagara, on exhibition at Goupil's [illegible] picture. I have seated myself before it and allowed my mind to wander away from the [illegible] and bustle outside, to the scene so admirably mirrored on canvas. But I am provoked [illegible] disgust at the snobbishness which insists upon the destruction of all the chromo plates over one hundred subscription copies. I should be ashamed as an American and a lover of Art to own [illegible] the chromos under the circumstances.

CALIFORNIANS IN NEW YORK.

How much I have enjoyed the recent visit of [illegible] old friends. I recollect with intense pleasure the delightful gatherings which used to make [illegible] so attractive in early days. We were all [illegible] up with the State; our interests were all [illegible] in common; we were all compelled to [illegible] ourselves in society to exhibit our most attractive phases of character, and an evening party [illegible] scenes of any prominent citizen was an [illegible] enjoyed. To meet Californian friends [illegible] New York is the next best thing, to me, to a [illegible] on the shores of the Pacific.

EARLY DAYS AND EARLY PIONEERS.

[illegible] thank you for your kind words accompanying my 100th letter. The friendship that was formed in the Rassette House, when Bartlett, Kingsberry, Dr. Veitch, Grayson, Judge Pratt, yourself, and your correspondent used to discuss topics of interest to California will never be forgotten. I recollect well your earnest enthusiasm that California would be something more than a producer of gold for the benefit of her luxurious sisters, and your faithful and industrious efforts to carry out your plans. You were a Pioneer in the work and I hope that the list of subscribers to the California FARMER will yet show, if it has not already done so, that your work has been appreciated and rewarded as it ought to be by a generous patronage. It is sad to recall the names of those who used to meet around the cheerful fire in the back parlor—how many have gone to their rest. The seasons of adversity and prosperity have rolled over us all. We have each the memory of sunshiny days and the sad recollection of clouds. May we, when the time comes, rejoice that we have been faithful to the principles that we used to delight in, and know that the Master will say to us, "Well done good and faithful servants."

WORKERS AND DRONES.

There used to be, and doubtless there are yet, in California too many drones; but there are less, I am sure, even now, than can be found in any community in the Eastern States. It is a pleasant thought that we have all, even most of us, who have been prosperous, exhibited the same industry that we used to speak so warmly of in days of yore. It is a pleasure for me to keep up my correspondence with the FARMER. It links me to very happy memories, and I enjoy it the more because day by day almost I can see that California is becoming all that "dreamers" used to predict.

M. A. S.

DISTINGUISHED VISITORS.

Our city is now being visited by many citizens of the Eastern slope, and among them men high in office under our Government,

The *Alta* of yesterday reports as follows:

ARRIVAL OF THE COMMITTEE ON WAYS AND MEANS AND OTHERS.

The Congregational Committe on Ways and Means arrived last night, by the Sacramento boat, from the East, and took rooms at the Cosmopolitan Hotel. The guests were met at the wharf by several citizens, who escorted them to the quarters provided. Following is a list of the Committee and accompanying parties.

Hon. Samuel Hooper, Boston, Mass., Temporary Chairman.
Hon. W. B. Allison, Iowa.
Hon. W. D. Kelley, Penn.
Hon. Austin Blair, Michigan.
Hon. Dennis McCarthy, Syracuse, N. Y.
Hon. Horace Maynard, Tenn.
Hon. James Brooks, New York City.
Hon. S. S. Marshall, Illinois.
George A. Bassett, Secretary of the Committee.
Francis H. Smith, Official Stenographic Reporter of the House, and Correspondent of the N. Y. *Herald*.
J. K. Moorehead, of Penn.
J. S. Samson, Sergeat-at-Arms of the House (who, togsther with Lessrs. Bassett and Smith, accompanihs the committe in an official capacity.
Hon. S. B. Axtell, Cala.
Hon. A. C. Bakewell, Pittsburg, Penn.
E. C. Bartlett, Washington.
M. Harney, Philadelphia.
W. H. Smith, Washington.
Miss Lucy McCarthy, New York City.
Miss Virginia Brooks, New York City.
Miss Kate Snook, Michigan.

[To this announcement, we shall soon add Hon. Wm. H Seward, and many other distinguished names.—Ed. Farmer.

CINDERS FROM ENGINES ON RAILROADS.

While our Railroad managers are doing so much to facilitate traveling and business communication in all directions over our country, would it not be a matter of some great importance to the comfort of travelers to have some invention whereby the *cinders from the engine* could be prevented from filling the cars, filling the eyes of travelers, and burning dresses, or compelling them to sit with closed windows at the *risk* of almost suffocation in warm weather.

Whoever will invent a proper and safe spark-catcher and consumer, one that our Railroad men will use, will not only immortalize themselves and make a fortune, but will receive the gratitude of the present and all future generations.

PALACE CARS ON THE PACIFIC RAILROAD.—This is the great theme now, everybody wishes a ride in the Palace Cars, (who wouldn't?)—We notice that a slight mishap occurred to the train that conveyed many distinguished guests from Sacramento to last Saturday, by running off the track. Among those who were on a visit East, was the family of Col. A. P. Stanford, his son received a slight injury; we are glad to know it was not serious, and that the other members of the family were not injured.

INSECTS UPON FRUIT TREES, VINES, ETC.

We notice as we travel over the State, visiting the various sections of it, that in various parts there is more or less injury inflicted upon Trees, Vines, Plants, etc. everywhere, and that each year there appears some new insect on this Coast, or new disease with us, or rather an *old disease* from other States, that seems to be imported into our midst.

The question arises, why these diseases, and why such a flood of insects now, that have not heretofore been known among us?

We have carefully examined the subject and have also viewed the matter in every place where we have found these diseases or insects, and have come to the only conclusion that is a safe one—that as the *human body* is a tree or plant, and that disease comes not to *that* when it is carefully attended to, properly *fed*, and wisely *nourished* and *kept clean* (for cleanliness is Godliness,) so disease or insects or injurious ailments of any kind will not come upon *Trees, Plants or Vines* that come from *healthy stock* and *pure seed*, or that are placed in *good ground* and *properly cultivated* and *kept clean*.

We are, however, free to admit, that we know that some of the evils, like insects or worms will pass from orchard to orchard, when *near each other*, but the general law will hold good, that where the *stock is healthy*, the *seed pure*, the *soil sweet, deeply and finely cultivated*, and noxious weeds kept from the grounds and surroundings, and cleanliness and a pure air can be inhaled by the Tree, Plant, Shrub or Vine, there, we are certain, to find the greatest success, and always to find Health, Strength and Beauty, and to inhale the sweetness of pure blossoms and see rich and splendid fruit, or perfection in all the other products of the earth; for when these *wise duties* are *well performed* it must always be so.

Medical men tell us that *disease* comes only from the *broken law* of our Physical Nature, or by constitutions inherited from diseased Parents, and our Divines tell us that *Moral corruption and Sin* comes from broken moral laws and sin against God; so we hold that the diseases and ailments upon Trees, Plants, Vines, etc. comes only from neglect to use proper means and those preventives we have before noticed.

We have just visited several orchards in San Jose and Santa Clara and other places, and we notice the *Slug* is making havoc upon *Pear trees*, that unless quickly remedied, will destroy the fruit now or the trees, for *this Slug destroys* the leaves, (the leaves are the lungs of the trees;) these gone the fruit must drop. It is important that immediate attention be given to this.

We notice, also, the *Scale* infests many trees.—We notice these on the *Olive*, the *Plum*, and several other trees, particularly in Gardens where ornamental trees such as the *Oleander, Accacia, Althea* and similar trees and shrubs are growing, and as these trees and plants are too frequently allowed to grow uncultivated with *grass around the roots*, or in hard ground, the *bark of the trees* become diseased and covered with moss or other fungus, and soon the *Scale* comes.

This Scale requires care to notice; sometimes it is the *color of the bark*, sometimes black, and the size of half a small pea, closely adhering to the bark, requiring a knife or a piece of hard wood to remove them. The whole tree must be carefully examined and every one removed by hand, or a *very stiff brush*. If by hand, collect and burn them, or if too numerous, a stiff shoe brush, and with strong *whale-oil soap washing* giving a thorough cleansing can save the tree. Other trees and many plants will be found to be infected when near by this bark *leach or blood-sucker*.

The remedy for the *Pear Slug* is the *Ground Gypsum*, which can now be had in our city of C. Janson, Esq. (See Advertisement,) at a low rate.

We noticed the large and fine Pear orchard of J. T. Adams, Esq., of San Jose, badly infected with this Slug; many of the trees appeared as if a *fire had swept over them*.

We find the Aphis and the Aphides at work on the Grape vines, and many fine arbors in Gardens look like a fire-blighted screen. The Mildew also in low damp places leaves its blue mark, destroying beauty.

For these evils, the *Sulphur* thrown upon the vines is a complete remedy if early applied, before growth is stopped. We recommend the application of Sulphur by means of a *pair of bellows*, to which is attached a tin box at the tube, holding a quart, with perforations like a pepper box, and with this a man can go over *acres a day*, and perform a certain cure.

We hope our *Pear growers* will look to their orchards quickly now, and apply this *only remedy* in season, else the Slug of this year will deposit its eggs for the next, and the *hundreds* now, will be *millions* then.

The way to use this ground Gypsum, (it is like flour,) is to scatter it over the whole tree with the hand freely. It will not only *kill the Slug* but benefit the tree, for fog, dew and moisture will cause the leaf to absorb the *nutritious* properties of the Gypsum, and to receive nourishment; and what falls on the soil will very greatly increase its fertility also, as Gypsum will be found to be one of the *best fertilizers* for our *dry climate* that can possibly be used.

The Roses in our gardens we notice also have the *Rose Slug* to some extent. The sure remedy for these is the whale-oil soap suds, put upon the bushes at night with a garden syringe forcibly and the bushes syringed in the morning early with pure water.

We have thus given large space to this subject, believing it to be of vital moment now, when our orchards and vineyards are about to be *despoiled of their beauty of foliage*, the result of which must *inevitably* be, the *loss of the fruit*.

We feel sad when we see these enemies of beauty and worth at work, for they remind us very forcibly of the *Political and Sectarian Vampyres and Money getting Schemers, and Speculators*, that now swarm over our State, casting a mildew and blight over much that was fair and prosperous, but leaving Pecuniary disease, Political and Moral death in their train, and casting a cloud over much that was so fair and beautiful in this otherwise glorious State of ours, the Great Mission ground for Human Progress.

You that have Orchards, Gardens and Vineyards, look to them now, and remove these *Insects, Slugs* and *Worms* from off the outer leaf and your labors shall save the fruit for your own refreshing; and you that have now peace of mind, contentment, and a comfortable independence, keep clear of the other vampyres we have named and you will then in Joy, Peace and happy Contentment,

"Sit under your own Vine and Fig Tree,
With none to molest or make you afraid."

Just as we had prepared the above article on Insect Depredation, we received a letter from St. George, Utah, with the "Rio Virgin Times" containing the following which we publish and reply to:

AN ENEMY TO THE GRAPES.

We are sorry to announce that an Enemy to our grape crops, very disagreeable and more or less distructive has appeared.

For the last two years, in the month of June vineyardists have doubtless noticed upon the bunch of grapes or the tendrils, a frothy bit of moisture resembling a spittle, which increases and finally in July assumes the consistence and appearance of the white of an egg beaten to froth, and containing from one to a dozen insects resembling the early appearance of the Potato bug; but what they finally grow to be we have been unable to discover. The insects finally in August disappear and the nasty frothy excrescence, which by this time has spoiled the cluster, dries up leaving most of the berries entire, but too nasty to use without washing.

Since the appearance of this nuisance, each year it has grown more and more common, until now they are only common, scarce a vine escaping and on some a dozen whitish specks of moisture may be seen—and upon one bunch we recently counted ten.

Every care should be taken to discover the cause, or origin this new to us enemy of the grape, and we earnestly ask grape growers what they know of this plague. Perhaps the California Farmer can enlighten the public upon this question.

This enemy by the discription we beleive to be the "Mealy bug," it attaches itself to the joints of trees, plants and vines, and then spreads all over it eating out its vitality.

The remedy for this, the best we know, is a hard syringing with *Whale Oil Soap Suds*, one pound to the pail full and so in proportion to the quantity wanted. Syringe at night with suds and in the morning with clean water; washings every three days, will remedy the evil.

We would also advise the free use of *Sulphur*, as advised in our Editorial above; we advise besides, a trial of the ground *Gypsum*, this should be administered in the morning when the dew is on the vines.

We hope our Cultivators in Utah, will report to us their results if they make the trial.

WHERE TO ADVERTISE.—The advantage of advertising in the *Farmer* can be proved in many cases where valuable Real Estates are for sale, or wanted.

We advertised a few weeks since, an estate for sale in Napa, within ten days there were two applicants direct from the Farmer, and the Estate was sold to one of these purchasers, advantageously and profitably. While from other advertisements and agents, not a word or a customer; so much for wisely selecting *where* to advertise.

THE MERCANTILE LIBRARY.

This Noble Institution has made its appeal to the sympathies and interests of our community, and we trust the appeal will not be in vain.

By reference to our columns the card of the President can be read; and strong appeals are made from all quarters, and it should not be doubted for a moment but that the Salvation of this Institution will be accomplished, and the Library placed upon a firm and prosperous basis.

A strong friend of the Library, speaking through Daily Press says, and forcibly too:

The urgent appeal of the Trustees of the Mercantile Library Association has now been several days before the public, and the burden of debt is even heavier. Who will respond to this immergency? There is, it is true, a general simmering in the public mind. Over one hundred have become subscribing members thus far during the month. Mr. Barnes' unique plan has also ripened into a definite announcement. These are all very well so far, but a vast deal more must be speedily done.

While our solid men are slowly combining for those grand efforts which shall place the Association where it deserves to stand, could not a large number of firms come speedily forward and make their clerks and employes members? Some have done it already. It needs but a moments reflection to convince any business man, that he can in this manner indicate his appreciation of faithful clerks, attach employes to his interests, and prevent perhaps, much injury to the public and to himself by inducing them to spend their spare hours at the Library, or in reading from its rich store of books. The great advantages of membership are appparent to any one on visiting the rooms. The very atmosphere of books, and tastily furnished halls is elevating. Beauty, order, harmony and intelligence combined, exert great power over the understanding and the heart. It is worth while for a person to spend ten minutes in the Library, even if he reads nothing nor selects a book. If one did it every day he would soon find himself more gentle and in communion with a larger and sweeter world.

The many distinguished persons who are now here or will be here soon on a visit to our far-famed coast, will find nothing that will so much please and astonish them as this Library. It surpasses all structures of the kind in the country. It will be a great dishonor to our citizens if they allow it to fail. The trustees have done but their duty in providing it, and if the citizens do not sustain them it is their own fault. And let it be remembered that it is not simply a loss of money over which the public is to be concerned, but over a loss of character, which will be the deepest disaster that can befall the people. Let no citizen who can, fail to aid this object in some manner.

A very *Patriotic* plan has been conceived of, by which great good can result pecuniarily to the Library, from a public Entertainment, which is to given next Wednesday at the California Theatre, and is now announced as follows:

BENEFIT OF THE MERCANTILE LIBRARY.

An entertainment will be given at the California Theatre next Wednesday evening, in aid of of the Mercantile Library, which will attract more attention than anything in the theatrical line since the settlement of California; the popular drama entitled "Rosedale" will be presented, with the well known lawyer, W. H. L. Barnes Esq., as Elliot Gray, the hero of the piece. The condition on which Mr. Barnes consented to undertake the character was, that a certain sum should be realized by the literary association of which he is Vice President, and to attain that end the seats will be put up at auction on Saturday by Maurice Dore & Co., for competition among those who wish to obtain choice places by paying a premium, the ordinary prices beidg fixed at $5 for that evening for the Dress Circle, $2½ for the Family Circle, and $1 for the Gallery.

We sincerely trust that the result of this *Festival for the Library*, (for so we would call it) will be completely successful and give $10,000 to $15,000 in aid of so good a cause.

LITERATURE AND POLITICS.

—The Yale *Courant* publishes a list of distinguished alumni of Harvard College, who have held federal or State offices. Besides those of the preconstitutioners, are two presidents, two vice presidents, eight cabinet ministers, fourteen foreign ministers, twenty-eight Senators, three judges of the United States Supreme Court, sixteen judges of the United States District Court, ten Governors of Massachusetts, nine Governors of other States, nine chief justices of Massachusetts, eleven chief justices of other States, twenty associate justices of the Supreme Court of Massachusetts, and twenty associate justices of the Supreme Courts of other States.

[Thus we see that Literature bows down to the Gods of the Political Maelstrom.—ED. FARMER.]

A wag suggests that a suitable opening for many city choirs would be "O Lord have mercy on us miserable singers."

Agriculture.

GREEN THINGS GROWING.

Oh! the green things growing! the green things growing!
The fresh, sweet smell of the green things growing!
I would like to live, whether I laugh or grieve,
To watch the happy life of the green things growing!

Oh! the fluttering and pattering of the green things growing!
Talking each to each when no man's knowing;
In the wonderful white of the wierd moonlight,
Or the gray dreamy dawn when the cocks are crowing.

I love, I love them so, the green things growing!
And I think that they love me, without false showing;
For by many a tender touch they comfort me so much,
With the mute, mute comfort of green things growing.

And in the full wreath of their blossoms' growing,
Ten for one I take they're on me bestowing.
Ah! I should like to see, if God's will it might be,
Many, many a summer of my green things growing.

But if I must be gathered for the angels' sowing—
Sleep out of sight awhile—like the green things growing,
Though earth to earth return, I think I shall not mourn,
If I may only change into green things growing!

—*Author of "JoAn Halifax."*

TEA CULTURE IN AMERICA.

The introduction of the tea plant into the United States was attempted in 1848 by Doctor Junius Smith, of South Carolina, who imported plants from China, of from five to seven years' growth — He stocked a small plantation with them in the mountainous parts of that State, where they were exposed without injury to severe frosts during the Winter, and snow which at times covered the ground to the depth of eight or nine inches. His experiments continued four years, and showed that the climate and soil were well adapted to the cultivation of tea, but the difficulty of procuring sufficiently experienced labor, prevented the culture from securing any important results. Under the new regime of freedom in the South, the cultivation of the tea plant is again attempted. Ten miles from Knoxville, Tennessee, tea is now grown, and it is said that in East Tennessee tea drinkers can readily raise their own tea with very little cost and trouble. The plant is described as a deep evergreen shrub, growing about five feet high, hardy, and needing no protection from the frost. Whether the quality of the tea grown there is equal to the imported article is not yet announced, but the fact of the adaptation of the climate and a portion of the soil of the Southern States to its production is apparent. The range of the tea plant in China extends between latitude 24 degrees to 35 degrees North, which parallels include most of Southern and all of the Southwestern States. The soil best adapted to the growth of the tea plant is said to be a light loam, more or less stony, containing vegetable matter, which while retaining moisture is at the same time well drained. This kind of soil is found in large sections of the South and Southwest.

In cultivating tea, the chief difficulty that has hitherto existed has been in procuring suitable labor, but that can be obviated by employing the Chinese, so numerous on the Pacific Slope, many of whom have been in their own country successful tea growers. They are spreading over sections of this country where their skill and labor might be profitably employed in a direction so familiar to them. In China, tea of an average quality is sold at from eight to nine cents a pound. Of course, with our different scale of prices for labor, we could not expect to produce it for anything like so small a sum, yet when we consider the heavy expense of packing, export and import duties, and transportation, in addition to the profits accruing to each one through whose hands the tea must pass, making its selling price many times the original cost in China, it would be an advantage to get our supply of tea from our country. The cultivation of the plant is regarded as a less troublesome matter than the manipulating process to which the leaves are subjected after gathering.—Three crops are gathered in a single season. The drying, rolling, and curling process, it is supposed, can only be successfully accomplished by the trained Chinaman, but it would not be long before machinery would be made to perform a large part of the labor, which in China is entirely done by hand. Machinery for drying and curing the leaves of the plant has been successfully operated in this city. The manufacture of silk by the Chinese emigrants in California has already commenced, and their introduction of successful tea culture in America may repay the country for giving them a home.—*Phila. Ledger.*

VALUABLE ORCHARDS FOR SALE.

We would invite the special attention of capitalists to the *Two Very Extensive Orchards* advertised in our Journal.

Aside from the large and certain income of these orchards yearly, the lands are certainly rising in value, and they must become a very profitable investment.

To any capitalist who has any knowledge of Fruits—any love of the business—here is a fine opening to make a great fortune in shipping Fruits over the Rail Road, East. We can give them important information on the subject.

Farmers are like fowls—neither will get full crops without industry.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Stee. Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

—:o:—

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULARS

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all e trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S

SELF-RAKING REAPER.

This Machine stands at Front of all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can sa ney by purchasing one of these. Also the CAY CHIEF COMBINATION REAPER AND MO , too well known to need any elaborate descri v here.

SAN FRANCISCO.

TRUE'S

IMPROVED

POTATO PLANTER.

This is, undoubtedly, one o the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow; cu's the potato in such sized slices as the farmer may prefer; drops those pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its own r for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

WARREN & CO.,

320 Clay street, up stairs.

AVERY

TUBE WELL

COMPLETE FOR USE

THE TUBE WELL IS FORMED BY DRIVING prepared Iron Piping into the ground with a sledge Although of comparatively recent invention, these Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well, all surface water, dirt etc being excluded. The Tubing is coupled together in lengths of five or six feet, as they are being driven into the earth. The valves are then dropp d in and the pump screwed down upon the top.

Force and Lift Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. For circulars, etc., address Postoffice Box, 17. URRIG & DEWEY.
Office at 318, Pine street. 31 10.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the articles they have to sell are wanted by those who have delayed to the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured themselves the very best by taking "time by the forelock," and those late advertisers lose a large amount of trade by this delay.

Agricultural Implements, Trees, Seeds, and all other goods should be advertised in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their trade largely increased by giving attention to this matter, and particularly in everything appertaining to Agriculture and Horticulture.

Newspapers and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* the life of trade."

To Take Charge of a Place

A young man with some capital (from $500 to $1,000) can hear of a good opportunity to take charge of a place and have an interest if he desires.

A person somewhat acquainted with the business is preferred.

No one but a steady and industrious young man need apply.

The applicant must be able and willing to work, have a love and taste for rural life. To such a one a good chance can be given.

THE VINE IN EUROPE.

OBSERVATIONS BY AN AMERICAN VINE GROWER.

Letter Number Three.

TYROL.

The culture of the vine in the Tyrol differs essentially from that pursued in any other region in Europe that I visited.

As you leave the fertile plains of Italy and commence that grand ascent which culminates in the stupendous pass of the Tyrolese Alps, you follow along the banks of a river, which is fed by the glaciers of these magnificent mountains, the valley of which as well as the adjacent mountain sides, are highly cultivated; and here often in high altitudes the vine flourishes, and most luxuriantly too.

It is planted in drills a few inches apart, from eight to twelve usually, and the drills set very far apart, often as far as sixteen to twenty feet, and rarely less than that distance.

The roots of the vine in the drills are raised up-on the crown or summit of a mound or hill, which is piled up at least two feet higher than the surface of the ground, on the exterior surface of the vineyard.

The training of the vine is most peculiar. A trellis is constructed on both sides of the plant and along the drills, which at the root of the plant is not more than two feet from the ground, and which is raised up on the sides so that at its outer edge it is at least five, and sometimes eight, feet high, and extending from the vine on either side about eight feet.

The vine is trained laterally on either and both sides along this trellis, which it entirely covers, by the vines of the plants being so close together in the drills.

The vineyard resembles rows of the inverted roofs of houses all covered with the vine, and the fruit is suspended from beneath these ascending trellises.

The culture was universally of the highest and best character. The earth was always thoroughly spaded, and the vineyards were kept scrupulously clean and entirely free from weeds.

The culture was, from the nature of the case and from necessity, done wholly by hand, and as the laborer could not stand erect under this peculiar overhanging or reclining trellis, he always stooped and worked it, carefully going over with his grape hoe the whole surface of the soil, and the vine itself to the extreme outside of the vine.

This method of culture, planting, and training, was throughout all the Tyrol, both on the Italian side and also on the Austrian side, and I was forcibly impressed with its merit and excellence, and the fruit itself properly cultivated in this method must of necessity be of the finest quality; quite close to the ground, easy of being picked, pruned, tended, and cared for, and the method worthy of study and imitation anywhere with a vine that is a strong grower, like our own American varieties.

The most striking feature of the vine itself in these districts is its magnificent and luxuriant growth. I did not at first know the cause, but soon came to understand it. The secret lay in copious and generous irrigation, which is in universal use by the Tyrolese farmer, not alone for his vineyards, but for all his crops. It will be remembered that through every considerable valley of this country there usually descends a rapid, mountain-formed river, while streams of more or less size and strength, thus supplied, come into it from every tributary ravine and valley. No farms or cultivated places are found except those along the bank of a rapid torrent or a rushing swift river. And all these tributary streams, as well as in the river itself, the current is usually rapid, and in many of the smaller streams exceedingly swift.—These rivers and streams, all along, and especially where the current was strongest, were placed enormously high skeleton water wheels that were turned by the current itself, and which raised in buckets the water from the river to the top of the wheel, and then emptied it into troughs or conductors which led it into a grand reservoir from which, by a series of troughs and pipes, it was conducted over every square foot of the farm, or vineyard, at the pleasure of the proprietor.

The altitude of this wheel was usually higher than the surface of the farm or vineyard, and as the wheel was ever turning and the water always flowing, there was no limit to the supply.

With this bountiful irrigation, as may well be supposed, a luxuriance of growth of all products obtained here and especially of the vine. And this system of irrigation was quite universal, as I saw no considerable farm or proprietor without it.

The wine of the Tyrol is excellent, and although ranked as common wine it rarely is found in any market, and is as a rule consumed in the country.

A very large amount is both produced and consumed, and it is of much better quality than the Italian wines, and though inexpensive, would command remunerative prices if an excess were produced over their home consumption, which, as it is generally drank, is very great.

Resembling Switzerland in its externals, the Tyrol, although far south upon the map of Europe, is, as a whole, and so far as its vineyard culture is concerned, confined to high altitudes, along the sides of the mountains, and in the valleys of this Austrian Switzerland.

The people are far more advanced in intelligence and force of character than in some of the other Austrian provinces. It is the same race that defied so long Napoleon I. after the subjugation of Austria, and who gained their liberties under Andreas Hofer (the William Tell of the Tyrol,) that now plant and care for the vine and people and cultivate the hills and valley of the almost inaccessible passes of the Tyrolese mountains. The quaint dress of the women, and the ornamented jackets and feathered hats of the men, peculiar to the Tyrol, are now almost the only distinctive costumes of the peasantry remaining in Europe, and their wines are really much better than they are usually considered, mainly because they have been hitherto so little known and rarely drank out of the country.

Their skies would be almost Italian if their country was a plain, and the vine is frequently grown at the base of a mountain whose heights will be crowned by the glacier which never melts; and the rain which falls on the vine in midsummer in a climate almost tropical rests frequently in snow on the summit of the mountain.

You may stand in the vineyards in the dog-days, when the grapes are ripening, and see the snow and ice above your head on the mountain top, which never melts, and which seems strange, indeed, to the American or Englishman, this union of the Torrid and Frigid Zones at the same time upon the same estate; for the Tyrolese can ice his claret in midsummer from a store which is inexhaustible, from his own mountain.

CLARK BELL.

TROPICAL FRUIT.—We would call the attention of our readers, to the notice in this weeks' issue, of A. Giorgiani, who is largely engaged in the Importation and Sale of Tropical Fruits; on Washington streeet near the Post Office. Mr. Georgiani has been engaged now nearly thirty years in the *Foreign Fruit Trade*, abroad and in this State and has made himself familiar with it.

Mr. Giorgiani is now one of the largest dealers in our city in the fruit trade, and is always prepared to offer the Choicest and Best Fruits, to be had on the very best terms—dealers in the country would well to call on him when in the city.

GREAT EXPOSITION OF TEXTILE FABRICS

AT CINCINNATTI, AUGUST, 1869. UNDER THE AUSPICES OF THE WOOLEN MANUFACTURERS' ASSOCIATION OF THE NORTH WEST.

Office of the Executive Committee,
CINCINNATTI, May 8, 1869.

To the Ed. *Cal. Farmer*:

Dear Sir,

An Exposition of Textile Fabrics will be held in this city, August 3, 4, 5, 6, 7th, 1869. This being a public enterprise in which the interests of a leading branch of industry are involved, you are respectfully requested to call attention to this movement in the editorial colums of your journal.

Some facts relative to the history of the Association, the work it has done, statistics of the manufacturing interest, and an outline of the plan of operations are, herewith appended.

For the Committee.

JAS. M. CLARK, Sec'y.

A general meeting of those interrested in the Great Exposition of woolen, cotton, silk, and other textile fabrics, to be held in this city on the first four days of August next, was held yesterday afternoon, April 5th, in Room No. 11 of the Burnett house.

A large Executive Committee was pointed to prepare and lay out the work for the convention. Committees on Finance, General Arrangements, Invitation, Reception, Transportation, and Premiums, were appointed and the following resolutions were adopted to carry out this very Important Convention.

"*Resolved*, That having a deep interest in the prosperity of our city, and the growth of Western enterprises, we hereby cordially invite the manufacturers of textile fabrics in the Southwest and Northwest, to hold an exposition of their productions in our city during the month of August next.

"We fully realize at this early day that our work is to be one of great labor but having full confidence in the business men of our community, we shall exert ourselves to make this an occasion worthy of our city and of the vast interests to be represented

"*Resolved*, That our invitation is extended alike to manufacturers of cotton, wool, flax, hemp, and silk, and also growers of wool and cotton.

"*Resolved*, That the Committee of General Arrangements is hereby instructed to procure a suitable room for regular business meeting, which shall be known as the office of the Exposition Committee' where regular meetings shall be held every Friday afternoon at 2½ o'clock.

"*Resolved*, That the Finance Committee is hereby instructed to continue its efforts until the subscriptions to the funds of the Exposition shall reach the sum of $10,000.

"*Resolved*, That all shipments of merchandise be marked with the owners name in full, and also marked, 'For the Cincinnatti Exposition, care of James H. Laws & Co.'"

It will be seen by the above that the executive committee has already arranged matters in good shape, and that, from the names and character of the gentlemen selected for the different committees vigorous action may be expected. Without donbt the contemplated exposition will be one of the most important, and bring to our city one of the largest crowds of people ever assembled here.

[We have recieved important information relative to this Exposition, and shall give more light upon it in our next. An Exhibition of this importance is worthy the attention of the Growers of Textile fabrics and our Manufacturers, and is to be hoped that California will take an interest and be Represented in both the Departments, and in each variety of manufactures, for California is now taking rank among the Manufacturing States of our Union.—Ed Farmer.]

New Advertisements.

ORNAMENTAL TREES.

The Oregon Fir Tree Association.

We are now prepared to Ship to all parts of the country, all the handsome varieties of the Fir Tree that so abound in Oregon. The trade of the Association is at present promising much greater success, especially on the Pacific Coast, than they have formerly anticipated. The nurseries of California do not seem to have adopted the Oregon Fir, only as we have recently taken some of their orders from them.

We find them to possess an attraction as an ornamental tree rarely equaled. The Yellow Pine and the Balsam Fir are the most popular varieties; the Yellow Pine the most hardy—thriving in almost any soil or climate. Our trade with the East is promising; our trees have arrived there in good condition and are growing.

The Association is prepared to supply a large demand for Trees, from six inches to four feet in length, but we cannot fill orders for any more than four feet.

Efficient Agents wanted in all parts of the country, to whom we will extend the most promising advantages. We shall be glad to receive a communication from any one who might desire such an agency, on the most paying terms, or from any one who may desire our Trees.

Orders for Trees to be set in the fall should reach us as early as October, and those for the spring supply as early as February.

We Ship none but parfect and healthy Trees.

All communications should be addressed:

REV. C. W. TODD,
Oregon City, Oregon.

LAKE VINEYARD WINE COMPANY.

The undetsigned, hitherto doing business under the name and style of B. D. WILSON & CO., have this day changed their firm name, and will hereafter continue their business as Wine Growers and Merchants, under the name and style of

"The Lake Vineyard Wine Company."

J. De BARTH HORB,
CARLTON CURTIS.

We desire to call the attention of the to our large stock of the celebrated LAKE AND MOUND VINEYARD Wines, and choice assortment of Wines and Brandies from the best Vineyards of California. These wines, bearing our trade mark on package, label, and seal, we guarantee of uniform good quality, inferior to none, and ready for safe shipment to any part of the world.

Orders for the Atlantic States will be filled by our New York House from their depot, at No. 45 Murray Street, New York.

LELAND STANFORD, President.
H. F. HASTINGS, Vice President.
JOS. CRACKBON, Secretary.
J. M. GREY, M. D., Physician-in-Chief.
SCHREIBER & HOWELL, General Agents.

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,

Valuable Patents FOR SALE

We invite the attention of energetic Mechanics' to several very

VALUABLE INVENTIONS

for which we hold the

PATENT RIGHT

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a hand o return for labor and capital can be made from.

WARREN & CO.

VALUABLE PLANTS FOR SALE

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

tf *Farmer* Office.

Wanted.

A Gentleman residing a few miles from the city, is anxious to meet with some one, who can Superintend the construction of Trout Ponds, or give information as to the best mode of constructing Fish Ponds. Such parties will be amply compensated for all trouble and knowledge. Address, B. L. B., FARMER OFFICE.

P. S.—A personal interview would be preferred at the Farmer Office.

ORANGE SEED.

THOSE WHO WISH TO RAISE TREES FOR [AN *ORANGE PLANTATION*,
Can obtain SUPERIOR SEED at the
[FARMER OFFICE.

Miscellaneous.

LANDS

FOR SALE OR TO LEASE.

IN NAPA VALLEY

IN THE VICINITY OF CALISTOGA.

ON THE

LINE OF THE RAIL ROAD

Within three and a half hours from San Francisso.

THE UNDERSIGNED WI LEASE FROM TEN to Thirty Acres of CHOICE VINEYARD LANDS, to competent parties, for the term of Four Years, they planting the same in Vines and cultivating them during the said term. At the expiration of the term.

ONE HALF OF THE VINEYARD

Will be deeded the Lessor for services.

ALSO, TO LEASE,

Four Thousand Three Hundred

Acres of Grazing and Grain Land, eight miles from Marysville, on the Yuba river. 2,000 acres under fence. on very advantages terms.

—ALSO—

A farm of three thousand Acre Grazing Lands,

Twenty-five miles from Sacramento City, on the Feather River, 1,500 acres under fence.

—ALSO—

A FARM IN NAPA VALLEY

Of 260 acres, on the most reasonable terms and credit.

Small tracts for Residences

At and near Calistoga, for sale—One two, and three years credit.

A Young Man Wanted!

A live Young Man wanted—one who wishes to *do his duty*, and by his true merit work his way up, and become of value to himself and his employer.

To such a young man, who can bring good recommendations a good situation will be offered in this office.

Apply only between the hours of 8 and 9 o'clock, A. M., and 5 and 6 o'clock, P. M., in the Printing Department of the FARMER OFFICE.

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish *collections* of choice plants, can buy them in quantities at a very low rate, if they visit the *Garden Corner of Mason and Pacific Street*, in this city, or address [EDITOR FARMER.

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....JUNE 24, 1869

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum the FARMER Office. Members of the Press and Strangers particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is TWO DOLLARS for five lines or less of space, in Nonpareil type, for *one* insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of our *Journal*, to which we would direct their *special* attention.]

The Letter of our valued New York Correspondent, M. A. S., will be read by his many friends here, with true pleasure, catching the hope that we may all welcome him soon to our shores again. We are indeed most grateful for so faithful a correspondent, and for his kind personal greeting and words of cheer for us.

DRESS REFORM.—Our Lady readers will find the Letter from our Correspondent, "Jenny Dare," full of "vim" and spirited on this subject. Jenny don't aspire to the wearing of the Pantaloons. Hear what she says and read "Ralph Meeker."

THE MOTHERLESS, by "Rosa" is a good Motherly Letter, and utters true and noble sentiments.

We invite those engaged in Vine Culture to the Letters we are now publishing in our Horticultural Column. Much of interest will be found there.

Acknowledgements.

Articles Received at the California Farmer Exhibition Rooms, No. 320 Clay Street.

THE ROSE.—We are indebted to Orange Judd & Co., the well known Book Publishers of N. Y. for Copy of "Parsons on the Rose," his new edition.

This book on the Rose we esteem one of the best works published, it is very complete, practically so, being a thorough treatise on its culture and care in everything relating to this "Queen of Flowers," also giving the Botanical and Garden classification; the early history and fables concerning it, with its uses in ceremonies, festivals &c.; the perfumes made from it, medical properties &c. &c.,—the book is valuable to every lover and cultivator of this most *Beautiful of Flowers*.

Messrs. Judd & Co., have issued this work in beautiful style, comprising 200 pages finely Illustrated. A. Roman & Co., sell the Book.

We acknowledge several parcels of Barley and Oats, from Thomas McElroy; the European seed grower and dealer of New York.

BARLEY SAMPLES.—This variety is marked *Four Rowed Chevalier*, 60lb to the bushel; we shall reserve this for trial in 1870.

OAT SAMPLES.—This variety is marked "Prize White Oats" 46lb to the bushel, this we shall also reserve for same purpose, as we could not use them advantageously now, the season being long past.

Our Eastern and European friends must study our season and climate, to make it advantageous to their trade.

LIFE OF JEFFERSON DAVIS.—We have received additional pages of this forthcoming work, by the pen of Edward A. Pollard Esq., from a glance we can see that it will be an intensely interesting work, and will be earnestly sought for.

We have the Circular of the Reform League for June, this publication contains many valuable articles, touching the Industry and great leading Interests of the country, worthy the notice of all who are identified with them.

We acknowlekge valuable publications from the Department of Agriculture at Washington.

ANATOMICAL MUSEUM.—We acknowledge the receipt of a very courteous letter, and card of invitation to this most interesting and important Institution of Knowledge.

Most earnestly we commend this Museum to all, for we should certainly learn all about "The House we Live in."

—The Thirty-Second Volume of the FARMER commences in July.

THE ELECTIONS! THE ELECTIONS!!

How all Important to a State like this, Rich in her Agricultural Resources beyond that of any State in our glorious Union, that *these Interests* should be carefully nourished, looked after, guarded and protected in the next Legislature of this State.

Where are our Farmers now when the plans are being laid for the Nominations of Senators and Representatives? Shall not the cause of Agriculture have good and trusty advocates both in the Senate and Representative Chambers at our New Capitol?

We appeal to our sturdy Yeomanry—now is the time to act, now is the time to make the influence and value of this great interest felt in the "Halls of Legislation."

Shall an interest that is superior to all other interests have no proportionate voice in the making of Laws and the Government of a State whose vital wealth arises from this very source?

AGRICULTURE, MANUFACTURES and MECHANIC ARTS, in all the past years, have never yet had any material voice in our State Government; the Legislators have mostly been men of the "spoils party," "office seekers," or schemers of new plans of corporations and private speculations, and not the Guardians of the Interests of the People of the State.

Assemblymen and Senators are Representatives of the *whole people*, or should be so, and the time has come when our State is to have a large and valuable addition to her Population from all parts of the world, and our great interests should have their proper voice in the *Halls of Legislation*.

Will our *Farmers*, our *Manufacturers*, and our *Mechanics* continue to bow down to *Politicians* and let them rule for *office, spoils and speculations* and let the great interests of the State go almost wholly neglected, or will they rise in their strength as Men and demand a proper voice in the Senate and and Assembly Chambers of our NEW CAPITOL, as shall give to these mighty interests that proper Guardian care and watchfulness so important at this time.

Will the true workingmen of this State think of these things *now*, before it is *too late?* Remember! what is done now, is done for *Two years*, and the *next two years* will witness most mighty changes in our State.

Shall these changes be for weal or for woe?

This depends upon the action of those who are now linked with these interests now, at the present Elections so soon to take place.

THE WEATHER, CROPS, ETC.

That we are having a change of seasons in California no one can doubt who shall carefully observe the "Seasons as they roll."

The recent repeated showers at different places, the continued heavy fogs, dews and sprinklings, are the *admonitions of nature* to our cultivators to prepare for greater changes every year, for *they are sure to come*.

Lightning, Thunder and Rain, Snow, Hail and Whirlwinds, will be as certain to visit us, as we cultivate, improve and build up our now waste places. They are the necessary attendants that always follow the settlement of any *new country*, and these things should be better understood, and our tillers of the soil must prepare for them.

That our crops will be large—*very large*, is now very generally admitted, larger than ever before, and better, too, we think, by reason of better tillage of the soil, and better implements to work with.

By reason of the completion of many new Railroads, our Farmers will be facilitated in getting their crops to market quicker and in better order and at less cost of time and money, this year, than ever before; and our Railroad Managers must look to their own interests well and encourage our Farmers by making as *low a schedule* of *Freight as* possible, or they will "kill the goose that is ready to lay the Golden eggs for" them.

Nothing can be more certain than that fair and just rates of freight on our Railroads for produce, tends to their increase and thus feeds the treasury of the Railroad corporation, as well as promotes the best interests of our producers.

The new crop of Grain comes in slowly by reason of the busy time among Harvesters, and the dull market and slack demand offers no inducement. Less than 5,000 sacks of wheat came to market last week. For particulars of market rates see Reports on last page.

WINE AND OIL.

Olive Oil of the best and purest kind is now made at the Gardens of the Santa Clara College, from the Olives produced from numerous large trees, which are the Ornamental and Shade trees of that Institution.

This Oil is used principally at the College; about 150 gallons was made the past year, and purer and better cannot be made in any land.

The wines made at this place, from the vineyards is of the very highest character some choice that was prepared with great care, specially for the occasion of their Commencement week, could not be excelled, its exquisite aroma, its brilliant amber color and its pure flavor, could not be surpassed if equalled in our State.

In the manufacture of the *Wine* and *Oil*, as well as many other articles for culinary and medical use, this Institution has made great preparations, and give to them particular care, and they excel in what they do, having careful vintners and laborers.

TRIAL OF STEAM LOCOMOTIVE.

The Grand Trial of the Locomotive Steam Engine for Farmers, for Plowing, Harvesting &c., took plase at Stockton on Saturday last, and created very great interest, and drew together a very large number of the Farmers of that rich and prosperous section of country. The Locomotive moved off in its majesty and strength, and gave satisfactory proof that the BAXTER WONDER was all that was claimed for it.

We regretted very much that by reason of illness, and duties claiming us home, prevented our presence at the trial; but from our correspondents report we can herald great success, and announce that repeated trials of this Farm "Locomotive," will be made at the *Exhibition of Agricultural Implements* which will take place at Stockton this Autumn, of which due notice will be given, with a list of Premiums of a liberal character.

The Trial of the Locomotive was made under the auspices and directions of Messrs. Webster, Bros., of the Pioneer Agricultural Warehouse, and under the superintendence of Mr. Baxter, the Skillful and Ingenious Inventor of the Locomotive, and the famed "Gang Plows," bearing his name.

Great praise is certainly due to Webster Bros., for their liberality to Inventors and their many efforts to draw out inventions, that shall benefit the Farmers of our State.

We learn by circular that an organization has been formed, called the "Stock and Agricultural Implement Association. The Exhibition is to be held this Autumn.

We think a Company with $500,000 could be formed that could be of great benefit, and result profitably to manufacture these Steam Locomotives and other valuable and costly Implements of Agriculture for our Farmers' use, and we hope the Enterprizing firm of Webster Brothers will move for such a Company.

Mr. Baxter, the Inventor, has achieved by his fertile brain, great things, and what our Scientific Men pronounce, truly wonderful, and for such Invention he should have due Public acknowledgement and due Honor as a true workman.

A very fine Photograph was taken of the Locomotive, as it stood before the Brick Warehouse of Webster Brothers, after its trial. We note Mr. Webster, Baxter, and a group of other citizens, admirably likenesses. The whole Picture is excellent, and upon the face of those was expressed that feeling of Triumph, which is felt by successful Generals, returning from a victorious field.

We take this opportunity to give a communication we received from a person who knew Mr. Baxter, while he was on his way from Boston to Worcester, to commence his now famous Engine.

The correspondent, while speaking of the merits of Mr. Baxter as an Inventor, enclosed us the thoughts of the writer, written in the cars, and placed in the annexed form.

ODE TO ROBERT BAXTER.

(BY THE FARMERS OF CALIFORNIA.)

Baxter's here! 'tis not the spirit
Of the author of "Saints' Rest,"
But a Practical Inventor,
One who always stand the test.

Robert Baxter he has traveled
Oft o'er California's clime,
Seventeen years of earnest toiling,
Still he's yet in manhood's prime.

Firm and strong you now behold him,
Baxter has not lived in vain,
He has toiled with all his manhood,
He has labored with his brain.

On our California Ranches,
Baxter often held his chat,
Climbed the mountains, strolled the valleys—
He's a man for a' of that.

Let me tell of his Invention,
Of his wonderful Machine,
One that by its rapid Threshings,
Claimed the best the world has seen.

One that pleases every Farmer,
This proves Baxter knows full well,
How to get up something for us—
Something useful, to Excel.

Baxter has a Plow invented,
'Tis a scientific thing;
Wonderful in all its movements—
Of its use'uln ss we'll sing.

See the Plow! deep furrows turning,
Soft and fine it moves the soil;
Baxter, with enthusiasm burning,
Feels *rewarded* for his toil,

Farmers come from far to meet him,
Come to see more "Baxter's Wonders;"
And with pleasure Farmers greet him—
Shout, and cheer in countless numbers.

Baxter has not done Inventing,
So his friends and neighbors say;
Soon new wonders that will please you,
Like himself they'll lead the way.

AGRICULTURAL FAIR, STOCKTON.

We have received the Circular of the San Joaquin Stock and Agricultural Association, announcing their preparatory steps for a Grand Exhibition the coming Autumn, (time not fixed.)

A liberal list of Premiums will be given; trial of all Implements trials of Speed, Orations, Poems, Addresses, Debates, a Ball &c.

Dr. E. S. Holden the veteran laborer in the cause of Agriculture in that county, is President with excellent officers, and an efficient Board of Trustees, give promise of a prosperous Exhibition.

OUR PAPER EAST.

The Pacific Railroad opens up California to the *Eastern World*, and those who wish to know of our State, should by all means have the California *Farmer* every week, as no other Journal will contain so much of California interests as the California *Farmer*.

SANTA CLARA COLLEGE.

COMMENCEMENT EXERCISES AND EXHIBITION.

One of the most successful, complete, and gratifying *Annual Ehibitions* which has ever taken place at this Institution, was triumphantly completed the present week, and the two hundred Students are now mostly with their friends and kindred in their happy Homes, where rest from study will give a zest to the richest enjoyments.

It has been our pleasure and enjoyment for long long years, to attend the annual Exercises of this most Excellent Institution, and to witness the proficiency made by the students, which we must in truth say are very much greater than is made at most other Colleges and Seminaries of learning in our State and Country.

The Santa Clara College is one of the most liberally provided Colleges on the Pacific Shore. The Buildings are large, spacious and elegant, covering nearly *four acres* of ground, and these buildings are severally provided with the best, and most complete materials for a thorough Education, that wealth could procure.

The most excellent Father Varsi the President, with the other Officers of the College, together with a large corps of the most able and accomplished Professors, give to this Institution the means rarely possessed by Seminaries of learning, to imbue their pupils with a Love of their studies.

The great secret of success, which attends this Institute of Learning, arises from the one great controlling principle that guides the Fathers and all the Teachers, and that is

THEY LOVE THEIR DUTY.

This love of Education causes them to love their pupils, and visitors can always notice the general joy and happiness that pervades the atmosphere all around.

The presents year's exercises was a Triumph.—About *Two Thousand* Visitors were present during the three days Exhibition. The evidence given by the Students in their Public Exercises was proof that they had studied well, and had faithful Teachers.

The Exercises were of a high character, and most gratifying to the Parents and friends present, and most honorable to the Teachers and the Students.

Some of the Lectures delivered by the Students were of a superior order, and the Essays and Dialogues most excellent.

The evening Entertainments—the Dramas, etc. were admirably done, and the Music superior.

We gave our whole time to this happy scene, and gathered many valuable facts. Being absent from our Office, we defer our complete and particular Report till our next, when we hope to give some of the Essays and give a more minute Report, speaking of many of the remarkable performances of the Students, their premiums, etc.

FARMERS' CLUBS.

In spite of the weather, says one of our city papers a few days since; in spite of the *dust* and *fog*, a large number of people assembled, to witness the race between the well known pacer and &c. &c.—

Now this shows the lively interest shown by members of well known "Jockey Clubs," owners of Racing Stock, sporting men, &c. &c. Now we would ask with all due respect to the different tastes of men, and the value of the different occupations, and pursuits of men, why the Sporting and Jockey Clubs should always be so well attended, and so much money so freely expended, when the great interest of Agriculture cannot muster near enough in the various districts, to form a "Farmers Club?"

Which of these clubs form the greatest and most important interests? Which interest *feeds clothes* and *sustains* the people? Which interest loads our ships and fills our Warehouses, with the rich products of the soil? And which contributes most to the increase of our manufacturing and our mechanical interests? And yet when we analyze the interest manifested by the members of the Jockey Clubs, we find them always ready with means liberally to sustain their Clubs, and do all in their power to make them popular.

But how is it with our Farmers and the "Farmers' Clubs," is it not a fact that a large majority of our Farmers are more ready to aid a "Jockey Club," or to attend a Race, rather than a "Farmers Meeting,"—we have only to remark, that while the influence of our Farmers are witheld from organizing a "Farmers Club," to promote *their own interest*, they must not complain if their own interests suffer.

WOOL DEPOT AND SALESROOM NEW YORK.

WALTER BROWN & Co., of New York, instituted at the commencement of this year, a system of Regular Public Sales of Wool. Four sales of this Series have already been held, and were largely attended by *Manufacturers* and *Dealers*, and resulted very satisfactorily, the wools selling promptly and realizing fair market value.

The Fifth Sale is advertised for the 15th of July and the Sixth will occur about the middle or last of August.

These periodical sales will afford our large growers and dealers the opportunity of consigning their wools, to a responsible house, and be sure of getting prompt returns, and know that their wools are sold at their real market value. They will undoubtedly operate very advantageously to owners, as the wools will thus be brought immediately before large numbers of manufacturers, which by the competition necessarily accompanying Sales of this kind, will ensure *good prices* for *good wools*, and often higher than real values, for those of poorer descriptions.

We call attention to the advertisement in another column, and commend the wool grower to this well known and highly responsible house.

A shoemaker has one great advantage over most kinds of mechanics; his goods when finished, are always *sol'd*.

OUR DELINQUENT LIST.

We found it necessary to send out a card "Last Week" to remind a certain class whose names are *not the best*, that it was necessary sometimes for them to "Remember the Printer," and as we had many *Thousands* laying round over this Coast in the shape of *mortgages*, or rather "Liens," upon "Real Estates in the Country," (for Newspaper debts are never outlawed,) for this kind of a debt is like a *Mechanic's Lien*, and always holds good. We said to all that no *false* delicacy would forbid us to ask for *our own*, after years of *patient waiting*, and therefore sent forth our notice.

We are glad to record that *some persons* have consciences, and being reminded of their remissness, they felt it was but *Just* they should pay "Newspaper debt."

Among the several letters and apologies thus far received, we append the following, coming as we know, from the "Better Half," in very plain words.

THE DELINQUENT'S LAMENT.

BY R. S. M.

Oh, do not stop our Paper,
Although we are behind;
Dear, patient, long-tried Editor,
We hope you'll change your mind.

We have met with many hardships,
Toiling both night and day;
We should sorely miss the Farmer,
And we surely mean to pay.

It comes to us with gladness,
It tells of Stocks and Trade,
Of Mulberry trees and Silk cocoons,
Of which fine things are made,

Of Goats Angora, Blooded full,
From the far off Syrian shore,
With soft and silky snowy wool,
Worn by the dames of yore.

Of Birds and Bees, and Fruits and Flowers
It gives us information,
And sometimes says our State may be
A Sugar Beet plantation.

It brings us cheering words like these:
The clouds are dark, but soon—
There is a *silver lining*—
And we shall see the Sun.

So, with such words of hope and trust,
We toil and struggle on,
To gain a little *soiled dust*,
Then go—as all have gone.

We wish we were a Poet, we would reply in rhyme, we can only say:

We will not stop *your* paper,
Although you *are* behind,
And long *have* tried *this* Editor,
But, you prove your *worth of mind*.

So, *you shall have the Farmer*,
Till dark *clouds* are past and gone,
And the Sun grows bright and warm,
And "Silver Clouds" light your Home.

TOBACCO, RUM, AND BLASPHEMY.

These three substances, now among the habitual to men, follow in their regular order, their use is steadily increased by man when once get the habit fixed in themselves, for which becomes a second nature."

A careful observer cannot but notice, that a man who has rarely or never been addicted the vile habit of swearing, or of drinking or of smoking, when the habit of *smoking* first upon him, he may be entirely free from Drinking or Swearing, but by slow degrees, these things sociate with him, those who are *smokers*, feel *he is one of them*, and they will very soon Invitation, "*will you join us?*" At first Rum Whiskey may be refused and some lighter used, for the habit of *smoking* will create and step by step from light drinks to the the habit becomes fixed, and now the *smoker* is also an *habitual drinker*.

These two habits always gaining upon men, and always undermine the and most robust constitution until disease form appears; then will soon appear a break, first *nervousness*, then impetuosity followed by an excitable disposition, which tably lead to anger and passion, then the guard to moral power falls, and cursing swearing steps in, and the citadel of the man is taken.

Whoever will carefully note these things find them true, and this class of men seek the pleasure of "Home," when the citadel is surrendered, then they will be found at the liard or Drinking Saloon, where men of kindred habits always congregate minds and kindred habits always congregate at such places what is enacted? What is and what is done? Oftimes it is of that which these very men would once shudder think of; but which came from the habits ed singly, and which now combined, has upon each victim, lost! lost!! lost!!!

This is no idle fancy, for the *Graveyards* State will attest to the sad truths, of which is but a faint picture.

DON'T BLEACH YOUR HAY.

During a recent trip to Santa Clara, San and vicinity, we could not but notice along line of the Railroad from this city, very quantities of Hay—some lying in small some just cut down, and the mowers at work ting down more.

We regret to notice that the most of it the field in these small heaps, *bleaching* and *goodness*. This practice is a bad one, for made is injured more than *one-third* in noticed with pleasure several large lots that a fresh green look, being cut and cured this was being baled at once and stacked will keep it fresh and sweet and will retain *aroma* which gives double value for stock.

We are surprised that any Haymaker should look to this matter of drying in hay.

THE CALIFORNIA FARMER!

OUR THIRTY-SECOND VOLUME.

In the opening part of the next month we shall commence our THIRTY-SECOND VOLUME of the

"California Farmer."

A few numbers more and we begin the closing Volume of our SIXTEEN YEARS' LABORS with this Journal.

We do not feel that it is necessay we should launch out with any new promises of what we shall do for the *Cause of Agriculture* and its kindred Sciences, for the past must speak for us; and those who can look back to the time when we launched our little bark, will now justly recognize what has been done to advance this great and important source of wealth to our State by this Journal during these long years.

One thing we do know, "*We* have done what we could," and we hope with our New Volume to enroll many New Voluntary Subscribers. For all such cooperation we shall ever be duly grateful.

We return our most sincere and heartfelt thanks to all our Patrons for their many kindnesses, and hope to continue to walk with them many years in the pleasant scenes of Rural Life and Rural occupations.

The Terms of the FARMER will remain the same—$5 per year, $3 for six months, (gold price,) and $1 extra when payments have been delayed; and these terms are unchangeable. A liberal allowance for clubs; when five copies are paid for, six copies will be furnished.

WARREN & CO., Editors and Publishers,
320 *Clay St.*, San Francisco.

TEN REASONS WHY EVERY FARMER AND STOCK-RAISER SHOULD TAKE THE "CALIFORNIA FARMER."

1. Every Farmer and Stock-raiser should be a reader of the Journal connected with the interests of his own profession in his own State.
2. Every such person should give his sanction and support, generously and voluntarily to a Journal that advances his own particular business in his own State.
3. Every such person is *benefited* by the publication of such a Journal, and is in justice bound to reciprocate such labors.
4. No person engaged in these employments can be without such a Journal without the loss of many times its cost annually.
5. The Farmer and the Stock-raiser will always be better advised of the markets, and that kind of information so important to his interests by constant access to a Home Journal.
6. The *California Farmer* has faithfully advocated the best interests of the Farmer and Stock-raiser for nearly sixteen years, and is the *only Agricultural Journal in California.*
7. The *California Farmer* contains the most important information relative to these interests in every branch of Agricultural science.
8. The *California Farmer* contains the announcement of all New Seeds, Grains, Grasses, etc., together with all New Implements that will advance the cause of the cultivators of the soil.
9. The *California Farmer* contains the arrival and introduction of all the best Stock of all kinds as soon as known, together with the full Market Reports of all the interests appertaining to Agriculture.
10. The *California Farmer* is now the *only paper* on the Pacific Coast that is continued by its *original Editor and proprietor*, commencing at the time this Journal commenced; and having been constant in its efforts for the good of these interests, deserves the cheerful patronage of all good men.

WHAT DO YOU WANT?

We are in constant receipt of Advertising Circulars, Cards, Letters, Pamphlets, &c., giving more or less information relative to new Inventions, Stock Implements, Nursery Articles, Seeds, Books, Paintings &c., and oftimes we are requested to *Publish these Circulars*, and to *call attention to their Business &c.* and yet these very *modest* persons do not stop to think that this will put us to *considerable cost*, and that too without an equal chance that we should be repaid for *our labor* by any good that could come to us.

Now we desire to give answer to all such persons in *this one special card.*

We will take the Golden Rule and hold it up before them, and ask each of this class of applicants to change places with us, and tell us if they would do this class of *Advertising for nothing?*

We are soon to enter upon our THIRTY-SECOND VOLUME; in all our past years we have cheerfully and voluntarily advertised largely for Religious, Benevolent, Scientific and Literary Institutions, and without charge, to the amount of many thousands of dollars. We have cheerfully exchanged with many Journals, whose price was one half to one fifth in cash to our own, and this to give them the benefit of our Journal, and we have supplied many Institutions with our Journal during its entire period, *Free*, and this last plan we shall continue; but there are some things we cannot and *must not do*, because it *is not* right, and these things we cannot do, is to Advertise for every body and everything *without pay.*

When we recieve this class of Letters and Circulars, we shall send a marked copy of our Journal with this card to such persons, and they must then understand that we ask a fair *Reciprocity for Labor*, if they manifest this well; if not, *well for us.*

We wish however to be understood, we shall always to be happy to do all in our power to aid every Benevolent and Good Enterprise, that is strictly "Pro Bono Publico," without other reward than the satisfaction of doing good.

TO THE PUBLIC!!!

THE

SAN FRANCISCO

PACKAGE EXPRESS COMPANY.

CAPITAL.....$100,000

IS ORGANIZED FOR THE PURPOSE OF CARRYing Passengers, Baggage, Packages, and Parcels from the different Railroad and Steamboat Lines, and delivering the same to any part of the City.

To our friends from the Country this system presents itself for their consideration. They can give their checks, etc. to our Messengers on the Cars and Boats and feel perfectly sure that all will be safely and promptly delivered, thus saving any trouble with Hackmen or Job Wagons.

The Street Cars run from all Depots to the different Hotels.

Fruit or other Freight consigned to our care will be promptly delivered, and Freight Bills paid.

Mark Care of

"S. F. Package Express Company,"

Commissions for the purchase of goods in this City especially solicited, and articles forwarded as directed.

This Company commends itself to the General Public. The same system has been long in operation in Eastern Cities with great success.

TO THE MEMBERS AND FRIENDS
OF THE
Mercantile Library Association.

The very heavy expense attending the Erection and Furnishing the New Library Building, has very much embarrassed and is seriously injuring the usefulness of the Association, and we find ourselves really in very great need.

Will every one who feels at all grateful for the comfort and benefits furnished by the Association, make some personal effort to render the load of debt weighing upon us less burdensome?

The most practical and best means of doing this, is by increasing the number of Subscribing Members, thereby increasing our source of revenue and extending the benefits of the Library to a much larger number than at present.

Every one has it in his power to do something for the general prosperity.

You owe the Library something more than initiation fees and quarterly dues, and an earnest appeal is made to each and every member to assist. Get at least, one new member; many can do much more, but be sure that you at least get one.

By order of the Board of Trustees,

THOMAS R. HAYES, Rec'g. Secy.

San Francisco, June 8th, 1869.

WHO MAKES SCRAP BOOKS.

'Tis said "In the making of Books there is no End," and we know there are many persons who are always interested interested in SCRAP BOOKS, now to all such persons, we have some very important information which will benefit them.

It will be seen by our advertisement of OLD NEWSPAPERS FOR SALE that we can furnish just the *right material for Scrap Books*, for we have in this collection of Old Newspapers, a series of papers of 10 to 16 years and from every State in the Union, and also European papers; also select scientific and literary papers, Journals of all kinds, In these papers will be found much of the best Poetry of the age, also Stories, Anecdotes, Recipes &c., all very valuable, and these we shall offer at the low rate of $2.50 to $3, per hundred. Many of these are 12, 16 and 20 page pamphlets and magazines and other periodicals, those who want these collections will address

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once at our office, or addressing EDITOR FARMER.

CRANBERRY PLANTS.

The Genuine *Bell Cranberry Plants*, just received by overland route, in the most perfect order, only a few days on the way.

This is now a grand chance for those who have "*Tule lands*," for if planted now, they will begin to yield the coming season. Apply at

FARMER OFFICE.

Home Miscellany.

MAKE THE BEST OF ONE ANOTHER.

Make the best of one another,
In this world of trial sore—
Why should brother cause to brother
Heart-aches where was bliss before?
Why should peace be made to perish
In a single mortal's breast,
When the very thing we cherish—
Love—with life with joy invest?

Oh! how quickly life doth vanish—
See, its eventide speeds on;
Wise it is to wholly banish
Hate and wrong, ere hope is gone!
While the day lasts let us labor
In the cause of concord true,
That no hand may raise the saber,
Any bloody deed to do.

Heaven grant that every nation
Soon may dwell in harmony—
Man, in what'er rank or station,
Doing as he'd be done by;
Then shall strife and discord flourish
Nowhere 'neath the smiling skies;
That good-will which friendships nourish,
Making earth a paradise!

For the California Farmer.

THE MOTHERLESS.

How much of sorrow and distress, is sent up in that *one word*. O, how friendly the heart clings to Mother; no other friend is half so dear, or half as much needed as the true Mother. A Father is missed when death snaps the brittle thread of life asunder, but not like the Mother; she it is, that makes *Heaven* of *Earth*, and keeps the family ties all cemented by the cords of affectionate kindness. O, how much Mother is needed to restrain and curb the turbulent passions of her sons, as they grow up to manhood: and to advise her affectionate daughters as they are budding into womanhood, and train them to fill other families with the leaven of affection, and lead them to the Gates of Heaven. Then Mothers try to prolong your lives by taking the needed recreation that the country affords, do not spend time foolishly in embroidering and ruffling, that should be spent walking in the open air, and chatting with your little ones.

Not long since I saw a woman weeping bitterly, over the garments and patchwork of her Mother, and she exclaimed, "I'd rather have my Mother." And the thought suggested itself to me, whether that Mother might not have lived years longer, had she done less needlework, or made things plainer; not that I would despise beauty, but is not a beautiful, healthy, and happy woman, far more lovely than the nicest of needlework? And cannot they feel and hear and see. O then in view of all these things, let them try to improve their health, and thus Praise and Glorify our Maker and Preserver.

Toil for use and not abuse,
'Twill bring you health, and there is wealth,
That gold can never buy.
The rosy cheeks and sparkling eye,
Speak praise to Him, who rules on high.

ROSA.

June 12, 1869, Edentia Ranch,
Carpenteria, Cal.

Pie Crust without Lard. Messrs. Editors: I wonder if the large family of the *Country Gentleman* are aware that hundreds of thousands of dollars are worse than wasted, in the use of lard made into pie crust, annually. To be sure; a white, flaky crust looks nice and tastes better, but indulging our appetite in its use, lays the foundation for dispepsia, rheumatism, gout and palsy. For years I have been experimenting to find out how to make a palatable pie crust without lard, and finally have succeed. The process I give below, for the benefit of those who choose to profit by it.

Take good rich buttermilk; soda and little salt, and mix just as soft as can be mixed, and hold together; have plenty of flour on the moulding board and roling pin; roll very thin; then make and bake as other pies, or rather in a slow oven, and when the pie is taken from the oven do not cover it up. In this way a dispeptic can indulge in the luxury of a piece of pie.—*Mrs. E. A. Call, in Co. Gent.*

Lemon Cake.—Three cups loaf sugar, 1 cup butter, rub the butter and sugar to a cream; 6 eggs, 1 teaspoonful saleratus in a cup of milk, 4 cups flour, the juice of one lemon and the peel grated.

A lady who was about to give a party to a convention of clergymen, sent for a caterer, to assist in the preparations. He asked if she intended to give a dancing party. She replied that it was to be mainly composed of clergymen. "In that case madam," said he, "I would advise you to provide bountifully. Them pious people eat dreadfully."

A little girl attending a party was askek by her mother, how she enjoyed herself. "Oh," said she "I am full of happiness, I couldn't be any happier unless I could grow."

"I see through it," as Betsey Perkins said when the bottom of her tub fell out.

"Dis cord am horrible," as the musical nigger said when he was about to be hung.

OUR LADY CORRESPONDENT FROM PENN.

LETTER NUMBER SIX.

Green Tree, Pa., June 10th, 1869.

Dear Col:

One of the *Tribune* Editors has kindly furnished me with a text for my sermon this week.

It occurs in a letter written by that gentleman to Mr. Dunas' sprightly and popular paper. Here it is:

"Fifty years experience with the ballot will abolish petticoats and corsets for ever."—N. Y. Weekly Sun, June 2nd.

Then gentlemen, in the name of all the Graces, keep the ballot and leave us our petticoats.

But I must confess I do not see the connection myself, or why a recent writer suggests; a woman could not walk up to a ballot-box and drop in a little bit of paper, with the same ease and propriety that she now deposits a letter in the Post Office. I must own to a weakness for peticoats, even at the risk of drawing down the wrath of the dress reformers upon my defenceless head. But I also believe in women being allowed to vote if they want to. And whenever a majority of them does want to very much, why then gentlemen, you may as well step back gracefully hat in hand, for

"When a woman wills, she will, you may depend upon 't;
And when she wont, she wont, and there's an end on 't."

And we *will* vote some day, and we *wont* wear pantaloons, there now; and what are you going to do about it?

Mr. Meeker asserts further: "Were all women to put on pantaloons to-morrow, they would not only be just as virtuous, as modest and as beautiful as now, but they could walk the streets as beings attired for work, whether it be in the nursery or in the hospital" That they might be as virtuous and modest I admit, but that they would be as beautiful, or beautiful at all, I deny; pantaloons would transform Venus herself into a scarecrow. Ye gods! fancy Broadway thronged by female pedestrians in pantaloons, and pantaloons trimmed with gimp and lace, as Mr. Meeker says it is natural for women to trim their clothes. As to walking the streets as "beings attired for work"—we wont do it. We think that a dress that is suitable for the kitchen or garden, would be out of place on the street.

No thank you, when we get the chores all done up, we like to put on something nice and fresh, and take a little walk down to the village, or a run across the fields to see a neighbor, or saunter down Broadway—just as it happens.

But pantaloons in the nursery. Imagine the universal and appalling squall, that would deafen Christendom, should all the mothers in the land appear simultaneously in their nurseries as working beings. It is is my opinion they would find it pretty hard work to reconcile the affronted babies to the new regime.

Whoever has observed a man handling a baby in a long white wrapper, must have noticed the absence of that affinity that does somehow seem exist between babies and petticoats. And as to hospital work, when the Sisters of Charity petition for a dispensation, to put on pantaloons, I shall begin to think there may be something in it What would our soldiers have said, do you think, had Secretary Stanton, shut the hospital doors in the faces of the women because they came in peticoats instead of pantaloons? Why the poor fellows were homesick, for the sight of a petticoat. Had Florence Nightengale doffed the garb of her sex on entering the hospital wards, we should have missed that touching little story, of the Sick Soldier, and the Nurses shadow on the wall. I never heard of anyone kissing Dr. Mary Walker's shadow, did you?

I would not be afraid to put it to the vote among the soldiers, they would shout to a man,—"the petticoat, long may it wave!"

JENNY DARE.

The article on Dress Reform, alluded to by Jennie, will be found under the head of Miscellany.—Ed. Farmer.

GARDEN GROUNDS LAID OUT,

Those who wish their garden grounds renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles, and with correct taste and skill, as

Adapted to this Climate,

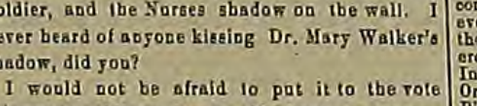
can have this work done to their satisfaction by calling at this Office, where all the best works on Gardering can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the Trees, Plants, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California Farmer.

None but Educated men ever engaged in such work.

Address WARREN & CO.,
Farmer Office.



BOUND VOLUMES FARMER

☞ Volumes of the "California Farmer" for The last EIGHT YEARS, uniformly bound, can be had at the Farmer Office at $8 per Volume.

These Eight Volumes contain more useful matter touchin the practical workings of Agriculture as adapted to California Culture than any Book or Books Extant, as they comprise hundreds of Experiments, Letters and Essays upon the Culture of Cotton, Rice, Coffee and Tobacco; Grapes, Strawberries, and all other Fruits, with the Culture of Hops, Castor Beans, Flax, Hemp, &c. and the Whole series of Essay of L. Prevost on Silk Culture, from early beginning.

This set of Volumes would be a Library of itself and in valuable to the Cultivator of the Soil.

Orders sent to Farmer Office will be promptly attended to

OUR HOME INTEREST

Appreciating the injurious effect that will inevitably result to the material interest of this State and of its citizens, by the permanent withdrawal from circulation of nearly two millions of dollars coin yearly (an existing fact and the probability that even double this large sum of money will be increased each year and in a very few years, it will amount to the enormous sum of Ten Million of Dollars or more, per annum, it is sent East for investment in the purchase of Life Insurance instead of being retained at homes to promote and encourage its investment here the commercial, mechanical, agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this growing evil could be checked, and the citizens of this and the other States on the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION, whose capital and assets will not be impaired or withdrawn affected by the change in values that will ensue on the return by a return to specie payments in the other States of the Union. Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to every citizen of this State, who feel an interest in its prosperity, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing and supporting a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

All policies issued by this Company are, by the laws of California, EXEMPT FROM ATTACHMENT OR EXECUTION FOR DEBTS, whether the policy be in favor of the party assured or of any other person.

Policies are made non-forfeitable after two annual payments.

All profits divided among the assured.

One half of the annual premium loaned to the assured at any time when desired.

Thirty days' grace allowed in the payment of renewal premiums.

This Company offers to those who have paid up their premiums in cash for two or more years, the advantage of giving notes for the whole amount of their annual premiums, for a period *corresponding* to the time they have paid in cash, by merely giving their note, and paying the interest in advance.

Wm. R. WHEATON, General Agent.

DRESS REFORM.

A TRIBUNE EDITOR ADVISES WOMEN TO WALK THE STREETS ATTIRED AS PAGES.

To the Editor of The Sun.

Sir: When Olive Logan's card appeared the other day many hearts rejoiced that there was one actress brave enough to speak the truth. Two days ago the same throb of exultation was felt when Lydia Sayer Hasbrouck had the courage to denounce one of the greatest nuisances of the age. Mrs. Hasbrouck spoke the sentiment of a majority of men, but still she advocated a costume which, like the Crittenden compromise, has done little towards aiding the cause of freedom.

The public are sick of trails, and so they are of Bloomers. Either costume tends to discourage all attempts at reform. It is just beginning to be understood that utility is of much more importance than fashion. Still the people will never be deprived of beauty nor symmetry, and until a proper regard is had for these, no dress reform will ever be successful. To say that the body is of little consequence compared with the soul, and that silks and flounces make one neither better nor worse, is all very well; yet the fact that men and women will admire the gay and worship the beautiful cannot be overlooked. It is true that as we advance in the intellectual scale, the desire for outward show diminishes, but human nature is as boundless as the universe, and for every Emerson there are a thousand Flora McFlimseys. The custom of wearing clothing suspended from the waist is radically wrong. It was not until the dawn of modern civilization that men themselves adopted their present garb. Even the blindest cannot fail to see that it is the only one which permits a perfect development of the human form. Had God intended that woman should dress in the present costume, He would surely have created her in another image than that of man. It is natuaal for her to select gay colors and put on gimp and lace, but this has nothing to do with the style in which her garments are cut.

Man has considered woman an inferior being, and he has educated her accordingly. Petticoats are emblems of slavery the same as are the veils of Turkey, and the stripes of Sing Sing. Were all women to put on pantaloons to-morrow, they would not only be just as virtuous, as modest, and as beautiful as now, but they could walk the streets as beings attired for work whether it be in the nursery, or the hospital.

When God created the birds he plumed them with feathers, male and female, and the fishes He clothed with scales. Who ever heard of a tigress having wool like a sheep, or hair like an ox? Yet no one has seen a stage girl attired in a page's suit, but he did not admire her dress. A similar costume might be adopted by our young women, that would be far more becoming than the one worn at present. The garments could be cut after any desired pattern, so that the fundamental principles be observed. About the only good thing the stage has given us, is now and then a decent female costume. Universal suffrage is the only remedy for the present evil. Fifty years experience with the ballot will abolish petticoats and corsets forever.

RALPH MEEKER.

TRIBUNE OFFICE, May 21, 1869.

CLIPPINGS, ABROAD AND AT HOME.

GOLD AND PAPER CURRENCY.—The Virginia *Enterprise* remarks.

Gold is current at present as far east as Promontory Point, in Utah, in fact, just as far as the Central Pacific Company have carried their road. At Corine, the traveler going east strikes a green-back country; a country where the people look with astonishment and perplexity upon a gold coin and scarcely know what to do with it. Prices, as far as the Promontory, are on a gold basis. Thus the traveler who starts from Sacramento pays $1 in gold for his meals, up to Promontory. Thence eastward he is agreeably surprised to find that the charge is only $1 in currency. On the other hand, the traveler bound west discovers with a lengthened face, that the meal which only cost him $1 currency at Corine, requires $1 25 or more 20 miles west of that town.

WARM WEATHER AT THE SUMMIT.—The Sacramento *Bee*, thus reports the weather at the Summit so warm, that the Silk Worm Eggs would hatch and had to be removed.

L. N. Hoag of Yolo county had sent to the summit a quantity of silk worm eggs, fearing that they would hatch too early here. The eggs were placed under the floor of the Summit House, immediately north of which there is a large bank of snow. Mr. Hoag recently recieved a letter which gives the weather at the Summit thus—June 1st, thermometer at noon, 53; at two P. M., 58; at three P. M., 61. June 2nd; noon, 58; two P. M., 60; three P. M., 62. Yesterday was then by far the hottest day of the season. The eggs are at once to be called home and placed in a refrigerator.

SILK CULTURE IN NAPA.—We learn that Mr. Baxter, who recently purchased the farm of J. Eggleston, some two miles from town, is going largely into the silk business. He has set out thirty thousand mulberries, and erected the necessary buildings.—[Napa Register.

—The largest "log jam" ever known on Black river, Wisconsin, was formed this spring on an island near Eaton's mill, about eighteen miles north of Neillsville. The jam was three or four miles long, and the amount of logs it contained was estimated by competent judges to be about seventy-five or eighty million feet.

Mr. H. T. Helmbold, the well known druggist of New York; returns for this year an income of $152,202. All this comes from advertising. Mr. Helmbold expenditures for advertising average over $10,000 a week.

New Advertisements.

GYPSUM. (Sulphate of Lime.)

This well known but most wonderful fertilizer has not yet been practically introduced into the Agricultural interests or before the minds of our California cultivators, for the reason that there was no supply, and because it was hard to make them believe our lands needed manuring.

The time, however, has arrived when, by the admitted fact of the deterioration of our soil and the lessening of crops, something must be done to restore the soil and bring it into that state of fertility necessary to make it profitable to cultivate the soil.

Gypsum is a compound of Sulphuric Acid and Lime, and the object of this fertilizer is the fixing of Ammonia, thus making it the direct food of plants, either by supplying the Sulphate of Lime or by its decomposition, affording the Sulphur so necessary to the due development of certain plants.

Sprengel's Analyses shows the quantity of Lime and Magnesia, Sulphuric and Phosphoric Acids to be very large in the following plants, and for these this fertilizer has no superior:

Wheat, Barley, Oats, Potatoes, Cabbage, Swedish Turnips, Clover, Beets, Turnips, and root crops generally; thus ensuring to a certainty its great importance to the Farmers.

Liebig's Natural Laws of Husbandry gives conclusive proofs of its superiority as a fertilizer on Clover and Grasses, furnishing details of experiments made by distinguished men in various parts of Europe.

According to the experiments made by Buckholtz, Gypsum is composed of *thirty-three* parts of Lime, *forty-three* of Sulphuric Acid, and *twenty-four* of the water of crystalization.

Gypsum is often called Plaster of Paris, but this is wrong—it only takes that name and character when it has been deprived of its water of crystalizates by fire; there it becomes *Calcined Gypsum* or Plaster.

Gypsum for Dry Countries like California, will prove immensely valuable, as when used as a fertilizer in our hot and dry soil, its waters of crystalization are seperated by means of our hot climate and go at once to benefit the plants, while the Acids and Sulphate of Lime is taken up by the soil, enriching it to a very great degree.

The undersigned is now prepared to furnish this valuable fertilizer by the quantity to all who desire to try its well attested virtues.

CHAS. J. JANSON,
222 BATTERY STREET.

To Hay-Makers!

The Great Stacking Fork.

WE OFFER TO THE HAY-MAKERS OF THE PACIFIC Coast, the Celebrated

HARPOON HAY STACKING FORK

One of the best inventions of the age. With this Fork, A Great Saving of Time, Strength, Labor and Expense is made, as it is indeed a very valuable and important implement, both to Hay Makers and Grain Growers. This machine is used to load and unload Hay or Grain Waggons to Barn or Stacks, and is very extensively used at the East.

We have received a few of these Implements which can be seen at our Office. Having more on the way, we are prepared to take orders for them in quantities to suit the trade, as we have the Agency for the sale of them for the Pacific Coast.

Sample Implements, and all Particulars at our Office.

WARREN & CO.,
"Farmer Office," 320 Clay Street, up stairs.

CAST-STEEL DAIRY KNIVES

WE HAVE RECEIVED INVOICES OF THE CELEBRATED

Cast-Steel Dairy Knives,

Manufactured by D. G. Young of New York. We have them of all sizes, from those of FOUR BLADES to cut FIFTEEN INCHES, up to THIRTEEN BLADES to cut TWENTY INCHES.

These Knives are of very great advantage to Dairymen, and are worthy their attention.

For sale by **WARREN & CO.,**
"Farmer Office," 320 Clay Street, up stairs.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facie* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

Miscellaneous.

A PRINCELY RESIDENCE IN THE COUNTRY FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L. AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market. Please see that their trade mark,

H.&L.

Is on the red cover of the package.

Depot, 320 Jackson Street,

THOMAS H. DOUGLAS,
Storekeeper and Wharfinger.
Or to I. FRIEDLANDER,
112 California street.

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, June 24.

Our Grain Market is very dull; but little Grain comes in, and although there has been an advance in the price of wheat in Liverpool and in New York, by reason of local, but only temporary causes, there is no export demand to any extent.

Our producers must study the markets more, and give more attention to their own interests, by making themselves familiar with every action that affects the movement of Grain abroad or at home.

The new Elevator at Vallejo, the transmission of Grain by our railroads, markets abroad and at home, should be their study; for it is their own interest.

Grain is known to be abundant in all the Grain growing States west of New York, and although there has been an active shipment recently from New York, it is admitted that it can only be *temporary*, and that Grain, by reason of heavy crops, must rule low. We hope our growers will be wise and change Grain into Gold as fast as possible—the present time will prove their best.

MEATS-

(Leopold Miller.)

Our Beef Market and the solid Meats are not very active, by reason of the greater use of Fruit and Vegetables, and the absence from our city of large numbers who are traveling and enjoying life, at the "Yosemite," "Geysers," "Calistoga," "Pescadero," and elsewhere, and as they eat away from "Home," the caterers in our markets for a "Good Dinner," lose some customers.

GOLDEN EAGLE HOTEL.

Corner Seventh and K streets, SACRAMENTO.

THIS HOTEL IS OFFERED TO THE PUBLIC AS a "Home for Families," and for the Traveler.

The Proprietor has spared neither expense or care to make his Hotel one that shall always be acceptable and pleasant to all that may favor him with a call.

With ample accommodations by means of spacious Suites of Rooms for Families, and by recent enlarged accommodations, he is confident that visitors will always be satisfied and feel at Home.

Particular attention will always be paid to the comfortableness of the apartments, by well ventilated Rooms, clean Beds and Bedding, and strict attention to the wants of Boarders; while the TABLES will be provided with the very best the season affords.

CARRIAGES, to and from the Hotel to the Railroad Cars and Steamers, at all times, Free of Charge to the Patrons of the Hotel. Hotel open all night.

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN, PROPRIETOR

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance*. We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,

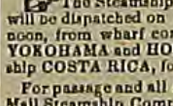
California Farmer Office

Traveling.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS



Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates as given below:

STEAMERS FOR JUNE

The following Steamships will be dispatched on dates as given below.

June 9—MONTANA, Capt. E. S. Farnsworth, connecting with ALASKA, Capt. Gray.

June 18—COLORADO, Capt. W. H. Parker, connecting with HENRY CHAUNCY, Capt. Conner.

June 30—CONSTITUTION, Capt. Wm. H. Hudson, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

oc4 OLIVER ELDRIDGE, Agent.

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish *collections* of choice plants, can buy them in quantities at a very low rate, if they visit the *Gardens Corner of Mason and Pacific Street*, in this city, or address EDITOR FARMER.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuges now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take neither Vermifuge or Liver Pills, unless you are sure u are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S

CELEBRATED LIVER PILLS,

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER and BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It is our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the power of the Stomach, Bowels, Brain, and the whole Nervous System should be vast and vital importance to human health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has also a connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal atrocity or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Mucous, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful impression of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, and complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every one. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken as Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow them. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are inferior to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. McLANE'S

American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and are ever quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous train of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked. Even in cases of great violence, if a potent and rompt remedy be possessed, so that they could be expelled with loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an arc or circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy matter; tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a painful sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently tinged with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water every morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten years a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE & FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the same stamped on the lid of the box, in red wax.

Prepared only by

FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

ETTER FROM MARGARET'S JOURNAL.

CASE'S RANCH, YULUPA VALLEY, June 24th, 1869.

...Farmer:

...wish I could show you this charming little ...y and the scenery around me this pleasant ...morning! I am resting on the lap of dear ...other Earth, who does indeed "rock me to ...p" so often, that I am in danger of forgetting ...ything but the dreamy delight of the present ...ent. This place is beautiful enough to real...ze the Happy Valley of Rasselas.

...he dewy, fragrant atmosphere, the clear run...g water of the pebbly brook with its delicious ...ress, the grassy lawn with its varied wild ...ers, the grand old Oak and Bay trees on the ...th and west with their broad leafy arms shelter...g from sun and wind, the lofty mountains on the ...th rising in solemn grandeur thousands of feet ...ve the sea, the "canon crimped hills" at their ..., the cultivated fields in front, all conspire ...fill the mind with impressions of beauty, and ...soul with a sense of delight, which naught ...n afford but the scenes of nature.

...as I sit dreaming in the shadow of these mag...ficent Oaks, I see before me a most lovely pan...ma—a level space with a broad avenue in the ...ter, leading to the house. On one side neatly ...anged flower and vegetable garden, well stock...d with esculents enough to delight the heart of ...experienced cook. Beyond this a large orchard ...th a great variety of choice fruit.

...The center of this lovely spot, half hidden by ...thick foliage of Oak, Locust and Bay trees, is ...pleasant, roomy cottage, neatly arranged, con...ining all those little coaxing, cozy comforts of a ...Home, a place truly such as we poor city ...llers seldom find for summer rest and recrea...n.

...would like to introduce to you the owners of ...s charming spot—a gentleman and his wife, ...d one fair daughter. He is one of nature's ...blemen, a true specimen of a genuine New Eng...d farmer. His worthy wife, a model house...per, whose savory viands would create a whole...me appetite in the most confirmed dyspeptic—...ch delicious broiled chickens, such snowy, ...ious biscuits! such tea and coffee, with *real* ...m! Surely one might be forgiven for turning ...ure and praising the tastes and pleasures of ...table, while enjoying the dainty fare each day ...pared for this worthy family and their numerous ...ests.

...The beautiful valley is situated northeast of ...alistoga and southeast of Santa Rosa. It is no...ed chiefly for its fine grapes, which make excel...t wine. Last year the two principal vineyards ...oduced about forty thousand gallons of wine. A ...considerable quantity of wheat, oats and barley ...are raised here. The buildings, fences, etc. would ...compare well with those of well-to-do farmers in ...the Eastern States.

...I have just finished looking over a late number ...of the Farmer. I was quite interested in the de...ption of the Pacific Railroad Celebration in ...New York, by our old friend M. A. S. He seems ...to have lost none of his love for California though ...he is so coolly down among his "household ...gods" near the crowded streets and avenues of ...Boston.

His friends would gladly welcome him, either in San Francisco, or to the classic shades of Benicia, where of old time we were wont to hear his pleasant voice, or listen to the sweet melody of his fairy fingers on the ivory keys of his favorite instrument, or to enjoy by his side a gallop over the delightfully smooth roads or gentle declivities of the Benicia hills. I wonder if he doesn't remember a certain sorrel nag and the "one horse shay," in which he occasionally treated himself to an airing among those breezy old hills?

I am glad also to see in your columns the name of another old friend of Benicia memory, Israel Diehl. Having wandered in many lands and seen perilous adventures, by flood and field, in the old world as well as the new, he comes to us with his mature thought and varied experience, painting for us his word pictures in colors heightened by his own vivid imagination and keen sense of the beautiful in nature, art and science. I hope that in some of his peregrinations on his lecturing tours in Sonoma county he will not forget to stop at Cottage Home and greet an old friend of "Good Templar" memory who will be glad to welcome him back to California and talk with him of days long past and friends, some of whom rest sweetly beneath "that low green tent whose curtain never outward swings."

What a wonderful tablet is that of Memory!—We turn its mystic leaves and recall the faces of old friends. We hear again their merry voices—voices, alas! which we may never hear again but from which time and distance divide us almost as entirely as the icy hand of death:

You see that I am rambling away from this delightful scene to the haunts of memory and I must return to present thoughts and close my scribbling. You shall hear again soon from

MARGARET.

SAN FRANCISCO WOOL EXCHANGE.

JULY 1st, 1868.

IMPORTANT ADVICE TO WOOL GROWERS.

We deem it our duty to call the attention of our Flock masters, to the unsatisfactory state of our Spring Wool this year, which is generally very short and of very poor condition.

The shortness of staple, arises from the late Fall shearing of last year; some Farmers, on account of the high prices of the Fall Clip, having shorn as late as September and October, leaving only 4 or 5 months growth for the New Spring Clip.

One of the results being, that fleeces have no weight—as a proof we would state, that last years bags from the country contained an average of 76 fleeces to the bag, while this year, the lots of short staple contained from 100 to 130 fleeces to the bag.

The bad condition arises wholly from neglect of the flockmasters.

The wool this year had more dirt and tags than ever before, besides, most of the lots contained more or less *defective* and *wet* fleeces, which could only be detected by grading.

So far, we beleive that we have rejected by grading more than 6 to 8 per cent. of unmerchantable wools.

Letters received from manufacturers East, who were in the habit of using California Wools, say that the Wools this season are totally unfit for many purposes, for which they were used previously, on account of shortness of staple. According to later advices yet, the best Wools this season are considered fully 25 per cent less value than last year, and buyers here have received orders not to purchase these short defective Wools at any price.

It behooves our flockmasters to redeem the good name of California Wools by strict care and attention this fall and winter, principally in avoiding a late fall shearing, otherwise it will be found next to impossible to dispose of the Wool to any advantage, as manufacturers will turn their attention to other Wools for the same purpose.

No FALL WOOL should be shorn later than the end of August, *leaving full 8 months* growth for the next spring clip.

Receipts of Wool from April 1, to June 30,

From the North.

	1869.	1868.
Bags—	16,748.	19,694 less 2,046 Bags.

Bags—	10,592.	8,042 plus 2,550 Bags.
Total	27,340.	27,736.

McLENNAN, WHELAN & GRIZAR.

THE FLORENCE.

In the early days of New England, when *Straw Bonnets* first came into fashion, the Florence *Braid* was the rage, and nothing shown in the way of a Pretty Bonnet, has ever surpassed it yet.

Now that *Sewing* is all the rage, and the great contest among Sewing Machines, grows more and more interesting and earnest, the FLORENCE still maintains the lead, for it is a FLORENCE *Braider* and a FORENCE *Sewer*, and by the sales of the FLORENCE SEWING MACHINE, it is clearly evident, that the Florence with its new and valuable improvements, A No. 1 before the Public now.

FRUIT GROWERS' CLUB OF NEW YORK.

This Club convened yesterday (June 10) at 1:30 o'clock, P. M., with Dr. J. E. Soodgrass presiding, who called the meeting to order and announced that they were ready to proceed to any miscellaneous topics that might be proposed for consideration.

Mr. W. M. Doty, of Keyport, spread the table with fine strawberries, of the Agriculturist and Charles Downing varieties, and Mr. Carey showed a quantity of the Wilson & Schenck Excelsior and some other varieties.

Then a brief talk ensued on the subject of strawberry culture. The Charles Downing was thought to be about as sweet as any other berry. But this is not so popular as a market berry as some others. It was thought best to grow strawberry vines in rows about eighteen inches apart, with the plants six inches apart in the row. One plant growing alone will produce ten times as much fruit as when allowed to run together.

A. S. Fuller related an experiment in the culture of a bed of strawberries. The bed was 100 feet long and 25 feet wide. The ground was spaded two feet deep and a great many loads of good cow-stable manure thoroughly mingled to the depth of two feet. The runners were then kept cut off.—He sold off that bed $87 worth of berries, beside the large quantities consumed by himself and friends.

Mr. Young, of 244 Washington street, presented a large watermelon, from Florida, which was cut in pieces and distributed among those present.—He stated that such melons were being sold in the market for $1 to $2 each.

W. S Carpenter related his manner of growing watermelons, which is to dig a hole about two feet deep and fill it with good manure, and the seed planted on the surface.

On motion of L. L Whitlock, it was voted that a premium of $50 be offered for the best exhibition of strawberries, to commence on Thursday of next week, at Horticultural Hall, at 1 o'clock P. M., to be continued for three weeks. Competition is open to fruit growers in every State. Also a second prize of $25 to be offered for the best seedling berry of this or last year. The seedling must be shown with some fruit on a plate and one or more plants growing in a pot.

The committee consists of Mr. Chas. Downing, Prof. G. Thurber, Mrs. E. Lyon, C. G. Bragdon and H. B. Smith. The exhibition will continue through the entire strawberry season.

Mr. C. F. Jones was canning strawberries by the aid of steam. The jar, or a jug, which is just as good, is filled with clean and ripe berries. Then a pointed tin tube as large as a wooden pencil is thrust into the fruit, so that the steam is forced out among the fruit near the bottom of the jar.—The fruit will all be thoroughly steamed in five minutes, so that the covers may be put on. No sweetening is employed, and no jars are broken by this simple process.

Some of the most curious novelties on exhibition were a lot of cast-iron bird cages, made by the Miller Iron Company, of Providence, R. I.—They were of various sizes and styles of architecture, neatly painted and exceedingly beautiful and cheap. Some of them were two-story, with Gothic finish, and a neat veranda on both sides, all of thin iron and so arranged as to be placed on the top of a high pole or post. Flower stands and hanging paskets of a very neat style of workmanship, were also made of cast iron, all of which were said to be much cheaper than similar articles that are made of other materials.

As Mr. Thos. McElroy has donated over $3,000 worth of all kinds of seeds to Southern agricultural societies, gratuitously, the officers of the Fruit Growers' Club desired the Press to request representatives of all Southern agricultural societies to forward their address to either of the officers of the Fruit Growers' Club, No. 37 Park Place, New York City, when a package of seeds will be forwarded to the address of such societies as may desire a supply. The Club then adjourned for one week.

"OYS" FINE "OYS."—The epicure and all who love good things, are anxiously waiting for the good time coming, when we shall feast upon the "Chesapeake Bay Oysters;" so much for the Pacific Railroad.

The *Bee* tells of a letter to a friend, who says:

As soon as the oyster season commences again, Sacramento, San Francisco, and all intermediate places on the railroad, will be daily supplied with Chesapeake Bay oysters, as large preparations are being made by our dealers for the new trade in their business, opened by the completion of the Pacific Railroad; and I hear that New York and Philadelphia will also furnish you with their higher priced planted bivalves. I know from experience that there is no such thing now in California as a good fresh oyster; in fact I at the time fully agreed with the writer in one of your papers who described their taste, as that of the result of a dirty penny soaked in vinegar. I am told there will be no difficulty during the cool months in delivering oysters on the pacific Coast perfectly fresh, in the shell, or opened and canned in large cans.

WORK AND WOMEN.

We commend most earnestly to our Women the article we place in our Home Department, on the Resolutions of some noble Women of New York. These are the *True Sentiments* that should inspire noble Women. To those sentiments we add some great truths under the words

LOVE OF THE BEAUTIFUL.

Place a young girl under the care of a kind-hearted, graceful woman, and she unconciously to herself grows into a graceful lady. Place a boy in the establishment of a thoroughgoing, straightforwrad business man, and the boy becomes a self reliant practical business man. Children are susceptible creatures, and circumstances and scenes, and actions always impress. As you influence them, not by arbitrary rules, nor by stern example alone, but in a thousand other ways that speak through beautiful forms, pretty pictures, etc., so they will grow. Teach your children then, to love the beautiful. Give them a corner in the garden for flowers; encourage them to put it in the shape of hanging baskets; allow them to have their favorite trees; learn them to wander in the prettiest woodlets, show them where they can best view the sunset; rouse them in the morning; not with the stern "time to work," but with the enthusiastic "see the beautiful sunrise!" Buy for them pretty pictures, and encourage them to decorate their rooms in his or her childish way Give them an inch and they will go a mile. Allow them the privelege and they will make your home beautiful.

And to these we would add the eloquent words of the Rev Dr. Chapin, which shows "Where Woman's Power Lies," and where these sentiments shall prevail, our women will be Good, True, and Beautiful, the last, Best Gift of God to Man.

WHERE WOMAN'S POWER LIES.

The true power of woman is in the resistless power of affection. In asserting this, am I attempting to mask the great questions of our day, with "a glittering generality?" Am I disposed to deny any lawful claims which woman may make for a more extensive recognition of her rights, or a larger field for her powers. No; I am not doing any such thing. Let woman do whatever her faculties can achieve—let her go wherever her instincts demand—if she truly follows her instincts, I am sure she will not go wrong. I am sure of this, also; that wherever man may lawfully go, woman may lawfully go. Wherever woman ought not to be, it is a shame for a man, it is a shame for humanity to be. I merely insist upon this, that whatever woman may accomplish in the world with brain or hands, will draw its vital efficacy, its talismanic virtue from the heart; and that her strength in all these various shapes of action and of influence, in its root and essence, will be the strength of the affections. The hiding of woman's power must ever be in the fervor and steadfastness other love. And her most triumphant characteristic is love culminating in its highest expression—that of self sacrifice. A thoughtful writer has observed the contrast between the sexes even in their play. "The boy," he says, "gets together wooden horses and a troop of tin soldiers and works with them. The girl takes a doll and works for it." That is womans great peculiarity—the work of self sacrifice—working for others.

THE GRAIN ELEVATOR AT VALLEJO.

We understand that this notable Institution has commenced its work, and some One Hundred Tuns have been deposited in the monster Institution:

We have been inquired of lately, when it was to be in working order, and it seems the Public know but little of it our opinion frankly expressed is, *that it will cost more than it comes to*, as the old saying is, for we feel very confident that our Farmers will be able in another year, when the New Bagging Mill shall be in operation, and furnish our grain growers with the best of Bags at 6 or $7 per hundred, that it will be much better and cheaper, handling grain in *Bags* than in *Bulk*. Our word for it, so it will prove, and the Elevator will be a bad speculation.

CENTRAL PACIFIC RAILROAD.

We call special attention to the NEW ADVERTISEMENT of this line of travel, the agencies in this city will now offer every facility and give all needed information, relative to the travel from hence to the city of New York and all intermediate routes.

The present arrangements, show the ready action of this Company to meet the wants of the people.

Next week we shall publish a schedule of the "Rates of Freight" between this city and New

SAN FRANCISCO PACKAGE EXPRESS.

This company are now in the full tide of success the Public have found out they can have their packages delivered promptly, and very cheap by this Company; and travellers find they can rely upon having their trunks and valises delivered safely and quickly, at low rates; everybody should patronize them.

STATISTICS OF THE WORLD.

The "American Year Book and National Register for 1869," contains a chapter on "Comparative Statistics of the World, relating to Area and Population," from which we gather the following interesting facts:

Asia contains an area of 17,318,000 square miles, and a population of 805,419,908. America an area of 15,480,009 square miles, and a population of 81,400,000; Africa an area of 11,556,663 square miles, and a population of 190,950,609; Europe an area of 3,781,000 square miles, and a population of 293,083 000, and Australasia and Polynesia an area of 3,425,000 square miles, and a population of 4,000,000.

In examining the tables of artificial or political divisions, we find that the Russian Empire stands first in point of territorial extent, it having an area of 7,862,568 square miles and a population of 77,008,448, or 9 9 to a square mile. The Chinese Empire contains 4 605 334 square miles, with a population of 487,500,000, or 101.6 to a square mile. China (proper,) however, with an area of 1,300,000 square miles, contains 450,000,000 inhabitants, or 346.1 to a square mile, being the most densely populated of all the large countries of the world. The British Empire—exclusive of the Hudson's Bay Territory—contains an area of 4,419 559 square miles and a population of 174,156,882, which gives a density of 39.4 inhabitants to a square mile. This, however, is very unequally divided, for while British North America, with an area of 3,523,083 square miles, contains a population of but 3.765,000, or about 1 to the square mile, Great Britain proper, with an area of 121,113 square miles, contains 29,321,288 inhabitants, or 242 1 to a square mile. The Netherlands exceed this degree of density, having a population of 280 2 to the square mile; and Belgium goes far beyond, having 438.2 to the square mile. Some of the small German States, which are in fact only cities, like Hamburg and Bremen, have a population four or five times as dense.

The United States has an area of 3,508,392 square miles and a population of 34,560,000 giving a density of 9 7 to a square mile. Of these States the largest is Texas, with an area of 247,356, a population of 604 215, and a density of 2.4 inhabitants to the square mile. The State having the largest number of inhabitants is New York, with an area of 47,000 square miles, a population of 3.-880,735, and a density of 82.6. The most densely populated State is Massachusetts, which with an area of 7,800 square miles, has 1,300,000 inhabitants, or 162 8 to the square mile. The District of Columbia, however, has 2,308.9 inhabitaets to a square mile, having an are of 55 square miles, and a population of 126.990.

There is probably no reason why the United State may not be capable of supporting as large a population, in proportion to its territorial size, as any nation in the world. We may by a few hasty computations, obtain a rough estimate of our future possibilities. When our entire country shall be as densely populated as Massachusetts is to-day, we shall number a population of nearly 600,000,000, and when it reaches Great Britain in point of density, our population will number more than 860,000,000.

THE RICH MEN OF NEW YORK.

The Eighth Internal Revenue District of New York includes the finest streets and avenues in New York City, and is the largest, wealthiest and and most important one in the United States. Look at some of the incomes reported for 1869.

A. T. Stewart	$3,019,218
E. S. Higgins	431,128
Geo. Fox	371,411
J. H. Benedict	311,589
Harvey Fisk	286,129
Moses Taylor	279,433
A. S. Hatch	278,261
Frances Warden	263,597
Paran Stevens	244,335
Peter Goelet	235,663
Aaron Arnold	230,609
W E. Dodge	221,375
A. R. Eno	217,276

Twenty nine persons return incomes ranging from $102,000 to $186,000, while the host of "small fry" who have the small pittances of from $10,000 to $100,000 fills three columns of the N. Y. Herald.

TAX PAYING WOMEN.

—There are some well to do ladies in New York Mrs. H. H. Greene returns an income of $78,700, Miss Sarah J. Zabriskie, $54,595 and Mrs. C. L. Spencer, 53,084.

TO OUR WOOL GROWERS.—We call special attention to the Important Circular of Messrs. McLennan, Whelan & Grizar, the well known Wool Sorters and Packers of this city.

These gentlemen, by their knowledge of Wools, and their experience added to their acquaintance with foreign markets, are fully qualified to give counsel that is valuable, and this Circular we esteem to be such.

Agriculture.

DON'T BLEACH YOUR HAY.

During a recent trip to Santa Clara, San Jose, and vicinity, we could not but notice along the line of the Railroad from this city, very large quantities of Hay—some lying in small heaps, some just cut down, and the mowers at work cutting down more.

We regret to notice that the most of it lay in the field in these small heaps, *bleaching out all the goodness*. This practice is a bad one, for hay thus made is injured more than *one-third in value*. We noticed with pleasure several large lots that bore a fresh green look, being cut and cured correctly; this was being baled at once and stacked up, which will keep it fresh and sweet and will retain that *aroma* which gives double value for stock.

We are surprised that any Haymaker should not look to this matter of drying in hay.

Agricultural Products in Russia.—Of all the agricultural produce in Russia, after wheat, flax is that of the largest consumption. and in which an extensive export trade is also carried on. Besides linen, that necessary article of clothing to all, flax furnishes both for rich and poor a number of article of the first necessity. Some ten years ago the annual production of flax in Russia was estimated at ten million pounds (of 36 lbs); but this estimate is evidently much too low, when we consider the enormous shipments made; and, according to the opinion of M. Tengoborsky (Productive Force of Russia,) the exports are two thirds less than the internal consumption. The linen consumed annually in Russia a quarter of a century ago was valued at nearly forty-three millions of roubles (six millions sterling,) each inhabitant of the Empire, it was supposed, using twenty archines (of nearly three quarters of a yard.) The value of the linen now consumed in Russia is estimated at sixty-three million roubles, equal to nearly nine and a half millions sterling.

Flax Culture and Flax Bagging.—The cultivation of flax is daily increasing in importance as a product of Western soil. Its value hitherto has been greatly under estimated, in as much as it was raised for the seed only, while the fibre of straw was allowed to go to waste; but within the past few years machinery has been so constructed as to work up this article to good advantage, and it is now extensively used in this city for the manfacture of bagging, which is in active demand for covering cotton. It has been shown by actual experience that bagging made from flax is stronger more durable, and can be made better and heavier than foreign bagging, or any article heretofore brought into the market. To cover a crop of 3,000,000 bales of cotton, requires over 20,000,000 yards of bagging, at a value of $4,000 000 to $5,000,000. To provide this entire amount, our Western soil can produce the fibre, which can be manufactured near at home for the supply of the Southern markets.

Good News.—An Eastern exchange thus speaks of the Pacific Slope: There are over 1,000,000 of people on the Pacific Slope. San Francisco, not 25 years old has 150,000 inhabitants. Her manufactures amount to $30,000,000. The Pacific Slope exports $50,000,000 to $60,000,000 of bullion annually. The wheat crop of California and Oregon is 25,000,000 bushels in a year. San Francisco in one year, loaded 160 vessels for China, and exported $10,000,000 worth of merchandise and minerals to that country.

—The number of sheep in Ohio in 1868 was 7,698,845, producing not less than 30,000.000 lbs of wool. The farmers of Ohio in 1855-6 lost in killed and injured 96,251 sheep by dogs, which were valued at $283,697 45, the number of dogs in 1866 was 174,909 making the loss for the two years per dog $1.62, a sum sufficient to defray the expenses of nearly three hundred families, at an annual cost of $1,000 each.

—An Irishman was employed to trim some fruit trees. He went in the morning, and on returning at noon was asked if he had completed his work. "No," was the reply; "I have cut them all down, and am going to trim them in the afternoon."

[There are lots of this kind of Gardeners roaming about, if we should judge by the work done. —Ed Farmer.]

—One of the benefits of Chinese immigration hithero overlooked, is just coming into notice. It utilizes rats, hertofore one of the most useless as well as destructive of the animal creation. The Chinese will eat them, and render the whole race extinct. Who will oppose Chinese Immigration now?

Prolific Ewe.—A correspondent of the London *Field* mentions a ewe coming 21 years old, that has produced 37 lambs in the past 19 years—twins every time but once. She has not had a tooth in her head for 12 years, but still is healthy.

—John T. Allexander, of Jacksonville, Ill., shipped to the New York market last year, 36,000 beeves. He is probably the largest dealer in cattle in the United states.

—The *Scientific American* say the dispatches sent by the Atlantic cable telegraph from Londong to-day, arrive in New York yesterday.

—The number of hogs in the United States is estimated at 38,000,000.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so consstructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Stee. Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

30-24 **STOCKTON, SAN JOAQUIN COUNTY.**

New Advertisements.

FARMERS ATTENTION,

HAWLEY & CO.,

AT THE OLD STAND, CORNER OF

CALIFORNIA & BATTERY STREETS,

SAN FRANCISCO

—:o:—

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULARS

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d. Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S

SELF-RAKING REAPER.

This Machine stands at Front of all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

—ALSO THE—

MARSH HARVESTER!

AUBURN HARVESTER,

SWEEPSTAKES

AND

VIBRATOR THRESHER

WHELER & MELICKS'

Two Horse Power and Separator,

HAINES' IMPROVED HEADERS,

HEADER WAGONS.

A full assortment of Agricultural Implements, and General Hardware, for sale by

HAWLEY & CO.

Stand, Cor of California and Battery Sts., SAN FRANCISCO.

TRUE'S

IMPROVED

POTATO PLANTER.

This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the Potato Planter from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

WARREN & CO.,

320 Clay street, up stairs.

WHO MAKES SCRAP BOOKS.

'Tis said "In the making of Books there is no End," and we know there are many persons who are always interested interested in Scrap Books, now to all such persons, we have some very important information which will benefit them.

It will be seen by our advertisement of Old Newspapers for Sale that we can furnish just the *right material for Scrap Books*, for we have in this collection of Old Newspapers, a series of papers of 10 to 16 years and from every State in the Union, and also European papers; also select scientific and literary papers, Journals of all kinds, In these papers will be found much of the best Poetry of the age, also Stories, Anecdotes, Recipes &c., all very valuable, and these we shall offer at the low rate of $2.50 to $3, per hundred. Many of these are 12, 16 and 20 page pamphlets and magazines and other periodicals, those who want these collections will address

EDITOR CAL. FARMER.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once a our office, or addressing EDITOR FARMER,

Miscellaneous.

SPLENDID CASHMERE GOATS

We Invite the attention of all who desire to purchase PURE BLOOD Cashmere Goats, to advise with us.

We have a List of the Splendid Goats imported by Hon. I. S. Diehl from Asia, and having been appointed to act for him, we are now ready to receive orders for the same.

As the value of this fleece is now rapidly increasing in demand, we shall soon have a large stock for the manufacture of the same.

Address Editor Farmer.

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the articles they have for sell are wanted by those who have delayed to the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seeds, and all other goods should be advertised in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their trade largely increased by giving attention to it, and particularly in everything appertaining to Agriculture and Horticulture.

Newspapers and handbills, however good they may be, can never take the place of Advertising in the Agricultural Journals.

"Bread is the staff of life, and Advertising is the life of trade."

Horticulture.

THE VINE IN EUROPE.

OBSERVATIONS BY AN AMERICAN VINE GROWER.

Letter Number Four.

IN AUSTRIA.

The most important portion of Austria, so far as the production of wine is concerned, is now, and for a long time has been,

HUNGARY.

More than one-half of all the wine produced in Austria is made in Hungary, and none of the Austrian wines, besides these, have obtained that celebrity abroad which the Hungarian wines have deservedly won.

Perhaps the vineyards which produces the best wines are those of Tokay, Pesth, Ofen, the Syrmia on the South, Warwitza in the Bannat, Erion, and Czerwenka.

Although a very large amount is consumed in the country, a large business is done in the exportation of Hungarian wines, which is year by year increasing, as their real merits and excellence are becoming more widely known and recognized. It has been the policy of the government to encourage and foster the culture of the vine, and many years an annual fair has been held at Pesth, for the wines of all Hungary.

The vineyards of Hungary have for a long time, by usage amounting almost to law, been permitted to be purchased by the peasantry under an arrangement, by which they are obliged to pay one-tenth to the lord of the soil. This, with all the other burdens that have fallen upon Hungary, and the domestic troubles, have kept the common people in a state of miserable poverty.

Notwithstanding these untoward circumstances, the wine has probably suffered less than their other material interests, and great attention has for a long time been paid to its culture, and to improvements in the manufacture of wine.

More than thirty different kinds of wine are produced in Hungary, most of which find their way into the markets of the world.

The manufacture of wine is carried on almost exclusively by the peasants, in the coarsest and most rude manner, but who, notwithstanding all this, pay the most scrupulous attention to cleanliness in all that concerns the vintage.

The vats and the wine-presses are never used until they are thoroughly and well-cleaned with scalding hot water in which the leaves of the vine have been steeped.

The fruit is collected in wooden vessels and carried to the wine vats by the laborers and thrown into a vat which has a double bottom, the upper one of which is filled with small holes through which the juice may pass. They beat the grapes in the vats and bruise them with large sticks.—When the first juice has thus run off and the vat has become filled, the whole contents are put under the wine press. It is quite common here to separate the grapes for the white wines and the red wines, but little attention is paid to removing the bad grapes, or to prevent decayed or unripe ones from mingling in the wine-press

After the press has been used all the must is thrown together into a large vat for fermentation for the white wines.

For the red wines it is quite common to dispense with the press altogether, letting the juice run through the double bottom of the vat, and mixing this refuse with the refuse of the wine-press in one common mass into a huge vat for fermentation.

It is also quite common in Hungary to feed cattle on the refuse of the wine-press, and to mingle different varieties of grape together for the production of their wines, and there are upwards of sixty varieties of grapes used in producing their various wines.

The most celebrated wine of Hungary is

THE TOKAY.

It is named after a town in High Hungary, and the product of a district called the Sub-Montine, Hegyla.

The grape itself in this district, unlike the usual wine grape of Europe, is large and of a rich and sweet taste.

The grape from which the Tokay is made is called the "Trocken beeren," or the "Hungarian grape," and is left on the vine until very late in the season, and sometimes literally till the snow comes, and, as I was told, have been even picked out of the snow for the vintage. When gathered they are dry and shrivelled, like a raisin. The berries are picked one by one, and most carefully selected, for the wine commands a fabulous price.

The prime Tokay is called the Tokay Ausbrach, and is made from a variety called the Formint or Szamorodi, the vintage rarely taking place until the last of October.

The Trockenbeeren have ripened a little earlier, and after being carefully picked and separated, are placed in a mass on a great table slightly grooved with deep grooves, from which the juice flows by their own pressure alone, runs into a separate jury.

This first product forms what is known as the "Essence of Tokay," and is as rich as the wine of the south of France. Its quantity is very small, it is preserved with the greatest care; is esteemed most precious, and is of enormous value. After this first slight work the grapes are trodden by a large rat with naked feet, and the must is allowed to stand twenty-four hours before it is set for fermentation, and a small portion of this wine essence is added to the must to flavor it. It is allowed to ferment from fifty to seventy-five hours, during which time it is frequently stirred, and all the matter coming to the surface carefully skimmed off frequently during this time, after which it is most carefully strained through cloths into casks

Tokay Ausbrach is said to contain sixty one parts of the essence and eighty-four parts of the wine. It has a powerful and peculiar aroma—which would never be forgotten by any one who tasted it.

The vineyards which produces this wine are owned by the Emperor and some of the nobility, and it has long commanded most fabulous prices. Forty years ago it sold in Vienna as high as fifteen Napoleons per dozen, or about sixty dollars in gold.

At the Grant dinner given at Delmonico's, this wine was on the list, and its price here is something like twenty dollars per bottle of our currency.

This wine is not fit for use until after three years of age. If exported in casks it always ferments in transportation by sea, but will work itself clear.

When bottled in Hungary a space is always left between the cork and the wine or the bottle will break, and a little oil is poured on top of the wine in the bottle, and a piece of bladder tied firmly over the cork.

The genuine has an oily taste, a slight taste of earth, with some astringency, but its peculiar aroma will always indicate it, as it can never be mistaken—no other wine in the world at all resembling it.

There is a peculiar wine in Hungary, which so far as I know, is never exported, called generally Vermuth, which is made by a mixture of wormwood, seeds of various kinds, and spices, over which old wine is poured, and then securely corked. It is held in high estimation at home.

In later years it has been common to mingle the "essence of the Tokay" with various kinds of Hungarian wines, to give them that peculiar flavor which is so rare, and which commands such prices.

Few men would pronounce them better for this admixture, but it has characterized the wines because of the fashion.

There is nothing especially attractive in this peculiar taste, but fashion has decreed it to be *par excellence* superior to most others. To those unitiated in it, the major part would not like it. All would say that it was strange and peculiar, and none would prefer it on its own merits, in my opinion.

IN AUSTRIA.

Outside of the Hungarian wines the wines of Austria, as a whole, are of a very poor quality.—They are below the standard of the Italian wines. Perhaps the best are those produced in Transylvania The wines of the Tyrol are much better than those of Austria, outside of Hungary, but these are all consumed in the country. There are some fair wines, both white and red, made near the head of the Adriatic Sea. The Cape d'Istria and St. Patronio are wines of merit, but within the vast territory of Austria preference should be given first to the Hungarian wines, next the Tyrol and last, the wines of the various other provinces.

THE CULTURE.

In Hungary the vines are planted and cared for more after the French methods, on poles to which the vine is trained, the poles being often removed in the winter, and the vine lying on the ground.

The culture in the Tyrol has been more carefully explained in another article.

In other parts of Austria I observed the pollard system of culture, with occasional vineyards trained low to trellises, after the German methods.

The vineyards between Bavaria and Vienna, and after leaving Vienna going toward Prague, were cultivated usually in the German methods, and resembled those vineyards in externals planted by the Germans in Ohio and Missouri, and some of the earlier vinyards on Crooked Lake near Hammondsport, New York, the vines set about four feet apart, in the row, with the rows quite close together, and in all cases trained to a single stake.

The vine was in almost all cases small and fragile, and exhibited nothing of that luxuriant growth so marked in the Tyrol, in Northern Italy, or in some portions of America. It was very rarely seen more than five feet high, and quite commonly not more than three or four feet in height.

Every vineyard that I saw, without exception, in the whole of Austria was worked well and quite free from weeds. The most perfect culture in our own vineyards at home was never better than the culture in any part of Austria. The ground was kept thoroughly and constantly stirred and in splendid order.

CLARK BELL.

BRANDY MADE OF LIVERWORT.

An important discovery has lately been made by Dr. Stenberg, Professor of Chemistry at the Caroline Institute of Stockholm, Sweden. It is the distillation of Liverwort, which grows abundantly on all the rocks of that country, and from which an alcohol of pure taste has been obtained. The liquid rectified only once, is similar to the best brandy, made of grain. The learned Professor has just published a pamphlet on the subject, under the title: "How to make Brandy of Liverwort." He congratulates the public to his discovery and all the proceedings which he proposes. He thinks that all the different species of Liverwort may be made useful, but he gives the preference to that, which is the favorite food of the reindeer, and which is known under the name of *Cladonia Rangiferina*.

New Advertisements.

ORNAMENTAL TREES.

The Oregon Fir Tree Association.

We are now prepared to Ship to all parts of the country, all the handsome varieties of the Fir Tree that so abound in Oregon. The trade of the Association is at present promising much greater success, especially on the Pacific Coast, than they have formerly anticipated. The nurseries of California do not seem to have adopted the Oregon Fir, only as we have recently taken some of their orders from them.

We find them to possess an attraction as an ornamental tree rarely equaled. The Yellow Fir and the Balsam Fir are the most popular varieties; the Yellow Fir the most hardy—thriving in almost any soil or climate. Our trade with the East is promising; our trees have arrived there in good condition and are growing.

The Association is prepared to supply a large demand for Trees, from six inches to four feet in length, but we cannot fill orders for any more than four feet.

Efficient Agents wanted in all parts of the country, to whom we will extend the most promising advantages. We shall be glad to receive a communication from any one who might desire such an agency, or from any one who may desire our Trees.

Orders for Trees to be set in the fall should reach us as early as October, and those for the spring supply as early as February.

We Ship none but parfect and healthy Trees.

All communications should be addressed:

REV. C. W. TODD,
Oregon City, Oregon.

LAKE VINEYARD WINE COMPANY.

The undersigned, hitherto doing business under the name and style of B. D. WILSON & CO., have this day changed their firm name, and will hereafter continue their business as Wine Growers and Merchants, under the name and style of

"The Lake Vineyard Wine Company."

J. De BARTH SHORB,
CARLTON CURTIS.

We desire to call the attention of the Trade to our large stock of the celebrated LAKE AND MOUND VINEYARD Wines, and choice assortment of Wines and Brandies from the best Vineyards of California. These wines, bearing our trade mark on package, label, and seal, we guarantee of uniform good quality, inferior to none, and ready for safe shipment to any part of the world.

Orders for the Atlantic States will be filled by our New York House from their depot, at No. 45 Murray Street, New York.

SACRAMENTO.

LELAND STANFORD, President.
H. F. HASTINGS, Vice President.
JOS. CRACKBON, Secretary.
J. M. GREY, M. D., Physician-in-Chief.
SCHREIBER & HOWELL, General Agents.

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,
(Of the firm of Hucks & Lambert.)

Valuable Patents FOR SALE

We invite the attention of energetic Mechanics to several very

VALUABLE INVENTIONS

for which we hold the

PATENT RIGHT

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a hand some return for labor and capital can be made from.

WARREN & CO.

VALUABLE PLANTS FOR SALE.

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,
tf Farmer Office.

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

OUR NEXT NUMBER.

Next week is our National Jubilee Week, the NATIONAL HOLIDAY, and agreeable to our custom, we shall issue no paper. We give rest and recreation to workmen in our employ, and we claim and really need a little ourselves, and those who wisely take this week for social recreations with their families and friends, will not wish any other reading than the general news.

Our next number—24—will appear July 15th. That closes this Volume.

We take this opportunity to return our sincere thanks to those who have kindly interested themselves to extend the Circulation of the FARMER, and hope we may ask all our friends to aid us with our NEW VOLUME; for such aid we shall be truly grateful.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of our *Journal*, to which we would direct their *special* attention.]

We call special attention to the very happy letter of our valued correspondent of early days, "Margaret," from the beautiful region of the Geysers, Yulupa Valley, at "Carrs Ranch", the Letter will be read with interest by all, and by many to whom allusion is made, with particular interest.

The spot must be beautiful, and just what we should expect from those who call it "Home," we have long hoped to visit our old Subscriber and trust soon to do so, we know our readers will look for a continuation of these most happy Letters.

We are pleased to insert the lines of Bertha Bay they speak truths.

We have a very interesting Letter from Jenny Dare, also Lines from Bertha Bay, both will appear in our next.

SANTA CLARA COLLEGE.—We regret we are obliged to defer the full account we had prepared of this most excellent Institution, but as the Illustrations and some Essays did not reach us we we shall give all in our next.

Acknowledgements.

Articles Received at the California Farmer Exhibition Rooms, No. 320 Clay Street.

AGRICULTURAL DISTRICTS OF CALIFORNIA.—We have a circular from the office of Messrs. Bacon & Co., announcing the Publication of a pamphlet of about 50 pages, giving statistics of Lands for sale, where and rates, wages and terms &c., an edition of 10,000 copies to issued at the low rate of 15cts. per copy.

TRAVELLERS GUIDE.—We have the New *Guide Book* just issued from the office of the publisher of the Guide; this is a valuable little Hand Book for the traveller, giving all the various traveling routes, by Steamer, Railroad, or Stage, a very credable work of about 100 pages.

We have received the new Catalogue of the Sacramento Seminary, under those truly talented and accomplished Teachers and Principals, Hermon Perry Esq., and Lady, and a corps of able Teachers.

We are glad to see by the Catalogue and the larger list of Pupils, that it is in a highly flourishing condition: we rejoice to know it is so.

We have many Pamphlets and Periodicals on our table, but too late for notice this week.

TRADES UNIONS.—The recent and most unpopular course pursued by the Trades Union, as reported at the "Booth Foundry," has caused much excitement, we have several Letters on the subject, shall speak of them in our next.

DON'T FORGET THE FIREWORKS.—A. Georgiani has a large quantity; and will furnish them at very low rates—call and see him

OUR NATIONAL JUBILEE.

The Fourth this year falls on Sunday, therefore the general Jubilee and Public exercises, will take place on *Monday the Fifth.*

We presume the clergy throughout our whole country, will make the subject of our *Country and her Institutions*, the theme of their discourses; it will give them a good opportunity to impress that religious view of it upon their hearers our country so much needs.

The return of this day should awaken in the heart of every Citizen, a lively sense of gratitude to God, for the blessings we enjoy in this Land of Liberty, and we should so observe and keep the day, as to prove we value the blessings we enjoy, as not to join with or approve any scene or act which casts a reproach upon the Memory of Washington, or the Patriots who gave their lives for the Liberties we have inherited.

We cannot utter a better word or prayer for the observance of this day, than in the words of the Poet Pierpont.

Day of glory! welcome day!
Freedom's banners greet thy ray;
See! how cheerfully they play
With thy morning breeze.

* * * * *

God of peace!—whose spirit fills
All the echoes of our hills,
All the murmurs of our rills,
Now the storm is o'er,—
O, let freemen be our sons;
And let future Washingtons
Rise, to lead their valiant ones,
Till there's war no more.

STEAM LOCOMOTIVE HARVESTER.

A Pleasant Picture.—We are much indebted to Messrs. Webster Brothers of Stockton, the well known Agricultural Pioneer House for this interest, for a very handsome Photographic Picture of the New Locomotive Steam Engine, designed to do the Harvester's work and also do the Plowing for the Farmers of the State.

When we look on this Picture, Imagination carries us forward to the time when this mighty weapon for Agriculture shall begins its day's Plowing and Sowing the seed and when the sun sets upon that day's work, FIFTY ACRES has been Plowed, Sown down, Harrowed and finished—*the One Day's Work*; and at Harvesting it shall guide the Harvester through the field and the day's work shall be, *Fifty Acres*—shall be cut, threshed, cleaned and sacked, this is to be as certain as we live. We do not say, this year, or next year, for improvements will be made, but *it will be done very soon.*

As we look upon this Picture we see the faces familiar to us Webster and his aids, Baxter, and many citizens of Stockton, and Farmers of that good and rich valley of the San Joaquin. We also see George Francis Train, a Genius that few men can understand; a blazing meteor—brilliant here for a moment, then gone to blaze elsewhere, and as we look upon him and this Engine, we would call them *Twins.* We see no "steam on" the Engine, but we see there in the face and brow of Train, that *he has steam on* ready to make a speech and endorse every word we say of the *future workings* of this wonderful Machine.

Put on your steam thou Genius! Train,
Fire up your boiler—speed away,
And give the date when every plain,
Works FIFTY ACRES every day.

We remember Mr. Train in years gone by, when the *First Clipper Ship*, built for his Uncle by Donald McKay of East Boston, (the "Ocean Monarch") was launched, and when she was ready for Liverpool and we were booked passengers together.—The same energy which marked the man then, marks him now; he is himself a Steam Engine.

But the Stockton Wonder, Messrs. Webster Brothers deserve very great credit for what they have done to advance the Interests of Agriculture.

LIFE INSURANCE FOR WOMEN.

We have often wondered that when so much has ben done for Insurance of Mens lives, so little has been spoken as to its importance for women.

We would ask with all due earnestness, why a widow who has a family dependant upon her for support, should have her life *Insured* as well as a man? And why should not any single woman insure her own life, when that life is spent in supporting a loved mother.

We learn with some surprise, that some Life Insurance offices refuse to take women, as they consider them a greater risk than men—this must be a mistake.

If woman in her Maternal trials, Is exposed to danger and death, it is more than counterbalanced in man, by her freedom from the vices of of strong drink and other dissipated habits, and to the exposures of Steamer and Railroad accidents. Reflect then gentlemen, Directors of Life Insurance, woman is the better man in this risk.

We are glad to say that the Pacific Insurance Co., (Mess. Schreiber and Howell, Agents,) Sacramento and this City, offer liberal terms, and have already issued quite a number of Policies to women. This Life Insurance Co., have been very successful and are doing a very large business—they have a paid up Capital, and are a very safe Company, and we commend them most heartily to those who wish a safe Policy.

A reward is offered by Western farmers for a grasshopper trap.

Imitation calicoes composed of paper, which are said to wear well, are made and sold in England.

CALIFORNIA WINES.

LANDSBERGER & CO.

California Wines are now occupying a very prominent place among the Wines now offered in the various Wine Markets at the East, and also abroad.

It is no uncommon matter now, to notice large shipments of California Wines to the different trade marts of Europe, for, within a few years the character of our Wines have so much improved, that connisseurs of wines in Europe, are surprised at the Excellence of our Wines, and are now sending orders here quite liberally.

Among several large and well known dealers in California Wines who export largely, none stand higher than the house of Landsberger & Co., of of our City. Mr. Landsberger is well known as an old Pioneer Wine Dealer, familiar with the wine districts of our State, and familiar with the best wines; long years of experience has given him eminent ability.

Recently, this House have enlarged their Warehouses, adding other spacious rooms, extending from 423 to 429 Jackson St., and the present firm is now composed of I. Landsberger, Arpad Haraszthy and Oscar Schlesinger,

Mr. Haraszthy is widely known as of the Sonoma Family, all wine dealers and experts in the knowledge of wines; Mr. Haraszthy has made himself master of the art of wine making, by extensive travels and researches in Europe, as his very valuable and highly interesting Letters from the Vine land of the Old World, Published in the Farmer some years since, prove, that this gives him that knowledge, which, added to years experience here in this firm, qualify him for every duty as a skillful vintner.

Mr. Schlesinger a well known Merchant of experience now in this firm make a Strong House and having the Knowledge, Capital and the Control of many of the very best wines of the State, will secure and deservedly so, a large share share of the Wine business to this house.

The Wines sent out by this house bear a high name, the Champagne Wines cannot be excelled, and by many are preferred to the imported Champagnes.

Landsberger & Co., have recently prepared a *Sparkling Muscatel*, that is of very superior quality, and will become a great favorite, it will be largely used at the celebration of our National Holiday.

We are pleased to make this report as we know it is fully deserved, and we trust, the new comers to our State, our most distinguished visitors, will give us their unbiased opinion upon California Wines we know they will stand the test.

LIGHT.

Scientific minds have been to work for centuries in order to discover some substance, or invent some Instrument by which great illuminating power can be had, or a greater brilliancy without a reflex injury to the eyesight.

A vast number of Inventions have been patented, and *House Lamps* innumerable have been before the public, their name is *Legion*, and at last Gas was required to be introduced into dwellings as the best light for general use.

There has however been a pressing want for a Lamp for *Individual uses;* for the Professional Man, the Student, and for many individual Cases, where all other contrivances have entirely failed to give that kind of clear, soft, steady light, so much needed by those who must spend many long hours in duty at the midnight labors.

What has always been needed is that kind of light which will not try the eyes, or injure these main illuminators of the body and mind, for their various duties.

This want has recently been most admirably supplied, by the NEW ST. GERMAIN, OR STUDY LAMP, which has been found on trial, to be the *very best invention yet known*, and from the Testimonials which we append to this article, we feel confidant that it will prove all that is required.

Our own Editorial duties are very great, requiring 4, 6, and 8 hours night work almost every night, and we have suffered for the want of a good light for years, and we feel that we can now cry out, Eureka!

The St. Germain Lamp we feel confidant will give great satisfaction to all who try it; we are so well satisfied with it, that we would not be without it were it to cost *One Hundred Dollars.*

This Lamp will not only be found very valuable for Professional Men, Students, &c., but we can most earnestly commend it to that class of our working Women, who toil by night at the sewing machine, or with the needle, or our Teachers of Schools and all classes who toil by night.

We here append the strong recommendations of "Henry Ward Beecher," whose words are brief but potent, also that of Professor Henry, this also speaks strongly. We advise all to go and see these Lamps.

TESTIMONIALS.

I consider it the safest and pleasantest article of the kind I have ever used. It gives a brilliant unwavering light, very agreeable to the eye, and is safe on account of explosion, since the vapor of the petroleum is entirely cut off from the flame, the reservoir being at a distance from the burning point and the supply tube constantly filled with the liquid.

Prof. JOSEPH HENRY,
Sec'y Smithsonian Institute,
Washington, D. C.

Your student lamp has become a great favorite in my house. I employ it in preference to all others. I can suggest no improvement and desire none.

Rev. HENRY WARD BEECHER.

A NICE CUP OF COFFEE.—Those who may desire a very nice dish of Coffee made quick, easy and delicious and made upon the table as you want it should call at Mr. Kohler's Music and Fancy good Warehouse, cor. Sansome and Clay streets, and see a great curiosity, and a new and valuable invention to *make a nice cup of Coffee.*

DR. ZEILE'S TURKISH BATHS.

We attended the opening of this New, Spacious and most Elegant Establishment the last week, and we confess our pleasure and our surprise and astonishment, at this truly wonderful and magnificent Establishment.

That our readers may not be led to suppose that Dr. Zeile's Baths or Buildings are like the ordinary Baths, we state that the building is a stately one, three stories high, elegant in style, costly in work and erected at an expence of over *one hundred thousand dollars.*

The fitting and furnishing this Oriental Palace, costing some *fifty thousand dollars* more, and no person can have any conception of the Elegance and luxury of these baths, until they shall visit this place and try them.

Those that have read of the Turkish and Roman Baths, their luxury and refreshing nature, can realize all they have read here, and we can testify to the fact, that not in London or Paris is their anything superior, nor in any of the Eastern States anything to equal them.

These Baths in all their variety can hardly be described; they are wonderful—and perfect in all their varieties, numerous spacious rooms richly furnished are ready for patients who desire to remain any length of time.

We have taken copious notes of the different apartments which are indeed wonderful, and shall give a sketch of the same very soon.

A very large number of guests, hundreds, were present at the opening, the Doctor was in his element, evidently loving his profession and understanding it thoroughly.

A handsome collation was prepared, and the richest of wines liberally dispersed—all were pleased and all satisfied. California "can beat the World," even with its famous Baths.

Visitors to our city should visit these Baths—Dr. Z., deserves great success, and we certainly wish it to him.

DOG DAYS.

"The Dog star rages; nay, 'tis past a doubt,
All Bedlam and Parnassus is let out."

We are now satisfied that "Dog Days" are upon us. We have had here in this cold windy city the thermometer up to 90° in the shade—we think warm enough for our Bay City.

The papers of the day chronicle numerous Quarrels, Runaways, Suicides, Murders, Robberies, Drownings, and other calamities too numerous to mention, so we think the "Dog Star" has had some influence to bring about so many troubles.

A friend at our elbow inquires if the corner groceries where card playing and whisky drinking flourishes so well, and the *Dog* holes under ground and in dark places leased by our City Fathers and Licensed, has not as much to do with these calamities as the "Dog Star?" We opine they have, and more too. Now we suggest, that as we have *officers of the Law* who go about and remove *stray dogs that bite*, cage them and put them away, these, or other officers of the Law should go and cage up these "Dog holes" that are the cause of *nine tenths* of all the calamities that befall poor, frail humanity.

FRUIT GROWERS' AND DEALERS' CONVENTION.

We have received a Circular signed by the principle FRUIT DEALERS of this city, also by some of the GROWERS of FRUIT in the country, calling a Convention of all interested, to meet in this city on the 7th of July, at the rooms of Wakelee & Co. corner of Kearny and California streets, to consult upon the best measures to be adopted to promote the general interest in Shipping Fruit over the Pacific Railroad to the Eastern States.

We heartily approve a united action on this subject and hope wise and well arranged plans may be adopted so as to advance the interests of Fruit growers and that of Fruit dealers and the general interests of the State also.

We hope the Fruit growers in the country will make it their special duty to come to the city and attend this Convention, the *Seventh day of July*—which will be *next Wednesday.*

LOSS OF SILK WORMS.

We regret to learn that there has been two serious losses experienced by our energetic Sericulturists very recently.

The first was by William M. Hayne, Esq., of Sacramento. The case is reported as follows:—Mr. Hayne himself writes to the *Union* and says: That he has recently lost 500,000 silk worms by using artificial heat improperly. The smoke-pipe ran lengthwise through the rooms where his worms were at work. During the night the damp cool air condensed and generated a liquid kreosote, which ran down the pipe at the elbow joint, and dripped on the floor, filling the room with a poisonous atmosphere, fatal to the worms.

The *Union* of the 25th also reports that George & Co's Cocoonery near Nicolaus, was destroyed by fire last Tuesday, (22nd) together with 325,000 silk worms. The origin of the fire is a mystery! [There is another mystery to us, and that is:—Why was it not insured?—Ed. Farmer.]

A NEW POLITICAL JOURNAL.

The Tribune.—We see it announced that with the opening of this month, Major Jack Strattman will send forth his initial number of the *Tribune*, a Journal that will act a as Tribune before which Politicians must come for examination and trial.

The Major promises to be vigilant and fearless, and to expose corruption in high places with an unsparing pen. This the Major can do, and do well and faithfully too, as he is so familiar with the *wire workings* of all the Political machinery of this State.

We know of no man who is better qualified to expose the corruption of Politics than Major Jack Strattman, and if he sets to work in the right good earnest manner he has promised, he can do the State and Nation great good and himself very great credit.

MORE DISTINGUISHED ARRIVALS.

First among the most distinguished arrivals [illegible] the Pacific Shores, over the Pacific Railroad, may be named the Hon. W. H. Seward late Secretary of State under President Lincoln, and one closely allied to him in the terrible calamity that befel our Nation, when the President fell by the hand of the assassin Booth.

Mr. Seward is now advanced in years, and the great service he has done the Nation in his official capacity, in the dark hours of the Nation, should command the Reverence and Homage of every patriotic citizen.

Mr. Seward arrived at Sacramento last evening and was received with lively demonstrations of honor and gratitude, Gov. Haight received him and gave him welcome to the Pacific Shore.

A collation was ready for him at the Orleans Hotel, where some one hundred and fifty citizens gathered to do him honor.

Mr. Seward will reach this city, this or tomorrow evening, where he will also be welcomed and the respect paid to this truly distinguished Statesman and Patriot.

THE PRESS.—The leading Newspapers in the Eastern Cities, are now sending on their Representatives, in order that California may have justice done to her, in her resources, climate, and wonders in nature.

Horace E. White, Esq., of the Chicago *Tribune* and W. E. Smith, Esq., of the Chicago *Republican* accompany Mr. Seward and will soon be with us.

LITERARY WOMEN.—As one of the leaders of this class, Miss Anna E. Dickenson the distinguished Lecturer, is now to be with us accompanied by her brother Rev. J. Dickenson, and undoubtedly we shall hear this Literary Woman by her Eloquent Lectures.

—There has recently been several distinguished Politicians in our midst, they now can come and go like meteors, for such indeed are many who blaze in this, to them, glory of a Political life.

COLLEGE EXHIBITIONS.

The last few weeks has been the Grand *Commencement Weeks* among our Colleges all around us, at Santa Clara at San Jose at Benecia at Oakland, at Sacramento, at Marysville and in our city; at each and all of these places, very successful Exhibitions of the several Colleges have been had, giving general satisfaction and pleasure to Parents and Gaurdians of the Students, and reflecting great credit upon Teachers and Pupils also.

The Santa Clara College we have spoken of in our report, that of the Sisters of Notre Dame, but same days, the Santa Clara College was a complete success, giving great satisfaction; there are about 500 pupils in that College.

The Saint Ignatius, has over 600 pupils was successful and very interesting Exhibition, the Exhibitions at each and all the other Institutions was of a high order; our Public Schools also such as to cause every citizen to feel proud of them, the Exhibitions were very fully attended and created quite a furor of enthusiastic pleasure and satisfaction, most honorable to Teachers and Pupils.

PASSENGERS COME AND GO.

Notwithstanding the great number of passengers that are now coming over the Pacific Railroad, and the great number that are going Eastward every day, for the travel is indeed immense, (we hear that the reciepts at one station, *Elko*, average $[illegible] 000 per day,) yet our line of Pacific Mail Steamers go as full as usual, and come in loaded to the utmost capacity.—The Conatitution which sailed yesterday, carried 224 passengers and $437,[illegible] specie, specie mostly abroad, none to New York.

WATER! WATER!! WATER!!!

Look to your Pumps Farmers, the dry season is upon you, and your cattle, horses and other animals will suffer without a full and free use of water; see to it, you have good pumps and plenty of water.

If you have not good Pumps now, see advertisements in our Journal, the Pacific Pump Co., and Gerrish Pump, should be immediately examined by you, choose for yourself both are good.

WHAT DU YOU WANT?

We are in constant receipt of Advertising Circulars, Cards, Letters, Pamphlets, &c., giving more or less information relative to new Inventions, Stock Implements, Nursery Articles, Seeds, Books, Paintings &c., and oftimes we are requested to *Publish these Circulars*, and to *call attention* to their *Business &c.* and yet these very modest persons do not stop to think that this will put us to *considerable cost*, and that too without an equal chance that *we* should be repaid for *our labor* by any good that could come to us

Now we desire to give answer to all such persons in *this one special card.*

We will take the Golden Rule and hold it up before them, and ask each of this class of agents to change places with us, and tell us if they would do this class of *Advertising for nothing?*

We are soon to enter upon our THIRTY-SECOND VOLUME; in all our past years we have cheerfully and voluntarily advertised largely for Religious, Benevolent, Scientific and Literary Institutions, and without charge, to the amount of many thousands of dollars. We have cheerfully exchanged with many Journals, whose price was one half to one fifth in cash to our own, and this to *give them* the benefit of our Journal, and we have supplied many Institutions with our Journal during its entire period, *Free*, and this last we shall continue; but there are some things we *cannot* and *must not do*, because it *is not right*, and the things we cannot do, is to Advertise for everybody and everything *without pay.*

When we recieve this class of Letters and Circulars, we shall send a marked copy of our Journal with this card to such persons, and they must then understand that we ask a fair *Reciprocity* for *Labor*, if they manifest this well; if not, well for us

We wish however to be understood, we shall always to be happy to do all in our power to aid every Benevolent and Good Enterprise, that is strictly "Pro Bono Publico," without other reward than the satisfaction of doing good.

THE CALIFORNIA FARMER!

OUR THIRTY-SECOND VOLUME.

In the opening part of the next month we shall commence our THIRTY-SECOND VOLUME of the

"California Farmer."

A few numbers more and we begin the closing Volume of our SIXTEEN YEARS' LABORS with this Journal.

We do not feel that it is necessay we should launch out with any new promises of what we shall do for the *Cause of Agriculture* and its kindred Sciences, for the past must speak for us; and those who can look back to the time when we launched our little bark, will now justly recognize what has been done to advance this great and important source of wealth to our State by this Journal during these long years.

One thing we do know, "*We* have done what we could," and we hope with our New Volume to enroll many New Voluntary Subscribers. For all such cooperation we shall ever be duly grateful.

We return our most sincere and heartfelt thanks to all our Patrons for their many kindnesses, and hope to continue to walk with them many years in the pleasant scenes of Rural Life and Rural occupations.

The Terms of the FARMER will remain the same —$3 per year, $3 for six months, (gold price,) and $1 extra when payments have been delayed; and these terms are unchangeable. A liberal allowance for clubs; when five copies are paid for, six copies will be furnished.

WARREN & CO., Editors and Publishers,
320 *Clay St.*, San Francisco.

TEN REASONS WHY EVERY FARMER AND STOCK-RAISER SHOULD TAKE THE "CALIFORNIA FARMER."

1st. Every Farmer and Stock-raiser should be a reader of the Journal connected with the interests of his own profession in his own State.

2d. Every such person should give his sanction and support, generously and voluntarily to a Journal that advances his own particular business in his own State.

3d. Every such person is *benefited* by the publication of such a Journal, and is in justice bound to reciprocate such labors.

4th. No person engaged in these employments can be without such a Journal without the loss of many times its cost annually.

5th. The Farmer and the Stock-raiser will always be better advised of the markets, and that kind of information so important to his interests by constant access to a Home Journal.

6th. The *California Farmer* has faithfully advocated the best interests of the Farmer and Stock-raiser for nearly sixteen years, and is the *only Agricultural Journal in California.*

7th. The *California Farmer* contains the most important information relative to these interests in every branch of Agricultural science.

8th. The *California Farmer* contains the announcement of all New Seeds, Grains, Grasses, etc., together with all New Implements that will advance the cause of the cultivators of the soil.

9th. The *California Farmer* contains the arrival and introduction of all the best Stock of all kinds as soon as known, together with the full Market Reports of all the interests appertaining to Agriculture.

10th. The *California Farmer* is now the *only paper* on the Pacific Coast that is continued by its *original Editor and proprietor*, commencing at the time this Journal commenced; and having been constant in its efforts for the good of these interests, deserves the cheerful patronage of all good men.

NEW

Russian, Turkish & Roman BATH HOUSE,

Nos. 524 TO 528 PACIFIC STREET,

DR. ZEILE INFORMS THE PUBLIC THAT his New Bath House is now open for the accommodation of patrons. Neither pains nor expense have been spared to make this the best and most commodious establishment of the kind, either in Europe or America.

Convenient and separate apartments are afforded for the administration of bathing by Steam, by Hot Air, and by Plain or Medicinal Waters.

Trained and polite attendants will use their best efforts to give complete satisfaction.

DR. ZEILE has also attached to his bathing establishment a few handsomely furnished Suites of Rooms, where he will receive and entertain patients for treatment, who are not affected with any contagious or infectious disease. To secure this accommodation it will be always necessary for engagements to be made in advance of the arrival of the patient.

Open daily from 7 A. M. to 9 P. M. On Sundays from 7 A. M. to 2 P. M.

[For the California Farmer.]

SUNLIGHT.

BY BERTHA RAY.

Let us run into the sunlight,
As dark as life was made,
We never make it better,
By living in the shade.

The wicked, God-forsaken,
With their lives of crime and blight,
May hide away in darkness,
And burrow from the light.

We fly away from darkness,
As we fly away from sin;
We never shut the window up,
That lets the sunlight in.

It is shining through the prison bars,
Upon the prison floor—
A spirit from the world of light,
To us forever more.

ASK MOTHER.

BY GEORGE COOPER.

Where is the sweetest pet,
The brightest birdie yet?
Whose are the prettiest eyes,
Most loving and most wise?
What form of fairest mould
Is worth its weight in gold?
You can't imagine? well,
Ask Mother—she can tell!

Where is the sunniest gleam
That makes her life a dream?
Whose are the rosy toes,
And blessed little nose,
And dimpled hands and feet,
The models all complete,
Which nature can't excel?
Ask Mother—she can tell!

Who is the grandest king,
Or queen, or anything
That may be great or high?
Who wandered from the sky
The best of girls or boys,
To be her joy of joys?
You guess—the Baby! well,
Ask Mother—she can tell!

WORK AND WOMEN.

Miss Catherine Beecher is at a Swedish Cure establishment in this city, and a few days since a meeting of women was held at the house where she is and a series of resolutions was adopted which have some good sense in them. Mrs. M. O. Roberts presided at the meeting, and several ladies, who know that the Anthony, Stanton and Dickinson movement is worse than foolish, participated in the proceedings. Here follow the resolutions.

Resolved—That one cause of the depressed condition of women is the fact that the distinctive profession of her sex, as the nurse of infancy and of the sick, as educator of childhood, and as the chief minister of the family state, has not been duly honored, nor such provision been made for its scientific and practical training as is accorded to the other sex for their professions; and that it is owing to this neglect that women are driven to seek honor and independence in the institutions and the professions of men.

Resolved—That the science of domestic economy, in its various branches, involves more important interests than any other human science and that the evils suffered by women would be extensively remedied by establishing institutions for training women for her profession, which shall be as generously endowed as are the institutions of men, many of which have been largely endowed by women.

Resolved—That the science of domestic economy should be made a study in all institutions for girls; and that certain practical employments should be made a part of common school education, especially the art of sewing, which is so needful for the poor; and that we will use our influence to secure these important measures.

Resolved—That every young women should be trained to some business by which she can earn an independent livelihood in case of poverty.

Resolved—That in addition to the various indoor employments suitable for women, there are outdoor employments especially favorable to health and equally suitable, such as raising fruits and flowers, the culture of silk and cotton, the raising of bees, and the superintendence of dairy farms and manufactures. All of these offer avenues to wealth and independence for women as properly as men, and schools for imparting to women the science and practice of these employments should be provided and as liberally endowed as are the agricultural schools for men.

We have long urged such views as these on the unwilling ears of women. The cry that is raised about women suffering for the want of work and good wages is [a needless cry, because there is more work for women than there are women ready and willing to do it. Society is now suffering for the want of women competent and willing to do the labor necessary for its comfort. Take the department of dressmaking. In every street of the city and in every village of the land there is demand for *competent* dressmakers. So with housework. The want of *help* in the house is the crying evil of domestic life.

HOME AND HEAVEN BELOW.

The man who stands upon his own soil, who feels that by the laws of the land in which he lives—by the laws of the civilized nations—he is the rightful and exclusive owner of the land he tills, by the constitution of nature, under a wholesome influence not easily imbibed from any other source. He feels, other things being equal, more strongly than another, the character of a man as the lord of animate world. Of this great and wonderful sphere which, fashioned by the hand of God, and upheld by His power, is rolling through the heavens, a part is his—his from the centre to the sky. It is the space on which the generation before moved its round of duties, and he feels himself connected by a link with those who follow, and to whom he is to transmit a home.

Perhaps his farm has come down to him from his fathers. They have gone to their last home; but he can trace their footsteps over the scenes of his daily labors. The roof which shelters him was reared by those to whom he owes his being. Some interesting domestic tradition is connected with every enclosure.—The favorite fruit was planted by his father's hand. He sported in boyhood beside the brook which still winds through the meadow. there lies the path to the village of earlier days. He still hears the voice of the village bell which called his father to the house of God; and near at hand is the spot where his parents laid down to rest, and where when his time has come, he shall be laid by his children These are the feelings of the owner of the soil. Words cannot paint them. they flow out of the deepest fountains of the heart: they are the life-spring of a fresh, healthy and generous natural character.

SHREWD.

A gentleman was chatting with a little girl on a railway train, when she suddenly looked up in his face and said,

"You look like Abraham Lincoln."

"Do I!" said the gentleman; "how do you know I'm not?"

"*He's dead*," said the child, with an astonished look at the questioner; "they *killed* him."

"Well," said the gentleman, "but didn't Abraham Lincoln have a brother?"

The child looked puzzled for a minute, and then quietly remarked,

"My father saw Abraham Lincoln."

"Did he?" asked the gentleman.

"Yes; after he was dead he saw him. Did *you* ever see him?"

"No," said the gentleman. "I never saw him."

"Then," said the child, triumphantly, "*course you ain't his brother!*"—*Little Corporal.*

Sorrow.—At whatever sign of genuine sorrow no one but a brute can mock. Sorrow is not more a chastener of the true soul than it is an inspirer of reverence. There is a measure of grief that is spiritual, elevating, purifying and divine. Most humanizing and divine is that immortal picture of Niobe. The tears of a mother over her dead babe—her first born—or the sadness of whatever heart is bereaved—these are sacred symbols of the divine that stamps and hallows our brotherhood—our humanity.

Canning Green Gooseberries.—Set the jar in warm water, and fill with the berries; then pour on boiling water until the jar is entirely filled; then seal immediately. A jar of gooseberries canned in this manner four years ago look now as fresh and plump as when first put up; and no sign of mould on them.

—"Do you know sir, that I am worth one hundred thousand dollars?" "Yes, I do, and that is all you are worth." Two men died withic the past month, one worth twelve millions, the other fifteen millions. Who knows their worth today?

—A good deal of the trouble of God's people arises from a mistake and misaprehension of God. They judge of God by their own sense, not by his promise; by their own frame, not by his constant nature.

—A late Paris paper revives the report of the impending marriage of Madame Lincoln, widow of the President of the United States, with Count Schmidtville, Chamberlain of the Duke of Baden.

—Nashville shopkeepers hire good looking girls to promenade the streets in dresses of their manufacture on pleasant days.

—It often happens, when the husband fails to be home to dinner that it is one of his "fast" days.

FLORENCE

The FLORENCE is warranted to be the best and most reliable Sewing Machine in the world. It seldom gets out of order. If there is one within a thousand miles of San Francisco not working well, I will fix it for nothing and pay all express charges.

SAMUEL HILL, Agent,
111 Montgomery street,
San Francisco.

OUR HOME INTERESTS.

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact and the probability that unless checked this large sum of money will be increased each year and in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, to be sent East for investment in the purchase of Life Insurance, instead of being retained at homes to promote and insure its INVESTMENT HERE the commercial, mechanical, and agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States of the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION whose capital and assets will not be impaired, or in any way affected by the change in values that will sooner or later come by a return to specie payments in the other States of the Union. Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to the citizen of this State, who feel an interest in its progress to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

THE CALIFORNIA

MUTUAL LIFE

Insurance Company

Of San Francisco.

Miscellany.

OUR SILK WORMS.

The Silk interest and its great future results must depend upon a proper management now.

San Jose, Los Angeles, and Sacramento seem to be the points of greatest interest, and although our friend Provost has selected Los Angeles, our Special *City* of Sacramento seems to *strive* for the prize in the Silk business.

The Sacramento *Bee*, ever busy, gives us the following picture of the

COCOONERIES OF SACRAMENTO.

In a district lying just east of this city, and the area of which is not more than a mile square, there are in full operation six or seven cocooneries, showing the great interest now being taken in that branch of industry—sericulture. The proprietors of these cocooneries are sanguine of financial success, and feel satisfied that the business cannot be overdone. On Sunday last we had the gratification of visiting four of the cocooneries; but the lateness of the hour when we had disposed of them prevented our visiting the others on that day. Smith Brothers, of Smiths' Gardens, have lately completed a cocoonery, in size 30 by 80 feet, and having 18 feet posts. Hot air from the heater is conveyed through the building by clay pipes, which are supplied with registers, regulating the temperature at between seventy and eighty degrees. There were in that cocoonery between 200,000 and 250,000 worms, and more constantly hatching; this cocoonery has accommodations for 1,000,000 silk worms. Messrs. Smith have over 100,000 mulberry trees. The rapid growth of these trees is astonishing. We there saw mulberry trees from 12 to 15 feet high and three inches through, which were seedlings a year ago last spring. Calling at the cocoonery of Burnett & DeMerritt, we found a building 24x50 feet, having 14 feet post, with heater, cellar, etc., and space for between 400,000 and 500,000 worms.—Here we saw silkworms in all stages, from the eggs up to those engaged in making cocoons. Mr. Burnett informed us that he had worms which commenced forming cocoons in 27 days from the egg, whereas it generally requires 30 days. Only at this cocoonery did we see the worms spinning.—The building was put up entirely by Mr. Burnett alone, and it reflects great credit on his skill as a mechanic. This firm has another cocoonery at Folsom. Mrs. Waldron's cocoonery is but a few yards distant from Burnett's. It is of exactly the same dimensions, and its interior arrangements, heating process, ventilation, etc., are about the same. Here we saw a large number of worms, all in the most healthy condition. Visiting the thrifty farm of E. F. Aiken, on Burns' slough, we found that he is setting apart a portion of the second story of his very handsome gothic barn for a cocoonery, which is in size 30 by 32 feet, and 30 feet in height to the ridge. He will have 4,570 feet of space for his worms, and will be able to accommodate between 500,000 and 600,000. This cocoonery will soon be completed, and then the worms which are now in a neighboring house will be moved into it. The heater is now being put up outside the barn and at the south end. If successful this year Mr. Aiken intends to put up an addition of 40 feet to the south end of his barn, thus placing the heater in the center, and he will then have the entire first and second floors as a cocoonery. In this mile-square district there are at least 50 acres of mulberry trees and there are now employed there from 70 to 80 men, where two years ago the services of not more than 12 or 15 were required. So much for the present in regard to sericulture in the vicinity of Sacramento.

Messrs. Hunt and King's Silk Circular says:—We have to report only a slight increase of business in the silk market, but prices are generally fairly maintained. In China silk a moderate demand appeared at the commencement of last month which cleared off the parcels being offered at some reduction, and transactions would doubtless have been made to some extent had holders been less firm and continued to concede about five per cent upon April prices; these rates consumers for the present seem unwilling to pay, except for special sorts or for absolute wants. In Japan silk a few sales have been made of good medium sorts at a decline of five per cent, but in the best and lower descriptions there is no alteration. The last advices from Shanghai to the 7th of May, report the most limited business; a few hundred bales only are added to the settlements, so that the total for the season, including Japans, will scarcely exceed 40,000 bales. Prices were firm. In Bengal silk there is nothing to remark. In European silk little can yet be accurately known. It appears that the original Italian and French silk yearly diminishes and the reproduction from Asiatic seed does not succeed, hence the high rates paid for good and yellow cocoons; a fair crop in quantity may still be gathered from the seed so largely imported last year.—*N. Y. Economist Reports from Japan.*

—A Texas gentleman has received a large quantity of silkworm eggs from France through the post. Some of the eggs hatched on the way, and the worms were living on their arrival.

Expensive Pills.—Josh Billings has been experimenting with pills for the good of mankind, and says: "Ef yu are lookin for a pill az mild az a pet lamb, and az searching az a fine tooth comb buy Dr. Kingbone's silent perambulators, twenty-seven pills in a box, sold by all respectful druggists. These pills don't phool round, but attend strickly to bizziness, and are as good in the dead of the night az an alarm clock."

Lives of Animals.—The hare lives 10 years, the ass 10, the goat 3, the donkey 20, the sheep 10, the dog from 15 to 20, the ox 20, the sow 25, the pigeon 8, the turtle dove 25, the partridge 25, the raven 100, the eagle 100, and the goose 150.

New Advertisements.

GYPSUM. (Sulphate of Lime.)

This well known but most wonderful fertilizer has not yet been practically introduced into the Agricultural interests or before the minds of our California cultivators, for the reason that there was no supply, and because it was hard to make them believe our lands needed manuring.

The time, however, has arrived when, by the admitted fact of the deterioration of our soil and the lessening of crops, something must be done to restore the soil and bring it into that state of fertility necessary to make it profitable to cultivate the soil.

Gypsum is a compound of Sulphuric Acid and Lime, and the object of this fertilizer is the fixing of Ammonia, thus making it the direct food of plants, either by supplying the Sulphate of Lime or by its decomposition, affording the Sulphur so necessary to the due development of certain plants.

Sprengel's Analyses shows the quantity of Lime and Magnesia, Sulphuric and Phosphoric Acids to be very large in the following plants, and for these this fertilizer has no superior:

Wheat, Barley, Oats, Potatoes, Cabbage, Swedish Turnips, Clover, Beets, Turnips, and root crops generally; thus ensuring to a certainty its great importance to the Farmers.

Liebig's Natural Laws of Husbandry gives conclusive proofs of its superiority as a fertilizer on Clover and Grasses, furnishing details of experiments made by distinguished men in various parts of Europe.

According to the experiments made by Buckholtz, Gypsum is composed of *thirty-three* parts of Lime, *forty-three* of Sulphuric Acid, and *twenty-four* of the water of crystalization.

Gypsum is often called Plaster of Paris, but this is wrong—it only takes that name and character when it has been deprived of its water of crystalizates by fire; there it becomes *Calcined Gypsum* or Plaster.

Gypsum for Dry Countries like California, will prove immensely valuable, as when used as a fertilizer in our hot and dry soil, its waters of crystalization are seperated by means of our hot climate and go at once to benefit the plants, while the Acids and Sulphate of Lime is taken up by the soil, enriching it to a very great degree.

The undersigned is now prepared to furnish this valuable fertilizer by the quantity to all who desire to try its well attested virtues.

CHAS. J. JANSON,
222 BATTERY STREET.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facie* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

Miscellaneous.

A PRINCELY RESIDENCE IN THE COUNTRY FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the Farmer. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

Advertising Abroad!

WE CALL THE SPECIAL ATTENTION OF ALL Manufacturers, Agricultural Men, Nurserymen, Booksellers, and others having interests connected with the Pacific Coast, that now is the time to secure the business of this region by wisely ADVERTISING WITH US.

The full effects of the completion of that Grandest of all Human Enterprizes, the Pacific Railroad, must open a large and wonderfully increased business between the Eastern States and the Pacific Coast, and the who wisely advertise now, will be the first to secure it, and when once secured, they can hold on to it.

We therefore invite all those who have valuable Implements, Manufactures, Inventors, Books, Paintings, etc. to the Columns of the California Farmer, that will give them a wider circulation than any other medium they can adopt

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L. AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum;

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☛ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.,

Is on the red cover of the packages

Depot, 320 Jackson Street,

For storage, apply at the Warehouse to
THOMAS H. DOUGLAS,
Storekeeper and Wharfinger.
Or to I. FRIEDLANDER,
112 California street.

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit: five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This report reflects the prices paid by the dealer to the produce on the wharf or landing places.

Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, July 1.

Our Grain Market is without material change. The news from abroad which caused a temporary rise of a few pence the cental was not sustained, and the demand for shipping is very limited. The Home demand is also light, and without a prospect of a pressing demand.

The prices are such as to make it an object for all to *sell now* at the present rates, *if they can find buyers*, for with the reports that come from all our Grain regions can be relied on, then surely our *present rates* will secure the *best prices* for some time for the *grower now*.

It is pretty generally known that our Grain shippers have experienced quite heavy *losses* the past year, even when they expected *gains*, therefore, as "the burned child dreads the fire," so Speculators will not be so rife his year. Farmers should sell and realize now.

Retail Prices in the Fruit Market.

Fruit.—As some varieties decrease others take their place. Strawberries wane. Raspberries and Blackberries grow abundant. Peaches begin to come in more plentifully. We hope soon to see some from the Mountain Ranches—those *red* cheek Melacaton's that weigh a pound each; these will soon be here.

Pears and Apples improve in quality. Luscious Figs — the black and brown Turkey Figs are now in market. Plums, too, come in more freely. We saw some true green Gages from Alameda—the very best Plum grown. Green Almonds, and native Hazelnuts come in with other Fruits. Whortleberries and wild Blackberries with large English Gooseberries are now offering freely.

We noticed a fresh lot of the Jucunda Strawberry, yet they will not prove a berry for carriage, as they grow soft—splendid, yet tender, melt quickly.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings, Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m.

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish *collections* of choice plants, can buy them in quantities at a very low rate, if they visit the *Gardens Corner of Mason and Pacific Street*, in this city, or address EDITOR FARMER.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge or Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S CELEBRATED LIVER PILLS,

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER and BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It has been our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the power of the Stomach, Bowels, Brain, and the whole Nervous System, should be vast and vital importance to human health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has also a close connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal atrocity or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Stomach, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful impression of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts everything. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow their use. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are taking to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and lie ever quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous kinds of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, ridiculous in other respects, but which entirely fails in consequence of worms being overlooked. And even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed and with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an arcus senilis circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or frothy tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a craving sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowe s irregular, at times costive; stools slimy, not unfrequently tinged with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough; cough sometimes dry and convulsive; uneasy and disturbed sleep, wi grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual, providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water every morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten, give a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: DR. McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

SILK CULTURE IN GEORGIA.

San Jose, July 7th., 1869.

...WARREN, Editor Farmer—*Dear Sir:*

...have received a letter from Georgia, which I ...close to you here, as it concerns you also. You ...do what you think proper with it. If you ...like it, all right, I will see it; if not, send it ...back to me to enable me to answer it. That letter ...contains the most important information for our ...State and country. The complete success of Mrs. ...Perry would demonstrate that Georgia, if properly ...managed, as they have already plenty of food, ...would make another Silk State. This deserves ...a little attention from all those who have the ...prosperity of the country at heart. Please excuse ...me if the time don't allow me to write any more. ...I will soon have the particulars about *Silk* ...City that is now located on the best soil and cli...mate, with any amount of water to irrigate if nec...essary, water power for machinery, etc. I am ...starting again for Los Angeles by steamer next ...Saturday. Yours, most truly,

L. Prevost.

La Grange, Georgia, June 18th., 1869.

...LEWIS PREVOST, San Jose, Cal.:

...Having obtained a few eggs of the Silk Worm ...*Bombyx Mori*, last Spring, my wife undertook to ...raise a crop as an experiment of the success of ...silk culture in this locality, and she was so suc...cessful, and became so much interested that she ...availed herself of every opportunity to give ...all the information within her reach in any way ...relating to the subject.

...In examining the various annual reports issued ...by the Commissioners of Agriculture from the ...patent office at Washington City, frequent refer...ence was made to your name, your silk-growers ...manual, and extraordinary success in the busi...ness.

...I wrote to the Patent office for your address, ...and to know where your Manual could be obtain...ed. In reply, Col. Capron sent me a copy of the ...edition of 1867, for which you will please accept ...sincere thanks, as it contains much of the de...sired information we were greatly in need of; and ...permit me to request, if you have written anything ...on the subject since, to inform me how and where ...I can obtain it. I request you will send me a number ...of the California Farmer, in which your articles ...seem to be last published, as I desire to subscribe ...for it, and do not know the address and price. ...Mr. M's eggs batched out five thousand worms, ...and succeeded in rearing all of them, except 25 ...which were accidentally killed—two of them by ...being washed, and the rest by ants and spiders ...getting upon the mulberry leaves, and that too ...without any special provision for them, other ...than could be furnished by loose plants laid up...on shelves in an upper room in our dwelling-house.

...They were fed upon the leaves and limbs of the *Morus Multicaulis*, and the *Morus Nigra*, as could be most readily obtained from the surrounding fields and forests, there being not a single mul...berry tree or shrub upon my premises. The *Mor...us Multicaulis* was introduced into this country about thirty years ago, when the Silk worm fever ...raged in this country. It was then planted ex...tensively throughout the South, and has continued to grow in fence corners and sides of ditches in spite of efforts to exterminate it. The *Morus Nigra* is indigenous to our forests here, and I think, from your description of the *Morus Moretti*, that one of our neighbors has one of that kind growing in her yard. Certainly, not even California can produce the Mulberry more luxuriantly and thriftily than it grows here.

I would like, however, to procure cuttings from your *Morus Moretti* and *Morus Alba* also, as I may be mistaken as to the *Moretti* in my neighbor's yard.

Parties in this State, having been raising the Silk worm in small quantities for a number of years, and manufactured the silk into domestic articles, sent us gloves, hose, sewing silk, and fishing lines, &c.; none of them with the remotest view of raising it for commerce. The older inhabitants, those who remember the disastrous *Bubble* of thirty years ago, are disposed to ridicule, and hold in derision the very idea of Silk Culture and the planting of Mulberry Orchards, and refer to it as a great humbug and folly. Yet, those who have continued to raise it on a small scale, as above referred to, have never had any disease among their Worms, or found any trouble in raising them.

I am fully pursuaded that if it could only be inaugurated, and the people induced to take hold of it, it would be a succes and a very profitable business. Lands are very cheap. The Mulberry—all species of it—grows thriftily. We have an abundant amount of labor which could be employed at very reasoneble prices for that light occupation, and it requires but small capital or outlay.

I enclose to you a few specimens of my eggs and Cocoons. The former may not possibly reach you in this letter without hatching. If, however, you should desire it, I will send you other specimens in a tin box or tube next winter. I would like to send specimens of my Eggs to Europe, if I had the address of parties there, who would be interested in receiving and testing them; also, through what channel they can be safely sent, and how put up for exportation.

You will excuse my addressing this communication to you, a stranger; but was induced to do so from the extreme interest I feel in Silk Culture in the United States. I am, very respectfully, yours,

C. W. Mabry.

SUCCESS OF CALIFORNIA SILK-WORM EGGS IN EUROPE.

[We give the following very interesting and valuable letter from Messrs. Hentsch & Berton, Bankers, of this city, relative to the Silk Worms' Eggs sent from our State to Europe last year. This report must be gratifying to all who wish the prosperity of California and its producing interests.

Messrs. Hentsch & Berton have shown a very magnanimous spirit in thus stepping forward at the first moment, to encourage this Enterprise, and our whole State owe them a debt of gratitude for their liberality.]

Editor of the California Farmer—*Dear Sir:*

We received from France the following letter in relation to the California Silk-worms' Eggs we forwarded last year:

"The hatching has been perfect. They passed triumphiantly through all the phases of the education. The climbing was admirable. The Cocoons are of a nice shape and of a beautiful yellow.

We have not seen, during the education, a small worm, a flat one, neither a greasy one, nor a dead black one, as it could be seen twenty years ago, during our fine educations of that time, and of which pollute the yellow breed of to-day.

I would say even more. That is the robust constitution of those Eggs, and consequently of its worms is such that the Chrysalis, which I have examined after the opening of the Cocoon, has but slight traces of the malady, which all the imported Eggs, even the most healthy, contract in our country by the feeding."

We believe the above will be important for California, and although our exportation of Eggs last year was not profitable to our pecuniary interest, we are happy to have been the instrument to making those Eggs known in France, Switzerland and Italy. We think our young State will profit by it. We remain, dear Sir, yours, truly,

Hentsch & Berton.

THE TULARE RAILROAD.

We are glad to learn that the Stocktonians are waking up to the true interests of Railroads.

The Board of Supervisors have passed a Resolution to appropriate $300,000 City Bonds for the building of the Railroad, subject to the decision of the Voters of that city and county, and approval of the Legislature.

This is right, and it is to be hoped it will be bravely approved of by the people. Let the Farmers and Mechanics all vote *Yes*, and their interests will be improved *Twenty-five per cent* when the Vote shall be declared, Railroad confirmed.

INQUIRIES ABOUT CHEESE MAKING.

Oneida Co., N. Y., June 28th, 1869.

To the Editor of the California Farmer—*Sir:*

Having a desire to see your paper, will you please send me a number or two as sample.

Yours, H. P. G.

P. S.—I am a practical cheese-maker; have had five years' experience in a factory. Is cheese-making much carried on in California, and what time do they begin with their Dairies? I presume some time in the fall of the year—about which months I know there are some large Butter Dairies in California. Do you suppose that a man could hire a Dairy of Cows, or part of a Dairy, for the purpose of making the milk into cheese; or do you suppose the milk could be bought at a stated price per gallon? What, in your opinion, do you think the milk could be had for per gallon or pound, fifty or one hundred miles back, or anywhere on the butter-ranch.

Enclosed you will find stamp. If your time is not too much occupied, will you please answer these few questions, as my mind is set that way?

H. P. G.

REPLY.

We publish this letter, though a private one, to show how little is known of California resources even in the leading counties of New York—this should not be so. We gladly reply, and would inform our correspondent that Cheese-making is carried on in this State, quite extensively in many places; and we are glad to inform him that our Clear Lake Cheese commands a higher price than even the best Dairies of New York. The The Cheese-making is carried on here as in other States. We presume the writer can make good arrangements for himself, should he come to California, either in securing a situation to profit, or procuring milk in quantities, or stock for a farm.

We send a parcel of Farmers for Free Distribution in that region.

CROPS IN THE BRITISH COLONIES.

We give the following items from our Correspondent's Circular to us of June 18th—Messrs. S W. Silver & Co—which shows the prospects of Crops in those regions, and will have some bearing upon our markets here.

Victoria, Melbourne, April 26th, 1869.—The drought has entirely broken up, and genial rains have set in throughout the country. As the weather still continues mild the grass is springing up everywhere, and there is promise of plenty of pasture for stock throughout the winter. Plowing is now being proceeded with, and the crops for the ensuing season are being very generally got into the ground. The rains have given an impulse to the demand for farm labor which has not been sufficiently responded to. Wages are consequently higher than they have been for the last two months. There is also a good demand for general labor, and building still goes on with undiminished activity.

New South Wales, Sydney, April 23rd, 1869.—Rain has fallen abundantly throughout the Colony unattended by floods.

South Australia, Adelaide, April 27th, 1869.—The weather has been fine, interrupted by a few showery days. Farming operations are being proceeded with vigorously. Exports of wheat and flour to 17th inst. have been 13,093 tuns of flour, and 116,815 qrs. of wheat, which at 45 bushelf of wheat to the tun equals 33,860 tuns of wheat and flour.

Queensland, Brisbane, April 19th, 1869.—Trade has been quiet, buyers supplying immediate wants only. Heavy rains have been general throughout the Colony, very little has consequently been done in the cotton fields, the weather however has now cleared up and picking will be actively prosecuted.

New Zealand, Canterbury, April 13th, 1869.—Government has offered a reward of £1000 for the first 100 tuns of sugar made from beet-root in the province.

Deep and Shallow Drainage.—I observe that after a dry summer, the fields drained five feet deep at thirty and forty feet apart, in stiff clay, do not discharge water through the drains so early in the season as those of thirty inches deep, at closer intervals. The reason appears to me to be obvious; the sixty inch drains take the surplus water from 6,000 tuns of earth, while the thirty-inch drains only lay dry 3,000 tuns. It is easy, therefore, to understand that when the autumnal rains come, the 6,000 tuns take longer to supersaturate than the 3,000 tuns. The deep drained lands had only commenced running to day (Jan. 8th) after the recent heavy rains. Are not those extra 3,000 tuns more available for the roots of plants than the same quantity undrained under the thirty-inch drains? for the roots of plants descend several feet. P. S.—One inch deep of earth gives over 100 tuns per acre.—*Louisville (Ky.) Courier-Journal.*

—There are over 2000 varieties of peas, but only seventy or eighty that are considered truly valuable.

NEW METHOD OF PRESERVING FRUIT.

Mr. Charles B. Rees, of this city, has perfected an apparatus for preserving fruit, by the aid of ice, which promises to be of great value to pomologists, and also to dealers in fruit. Mr. Ress has for many years been employed as superintendent of a large ice company, and was engaged, during the war, in packing meat and food for the Southern Atlantic fleet and Gulf squadron, during which time many experiments were tried, under the direction of scientific men, in the construction of ice-chambers.

Out of this experience was developed a method of cooling a fruit room, by the aid of ice, to a very low degree of temperature; obtaining, at the same time, perfect dryness of the atmosphere, without any artificial absorbent or dryer. This is all done upon philosophical principles by the aid of apparatus which removes every particle of moisture to such an extreme degree that when the bare wet ice is fully exposed to the air of the fruit room, the doors will shrink as if exposed to hot air, and the floor becomes so dry that a match may be readily ignited by rubbing it upon the boards.

The apparatus requires no power to work it, and but little attention. That this invention is a perfectly practical one is proved by the fact that more than a dozen fruit and meat rooms of this description have been in successful operation for more than one year in the market houses and principal fruit stores of Philadelphia, and they are I believe, the only successful ones, of this character, in the country.

The principle of cooling and drying the air, invented by Mr. Rees, has also been applied to the brewing of ale, in hot weather, and to the packing and curing of pork in summer, with entire success. Two of the largest breweries in Philadelphia have their brewery rooms and ale vaults cooled in this manner, with great satisfaction and advantage.—One of these breweries is that of Collins & Massay, Tenth and Filbert streets.

The apparatus can be applied to large or small rooms, or even closets and refrigerators, with equal ease and success, and from the very nature of things—as it is based upon the strictest natural laws—it is the only plan that can produce a perfectly dry atmosphere, without introducing fresh air into the chamber, or using an artificial absorbent.

Fruit in a state of moist decay, on being put into this fruit room, directly become dried in such a degree that all the moisture upon the decaying spots disappears, and the spots themselves become covered with a dried pelliole, like court-plaster, and the rot ceases. The drying, however, is not such as to produce shrivelling in apples and pears, for the reason that only the external moisture is removed, and the interior flesh of the fruit remains unchanged.

In this connection, we may demonstrate the fallacy of the common idea, that fruit, just gathered from the tree, must undergo a process of sweating before it is fit to be put into the cellar or fruit room. The simple truth is, that fruit which has been cooled by any means will always sweat when it is brought into a warm atmosphere, not because the juice passes out of it, but because the moisture in hot air always condenses on a cold surface.—The process of sweating in apples may be repeated a hundred times, by cooling the fruit in a cellar, and then bringing it suddenly into a heated room.

Mr. Rees, the inventor of this new fruit room, proposes to superintend the construction of houses himself, and, being a plain, practical man, is disposed to labor in this work for a very moderate compensation.—*By J. S. Houghton, in Gardener's Monthly, Phila.*

To Destroy Small Flies in Orchards.—Little fires in gardens or orchards, at early twilight, burning five, ten or fifteen minutes, will attract or consume perfect swarms of all sorts of insects, and more directly save fruit than anything else.—Lightwood obtained and split fine beforehand, enough for the whole season, or flat bottomed tin lamps, like those of the campaign torches, will be money at one hundred per cent in every man's pocket who owns either garden or orchard. And picking up and burning or boiling all fallen fruit, will make two or three hundred to one less insects the following year.

Exercise.—Exercise which is most agreeable is usually the most beneficial. In selecting methods of exercise, every individual should beguided by his own individual tastes. It is better to change frequently from one exercise to another. It is well even to consult our whims and our varying moods. Above all things, we should strive to prevent our exercise from becoming a dry, hard, mechanical routine. The heart should go with the muscles.

—If a screw is rusted into wood, or there is a nut or bolt that will not readily turn, a little kerosene oil should be poured on it and allowed to remain. In a little while the oil will penetrate the interstices, so that the screw, nut, or bolt can be easily moved.

GEORGE HUDSON.

At the meeting of the Wear Commission June 2d, Mr. Hugh Taylor and Mr. Elliot, with characteristic kindness, drew attention to the forlorn and distressed condition of Mr. Geo. Hudson. The quondam Railway King is old, exiled and destitute. Age and want are confessedly an ill matched pair, and with both, Mr. Hudson has been called to grapple. The conflict is equally dreary and hopeless. Need we wonder that the heavy-laden wayfarer has grown moody and despondent? At 69 the elasticity of spirit which triumphs over adversity is gone. Few lives present such strongly marked contrasts as the life of Geo. Hudson. At the beginning of our railway system we find him a modest draper, doing a quiet business in the cathedral city of York, with nothing to distinguish him from the rank and file of shopkeepers. But with the invention of the locomotive and the creation of railways, golden visions rose on the path of those courageous enough to speculate in scrip. Railways became the passion of the hour, and the York draper was bitten by the mania. Mr. Hudson risked all and was successful. Stimulated by success, he played again, and again fortune proved propitious. His name became an authority on railway speculation, and the confidence reposed in him was unbounded. For a time the entire railway system of the north of England seemed under his control. What herculean energy was in the man may be gathered from a couple of days work. Under Mr. Hudson's direction, on the 2d of May, 1845, the shareholders of the Midland company gave their approval to 26 bills, which were immediately introduced into parliament On Monday following, at 10 o'clock, the York & North Midland sanctioned six bills, and affirmed various deeds and agreements affecting the Manchester & Leeds and Hull & Selby companies. Fifteen minutes later he induced the Newcastle & Darlington company to approve of seven bills and accompanying agreements; and at half-past 10 took his seat as a controlling power at the board of the Newcastle & Berwick. In fine, during those two days, he obtained the approval of 40 bills, involving the expenditure of about £10,000,000. For some three years, matters went bravely on, each succeeding day being a witness of greater wonders than its predecessor, until ultimately the whisper of detraction arose, a "Committee of Investigation" was appointed, and Mr. Hudson accused of appropriating £184,204 of the Newcastle & Berwick Railway Company's money to his own use. When subsequently this claim was compromised, we do not marvel that Mr. Hudson asked the shareholders "To review these transactions with some remembrance of the excited period in which they occurred, and the multiplicity of the concerns which he had to superintend." Admidst the mad whirl of excitement there was no leisure for reflection. In vain had sensible men counselled caution; sensible men were at a discount, and their counsel esteemed foolishness. Prudence was timidity, and those that remained outside the circle of gamblers in scrip were pronounced unable to keep pace with an age of progress. It was in the mid-noon of this mania that George Hudson's crimes were committed. The deference of compeers had constituted him the Autocrat of the Rail. He was believed to possess the secret of fortune-making, and wherever he appeared a crowd of sycophants were at his heels, grandees of England graced his levees, and the prospect of a peerage presented itself as among the possibilities of the future.

Was it wonderful that admidst this adulation George Hudson's head grew giddy, or that confidence in his star tempted to courses which wrecked his fortune? From the day that the petition of the Eastern Counties Railway Company charging Mr. Hudson with tampering with the share list was presented to Parliament, his course has been downward. The point he has now reached exhibits a depth of humiliation that might satisfy the most relentless detractor. All who have seen Mr. Hudson recently give the same dolorous report of his condition. The object of the subscription now so generously inaugerated is to shed a gleam of sunshine on the closing hours of a life tragic in vicissitude. It is twenty years since the glory of the Railway King began to wane. The splendor was evanescent, the gloom has been protracted. It is perhaps well that it has been so. Our age requires to be taught that industry is the only royal road to wealth; the notion that gambling in scrip is legitimate business cannot be too sternly rebuked. Unfortunately in this matter George Hudson has not been a solitary transgressor. He sinned in good company. Thousands have followed in the same path, though probably few have been overtaken by such terrible retribution. It is a knowledge of how much Mr. Hudson has suffered that prompted Mr. Taylor and Mr. Elliot to interpose their good offices in his behalf. The past is fading into the mild moonlight of memory, and animosity giving place to mercy. In this relenting mood enough will be obtained from the liberality of the North to give Mr. Hudson the respectable annuity to which Mr. Elliot points.—*Newcastle (Eng.) Chronicle.*

Agriculture.

JAPAN CLOVER.

William F. Beasley, of Greenboro, N. C., writes to the *Home Journal* the following account of the Japan Clover, which is spreading itself over that State: A recent trip to the western part of this State enables me to place at your disposal a specimen of Japan Clover and a few facts pertaining to its characteristics, locality, &c. I found that this plant was very generally scattered over all of the counties west of Salisbury, and was told that it was spreading in every direction; wherever it takes hold all other grasses surrender the ground, and it soon becomes entire master of the situation. It seems to care very little for soils, for I saw it growing luxuriantly in many places that a glance convinced me were entirely devoid of substance, as for instance, in old roads that had been traveled fifty and sixty years and had been enclosed because a nearer road had been provided. In badly washed gullies too I witnessed it flourishing and healthy. Many farmers are planting it for the purpose of preventing their lands from washing. Several farmers informed me that they were somewhat fearful that it would eventually become so general that it would destroy their timothy and other more useful stock grasses, but this fear is rather slightly founded, because the Japan is far smaller and, I think, less strong than either timothy, white or red clover, but time alone can solve the question.

The stock of every kind are very fond of it and fatten very quickly while feeding on it. Its appearance in this State is surrounded with mystery, and while many conjectures are afloat concerning its origin, &c., I consider none of them worthy of notice. An aged farmer remarked to me that he believed "God had sent it to keep the stock from starving during the reconstruction of our labor." One thing is certain concerning its appearance, that is the date of its arrival. It was first noticed in 1861, and since then it has been marching in every direction and, in my opinion, will soon spread over the entire State. It seems to flourish more abundantly in the shade than in the sun, and therefore it promises to become a fine woods' pasture grass. I wish I was sufficiently posted to furnish you for publication with a detailed account of this mysterious and valuable addition to our stock stores, but I am not, and must, therefore, beg you will be satisfied with this slight and imperfect communication.—*Michigan Farmer.*

CARE OF MILK VESSELS.

In an article of the *Ohio Farmer*, written by a cheese factory man, we find the following suggestions on washing cans, which are equally applicable to pans and other dishes in which milk is kept:

When a can is to be washed, do not put hot water in it at first, but put in water not above milk warm, which will readily dissolve the milk if any is dried on to the tin, and it works off very easily; while if hot water is applied at first, it has a tendency to cook the milk on the tin, in which condition water will not very readily dissolve it, but warm milk will. It is, therefore, very important to give strict heed to this matter, and see that the milk is thoroughly removed by washing before any boiling hot water is applied. Care must be taken to remove every vestage of the milk about the seams of the cans and covers, as here is where the trouble always begins. My attention is always directed to the seams first, if I suspect a can is not properly cleaned, especially the seams in the cover. The little tube in the center of the cover is also a place to be especially looked after in cleaning the can.

Very many people who consider themselves, and are considered by others, patterns of neatness, fail to keep their milk cans perfectly cleansed; many times no doubt through ignorance of how to do it, and many times from a lack of appreciation of the extreme neatness of that scrupulous care necessary to keep everything used about milk *immediately* clean.

ABOUT BEES.—The present season in Southern Utah has been very unpropitious for the increase of Bees. The usual early rains, that produce spring flowers, being withheld, the early working-stock of bee industry was missing. As season advanced the second suit of flowers for bee-feed was so poisoned by the grasshoppers that several swarms died of starvation, and others made a bare living, whilst some took weeks of feeding. Since the hoppers left, new flowers have sprung out and these industrious insects are working very lively; but there has been an almost entire failure of prolific. In fact we have heard of but two or three new swarms having come out this season; and whether they may yet come out is a problem to be solved by the future. We doubt, however, if we enjoy much increase, save it be of honey the present year.

WATERING PEACH TREES.—We seem to have a hallucination, a fever that nothing but large doses of water will quench. We cry for water when more trees and plants are killed by water than by drought. Our observations, for three years, result in the conclusion that the excellence of our peach crop is nearly lost, by overdoses of water, soaking and entirely permeating the soil, and the lack of the hoe and plow.

If our peach orchards are well tilled, as they should be, they will not require water oftener than once in three or four weeks to get the best results —*Eastern Exchange.*

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HO SE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

SAN FRANCISCO

—:o:—

THE CELEBRATED PREMIUM

CLIPPER MOWER!

"The Best Mower in the World!"

SEND FOR CIRCULARS

The Clipper Mower for 1869 is an embodiment of a larger number of substantial requisites necessary to a perfect Machine, than can be found in any other Mower and Reapers yet offered to Farmers of California, for the following reasons:

1st. Superiority of workmanship, and material used.
2d. High Wheel with wrought-iron spokes.
3d Rolling Finger, Bar and Forward Cub.
4th Patent Draft Attachment.

These are a few of the important features of the Clipper. It has taken the First Premiums in all trials in the Atlantic and Western States for 1869. We invite the attention of Farmers to the Clipper, feeling confident that they will be convinced of its superiority over any other Mower in the World. We have also for sale the Celebrated

WOOD'S

SELF-RAKING REAPER.

This Machine stands at Front of all Reapers in this country. It cuts a swarth 5½ feet in width, and will reap from 15 to 20 acres per day. Farmers in want of a good Reaper only, can save money by purchasing one of these. Also the CAYUGA CHIEF COMBINATION REAPER AND MOWER, too well known to need any elaborate description here.

HEADER WAGONS.

A full assortment of Agricultural Implements, and General Hardware, for sale by

HAWLEY & CO.

Stand, Cor of California and Battery Sts.,
SAN FRANCISCO.

TRUE'S

IMPROVED

POTATO PLANTER.

This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

WARREN & CO.,

320 Clay street, up stairs.

PACIFIC ANATOMICAL MUSEUM,

....AND....

GALLERY OF NATURAL HISTORY AND SCIENCE,
Eureka Theatre, Montgomery Street.

This truly elaborate and magnificent collection of all that is strange, wonderful and curious in SCIENCE, NATURAL HISTORY, AND ART, is now open to the public.

Extensive embellishments and improvements have been made. The additions will include an immense collection in BOTANY, ICTHYOLOGY, and ENTOMOLOGY.

COMPARATIVE, FLORAL, AND BOTANICAL ANATOMY will be largely illustrated, and form a leading feature of the institution. Every exertion has been used to render this superb collection the most INSTRUCTIVE, AGREEABLE, and USEFUL IN THE WORLD.

INSECT AND ANIMAL LIFE will be beautifully displayed and the celebrated Du Chaillu GORILLA which was exhibited ALIVE in Paris, has been added to the already vast collection of HUMAN AND COMPARATIVE ANATOMY.

Open daily from 9 A. M to 5 and 7 to 9 P. M. Sundays from 29x1

Choice Plants.

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the articles they have to sell are wanted by those who have delayed to the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seeds, Fruits and all other goods should be advertised in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their trade largely increased by giving attention to this matter, and particularly in everything appertaining to Agriculture and Horticulture.

Newspostors and handbills, however good they may be, can never take the place of advertising in the columns of a paper.

"Bread is the staff of life, and *Advertising* is the life of trade."

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to put in NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a font of Type again can have one by calling at once at the office, or addressing EDITOR FARMER.

THE VINE IN EUROPE.

OBSERVATIONS BY AN AMERICAN VINE GROWER.

Letter Number Five.

IN PRUSSIA.

The vine was more rarely seen in Prussia pro- , and while it was not entirely lost, it was only good locations, on Southern and Eastern hill- that I saw it at all.

Wherever the vine was cultivated it was grown ually in the German method, and resembled ne vineyards planted by the Germans in Ohio Missouri, and some of the earlier vineyards Crooked Lake, New York.

The vine was planted together in rows not more as four feet apart, and frequently as thickly as ne or four feet in the row, and trained usually a single stake.

scarcely attained much height, and was usu- three, four, and in exceptional instances five high.

he vine itself was small and fragile, and exhib- nothing of that luxuriance of growth seen in the Tyrol, or in America.

bears apparently a similar relation to the grown here that a dwarf pear does to a dard, and must be considered on questions of are to have as much difference in all respects hose.

he only exceptions to the method of training pruning the vine in Prussia from that above ribed that I observed was in passing by river ugh Saxon Switzerland on one of the little boats that navigate the Elbe, in the vicinity resden.

e approaches by river to this city resemble much the Hudson. It is the scenery of the part of the latter river in miniature. The s are adorned with magnificent palaces, vil- nd country seats, with grounds beautified in most tasteful manner, while along all the , and down to the water's edge, and all along, en splendid vineyards that quite resemble in rrangement of the terraces and the training e vines upon trellises our better American ards, excepting only that the vine was small- d even of less luxuriant growth.

was not uncommon to see here terraces of olve construction sometimes faced with stone sometimes covered with sod, upon which the was planted in drills, four and five feet apart, rained upon trellises that were supported by s set regularly in the row of sufficient strength pport the trellis, and which was a permanent substantial structure. These trellises ran four, and sometimes five feet high, and were about the same distance apart; they were ised to the highest point, and in some in- s were attached and belonged to the estate an of wealth, and in no case in the hands or men or of the peasants, and were in this, all as in every other respect, exceptional to neyards of Prussia.

Prussia (and in speaking of that country I do clude Germany on the Rhine, which should nsidered separately, by reason of the impor- e of the culture in these sections) is so far it is hardly considered a wine growing ry in the sense of the term as applied to ce, Italy or the Rhine, still it grows consider- fruit.

t has more climate difficulties with which to end than the countries to the south of it, and neyards are more frequently injured by the s.

Their greatest dangers, in this regard, are the ts of Spring, in the months of April and , in those seasons which have had Winters of nual mildness, and when March has been so d and pleasant as to have prematurely started buds.

The crop is sometimes entirely destroyed in this , and ruined from the same causes as the peach s in the northern states is often lost.

Very many expedients are resorted to to pre- this. When the night has been so severe as dicate frost, an hour before sunrise numerous s are kindled throughout the vineyard. Large ches of straw are lighted and carried on fire by through the vineyard and close to the vines; or five persons will go over one arpent of s thoroughly in this manner, and this artifici- work is kept going on until the sun shines. This also done in the vineyards of Germany and the ne.

The burning of a newspaper in a grate, as all ow, will throw out an unusual amount of heat, they utilize this principle with the best means n command. Their theory is that the in- is not from the cold itself, but from the action the sun upon the frost, and they seek artificial- to melt or soften the frost before the sun ches it.

From the late frosts of the autumn a most sin- preservative is used in Prussia, and to me naturely novel one. It is not confined to vine- ds, but it is frequently adopted for various ds of fruit.

Long cords are made out of straw, the bark of , or hemp twisted into a rope of considerable . They place a vessel of spring water at a ance of twelve or fifteen feet from the tree or , and then surround the fruit tree with this placing both ends of the same in the vessel water. It is not necessary to have many ves- , one will do for a whole trellis, if the cord is nected and both ends are in the water. By joining the cords properly together a great num- ber of vines or trees can be thus surrounded, and it is claimed that this singular remedy is complete- ly effectual in saving the fruit from the effect of the late frosts.

There can be no doubt of the fact that a current of water brought by any means in contiguity with the fruit would affect the atmosphere in its imme- diate vicinity. If a trial should demonstrate that this means would be efficacious in our American vineyards in the more northern latitudes in case of the early frosts of October, it would be very valuable information, indeed, to those proprietors who suffered in the seasons of 1867 and 1868. I should think it was well worth the trial, as it is comparatively inexpensive. The wines of Prussia cannot at all compare in quality with those of Germany and the Rhine, with which they should, of course, be classed.

Perhaps the finest are those of Saxony, and the wine of Meissen, near Dresden, and of Guben would doubtless be considered the best. The wines consumed in Prussia proper are those in the main of Germany and the Rhine, and no consider- able proportion of the amount consumed in that country are grown within it. Now that recent political changes have advanced Prussia into a first-class power, and reconstructed Germany seems to have added to Prussia's glory, at the ap- parent expense of the United Germany, which has been the dream of that race, we prefer to reserve for a future article the vineyards of Germany and the Rhine, without detracting from the authority of the King of Prussia over the States that have so lately united their political destinies with the new Germany of to-day.

ORNAMENTAL TREES.

The Oregon Fir Tree Association.

We are now prepared to Ship to all parts of the country, all the handsome varieties of the Fir Tree that so abound in Oregon. The trade of the Association is at present promising much greater success, especially on the Pacific Coast, than they have formerly anticipated. The nurseries of California do not seem to have adopted the Oregon Fir, only as we have recently taken some of their orders from them.

We find them to possess an attraction as an ornamental tree rarely equaled. The Yellow Fir and the Balsam Fir are the most popular varieties; the Yellow Fir the most hardy—thriving in almost any soil or climate. Our trade with the East is promising; our trees have arrived there in good condition and are growing.

The Association is prepared to supply a large demand for Trees, from six inches to four feet in length, but we cannot fill orders for any more than four feet.

Efficient Agents wanted in all parts of the country, to whom we will extend the most promising advantages. We shall be glad to receive a communication from any one who might desire such an agency, or from any one who may desire our Trees.

Orders for Trees to be set in the fall should reach us as early as October, and those for the spring supply as early as February.

We Ship none but perfect and healthy Trees.

All communications should be addressed:

REV. C. W. TODD, Oregon City, Oregon.

H. F. HASTINGS, Vice President.

JOS. CRACKBON, Secretary.

J. M. GREY, M. D., Physician-in-Chief.

SCHREIBER & HOWELL, General Agents.

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

Valuable Patents

FOR SALE.

We invite the attention of energetic Mechanics' to several very

VALUABLE INVENTIONS

for which we hold the

PATENT RIGHT

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a handsome return for labor and capital can be made from.

WARREN & CO.

VALUABLE PLANTS FOR SALE.

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

tf *Farmer Office.*

Country Homes Wanted.

There is wanted at this time, several Homes in the Country, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will buy them if they communicate with this office immediately

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Address the FARMER OFFICE.

Miscellaneous.

SPLENDID RESIDENCE FOR SALE.

A VERY MAGNIFICENT RESIDENCE, SURrounded with the most valuable and choice Ornamental and Shade trees, and connected with a large and valuable heavy bearing Orchard of nearly

FIFTY ACES.

The Fruit of the very choicest kinds.

This Estate is situated upon a Country Road, in one of the finest sections of country where lands are rapidly advancing in value.

The whole Estate, comprising over

SEVENTY-FIVE ACRES

and all of the very best land

The Mansion House.

Is of modern style, nearly new, and now well and genteely furnished.

The entrance to the Mansion is through fine ornamental and shaded drives, and all the surroundings, are of a pleasant character.

LARGE STABLES,

CARRIAGE HOUSES, and FRUIT HOUSES, and a liberal collection of

FARMING IMPLEMENTS,

make this Estate such a one as is rarely offered for sale.

To a skillful ORCHARDIST, this is a rare chance, as the product of these extensive Orchards, should pay the purchase money in three or four years.

Those who desire a

Large and Valuable Estate,

and one of increasing value, can address

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....JULY 15, 1869

THE CALIFORNIA FARMER READING ROOM, AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productions—Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is TWO DOLLARS for five lines or less of space, in Nonpareil type, for one insertion, twenty cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination hoping our paper will meet their approval and induce them to subscribe, and to ask their neighbors to subscribe also.

Send for Sample Papers and get up a club, Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of our *Journal*, to which we would direct their *special* attention.]

GEORGIA SILK CULTURE.—We are highly gratified to lay before our readers the letter of our esteemed Silk-worker, Prevost, with the letter of Mr. Mabry, from Georgia, giving account of the success of this business there.

We are truly glad that Georgia takes hold of the work, and we hope Mr. Mabry's example will be copied by many others. The whole letter is full of interest, as not only indicative of success, but a guarrantee that the business will be established there.

We shall send a liberal supply of FARMERS to the writer for distribution, and they, as *Subscribers*, will find from time to time, when and how to send Eggs to Europe or elsewhere; and we hope to hear from Mr. Mabry, direct to this Journal, of a still greater success of Mrs. Mabry in her enterprise.

CHINA IN OUR KITCHEN.—This most excellent article which we take from the *Atlantic Monthly*, we esteem of so much importance at this time to California while the question of "Chinese Labor" is before us, that we have taken the large space it requires to give it entire. We believe every family in our State has an interest in this question.

GEO. HUDSON.—We hope the history of George Hudson, the Great Railway King of past years in England, will be read by those who are now engaged in the Speculation so rife in our midst—Mining Stocks, Homesteads, Real Estate—for there are the same temptations now that beset George Hudson, and his sad history should be a warning to all.

SANTA CLARA COLLEGE.—We very much regret the necessity of deferring our matter relative to this College; but not receiving promised MSS. and Cuts in time for this issue, we must defer them till our *number One*.

We call special attention of all our Fruit growers to the Report of the Fruit Growers' Meeting, and their doings, published in full in our columns; also, the new Invention for Drying Fruit, which will greatly aid them in exporting their fruit.

Acknowledgements.

Articles Received at the California Farmer Exhibition Rooms, No. 320 Clay Street.

BOOKS.—European Vineyard, by W. J. Flagg, Esq., from the Press of Harper, Brothers, N. Y.

Here we have a Book worth reading, containing, as it does, a vast amount of information for the general reader, and to the Vine-grower and Wine-maker, a large amount of practical knowledge, which can be made available. The Book should be in the hands of every Vine-grower.

WEDDING DAY.—Ed. J. Wood. Esq., has sent out from the Press of Harper, Brothers, of N. Y., a Book which tells us of the Wedding Days of all Ages and all Countries. Here now we have a Book that will be read by all our Young Men and Women; for this is the *Chief beginning of Man* and Woman too; at least it is the *Chief desire* of all to be married.

This Book will furnish a large amount of interest and amusement, as well as valuable information on the subject of marriage. The Book commences with the first marriage, its Intention and purpose, and then furnishes the History and forms of marriage in all countries. It will be extensively read.

Messrs. A. Roman have these two Books for sale.

SEEDS.—We are indebted to Hon. Cornelius Cole at Washington, for a collection of rare and valuable Seeds, for which we return thanks.

OUR NEW VOLUME.

With our next issue we shall present our *Number One* and of VOLUME THIRTY-TWO.

It is not our purpose to make any *new* profession of love and earnestness for the cause we have so long espoused. We feel confident that every honest-minded man in our State, will admit that we have been true and faithful to the cause of Agriculture and all its kindred interests, from the days of the Infancy of this interest to its now present Gigantic proportions, and great Value to our State.

We trust that for these long years of labor for the best and greatest interests of California, that we can ask of our Merchants, Manufacturers, Mechanics, as well as of all who are now engaged in any Agricultural department, their *Voluntary co-operation with* us; and we would now ask of all such to kindly give us their names, that we may enrole them upon our list of subscribers. We feel we deserve their voluntary aid, so we may do still more as we enter upon our New Volume.

We shall send copies of this number, and of our *Number One*, to many thousands of our prominent citizens and others, over this coast, and we hope such persons will work with us in this great and very important interest.

We think that all who have pleasant Homes and Garden spots, will find in the CALIFORNIA FARMER much that will aid them in their pleasant rural labors and adornments.

We return our sincere thanks and most grateful acknowledgments, to our many thousand subscribers, and our many liberal patrons, who are in our advertising columns, for their generous support, and hope we shall long have to record their success and the prosperity of our State, our Pacific Coast, and our Glorious Union.

CELEBRATION OF OUR INDEPENDENCE.

When we recall the early years when this important Festal Day was kept, and compare it with the late celebration in our city, we grow sick at the degeneracy of the times, or rather to the shameful disregard of the day that was manifested by the Procession that passed through our streets.

We consider that it was a desecration of the Holy name of Liberty, Freedom, and Independence, and an insult to the memory of Washington, and all the Patriot Fathers, and all those who fought, bled, and died to achieve the Independence we now enjoy.

In early years, and until recently, we have always seen Banners and Emblems, Figures and Trophies illustrative of the Glorious Spirit of Liberty, and Paintings of Washington and other Heroes, with mottos and dates, telling us of past, memorable times, and paying a loving tribute to the honored dead.

What did we behold in our city at the last Celebration? We think we are right when we say that throughout that long line of people, with their Waggons, Teams, and people, there was scarce a single Banner, Emblem or motto that would at all indicate that the Celebration was our Glorious Fourth of July.

The whole parade bespoke *trade and traffic*. "Vinegar Bitters," "Apothecarie's Wares," "Lager Beer," "Furniture," and all the signs and advertising cards of those who thus use the day as a means to turn it to account of *the almighty dollar*. It was virtually "*Bowing down to the Golden Calf*," and thus prostituting the day that should be as an offering of Gratitude and Thankfulness to *God* for the Blessings of our Civil and Religious Liberty, to a day when the people showed by their acts that they preferred to WORSHIP MAMMON.

When we remember the course adopted in the outset for the celebration of the day, *we* rather feel glad our Military were not in that *Show Bill Train*. We felt sick at the thought that the glorious day could be thus misused.

We are glad to know that if our city failed of a good Enjoyment in their outward display, there were many citizens that duly observed the day.

Oakland had a Grand Celebration, and they deserve great credit for their liberality on the occasion.

Sacramento, Stockton, Marysville, and other places observed the day wisely and well, and we hope another year, the errors of this year on such a day, may not only be forgotten, but wisely corrected.

NEW FLOWER VASES.

At the large Crockery Warehouse of Messrs Haynes & Lawton, on Sansome street, in our city, we were glad to see amid the large quantity of new and rich Dinner, Tea and Coffee Sets they are opening, (and they are rich and superb too, entirely new designs,) to see some very beautiful Flower Vases of the true, sensible style, and of patterns that will admit of arranging the flowers in a true, natural style.

It is, or should be known, that in the ordinary Flower Vase, that, where by the means of a narrow neck, the stems of the flowers are crowded compactly into the Vase; this not only bruises the tender stems, but prevents all the circulation of air around the foliage and the flowers, and thus hastening their decay.

Large, *open mouthed* Vases are always best for arranging flowers in the house. With such, Nature can be copied, and the green foliage and flowers so arranged as to look beautiful, like Nature, for true Nature is always beautiful; and in gathering flowers from the garden, they should be carefully cut off with a sharp knife, not broken; this causes earlier decay; have care not to immerse the stems too deeply in water; and as the water evaporates, *add to it, not change it.*

With the new and elegant Vases, now introduced by Messrs. Haynes & Lawton, our lovers of cut flowers can gratify their most refined tastes.

OUR HARVEST SEASON.

It is, we think, wholly unnecessary, with the universal testimony that comes from all quarters, to doubt but that we shall have the largest Grain Crop, by *twenty-five per cent*, that has yet been harvested in our State.

Even the Croakers say that the Smut and Rust had disappeared when the harvest came, and where small crops only was expected, a very good, general crop was had, and in many places a very Extraordinary yield will be had.

It is to be regretted that there is cause of complaint at the want of care shown by many harvesters to the manner of cleaning and sacking their grain; and unless this is attended to now, and promptly, and well too, farmers will find their grain will be *neglected by our shippers on account of its foul condition*.

We think too little attention has been paid to the *quality of seed planted*; and, also, planting the same seed over and over again on the same land. *A change of seed* is of the highest moment to our grain-growers, and a cent or two, or three cents, per pound, in the cost of seed, is a small item, when the result is often *twenty-five to fifty per cent*, greater yield, per acre. The present price of wheat should satisfy our grain growers, and we advise them to sell as rapidly as they can.

Hurry up, Farmers—you who live at the *head waters of Navigation*—now is your time, and before the rivers fall and shut you in. One and a half cents now is better than one and three-fourths next spring; and the prospect is, that we are now at high water prices.

Shipping grain in bags will always prove the *best and cheapest plan* for California and this, we have always said, "We never had any faith in the "Grain Elevator," and so said at first; and many weeks since we said it would "cost more than it came to," and so it will prove; and those who travel through Vallejo, in coming years, will look on that ungainly building, at Vallejo, called the Grain Elevator, and as they learn its *unfitness* for the purpose for which it was intended, they will point to it, saying, See "Speculator's Folly.

The subject of raising Flax and Hemp here, has awakened attention, and a large area has been planted both here in California, and also in Oregon, the present year, and this crop will be very largely increased the next year, as the Cotton Mills, at Clinton, have been changed to the manufacture of Bagging, and greatly enlarged expressly for that purpose. Grain Bags, by the million, will be made annually, and furnished as low as six and a half to seven and a half cents each; and as grain must be put into bags in the field, and then brought to market, *it will cost very much less to ship grain in Bags* than *in Bulk*; besides, in Europe, and in New York, and in other ports, Bags are returned to the shipper; and frequently the value of the bags, so returned, give the shipper quite a little per cent profit. So with these *facts*—we think the grain growers will give the "go by" to the Grain Elevator.

From information received from the interior, we learn that the Sacramento, Feather, San Joaquin, and Tuoleme Rivers are rapidly falling. It is to be hoped that our farmers will hurry up their grain and send it down to market quickly, and then float easily into the harbor of their prosperity. See our Market rates in last page.

MISS ANNA E. DICKENSON.

This distinguished Lady made her Debut at Platt's Hall, on Monday evening last, to a very intelligent and very large audiance, and we think the Lady must have been highly gratified at the cordial and flattering reception given to her, for it was one of the best proofs that her course in life has met the approval of the wise and good of all classes.

Miss Dickenson delivered her second Lecture, last evening, to even a larger audiance, and a very select and enthusiastic gathering—one rarely accorded to a Lady.

Miss Dickenson has created quite an enthusiasm upon the public mind, which will give her an opportunity to labor long and accomplish great good.

The coming of this Lady now is very opportune. Her appearance, every word, look, and gesture seems electric, and makes a most favorable impression. Her subjects for discussion are well taken; her manner is graceful; her words are clearly and eloquently spoken. Such is her confidence in the truth and goodness of her own purpose in coming before the public, that she charms by her earnest eloquence, and convinces by the power of the Truths she utters.

No public Speaker has ever been received with a warmer welcome than has already been given to Miss Dickenson; and it is good for our people that she has come among us. Let all go and hear this most eloquent Lady.

We would most respectfully suggest that some means may be adopted, whereby this Lady could address the *Working Classes*, those who are not able to *pay a dollar*. It is that class that need to be enlightened, and Miss Dickenson can do this better than any other Lecturer.

SAMPLES OF GRAIN WANTED.

We are desirous of obtaining small sheaves of Wheat, Barley and Oats, from the different counties in this State. Small sheaves with straw some twelve to twenty inches long, and the sheaves of sizes convenient to the collector.

We also desire Samples of the *clean Grains*, in parcels of a pint each, and of all the varieties grown.

If growers will be so kind as to aid us in these collections and forward such to us by Express, carefully packed, we will cheerfully pay all charges and trouble to them, and gratefully reciprocate the favor in any way we can, freely.

We shall also be grateful to receive at the same time the grower's name and locality, and such other facts as may be convenient to send to us.

CALIFORNIA FARMER OFFICE,
320 Clay Street, (up stairs.)

FRUIT GROWERS' CONVENTION.

A very interesting meeting of the Fruit Growers and Fruit Dealers was held at the Hall of Messrs. Wakelee & Co., on Kearny street, on the 7th., for the purpose of forming an Organization for the protection and benefit of all interested. About forty persons attended the first meeting, and a good feeling prevailed.

S. W. Shaw, Esq., was called to the Chair, and E. D. Lewellen and W. H. Stevens, adpointed Secretaries.

Very interesting statements were made to the meeting, relative to the increasing value of the Fruit interests of our State, and the importance of making arrangements with the Pacific Railroad to send our Fruit East. Among the Speakers was E. W. Haskell, of Yuba Orchard, Mr. Rhodes and Mr. Robinson, of Alameda, Mr. Reed, of Yolo, Mr. Strong, of Sacramento, and Mr. Shaw, of Sonoma, and others.

A Committee was appointed to prepare a Constitution and Bye laws, who, at the afternoon Session, reported as follows:

The Committee upon Organization reported the following Preamble, Constitutions and Bye-laws, which, after discussion, were fully adopted, and are as follows:

CONSTITUTION.

WHEREAS, It is becoming more and more apparent from year to year, that the production of fruit in this State is, and will continue to be, greatly in excess of the demand of our limited home market, and that a fair compensation to fruit growers requires that new markets should, if possible, be made available; therefore, we, the fruit growers and dealers of California, for the protection of our interests, and the further successful development of our branch of Agriculture, form ourselves into a permanent Association, to be known as the

CALIFORNIA FRUIT FRUIT GROWERS' AND DEALERS' ASSOCIATION.

The Officers of the Association shall be a President, a Vice-President, Secretary and Treasurer, and fifteen Directors. The Directors shall be selected from the principle fruit districts of the State.

BY-LAWS.

ARTICLE I.

It shall be the duty of the President to preside at all the meetings of the Association. The President shall call a meeting upon the written request of five members of the Association.

ARTICLE II.

It shall be the duty of the Vice-President to preside at the meetings of the Association during the absence of the President, and perform the duties of the same.

ARTICLE III.

It shall be the duty of the Secretary to keep a full and complete record of the proceedings of the Association and of the Board of Directors at all their meetings, and perform such other duties as may be required of him by the Board of Directors.

ARTICLE IV.

It shall be the duty of the Treasurer to receive all monies and deposit the same as directed by the Board of Directors, and dis burse the same on orders drawn by the Secretary and countersigned by the President, and also shall give such bonds as required by the Directors.

ARTICLE V.

It shall be the duty of the Board of Directors to take charge of all property of the Association, to control and manage the affairs of the same. Five shall constitute a quorum for the transaction of business.

ARTICLE VI.

All contracts entered into by the Board of Directors and signed by the President and Secretary shall be binding upon the Association.

ARTICLE VII.

Any fruit grower or dealer may become a member of this Association by the payment of Five Dollars and the signing of the Constitution and By-Laws.

ARTICLE VIII.

The Annual Meetings of this Association shall be held in San Francisco, on the First Thursday in May of each year.

ARTICLE IX.

The Officers of this Association shall be elected by ballot at each Annual Meeting.

ARTICLE X.

Any change or alteration of these By-Laws may be made at any Annual Meeting, by a vote of two-thirds of the members present,

The following officers were then elected for the ensuing year:

President—S. W. Shaw.

Vice-Presidents—B. N. Bugbee and D. W. Grant.

Secretary—W. H. Stevens.

Treasurer—C. W. Weston.

Directors—H. Robinson and E. D. Lewellen, representing Alameda; L. A. Gould, Santa Clara; J. M. Thompson, Napa; R. B. Blewer, Yolo and Solano; A. P. Smith and W. R. Strong, Sacramento; J. M. B. Weatherwax, Eldorado; John Briggs, Yuba and Sutter; Mr. Rose, Los Angeles, E. W. Haskell, P. L. Webb, A. Lusk, and W. K. Cummings, San Francisco; Mr. West, San Joaquin.

Mr. Robinson offered the following Resolutions:

Resolved—That an organized effort be made by the fruit-growers here represented, to obtain such a reduction of the rates of freight now charged by the transcontinental railroad companies—through proper representations to said companies of the absolutely prohibitory rates now ruling—of the vast amount of freight immediately available to them in consequence of such a reduction of rates as shall enable the fruit grower to place his fruit in the Eastern markets at a reasonable profit to himself, and of the great future importance which this fruit trade with the East would assume if properly encouraged.

Resolved—That the production of fruit in this State is limited only by the want of a market, and that this fact, connected with the known rapid deterioration of orchards now going on in the State, renders the subject of the availability of Eastern markets to California fruit-growers one of great interest to the whole country.

Resolved—That we do not expect such a reduction in the price of freight as will enable us to place our fruit in market in competition with Eastern growers, but, owing to our peculiar circumstances such a reduction as will enable us to sell them, and thus greatly prolong the fruit season for the consumer.

The resolutions were adopted.

Col. Warren, Editor FARMER, announced the promised visit to California of Hon. Marshall P. Wilder, of Boston, Mr. Leroy, of France, and Mr. Rivers, of England; and read the letter of Mr. Wilder to the meeting; and offered the following Resolution, which was happily greeted and passed unanimously.

Resolved—That we the fruit growers of California hail with great satisfaction the announcement that the Hon. M. P. Wilder, the well known veteran Pomologist of our country and President of the American Pomological Society, and those other well known Pomologists of Europe—"Leroy" of France and "Rivers" of England—will visit California this Autumn. We desire to express our great satisfaction and that we will, when we learn the time of their coming, adopt suitable measures for their reception, so that we may do such distinguished men all suitable Honor and Respect.

A Committee was then appointed to visit Sacramento, and confer with the Directors of the Pacific Railroad, relative to the transmission of fruit over the line.

The meeting was one of interest, and was conducted with spirit and energy, and will be productive of great good to the Fruit Growing interest of our State.

DELINQUENT SUBSCRIBERS.

We last week received the following letter on the subject of Delinquent Subscribers, so apropos that we herewith give it, and hope it will do good. We return thanks to our prompt subscriber for his many favors, and hope to have him long with us.

June 25, 18[illegible]

Editor California Farmer:—

Well, I guess I'll write you a little note to say *like* your gentle hint to the "Delinquents." I don't see how any man can take a newspaper and not feel ready and willing, even glad to pay for it cheerfully and promptly, too. Now you know I have been a subscriber to the FARMER for the whole time you have published it—nearly [illegible] *years*—and if you will look over your Cash Book I think I never but once let the *year* run out before I *had* paid for the next; then I feel a pleasure in reading the FARMER, for I know the Editor must be a hard, toiling man to present us so much in every department, and this too, without that class of matter or advertisements which disgrace so many newspapers and endanger the morals of the families where they are found.

I feel, Mr. Editor, as a Parent, that we all should do what we can to encourage a Journal that has done so much for the *Good of this State*, and has long labored for its best interests.

I take pleasure in enclosing Ten Dollars and the names of my neighbors who, like myself, will do all we can for the FARMER, and you may write opposite my name, "Subscriber for Life," and you shall always have the *pay in advance, too*.

Wishing you every success and a long life, I am truly yours, B. S. W.

P. S.—I enclose an article I cut out of an Ohio paper, about *delinquent subscribers*, and I think they deserve all the writer says. B. S. W.

THE MAN WHO WON'T PAY THE PRINTER.—May he never be permitted to kiss a handsome woman.

May his boots leak, his gun hang fire and his fishing line break.

May his coffee be sweetened with flies, and his sauce seasoned with spiders.

May the famine stricken ghost of an editor haunt his slumbers.

May he be bored to death with boarding school misses practising the first lessons in music within the privilege of seeing his tormentors.

May a troupe of printer's devils, lean, lank and hungry, dog his heels each day; and a regiment of cats caterwaul his window each night.

A CARD.

To Advertisers!!

Our number One of our New Volume will be issued on the 22nd of this month.

We wish to call the special attention of all who wish to ADVERTISE, as we shall send out a large Extra Edition of our Journal, mailing copies [illegible] this Coast and to prominent business persons in Eastern States and Europe.

This opportunity will give Advertisers a chance to make known their business very widely on this Coast, besides our new term of Three Months [illegible] embrace the whole Fair Season over the State, a period when our Journal has a wide circulation, distributed at the Fairs by thousands.

Advertisers in the Eastern States should improve this period for their business, as it will be of particular benefit to them and accomplish more for them than they could obtain by any other mode of Advertising.

Address this Office early to secure space for the Season.

THE CALIFORNIA FARMER!

OUR THIRTY-SECOND VOLUME.

In the opening part of the next month we shall commence our THIRTY-SECOND VOLUME of the

"California Farmer."

A few numbers more and we begin the closing Volume of our SIXTEEN YEARS' LABORS with this Journal.

We do not feel that it is necessary we should come out with any new promises of what we shall do for the *Cause of Agriculture* and its kindred Sciences, for the past must speak for us; and those who can look back to the time when we launched our little bark, will now justly recognize what has been done to advance this great and important source of wealth to our State by this Journal during these long years.

One thing we do know, "We have done what we could," and we hope with our New Volume to enroll many New Voluntary Subscribers. For all such cooperation we shall ever be duly grateful.

We return our most sincere and heartfelt thanks to all our Patrons for their many kindnesses, and hope to continue to walk with them many years in the pleasant scenes of Rural Life and Rural occupations.

The Terms of the FARMER will remain the same—$5 per year, $3 for six months, (gold price,) and $1 extra when payments have been delayed; and these terms are unchangeable. A liberal allowance for clubs; when five copies are paid for, six copies will be furnished.

WARREN & CO., Editors and Publishers,
320 *Clay St.*, San Francisco.

TEN REASONS WHY EVERY FARMER AND STOCK-RAISER SHOULD TAKE THE "CALIFORNIA FARMER."

a. Every Farmer and Stock-raiser should be a reader of the Journal connected with the interests of his own profession in his own State.

d. Every such person should give his sanction and support, generously and voluntarily to a Journal that advances his own particular business in his own State.

f. Every such person is *benefited* by the publication of such a Journal, and is in justice bound to reciprocate such labors.

h. No person engaged in these employments can be without such a Journal without the loss of many times its cost annually.

b. The Farmer and the Stock-raiser will always be better advised of the markets, and that kind of information so important to his interests by constant access to a Home Journal.

b. The *California Farmer* has faithfully advocated the best interests of the Farmer and Stock-raiser for nearly sixteen years, and is the *only Agricultural Journal in California.*

k. The *California Farmer* contains the most important information relative to these interests in every branch of Agricultural science.

k. The *California Farmer* contains the announcement of all New Seeds, Grains, Grasses, etc., together with all New Implements that will advance the cause of the cultivators of the soil.

k. The *California Farmer* contains the arrival and introduction of all the best Stock of all kinds as soon as known, together with the full Market Reports of all the interests appertaining to Agriculture.

k. The *California Farmer* is now the *only paper* on the Pacific Coast that is continued by its *original Editor and proprietor*, commencing at the time this Journal commenced; and having been constant in its efforts for the good of these interests, deserves the cheerful patronage of all good men.

NEW

Russian, Turkish & Roman

BATH HOUSE.

Nos. 524 TO 528 PACIFIC STREET,

DR. ZEILE INFORMS THE PUBLIC THAT his New Bath House is now open for the accommodation of patrons. Neither pains nor expense have been spared to make this the best and most commodious establishment of the kind, either in Europe or America.

Convenient and separate apartments are afforded for the administration of bathing by Steam, by Hot Air, and by Plain or Medicinal Waters.

Trained and polite attendants will use their best efforts to give complete satisfaction.

DR. ZEILE has also attached to his bathing establishment a few handsomely furnished Suites of Rooms, where he will receive and entertain patients for treatment, who are not affected with any contagious or infectious disease. To secure this accommodation it will be always necessary for engagements to be made in advance of the arrival of the patient.

Open daily from 7 A. M. to 9 P. M. On Sundays from 7 A. M. to 2 P. M.

Home Miscellany.

[For the California Farmer.]

WILLIE.

BY BERTHA DAY.

I wait upon the hearts of love,
That bend unto me just above
My feeble reach, who are to come
And take me to that Heavenly Home.

When Angels gather round my bed,
And spread their wings above my head,
They hide my trusting heart from harms,
Folding me in their spirit arms.

Away from sin, away from mirth,
And all the crimes and woes of earth,
To live with them in worlds of bliss—
Then I'll forget the woes of this.

CHINA IN OUR KITCHENS.

In those days when the Boston stage-office was in Elm street, girls with blooming cheeks came from the pine woods of Maine, the breezy hills of New Hampshire, and the green valleys of Vermont, to do housework in the city. They arrived by stage over Charlestown Bridge, and beheld with wondering eyes the shipping in the harbor. Westward they saw the spires of Cambridge, while before them rose the city of Boston with its labyrinth of streets and lanes. Down through Union street galloped the horses, the people rushing to their doors and windows to witness the event of the day—the coming-in of the stages—and refreshing their eyes with the sight of health and beauty.

The stage-coach with six horses on the run was the highest ideal of progress. Society, at that period, moved only at the rate of nine miles an hour. Farmers from all "Down East," from the Canada line, and from the Berkshire hills, came in midwinter to Boston market, and there was an annual throng of red sleighs round Faneuil Hall. In those years there was no lack of children in the land, and M. D.'s and D. D.'s did not feel constrained to write tracts and deliver lectures to the women of America upon the baby question. Farmers had daughters by the half-score, who could spin, weave, knit, sew, milk, make butter and cheese, and who, by hard work from dawn to twilight, at the wheel and loom, could earn fifty cents a week.

Those who had a surplus of daughters were always on the lookout, when at market, for situations where a dollar a week and board could be earned by Jane and Mary; so, when the girls came whirling into the city in the stage, they knew where they were going, and what wages they were to receive; for it had all been settled by the prudent father.

Ah! there were capital chambermaids and cooks in those days, many of whom have bloomed into matrons during the lapse of years, and are now sitting in their parlors, vainly wishing that they could find girls as willing and capable to work for them as they had been for others, and sighing for those good old times when there was respect between employer and employed, and when respect and confidence often ripened into friendship and affection.

But the times are not as they were; neither are the servants. The farmers' daughters have disappeared; we ne'er shall look upon their like again. The new servants have come; we never looked upon their like before.

The change from the old to the new was like the coming on of an eclipse—like the transition from light to darkness. We know when the obscuration began, and many a vexed housekeeper would like to know when it will end. It began in that year when three men went up from Boston, and lounged along the banks of the Merrimack, at Pawtucket Falls, pretending to be fishing, but in reality speculating how they might dam the river. Their brains were full of wheels, and their thoughts were spinning down the current of time. They bought the waterfall, dug a canal, erected a row of brick buildings, filled them with machinery, scoured the country, gathered up the farmers' girls, gave them a chance to earn four dollars a week, and the result of it all is Lowell, Lawrence, Lewiston, and a score of manufacturing towns.

It is a mystery to know what becomes of all the pins, and equally a puzzle to know what has become of the farmers' daughters. They were in the factories, but nearly all of them have disappeared. Ireland is tending looms in mills as well as holding sway in our households.

"Do you know of any American girls doing housework in the city?"

I have put this question to several of my lady friends, and the invariable answer has been: "No; not one."

And yet there *are* some, as I have ascertained by inquiries at intelligence offices. Of house-servants in cities about one in a hundred are of American parentage. In the country and in suburban towns the percentage is larger; for the daughters of Cork and Killarney prefer the city to the country, while American girls, as a rule, are more willing to go where they can have fresh air, and where they will not be compelled to climb from basement to attic several times a day.

From some cause or combination of causes—the increase of wealth and consequent increase of luxury, hot-air furnaces, close rooms, warm bread, want of out-door exercise, and a following of fashion, American women are less able than in former years to do their own work, while, at the same time, there is vastly more to be done. There was a time when two girls were sufficient for a household of twelve; but in these days twelve servants are sometimes required for a household of two. It has come to pass, therefore, that Ireland is getting on bravely, not only at the ballot-box, but in our kitchens and chambers as well.

The supply of house-servants not being equal to the demand, the employed are able to dictate terms and take such liberties, that it is not definitely settled whether the woman who sits in the parlor or the lady who makes the beds is mistress of the establishment.

During the war, when fugitives from slavery flocked northward in search of employment, there was some prospect of relief for afflicted housekeepers; but, like birds of passage, our colored allies have nearly all flocked back to Southern climes. The mercury drops too near zero, and the winters are too dreary for their comfort, here.

It is apparent that, if we are to have our dinners cooked and beds made by other hands than those of our wives and daughters, we must look in some new direction for help. Thus far, most of our domestics have come from the other side of the Atlantic. Ireland has been emptying itself into America at an astonishing rate; but the supply is running short, and the prospect of liberal legislation has already had its effect on emigration. Wages have risen in Ireland as well as here; the lot of the peasant has improved—his future is brighter. Why then should he leave the greenest isle under the sun? Throughout Europe liberal ideas are gaining ground; the people are obtaining such influence as they never enjoyed before, under these circumstances there is more inducement for them to remain where they are. Land in the United States is dearer than it has been, while the cost of living has also increased greatly; and the prospect now is that there will be a gradual falling off in emigration from this time forward unless it is stimulated by unforeseen events.

The difficulty of obtaining good house-servants, united with false conceptions of the aim and end of life, has driven multitudes out of their own homes into boarding houses and hotels. A story both pathetic and amusing might be written concerning the trials and experiences of housekeepers, the mistakes of the cook, the tantrums, the sulks and saucy words of the chamber-girl, the petty pilfering and wholesale robberies by both, and their leaving at a minute's notice. Undoubtedly there there are two sides to all stories, and Bridget's is very doleful when rehearsed to sympathizing friends, for it is a story of the bad temper of mistresses, and the perfect slavery to which the servant is subjected.

On each side it is a tale of antagonisms rather than of good-will, and there is very little sympathy or esteem between employer and employed. Democratic ideas, universal suffrage, and a lack of servants, are just now in Bridget's favor. Having become mistress of the situation, she does not hesitate to make her power felt.

But it also happens just now that we are laying down a service-pipe to an immense reservoir brimming over with labor. The Chinese have already found their way to our Pacific coast. They are at work on the railroad, in mines, forests, fields, factories, and the kitchens and chambers of our friends in California. They are in Oregon, Montana, Nevada, and Idaho. When the Pacific Railroad is completed, they will be at Salt Lake City and Omaha, and in time will make their appearance in Chicago and Boston.

But Bridget and Patrick already comprehend the situation of affairs, and have declared war against the interloping Celestials. The possibility that Hop Kee and Woo Choo may be able to solve the servant-girl problem leads us to consider the qualifications of the Chinese, not only for general labor, but for household service.

The supply of labor in China is unlimited. We are to think of a territory not larger in area than the United States east of the Rocky Mountains, but containing a population of 400,000,000. One half of the people are only able to gain their daily bread. Two hundred millions in that country have faint hope of ever making any headway, and hence the readiness to seek their fortunes in foreign lands. They are at Singapore, where several hundred thousand have taken possession of the lower end of Malacca, and trade with vessels touching at that port. They are on all the islands of the Indian Archipelago. They swarm in the gold-fields of Australia; the Sandwich Islands will soon be in their hands, and they will supply San Francisco with sugar. They are to be found all the way from Chili to Oregon.

Nearly all those who are thus seeking their fortunes abroad are from Southern China, where a remarkable spirit of enterprise and adventure has been lately developed. Companies, like those established in London two and a half centuries ago for the settlement of North America, have been formed at Canton and San Francisco for the encouragement and protection of the Chinese emigrants. The one hundred thousand now in this country are but pioneers of the millions who will follow by and by.

It is evident that henceforth we are to look westward, as well as eastward, for laborers. We are accustomed to think of the Chinese as belonging to a degraded race, ignorant of civilized life, and unable to compete with the skilled labor of Europe. But we have this fact before us, that China as a nation makes the whole world her debtor.—We want her tea and silks, and can obtain them only by paying cash. We have also the fact that the Chinese have established themselves in the woolen mills of California, producing cloth which won a prize at the World's Fair.

It would not be strictly accurate to say that they have driven Patrick from the railroad and Bridget from the bed-chamber, for these worthies were not present in California when wanted; but Hop Kee and Woo Choo, being there, took up the shovel and broom, and having acquitted themselves to the satisfaction of their employers, will remain.

"But what sort of servants do they make?"

The question was put by our next door neighbor, whose Christian fortitude is sorely tried by what goes on in the kitchen, and what doesn't go on up stairs.

Let us look at the peculiarities of a Chinese servant. He is small in statue, has a solemn countenance, twinkling black eyes, retreating forehead, high cheek-bones, and broad, flat nose. He will never be hung for his beauty. He wears a blue cotton tunic reaching to the knees, large, flowing trousers, and thick-soled slippers turned up at the toe. All his hair is shaved off except a small portion upon the crown, which is braided into a cue reaching nearly to the floor. When about his work it is coiled upon the top of his head, but it would be a breach of politeness were he to appear before us with his pigtail thus arranged. It must be at full length, to show not only his respect for us, but for himself.

It would be strange indeed if all his habits of life commended themselves to us at first. He has been poor in his own land. Cleanliness is not set down there as being next to godliness; washing-days do not come regularly every Monday. But he is imitative and quick to learn. He is not an expert in pastry, but show him how to make one pie and he will make a dozen—a thousand if you wish—precisely like the pattern; with just as much dough for the crust, the same amount of spice to a grain, and with twelve holes and no more in the upper crust, if you made so many, to let the steam out, though he will have no idea of their use.

He works patiently, and will not stipulate for three evenings a week to visit friends. St. Patrick's day is not in his calendar. He wants only a week at New Year.

The Chinese are not disposed to be aggressors upon the rights of others, neither will they allow any infringement of their own. They wage no war, but, if treated unkindly, quietly go their own ways, seeking business somewhere else. "I no do for you, you no do for me. I go." And he is off at once. He fully understands what some Anglo-Saxons as yet have failed to comprehend, that the hiring of servants does not include the privilege to abuse them.

"But are they not a thievish set? Won't they steal all they can lay their hands on?" asks my excellent neighbor, whose napkins, towels, sheets, and pillow-cases have mysteriously disappeared, and the chamber-girl has no idea what has become of them. The sugar bucket gets low very often. The tea-caddy wants replenishing every week; and although there are only four in the family, a firkin of butter lasts, to use the words of the lady, "no time at all."

"I have my suspicions," she adds, "as to what becomes of a large portion of our groceries."

Having suspicions, though she does not declare them, it is perfectly natural that she should ask if the Chinese are not a thievish set. Upon this point we give the testimony of those who have employed them.

"I have had a Chinaman," says a gentleman of San Francisco, "nine years. When he came into my family he could not speak a work of English. He knew nothing about cooking. My wife went into the kitchen and showed him how to make a pudding and a pie, and after a few days' observation he mastered the mysteries of the culinary art, and has cooked to our satisfaction from that time to the present. He is faithful and honest. I would intrust every dollar of my property to him as soon as I would to one of my own countrymen."

Another gentleman gives this testimony:

"I have had a Chinese servant several years, and when I go into the country I leave my house in John's hands. He hides my silver plate and other valuables, and does not leave the premises a minute. When I return I find everything in perfect order. I do not think he ever took a dollar that did not belong to him, though he has had opportunities to do so. He purchases all my groceries, and invariably makes better bargains than I can myself. I would trust him quicker than I would many Americans in my employ."

The Rev. Mr. Nevius, ten years a missionary among the Chinese, thus speaks of their qualifications:

"It is the testimony of foreigners that the laboring classes make excellent servants. There are exceptions to this statement, some persons representing them as very inefficient and unreliable.—The probability may be inferred, in these cases, that the employers have been unfortunate either in the selection or management of those in their service. During our residence of ten years in China, we hardly ever had occasion to dismiss a servant; in nearly every case a strong attachment sprang up between them and us; and in more instances than one, I have felt personally grateful for services and attentions which I could not reasonably have required, and which were all the more gratifying because rendered spontaneously and heartily. The only thing which I recollect to have had stolen was an old clock, which was taken by an opium-smoker, and found a few days afterward. We had so little fear of theft that our doors and drawers were often left unlocked, and servants and numerous visitors had free access to every part of our house. I am aware that others, both missionaries and merchants, have had a different experience, and that, especially in the foreign communities, it is as dangerous to leave coats and umbrellas near the hall-door when unlocked as it would be in New York or Philadelphia. I have traveled hundreds of miles in the interior, at different times and in different parts of the country, sometimes entirely alone, and have been completely in the power of perfect strangers, who knew that I had about my person money and other articles of value, but have always felt nearly as great a sense of security as at home, and have hardly ever been treated with rudeness or violence, although I have been often annoyed beyond measure by exorbitant charges and useless detentions. I have heard the testimony of prominent merchants who have had large business transactions with the Chinese, both in China and California, who have represented Chinese business men as very prompt and reliable in meeting their business engagements. The confidence often placed in Chinese agents is seen in the fact that they are sent into the interior with large sums of money to purchase silks and tea, the persons employing them having no guarantee or dependence but that of their personal honesty. I have known genuine 'one-priced stores' in China where you are sure to obtain a good article at a reasonable price. There are also false 'one-priced stores,' and it is not safe to trust them from simply looking at the sign.

I may say further, that I have met with some of the most beautiful instances of affection, attachment, and gratitude in China which I have ever known; and that it has been my privilege to form the acquaintance of not a few Chinese, whom I regard with more than ordinary affection and respect, on account of the natural amiability of their dispositions, their sterling integrity, and thorough Christian principle and devotion."

We are not from this testimony and high praise to conclude that there are no thieves in China, or that all Chinamen will make good servants; but from diligent inquiry, at Canton, Shanghae, Hankeoo, and San Francisco, of men who are best acquainted with Chinese character and morals, I believe that there is not so much crime in that empire in proportion to the number of the population as in the United States. This may be a startling admission, certainly it is an humiliating one. I am assured by American traders in Canton and Shanghae, that there are no men in the world who have higher commercial integrity than the great Chinese merchants. "I know," said a gentleman at Shanghae, "men who are worth fifty million dollars, and I believe they would lose every cent of it rather than break their word."

It is not pleasant to contrast this scrupulousness with operations in Erie Railroad stock in Wall street, or with daily transactions in gold and bonds, in the great commercial centres of this country. The time may come when we shall revise our opinion of the Chinese, and instead of setting them down as a nation of "thieves and liars," shall arrive at a truer estimate of their character.

It will probably be some time before Chinamen will make their appearance in our Atlantic cities. Those who take up their abode in California do not intend to make it a permanent home. Wife and children are left behind, and emigrants hope to go back after having accumulated a few hundred dollars. As yet the Chinese know little about us, and what knowledge they have is not altogether to our credit. They think of America as a country abounding in gold, where provisions are plenty and where high prices are paid for labor; but those who have been here have harrowing tales to tell of the state of morals. We are a nation of thieves, swindlers, and murderers. In our railroad stations, in public halls, in cabins of steamboats, there are placards cautioning the people to beware of pickpockets. The newspapers are filled with accounts of murders, poisonings and robberies. In the largest city of the country twenty-two hundred policemen, armed with clubs and revolvers, are required to look after the ruffians, and, notwithstanding their vigilance eighty thousand crimes are committed during the year. Forty jails are filled with criminals, to say nothing of the large number daily sent to the houses of correction and the penitentiaries. If there is so much crime in one city, what must the aggregate be throughout the country?

Chinese who are in comfortable circumstances will not leave their homes to trust their lives in a country where boys pelt them with stones, where rude men kick them from the sidewalk into the gutter, where they are plundered without finding redress in the courts, and maltreated not only by any ruffian upon the street, but outlawed by the State itself, as in California and Oregon.

It is only the lowest class of Chinese that have thus far reached our shores as servants and laborers; but let these receive kind treatment, let them have the same protection for life and property which is given to all others, and in time a different class will make their appearance. It would be comparatively an easy matter to obtain Chinese labor through the societies already established at San Francisco and Canton. These are not emigration companies, but mutual-aid societies, and they might be used for conveying information to the millions in China concerning the field open here to laborers of every description, but especially to house servants. Although the Chinamen cannot speak a word of our language when they arrive, in a few days they master enough to understand what we want.

It is to be hoped that, as the Pacific Railroad is now completed, the experiment of bringing to this side of the continent some of the Chinamen now employed as house servants in California will be tried. If they prove to be as good as they have been represented, housekeepers may regain their lost liberty.—*Atlantic Monthly.*

THE YOUNG WIFE.

It takes a hero to be economical, says Miss Mulock. "For, will she not rather run in debt for a bonnet than wear her old one a year behind the mode? Give a ball and stint the family dinner for a month after? Take a large house, and furnish handsome reception rooms, while her household huddle together anyhow in united attic bed chambers, and her servants shelter on shake-downs beside the kitchen fire? She prefers this a hundred times, to starting plainly by word or manner,—"My income is so much a year—I don't care who knows it—it will not allow me to live beyond a certain rate; it will not keep comfortable my family and acquaintance; therefore, excuse my preferring the comfort of my family to the entertainment of my acquaintance. And, society if you choose to look in upon us, you must take us as we are, without any pretenses of any kind, or you may shut the door, and—good-bye?"—*Randolph Plaindealer.*

OUR

HOME INTERESTS.

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact and the probability that unless checked this large sum of money will be increased each year until in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, to be sent East for investment in the purchase of Life Insurance, instead of being retained at homes to promote and foster its INVESTMENT HERE the commercial, mechanical, and agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States of the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION, *whose capital and assets will not be impaired or importantly affected by the change in values that will sooner or later occur by a return to specie payments in the other States of the Union.* Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to the citizen of this State, who feel an interest in its progress, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

Miscellany.

WANTS.

Many people, says the "Fat Contributor," are in perpetual fear that they will "come to want;" and when is there a time in any one's life that he don't want something? Some want one thing and some another. The baby wants to stick his thumb in his eye, kick over the teapot and wants his three meals a day. The little boy wants a top, a rocking-horse, and a licking at regular intervals. The little girl wants a doll, and wants to play out doors with the boys. A little older, the girl wants a beau, and the boy wants a bow-an-arrer. The young lady wants a piano and a Grecian bend, invitations to the opera, and the exclusive use of the front parlor Sunday nights. The young man wants a fast horse, a diamond pin, credit at the tailors, a moustache, gin cocktails, and no words from the "old man." Mature matron wants a select circle of society, carriage with a liveried driver, the best pew in church, president of some fashionable benevolent society, wealthy matches for her daughters, and no foolishness. Masculine maturity wants safe investments, credit at the bank, few friends, plain clothes, daily paper, an eleven o'clock "tod," prompt dinner, slippers, and a "nightcap." Old age wants to keep up a pretense of being young sometimes, but generally wants only a quiet place to die in.

There are millions of wants on this earth, without considering whether or not the other planets are inhabited. A vast multitude want "situations," while another horde, finding themselves in a "bad situation," want to get out of it. One woman wants a new bonnet, another wants a divorce. Grant wants "peace," and Mrs. Dr. Walker wants a Government office. Thousands want lodging at night, and other thousands want a drink in the morning. Thirsty loafer knocks at a saloon door at 5 A. M.; he wants to get in. Captured covey in jail; he wants to get out. Some want glory, and enlist at thirteen dollars a month to get it; some want hair on the top of the head; some want a leg or an eye; thousands want to get married; a few want to die; many want to join a club, *and all want money.*

A Novel Check upon Street Railroad Conductors Proposed.—The various street railways in Cincinnati are about to adopt a rather novel plan to act as a check upon their conductors, some of whom, they claim, do not make full returns, and which has been suggested to the managers of the roads by a well known citizen who has had considerable experience in railroading. The plan is to place in the hands of the conductors packages of small car tickets, with a corresponding number on each end, to be torn in two in the middle, which the conductor is compelled to distribute among the passengers who pay their six cents fare. The ticket, when the passenger pays his fare, is torn in two, he retaining one half with a number upon it, the conductor depositing the other in a box. The gist of the matter is that the proprietor of the plan suggests that at the close of each week the half tickets in the hands of the company shall be put in a box and one ticket drawn out, and the passenger holding the other half ticket with the corresponding number shall be entitled to fifty dollars, to be paid by the company. The projector claims that the companies can afford to pay this sum every week, as they will save thousands of dollars in adopting this plan.

Carolina Newspaporial.—There has been a new use found for old newspapers. They are now made over into paper petticoats, which are coming into general use in London. The mind shrinks from the contemplation of what would necessarily happen to the wearers should they be accidentally caught in a rain storm.

—Manchester, N. H. has a schoolmaster who is a notorious punster. At the late teachers' institute, when a call was made for a name for New Hampshire boys, "Granites" was suggested. "Yes" said the wit, "the boys are granite and the girls are primx."

—At a social meeting of negroes in Baltimore, a few days ago, the following toast was offered:—"Our wives and daughters—may the women of our race never unsex themselves by becoming strong minded."

ECONOMY WASHING MACHINE!

A new lot of the above named Machines, including all the latest Improvements, are now ready for sale and can be sent to any part of the State.

Sixty one (91) Machines are now in use in this County Township, where they were Invented, and still Manufactured.

Price of Machine, ... $25.

Letters directed to JONE M. HORNER, Mission, San Jose, Alameda County, will receive prompt attention.

20,000 NEWSPAPERS.

We Have Twenty Thousand Newspapers—Newspapers of the largest size among our Exchanges, suitable for Wrapping Paper for Dry Goods, Clothing, etc.

FARMER OFFICE.

New Advertisements.

GYPSUM. (Sulphate of Lime.)

This well known but most wonderful fertilizer has not yet been practically introduced into the Agricultural interests or before the minds of our California cultivators, for the reason that there was no supply, and because it was hard to make them believe our lands needed manuring.

The time, however, has arrived when, by the admitted fact of the deterioration of our soil and the lessening of crops, something must be done to restore the soil and bring it into that state of fertility necessary to make it profitable to cultivate the soil.

Gypsum is a compound of Sulphuric Acid and Lime, and the object of this fertilizer is the fixing of Ammonia, thus making it the direct food of plants, either by supplying the Sulphate of Lime or by its decomposition, affording the Sulphur so necessary to the due development of certain plants.

Sprengel's Analyses shows the quantity of Lime and Magnesia, Sulphuric and Phosphoric Acids to be very large in the following plants, and for these this fertilizer has no superior:

Wheat, Barley, Oats, Potatoes, Cabbage, Swedish Turnips, Clover, Beets, Turnips, and root crops generally; thus ensuring to a certainty its great importance to the Farmers.

Liebig's Natural Laws of Husbandry gives conclusive proofs of its superiority as a fertilizer on Clover and Grasses, furnishing details of experiments made by distinguished men in various parts of Europe.

According to the experiments made by Buckholtz, Gypsum is composed of *thirty-three* parts of Lime, *forty-three* of Sulphuric Acid, and *twenty-four* of the water of crystalization.

Gypsum is often called Plaster of Paris, but this is wrong—it only takes that name and character when it has been deprived of its water of crystalizates by fire; there it becomes *Calcined Gypsum* or Plaster.

Gypsum for Dry Countries like California, will prove immensely valuable, as when used as a fertilizer in our hot and dry soil, its waters of crystalization are seperated by means of our hot climate and go at once to benefit the plants, while the Acids and Sulphate of Lime is taken up by the soil, enriching it to a very great degree.

The undersigned is now prepared to furnish this valuable fertilizer by the quantity to all who desire to try its well attested virtues.

CHAS. J. JANSON,
222 BATTERY STREET.

To Hay-Makers!

The Great Stacking Fork.

We offer to the Hay-Makers of the Pacific Coast, the Celebrated

HARPOON HAY STACKING FORK

One of the best inventions of the age. With this Fork, A Great Saving of Time, Strength, Labor and Expense is made, as it is indeed a very valuable and important implement, both to Hay Makers and Grain Growers. This machine is used to load and unload Hay or Grain Waggons to Barn or Stacks, and is very extensively used at the East.

We have received a few of these Implements which can be seen at our Office. Having more on the way, we are prepared to take orders for them in quantities to suit the trade, as we have the Agency for the sale of them for the Pacific Coast.

Sample Implements, and all Particulars at our Office.

WARREN & CO.,
"Farmer Office," 320 Clay Street, up stairs.

CAST-STEEL DAIRY KNIVES

We have received Invoices of the Celebrated

Cast-Steel Dairy Knives,

Manufactured by D. G. Young of New York. We have them of all sizes, from those of FOUR BLADES to cut FIFTEEN INCHES, up to THIRTEEN BLADES to cut TWENTY INCHES.

These Knives are of very great advantage to Dairymen, and are worthy their attention.

For sale by WARREN & CO.,
"Farmer Office," 321 Clay Street, up stairs.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facie* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

Miscellaneous.

A PRINCELY RESIDENCE IN THE COUNTRY FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the Farmer. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L. AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE, works free from Comb, or Gum;

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H. & L.

Is on the red cover of the package

Depot, 320 Jackson Street,

THOMAS H. DOUGLAS,
Storekeeper and Wharfinger.
Or to I. FRIEDLANDER,
112 California street.

Railroad Lands.

Central Pacific Railroad,
Land Department.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer on the wharf or landing places.

(Corrected Weekly, by EDITOR FARMER.)

SAN FRANCISCO, July 15.

The Grain Market—What is the condition now?

Two weeks has not made much change in our Market for Breadstuffs. It is reported that the Liverpool market is firmer, but the trifling advance of a *few pennies* on the cental will not affect our market, only as it may not cause a heavy decline.

Now that harvesting is well advanced that our grain growers can begin to market their grain, it is to be hoped that they will remember *last year*, and now that wheat commands a grand paying price, they will not forget that "a bird in the hand is worth two in the bush," and that as we have urged them in our editorial columns, to *Realize* as early as it is possible for them to get their grain to market, they will do so.

The grower must bear in mind that $1 50 the cental now is better than $1 75 a few months hence, for their cash put to interest is increasing, whereas their grain would be adding to its cost by storage, waste, insurance, etc.

By reports in all the Eastern States, large crops will be harvested, and there is no prospect of a better market—nothing indicates a better time than now; besides it is a well known fact that the grain shippers of the last year lost *hundreds of thousands of dollars*. This, therefore, is a clear proof that it "did not pay" to ship at high prices, and they will not do so this year.

California Wool received a check in the Eastern market, by reason of its poor condition, as was well explained by the Messrs. McLennan, Whelan & Grisar, in their Circular, published by us recently. We hope their counsel will be heeded in the future.

Potatoes, Beans, Corn, and root crops are all promising well. The lower portion of our State is waking up to a better action in relation to a general crop.

Flax, Hemp, Castor Beans, and other new crops look well.

For the specific articles in our markets they will always be noted under their several heads.

Retail Prices in the Vegetable Market.

(Brown & Arnold.)

Vegetable Food.—This is the food for health, and any person going to market in our city would surely think that we in California should be a healthy people, for never was a *grander show* of these healthy eatables than in our markets.

We hope all new comers will get up early in the morning and walk through Sansome street about six or seven o'clock and see what we grow in this *hot* and dry climate, and then write home to the East the simple truth of our abundance here. See below for prices.

FISH

(Tessmore and Mayes.)

The Fish Market of our city is always good—nay, excellent—for we have all the choice things in this department that tickles the epicure's palate. Our new comers from the East are so delighted with our *Salmon* and Lake Tahoe *Trout*, and our other delicious Fish that, like the student's brother at the college, who did not have so *good living at home*, said he often had eaten for yesterday and the day before, he would eat for tomorrow and next day too, as it was so nice; so, when the *Members of the Press* who have been with us from the East shall go back and report us, we hope they will not forget to do justice to our *Markets*, as well as every thing else.

Tessmore & Mays of California Market, are always ready with the choicest that swims in the golden sanded waters of California.

POULTRY AND GAME.

Poultry and Game.—This department is well supplied, although Spring Chickens bring good prices as an extra delicate dish.

Our old and well known Poultry King—Louderback—will always have a good stock and the best, and what he tells his customers, "is just so." Louderback always remembers the poor at the Holidays and is liberal, and the *rich* that want a *good* Poultry or a Game *dinner* always go to Louderbeck's stall for it.

DAIRY—BUTTER, CHEESE, EGGS ETC.

(M. B. French & Co.)

Our Dairies—These are now to be considerably affected by *Eastern* Butter, which will now come to us in large quantities over the Pacific Railroad. *One Thousand Firkins* came recently in *ten days* from New York, and came in good condition and was eagerly sought for at good prices. It will be remembered that we have all along urged our dairymen to sell their butter when it 60 to 75 cents rather than to pack it down; for it is clearly evident now, that with the Railroad giving us only ten days to the markets of the East, Butter and Eggs will no longer command the old high rates of former days.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive another than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered. and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take neither Vermifuge or Liver Pills, unless you are sure u are getting the genuine McLANE'S, prepared by

FLEMING BROTHRS, PITTSBURG, PA.

DR. M. LANE'S
CELEBRATED LIVER PILLS,

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER and BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physician, requires that some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual That such is the true character of DR McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use will, we think, be sufficient to convince the most incredulous. It has been our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effect.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the powers of the Stomach, Bowels, Brain, and the whole Nervous System should be vast and vital importance to human health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has so close a connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character, that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal atrocity, or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Menses, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three-fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. M. AS LIVER PILLS in cases of AGUE AND FEVER, when taken with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after taking Quining. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow their use.—The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are inferior to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach.

DR. M'LANE'S
American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult, the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous train of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, judicious in other respects, but which entirely fails in consequence of worms being overlooked. And even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed, and with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure semi-circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip, occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or furred tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a gnawing sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently tinged with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual "providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause." In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water every morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten, give a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: DR McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by
FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

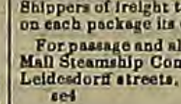
The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills, or of Vermifuge on receipt of forty cents in Government Stamps.

Traveling.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS



Leave Wharf corner First and B streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting via Panama Railroad, with the Company's splendid steamers from Aspinwall for New

On the 6th, 14th 22d and 30th of each month

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans Atlantic Comp.'s steamer for Aspinwall, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with the steamer for Southhampton Australia and South America. P. M. S. S. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched as above given below:

STEAMERS FOR JULY

The following Steamships will be dispatched on dates as given below.

July 9—GOLDEN CITY, Capt. Wm. F. Lapham, connecting with ALASKA, Capt. Gray.

July 17—MONTANA, Capt. E. S. Farrarwood, connecting with HENRY CHAUNCY, Capt. Conner.

July 30—COLORADO, Capt. W. H. Parker, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked to 100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board at 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be made orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—If desired amount of £10 to £20 will be advanced with the orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship OREGONIAN, Capt. H. C. Cousins will be dispatched for YOKOHAMA and HONGKONG Wednesday, August 4th, at noon, connecting at Yokohama with the steamer NEW YORK, for SHANGHAI. Shippers of freight to China or Japan are requested to mark on each package its destination.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sansome and Leidesdorff streets.
